MASTER OF BUSINESS ADMINISTRATION (MBA)

The purpose of the Master of Business Administration program is to offer students an opportunity to acquire proficiency in general business management and decision making skills which will enable them to carry out managerial responsibilities in both the private and public sectors. As a result of successfully completing the MBA program, graduates should improve their ability to apply strong problem-solving skills to the strategic planning process in organizations and to use written and verbal communication skills effectively to communicate the results of their problem-solving analyses and recommendations. Concentrations offered in accounting and information systems provide additional specialized study related to the strategic management process in organizations.

MASTER OF SCIENCE IN MANAGEMENT (MSM)

The purpose of the Master of Science in Management program is to provide a specialized professional program for the student who wants to acquire proficiency in management skills, including decision making, which will enable the graduate to carry out responsibilities in both general and specialized managerial roles. PREREQUISITE REQUIREMENTS

Candidates for admission must have a baccalaureate degree in any subject area from a regionally accredited college or university. The MSM degree program requires no prerequisite courses; however, MGT 6601, Advanced Concepts and Topics in Management, must be taken for graduate credit if the student does not have an undergraduate major in business. If the student has an undergraduate major in business, an elective course will be substituted.
