ACCOUNTING COURSES (ACT)

ACT 2291  Principles of Accounting I (3)
Modern financial accounting theory and practices applied to sole proprietorships, partnerships, and corporations.
Prerequisite: ACT 2292.

ACT 2292  Principles of Accounting II (3)
Modern financial and managerial accounting theory and practices applied to an organization’s liabilities, cash flows, planning, budgeting, and control.
Prerequisite: ACT 2291.

ACT 3355  Internal Auditing (3)
Internal auditing theory as contained in official pronouncements (IASC, COSO, COBIT, Sarbanes-Oxley). Emphasis will be placed on material required for the CPA exam as it relates to professional ethics, audit engagement procedures, internal control, audit sampling, evidence gathering and auditor’s reports.
Prerequisites: ACT 2292.

ACT 3357  Financial Reporting & Analysis I (3)
Study of financial accounting concepts and principles related to financial reporting emphasizing income measurement and accounting for assets. Accounting majors must complete this course with a grade of C or better.
Prerequisites: ACT 2292.

ACT 3358  Financial Reporting & Analysis II (3)
Study of accounting concepts and principles related to financial reporting of long-term debt, owners’ equity and other special items. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 3357.

ACT 3360  Entrepreneurial Accounting (3)
This course covers small business accounting basics that assist business owners in making business decisions based on accounting information. It emphasizes the triple bottom line reporting that refers to reporting on a company’s economic, social, and environmental performance.
Prerequisite: ACT 2292, MGT 4475.

ACT 3365  Corporate Financial Reporting (3)
An analysis of the financial reporting issues faced by managers, including preparing, understanding, and analyzing financial reports.
Prerequisites: ACT 2292.

ACT 3391  Intermediate Accounting I (3)
Theory and applications of assets, liabilities, and owners’ equity, revenues, expenses, and analytical process. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 2292.

ACT 3392  Intermediate Accounting II (3)
Theory and applications of assets, liabilities, and owners’ equity, pensions, leases, earnings per share, and analytical process. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 3391.

ACT 3394  Governmental Accounting (3)
Analysis of governmental and not-for-profit accounting issues including the preparation and use of budgets, records and statements. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 2292.

ACT 3395  Managerial/Cost Accounting I (3)
An analysis of issues dealing with cost accounting and cost management in the global economy from the viewpoint of management, including calculating product costs and period expenses, cost systems for accumulating and managing costs, analyzing cost behavior for tactical decisions, introduction to activity-based costing, ethical principles for management accountants, measuring the costs of quality, and preparing the master budget. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 2292.

ACT 3396  Accounting Information Systems (3)
Principles underlying establishment of complete accounting systems; applications to typical business organization; emphasis on the functions of control and protection. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 2292.

ACT 4435  Accounting in a Global Environment and Analytical Perspective (3)
This course focuses on issues related to accounting, reporting of financial information and data analysis for a global enterprise. The course will address topics such as: accounting standards and frameworks associated with financial reporting, legal systems, taxation systems, currency transactions/translation and the impact of culture in a global business environment. Students will use data analytical tools through hands-on applications to analyze business data and assess international organization operations. Accounting majors must complete this course with a grade of “C” or better.
Prerequisite: ACT 2292.

ACT 4450  Auditing Concepts (3)
Study of auditing concepts related to professional ethics, audit engagement, internal control, audit sampling, evidence gathering and auditors’ reports. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 3358. Prerequisite or Co-requisite: ACT 3355.

ACT 4451  Introduction of Taxation (3)
Study of federal tax laws and regulations for individuals and business entities, with an emphasis on components of income, exclusions, allowable expenses, losses and owner distributions. Tax implications of property transactions to both individuals and business entities, and choice of business entity will be introduced. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 2292.

ACT 4480  Professional Development—Public Accounting (1)
Examination of professional and pre-professional requirements for entry into the public accounting profession. Accounting majors must complete this course with a grade of C or better.
Prerequisite: ACT 3391, ACT 3392, ACT 3394, ACT 3396, ACT 4494. Prerequisites or Co-requisites: ACT 3395, ACT 4491, ACT 4495, ACT 4497.

ACT 4481  Professional Development—Forensic Accounting (1)
Analysis of current developments and requirements...
for entry into the forensic accounting profession. Accounting majors must complete this course with a grade of C or better.

Prerequisites: ACT 3358, ACT 3394, ACT 3396, ACT 4451, LAW 4425, ACT 4450.

ACT 4498 Fraud Examination II (3)
Auditing theory and procedures as applied to fraud prevention, detection and investigation. Accounting majors must complete this course with a grade of C or better.

Prerequisite: ACT 4485.

ACT 4499 Accounting Internship (1 to 3 credit hours per course per semester)
Internship in local, regional or national firm. Requires junior or senior standing and individual approval for the internship program. See “Internship Program” for additional requirements. Accounting majors must complete this course with a grade of C or better.

Prerequisite: ACT 3392.

ADULT EDUCATION (ADE)

ADE 3301 Education Leadership and Motivation in Adult Learning (3)
In this course, you will learn how to create a shared vision for your team and effectively communicate it to your teammates. You will also learn how to set effective goals and expectations in a way that best enables your team to attain the shared vision. Finally, you will understand the most important needs and drivers of performance across cultures, and will learn to align rewards with desired behaviors so that your teammates are motivated to attain the team’s objectives. This course will help you diagnose and solve motivation problems so that you can bring out the best in your people.

ADE 3305 Teaching Adults with Technology (3)
Instructional technology is becoming increasingly an important part of adult learner education. Adult learners need to utilize current and emerging technologies to perform required career duties and succeed as professionals in the workforce. Technology enhances the learning of adults, improves their motivation, and engages them in various activities. It also increases accessibility to individualized learning, and improves communication with coworkers and supervisors. This course focuses on the ideas and skills to integrate technology efficiently into curriculum and its utilization for effective teaching.

Prerequisite: ADE 3301

ADE 3310 Teaching Adult Learners (3)
This course features practical strategies and instructional techniques for teaching adult learners. Topics include characteristics of adult learners, adult learning/teaching styles, overcoming resistance to learning, promoting self-learning in adults, and dealing with diversity in the adult learning environment.

Prerequisite: ADE 3301

ADE 3320 Assessing Adult Learners (3)
This course is designed to assist participants with the development of knowledge and skills that can be applied to successful student outcomes assessment. Specifically, this course is an introduction to various methods that measure students’ knowledge and skills. Emphasis is placed on constructing and validating various types of measurement instruments and performance assessments including their validity and reliability.

Prerequisite: ADE 3301

ADE 3346 Educational Psychology in Adult Learning (3)
This course is a study of the distinctive characteristics of adult development and their interaction with the cognitive, social, and
psychological characteristics of adult learning. Emphasis will be given to understanding the nature of adult learners and their learning processes, principles of motivation and effective facilitation geared toward adult learners, and social and cultural influences on adult learning. Prerequisite: ADE 3301

ADE 4400 Classroom Management in Adult Learning (3)
This course will provide an introduction to managing various instructional environments including how to create a safe learning environment, design classroom and laboratory procedures, and develop an effective classroom management plan. Instruction also includes how to implement organizational systems to manage work-based learning experiences, student records, learning experiences, supplies, equipment, tools, finances, and facilities. Prerequisite: ADE 3301

ADE 4401 Problem Solving and Decision Making (3)
This course explores the application of effective problem solving and decision making strategies in the workplace. It examines involvement of stakeholders in decision processes, models for decision making, decision trees, risk analysis, and issues associated with implementation of decisions. Prerequisite: ADE 3301

ADE 4410 Professional Education Communication (Student Counseling) (3)
This course is designed to develop communication skills required for effective occupational educators working with adults in a variety of postsecondary, workforce development, and military education settings. The course focuses on information and the communication process. Emphasis will be placed on verbal, non-verbal, interpersonal, and written communication. Special attention will be given to working with diverse populations. Prerequisite: ADE 3301

ADE 4420 History and Development of the Workforce (3)
This course is a study of the origins of adult career education and training in the United States. Students will learn about the pioneers in this field who built the theoretical concepts over time. Those concepts are examined through the lenses of:

- Time and changes in the workplace during the agrarian and craftsman period, early industrialization, the post industrialization period, to current service and technology industries;
- The impact of world events, and the influence of government legislation; and
- The influence of women, minorities, and special needs employees in the workplace.

The course will provide the student a greater appreciation of the breadth and complexity of adult education by focusing on an area often overlooked—Career and Technical Education. Prerequisite: ADE 3301

ADJ 2220 Principles of Advertising (3)
An introduction to the principles and background of advertising, advertising campaigns and the different types of advertising. Special emphasis is given to social, legal, planning, and creative aspects.

ADJ 3320 Prehistory of North American Indians (3)
An examination of the aboriginal cultures of North American prior to the period of European contact based upon archaeological evidence.

ANT 2200 Anthropology (3)
An examination of human, physical and cultural development using evidence from archaeology, paleontology, genetics, ecology, cultural anthropology and linguistics with emphasis on the historical, structural and symbolic aspects of human culture.

ANT 3305 Introduction to Archaeology (3)
An examination of the methods and theory of traditional and contemporary approaches to archaeological research.

ANT 3310 Cultural Anthropology (3)
An anthropological examination of human cultural development and a survey of both contemporary and past human cultures. May be taken for sociology credit.

ANT 3311 Physical Anthropology (3)
An examination of human biological development from the beginning of mankind through the Pleistocene age using evidence from archaeology, paleontology, biology, genetics and osteology.

ANT 3312 Field Techniques in Archaeology (3-6-9 hours)
Instruction in survey and excavation methods and techniques used in the discipline of archaeology.

ANT 3313 Laboratory Techniques in Archaeology (3)
Instruction in the methods and techniques used in the curation and analysis of cultural materials recovered from archaeological investigations.

ANT 3315 The Anthropology of Kinship and Social Structure (3-6)
Students will be introduced to the basic concepts and major issues in kinship studies, including gender, marriage, social relationships, and descent from a cross-cultural perspective. The course will explore different theoretical approaches to understanding the importance of global kinship practices, variations in kinship practices and gender systems around the world, and the relevance of kinship systems today as new reproductive technologies challenge our traditional ideas on kinship.

ANT 3321 North American Indians Since Contact (3)
An examination of aboriginal cultures of North America from the period of European exploration, colonization, and settlement to the present using
archaeological, ethnographic, and ethnological studies.

ANT 3324 Food and Culture (3)
This course will explore the historical foundations of food production. Students will critically examine the current system of food production, and specifically how differential production and access to food have created disparities in health and nutrition. The course will also include an exploration of the Food Justice movement and how it is working to restructure and transform our current system of production.

ANT 3328 Environmental Archaeology
This course explores past environments and the methods and evidence used to reconstruct them. Emphasis is placed on the integration of geological, botanical, zoological, and archaeological data used to reconstruct Quaternary climates and environments. A number of issues central to and addressed by environmental archaeologists using plant, animal, and mineral data sets and working within the larger discipline of archaeological anthropology are considered throughout the course.

ANT 3330 Historical Archaeology (3)
An examination of the historical research methods and archaeological techniques used to investigate and interpret archaeological sites dating from the historic period.

ANT 3333 Human Osteology (3)
An intensive study of the human skeletal system covering the structure, function, growth, and development of human bone as well as methods for the identification and analysis of bone in archaeological and forensic contexts.

ANT 3335 Introduction to Forensic Anthropology (3)
An introduction to forensic anthropology, the sub-specialty of biological anthropology that focuses on human identification in medico-legal contexts. This course builds on the content from Human Osteology and covers the basic methodology for estimating sex, age, ancestry, stature, trauma, pathology, and time since death. Prerequisite: ANT 3333

ANT 3340 Language in Culture and Society (3)
A sociological and anthropological examination of language from a descriptive, historical and social perspective.

ANT 3360 Magic, Witchcraft and Religion (3)
An anthropological examination of the role of religion and the supernatural among traditional peoples.

ANT 3375 Research Methods in Anthropology (3)
The purpose of this course is to provide a structured opportunity to review, learn, and apply quantitative and qualitative anthropological research methods. This course incorporates anthropological examples and theory to assist each student in developing a research question and a general research design report. This course covers a wide variety of methodologies applicable to all four subfields of anthropology (cultural, archaeological, linguistic, and biological). Prerequisite: ENG 1102 or ENG 1104

ANT 3376 Anthropological Statistics (3)
A detailed description of what anthropologists do with the information they gather. Inferential and descriptive statistics are discussed in terms of univariate and multivariate methods. Particular attention is paid to the problems pertaining to anthropological data (e.g., small sample sizes, missing data, autocorrelation). This course also serves as an introduction to statistical software options frequently used in anthropological research. Prerequisites: STAT 2210 or equivalent

ANT 3380 Anthropology Study Abroad (1-3)
Supervised investigation of relevant topics in Anthropology through travel study abroad or within the interior of the United States.

ANT 4410 High Civilizations of the Old World (3)
An anthropological examination of the sociocultural systems that formed the foundations of pre-industrial high civilizations of the Old World and a survey of past cultures that achieved this degree of development.

ANT 4411 High Civilizations of the New World (3)
An anthropological examination of the sociocultural systems that formed the foundations of pre-industrial high civilizations of the New World and a survey of past cultures that achieved this degree of development.

ANT 4412 Advanced Archaeology Techniques (3)
This course involves specific archaeological training in a singular area of Archaeological practice. Training in specific areas will be limited to such areas: zooarchaeological analysis, paleoethnobotanical analysis, geo-spatial archaeological analysis, cultural resource management, ceramic or lithic analysis, ethnarchaeology, experimental archaeology, archaeological synthesis, and curation. Prerequisite: Permission of Instructor.

ANT 4413 The Archaeology of Death and Burial (3)
The goal of this course is to provide an anthropological perspective on mortuary studies derived from a study of the death experience. A strong emphasis will be placed on the theoretical foundations of mortuary data, drawn from cultural anthropology and ethnography.

ANT 4415 Anthropological Perspectives on the Domestication of Plants and Animals (3)
This course focuses on the consequential transition in the human past, specifically, that from hunting and gathering of wild plants and animal food resources to agriculture and pastoralism. The course will cover the emergence of cultivation, the adoption of plants foods, and the domestication of animals in key regions across the globe. The course will also discuss the most recent contributions from disciplines including archaeology, climatology, botany, zoology, genetics, and linguistics to these topics. Utilizing data and ideas from these various disciplines, the course will investigate the processes behind and the regional expression of the development and spread of domestic plants and animals.

ANT 4422 Principles in Biological Anthropology (3)
This course examines human variation from an evolutionary perspective. We will explore human diversity in terms of genetics, and adaptation at both the individual and population level. The mechanisms and processes of microevolution will be considered, in particular how they influence the diversity that characterizes the human species. Prerequisite: ANT 3311

ANT 4445 Aboriginal Peoples (3)
This course will focus on the ethnography of aboriginal peoples. It will cover such areas of culture as kinship, political systems, social organization, religion, and the interaction between aboriginal people and non-aboriginal people.

ANT 4450 Anthropology of Sex and Gender (3)
This course will focus on gender as a primary organizing principle of society and explore how these categories get created, reproduced and transformed. Topics of discussion will include the social position of women and men in the family, changing social, economic, and political ideologies with respect to gender and the
construction and reproduction of gender inequality from a global perspective.

ANT 4455 Paleoanthropology (3)
The course examines the origin and evolution of humans in biological terms, though some consideration is given to developments in material culture and cultural behavior. Emphasis is placed on the fundamentals of paleoanthropological research, evidence of human evolution, trends in human evolution, important fossil finds and sites, and phylogenetic relationships.
Prerequisite: ANT 3311

ANT 4460 Archaeological Theory (3)
Explores the history of archaeological thought since the eighteenth century (including evolution, cultural history, and processualism) and concludes with contemporary theory (postprocessualism and feminism).
Prerequisites: ANT 2200, ANT 3305

ANT 4470 Selected Topics in Anthropology (3)
Anthropological examination of a designated topic of special and/or current interest and importance that is generally not covered in regularly offered courses in the department.

ANT 4485 Archaeology Practicum (3 or 6)
This course will expose students to the process of synthesis in the archaeological method. This process includes the incorporation of field and laboratory methods in archaeology towards accomplishing archaeological research projects.

ANT 4490 Internship in Anthropology (1 – 6)
Internship with a recognized, professional anthropology related agency in which the student is assigned specific tasks related to the field of anthropology.

ANT 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
Undergraduate research with attention to critical evaluation of research techniques, methods and procedures.
Prerequisites: Junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which the study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”

ANT 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)
Supervised study through field and laboratory projects, guided readings, creative endeavors or achievement of specific skills.
Prerequisites: Junior or senior standing, with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which the study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”

ANT 4498 Anthropological Theory (3)
This course will focus on the early foundations of Anthropology and a survey of the major theorists in the discipline, emphasizing those who made critical contributions influencing the four subfields of Anthropology.
Prerequisite: ANT 3305, ANT 3310, ANT 3311, ANT 3340, ANT 3315, senior status, or permission of instructor.

ART AND DESIGN COURSES (ART)

ART 1133 Visual Arts (3)
Visual arts and their relationship to human needs and aspirations.
Note: Credit for this course may not be applied toward any program in art.

ART 1134 Honors Visual Arts (3)
Visual arts and their relationship to human needs and aspirations. Presentation of aesthetic, cultural and social issues related to art and its making.
Note: Credit for this course may not be applied toward any program in art.

ART 1145 Foundations of Form and Space (3)
Introduction to the principles, elements, and concepts of two-dimensional space.

ART 1150 Foundations of Time and Space (3)
Introduction to the principles, elements, and concepts of three- and four-dimensional space.

ART 2201 Introductory Drawing (3-5)
Introduction to drawing with emphasis on traditional rendering materials and techniques.

ART 2202 2D Studio I (3-5)
Fundamental concepts in printmaking. Basic techniques in producing black and white multiples in relief, intaglio, serigraphy and lithography.
Prerequisites: ART 1145, ART 2201.

ART 2204 3D Studio I (3-5)
Fundamental concepts in pottery and ceramics. Basic techniques in production and free form ceramics to include introduction to hand-building, wheel throwing, and glazing/firing techniques.
Prerequisites: ART 1150, ART 2201.

ART 2205 3D Studio II (3-5)
Fundamental concepts in sculpture. Emphasis on traditional subtractive and additive techniques in a variety of media.
Prerequisite: ART 1150 ART 2201.

ART 2206 2D Studio II (3-5)
Fundamental concepts in painting. Basic techniques in application using transparent and opaque painting media.
Prerequisites: ART 1145, ART 2201.

ART 2208 Digital Tools (3)
This course examines literacy and application of art and design industry-based hardware and software.

ART 2210 Introduction to Digital Drawing (3)
A fusion of analog and digital drawing focusing on basic introductory concepts. Technique and best practices are emphasized.

ART 2228 Photo Studio Darkroom (3-5)
Introduction to the fundamentals photographic techniques in traditional black and white darkroom photography and contemporary digital photographic techniques and practices. Emphasis on darkroom printing, manual camera controls, compositional elements, digital technologies and photographic history.
Prerequisites: ART 1145, ART 2201 or ART 2210.

ART 2230 Color and Technology (3)
Introduction to the principles and science of color and color applications in both colorant and digital environments.
Prerequisites: ART 1145, ART 2201 or ART 2210.
ART 2250  Survey of Art History I (3)
This course examines the development of art from pre-history to the Gothic period. The sessions will focus on the various social and cultural factors that determine the uses and appearance of art at different times.

ART 2251  Survey of Art History II (3)
This course examines the development of art from the Renaissance to the Modern period. The sessions will focus on the various social and cultural factors that determine the uses and appearance of art at different times.

ART 2255  History of Photography (3)
An examination of the development of photography and its relation to the other visual arts. This course is designed to provide a brief introduction to the history of photography. It outlines major developments in photographic processes, concepts, and criticism; and it presents a selection of well-known photographic images from the 19th, 20th, and 21st centuries. The course will provide students with a basic knowledge of photographic history, theory, and criticism. It will examine how photography has both been influenced by and has also influenced other mediums. (Writing Intensive)

ART 3301  Life Drawing (3-5)
Drawing the human form with emphasis on rendering mood and expression while learning skeletal and muscular structure.
May be repeated for credit up to six hours.
Prerequisite: ART 2201.

ART 3302  History of the Arts (3)
An analysis of examples of art from diverse periods with an emphasis on trends and patterns and the interactions of art with various aspects of social, political, and intellectual developments.

ART 3308  Graphic Design Principles & Practices (3)
This course explores the principles of graphic design from concept development to final execution.
Prerequisites: ART 2230.

ART 3310  Motion Graphics Principles & Practice (3)
This course is an exploration of graphic design as it is applied to multimedia.
Prerequisite: ART 2230.

ART 3315  User Interface Design (3)
Formal and practical aspects of graphic design as applied to web development, Internet communication, marketing, and advertising.
Prerequisite: ART 3310.

ART 3318  Conceptual Drawing (3-5)
A course in the exploration of image making that expands drawing from direct observation to a more conceptual approach.
May be repeated for credit up to six hours.
Prerequisites: ART 1145, 2201.

ART 3320  Ancient and Medieval Art (3)
This course will focus on the art and culture of the ancient Greek and Roman Worlds, and consider how the artistic heritage of Europe during the Medieval Era follows upon and deviates from these earlier eras. An examination of the culture and intellectual traditions of these eras will be incorporated as well, with particular focus on how culture influences the artistic traditions discussed.
Prerequisite: ART 2250.

ART 3321  Renaissance Art History 3
This course will explore the visual arts of the Renaissance from the early Renaissance through to Manerism. Attention will be paid to the Renaissance in Italy, along with issues of patronage, the socio-political and economic context of the artists, and the cultural, intellectual and religious changes occurring at this time.
Prerequisite: ART 2251.

ART 3322  Rococo to Revolution Art History (3)
This course will examine the visual arts from the Rococo period through to Post- Impressionism. Along the way, we will confront the debates concerning style during the Neo-classical period, the effects of the Revolutionary era and the revolt into artistic individualism during the Romantic period.
Prerequisite: ART 2251.

ART 3323  Modern and Contemporary Art History (3)
This course provides a detailed study of the visual arts of Europe and America from 1900 to present day. Specific attention will be paid to the changing identity of the artist, dialogues and tensions between “high” art and mass culture, and the success and failure of Modernism.
Prerequisite: ART 2251.

ART 3324  Concept and Process (3)
This course is an exploration in content development, publishing, research and design for print and digital media.
Prerequisite: ART 3308 or permission of department chair.

ART 3325  Typography (3)
A study and application of history, design, letterforms, typeface hierarchy, and grids.
Prerequisite: ART 2230.

ART 3326  Digital Illustration (3)
Student will explore the concepts and techniques necessary to create illustrations for use in print, web, and multimedia applications. Various categories of illustration will be addressed (i.e. technical illustration, editorial illustration, charts, maps, icons, and others). Students will also learn of significant illustrators and their contributions to digital image making.
Prerequisites: ART 1145, ART 2201, and ART 2230.

ART 3328  Digital Photo Studio  (3-5)
Intermediate classroom environment based around the exploration and fundamentals of digital color photographic processes. Techniques explored are artistic aspiration, color printing, theoretical research and exploration, digital photography manipulation and editing, studio lighting, photographic history and contemporary topics.
Prerequisites: ART 1145, 2201, 2210 or 2230.

ART 3330  2D Studio III (3-5)
Advanced concepts in two-dimensional media. Studio focus on specific painting, and mixed media techniques.
May be repeated for credit up to six hours.
Prerequisite: ART 2206.

ART 3331  3D Studio III (3-5)
Advanced concepts in three-dimensional media. Studio focus on specific additive and subtractive techniques in a variety of media.
May be repeated for credit up to six hours.
Prerequisite: ART 2205.

ART 3340  Portfolio Design (1)
Through this course, students will develop a printed, digital and interactive portfolio that expresses their innovation, mastery of skills and ability to research and complete art/design projects.
Prerequisite: Must have completed at least 21 credit hours of major.

ART 3342  The Business of Art/Design (1)
This course explores the business aspects of the Art and Design Industry and readies students for their transition to the field by providing relevant marketing, entrepreneurial, collaboration, and planning proficiencies.
ART 3346 Educational and Psychology Assessment in Fine Arts (3)
This course provides a broad foundation in all aspects of assessment as it is applied to the P-12 music and art classroom, from learning theory to practical application of assessment techniques, data management, critical thinking, progress reporting and portfolio building. Assessment task design in the artistic response modes is covered, and a series of assessments that can be implemented in the music/art classroom are developed.
Prerequisite: Must have completed at least 21 credit hours of their major.

ART 4428 Advanced Photo Studio (3-5)
Advanced photography classroom emphasizes the preparation and completion of a photographic portfolio and the function of photography online. Students will explore projects established in large format film processing, scanning and printing, advanced theoretical research, historical and contemporary photograph research, continued video creation and editing and alternative printing processes.
Prerequisite: ART 3328.

ART 4442 Design Studio (3)
This course will provide the opportunity for students to work alongside of clients in a studio/lab atmosphere to produce design solutions for today’s industry.
May be repeated for credit up to six hours.
Prerequisite: ART 3315 and ART 3324 or permission from the department chair.

ART 3348 Intermediate Photo Studio (3-5)
Intermediate photography, which emphasizes a greater knowledge of digital photographic tools and introduction to video exploration. Techniques and processes explored are photography theory and research, video creation and editing, advanced digital composing and manipulation, beginning portfolio work and studio art.
Prerequisite: ART 3328.

ART 3350 Research and Criticism (3)
This course is a seminar that addresses the study and methodologies of art as it has been interpreted in the modern and post-modern periods. Students must take the semester before taking ART 4499.
Thesis Exhibition.
Prerequisite: ART 2250, ART 2251.

ART 4430 2D Studio IV (3-5)
Content and issues in two-dimensional media on the development of personal artistic expression. Advanced studio practices in printmaking and mixed media techniques with a focus.
May be repeated for credit up to six hours.
Prerequisite: ART 2202.

ART 4431 3D Studio IV (3-5)
Content and issues in three-dimensional media. Advanced studio practices in ceramics with a focus on the development of personal artistic expression. May be repeated for credit up to six hours.
Prerequisite: ART 2204.

ART 4432 Women in the History of Art (3)
This course examines the role of gender in the production and reception of works of art. Analyzing a canon of great women artists, how patriarchal systems have affected the way art history has been written and the impact of the feminist movement on artistic production.

ART 4435 Collaborative Studio (3)
An integrative art studio experience joining students from each concentration area. Thematic, supervised exploration of a chosen medium. This course will facilitate the comprehensive assessment of student competencies in art portfolio review, core curriculum exam and/or the taking of a standardized art exam, a requirement of all art majors. Prerequisite: Must be taken upon completion of the twelve hours concentration or have approval of the department chair.
May be repeated for credit up to six hours.

ART 3355 Graphic Design History (3)
Survey of the history of graphic design from prehistoric visual communications to contemporary global issues.
Prerequisites: ART 2250, ART 2251.

ART 4440 User Experience Design (3)
A continuing study of “Design for the Internet”. Through leveraging new trends and technologies, students will explore development concepts such as usability, functionality, modality, and accessibility.
Prerequisite: ART 3315.

ART 4447 Internship in Art Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP; Co-requisite: IED 4454 Internship Seminar for Interdisciplinary Education.

ART 4481 Methods and Materials for the Art Teacher (3)
Teaching methods, selection, organization, and use of art materials.
Prerequisite: ART 3361 and admission to TEP.

ART 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.
ART 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

ART 4496 Internship (3 or 6 credit hours)
Experiential learning in the context of an art- or design-related profession. Must be approved by the department chair and cooperating host organization or business. May be repeated for credit up to nine hours.

ART 4499 Thesis Exhibition (3)
This class provides students with the opportunity to produce a body of work related to their area of concentration along with a robust research paper. All students must take this course in one of their last two semesters prior to graduation.
Prerequisite: ART 3350.

**AIR FORCE ROTC/AEROSPACE COURSES (AS)**

AS 1112 The Foundations of the United States Air Force I (1)
Is the first of two courses designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.
Co-requisite: AS L112.

AS L112 Leadership Laboratory I (2)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 1112 course by providing cadets with advanced leadership experiences, giving students the opportunity to apply the leadership and management principles.
Co-requisite: AS 1112.

AS 1113 The Foundations of the United States Air Force II (1)
Is the second of two courses designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.
Prerequisite: AS 1112.
Co-requisite: AS L113.

AS L113 Leadership Laboratory II (2)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 1113 course by providing cadets with advanced leadership experiences, giving students the opportunity to apply the leadership and management principles.
Prerequisite: AS 1112.
Co-requisite: AS L113.

AS 2212 The Evolution of the USAF Air and Space Power I (1)
The first of two courses featuring topics on Air Force heritage and leaders; introduction to air power through examination of the Air Force Core Functions, and continued application of communication skills. Its purpose is to instill an appreciation of the development and employment of air power and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.
Prerequisite: AS 1113.
Co-requisite: AS L212.

AS L212 Leadership Laboratory I (2)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 2212 course by providing cadets with advanced leadership experiences, giving students the opportunity to apply the leadership and management principles.
Prerequisite: AS 1113.
Co-requisite: AS 2212.

AS 2213 The Evolution of the USAF Air and Space Power II (1)
The second of two courses featuring topics on Air Force heritage and leaders; introduction to air power through examination of the Air Force Core Functions, and continued application of communication skills. Its purpose is to instill an appreciation of the development and employment of air power and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.
Prerequisite: AS 2212.
Co-requisite: AS L213.

AS L213 Leadership Laboratory II (2)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 2213 course by providing cadets with advanced leadership experiences, giving students the opportunity to apply the leadership and management principles.
Prerequisite: AS L212.
Co-requisite: AS 2213.

AS 3312 Air Force Leadership Studies I (3)
The first of two courses that teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.
Prerequisite: AS 2213.
Co-requisite: AS L312.

AS L312 Leadership Laboratory I (1)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 3312 course by providing cadets with advanced leadership experiences in officer-type activities thus giving students the opportunity to apply leadership and management principles.
Prerequisite: AS 2213.
Co-requisite: AS 3312.

AS 3313 Air Force Leadership Studies II (3)
The second of two courses that teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.
Prerequisite: AS 2212.
Co-requisite: AS L313.

AS L313 Leadership Laboratory II (1)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 3313 course by providing cadets with advanced leadership experiences in officer-type activities thus giving students the opportunity to apply leadership and management principles.
Prerequisites: AS 3312/L312.
Co-requisite: AS 3313.

AS 4412 National Security Affairs/Preparation for Active Duty I (3)
The first of two courses designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level.
Prerequisite: AS 3313.
Co-requisite: AS L412.

AS L412 Leadership Laboratory I (1)
Leadership laboratory is mandatory for AFROTC cadets and it complements the AS 4412 course by providing cadets with advanced leadership experiences, giving students the opportunity to apply the leadership and management principles.
AMERICAN SIGN LANGUAGE COURSES (ASL)

ASL 1141 American Sign Language I (3)
Initial course in the four-course sign language developmental sequence which exposes students to American Sign Language at a Survival Level and will increase their knowledge of Deaf Culture. The course is designed for students who have had no previous knowledge of sign language.

ASL 1142 American Sign Language II (3)
The second course in the ASL sequence in which students continue to develop ASL proficiencies in lexicon, sign production, use of sentence types, and grammatical features such as use of classifiers, use of space to compare and contract, mouth morphemes, and locatives. Outside interaction with the deaf community is required. 

Prerequisite: ASL 1141 with a grade of "C" or better or departmental permission based on approved fluency assessment.

ASL 1170 ASL Semantics and Structure (2)
An advanced exploration of American Sign Language morphology, semantics and vocabulary expansion. Students also explore various syntactic structures in ASL.

Prerequisite: ASL 1141 with a grade of "C" or better.

ASL 2230 ASL Classifiers and Depiction (2)
This course provides theory and practice using the complex ASL morphology known as Classifiers, which are commonly used for descriptions of settings, participants and actions.

Prerequisite: ASL 2241 with a grade of "C" or better.

ASL 2241 American Sign Language III (3)
This course builds on skills and knowledge acquired in ASL I and II and focuses on building narrative skills. Students move from an informal to more formal style of signing. Interacting with the deaf community is a required activity. Students should be able to demonstrate intermediate to intermediate plus level conversational skills.

Prerequisite: ASL 2242 with a grade of "C" or better.

Prerequisite: ASL 1141 with a grade of "C" or departmental permission based on approved fluency assessment.

ASL 2242 American Sign Language IV (3)
This course builds on the previous ASL courses by increasing expressive and receptive skills with exposure to a wide variety of signing styles. Students will begin text analysis, be introduced to deaf literature, story-telling and signed poetry.

Prerequisite: ASL 2241 with a grade of "C" or better or departmental permission based on approved fluency assessment.

ASL 2250 Advanced American Sign Language (3)
This course provides students with opportunities to expand expressive and receptive use of ASL, including a variety of special topics at an advanced level. Special emphasis is on increasing spatial use, ASL fluency and nonmanual behaviors. Students are given opportunities to increase expressive and receptive skills through activities and class discussions, including a variety of special topics at an advanced level. Special emphasis is on understanding the importance of spatialization, nonmanual grammar and morphology, and discourse features of ASL such as register and academic language use.

Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, or ASL 2242 with a grade of C or better, or permission of ITP Academic Advisor.

ASL 2252 American Sign Language Fingerspelling (3)
This course is taught using American Sign Language. The course will introduce the students to the American manual alphabet of fingerspelling and its use within American Sign Language. The students will be given opportunities to demonstrate increased ability to accurately produce and comprehend ASL number systems and fingerspelling uses. Extensive drills and practice in both receptive and expressive use will be implemented.

Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, or ASL 2242 with a grade of C or better, or permission of ITP Academic Advisor.

ASL 3310 Deaf Culture and Diverse Populations
An exploration of linguistic, social, and ethnic factors that influence attitudes and beliefs among various segments of both deaf and non-deaf communities. Attention will be paid to "deaf plus" populations that simultaneously identify as both deaf and some other socio-cultural identity. Geographical, generational, ethnic, and gender differences are explored.

Prerequisites: ITP 2200 and ASL 2242 with grades of "C" or better.

BIOLOGY COURSES (BIO)

BIO 1100 Principles of Biology (3)
Biological principles including the evolution of life, cell structure and function, human biology, cell reproduction, heredity, and ecology. Credit for this non-majors course cannot be applied toward any curriculum in biology.

Co-requisite: BIO L100.

BIO L100 Principles of Biology Lab (1-2)
Labs include coverage of scientific methods, measurements, microscopy, cell structure, human biology, cell reproduction, heredity, and ecology. Credit for this non-majors course cannot be applied toward any curriculum in biology.

Co-requisite: BIO L100.
BIO 1101 Organismal Biology (3)
Biological concepts and life processes of protists, fungi, plants, and animals.
Prerequisites: BIO 1100/L100.

BIO L101 Organismal Biology Lab (1-2)
Survey of organisms from selected phyla, including anatomy, phylogeny, and life histories.
Prerequisites: BIO 1100/L100.
Co-requisite: BIO 1101.

BIO 1120 Survey of Environmental Sciences (3)
This course is an overview of the Earth’s abiotic and biotic systems with an emphasis on how human activity influences these systems. Included in this course will be lectures on ecology, environmental health, natural resources, energy, pollution, and environmental monitoring. If a student drops the lab (BIO L120), then the student MUST also drop the lecture (BIO 1120).
Co-requisite: BIO L120.

BIO L120 Survey of Environmental Sciences Lab (1)
This course includes Lab/Field-oriented experiences designed to enhance understanding of environmental concepts and issues. If a student drops the lecture (BIO 1120), then the student MUST also drop the lab (BIO L120).
Co-requisite: BIO 1120.

BIO 2205 Career Opportunities in Medicine and Allied Health Professions (1)
An introduction to medicine and allied health professions, including academic requirements, job opportunities, and future trends. Professionals from different fields will discuss their specialties to provide students with realistic perspectives.

BIO 2220 Principles of Cell Biology (3)
Introduction to cell structure and function with emphasis on organelle structure, metabolism, cell cycle, genetics, and gene function.
Prerequisites: BIO 1100/L100.
Credit will not be given toward major/program if taken at same time or after BIO 3320 and BIO 4482.

BIO L220 Principles of Cell Biology Lab (1)
Laboratory studies of cell biology with an emphasis on cell structure, function, experimental techniques, and data collection and analyses.
Prerequisites: BIO 1100/L100.
Credit will not be given toward major/program if taken at same time or after BIO L320 and BIO L482.

BIO 2229 General Ecology (3)
The relationships of living organisms to one another and to the nonliving environment. Basic ecological concepts with emphasis on bioenergetics, limiting factors, adaptation to a changing environment, the niche, ecological pyramids, and succession.
Prerequisites: BIO 1100/L101.
Co-requisite: BIO L229.

BIO L229 General Ecology Lab (1-3)
Introduction to the terminology, procedures and equipment for sampling biotic and abiotic components of ecosystems, the functional and dynamic features of ecosystems, and biotic interactions.
Prerequisites: BIO 1100/L101.
Co-requisite: BIO 2229.

BIO 3307 Invertebrate Zoology (3)
Major and minor phyla of invertebrates with emphasis on anatomy, classification, life histories, and phylogeny.
Prerequisites: BIO 1101/L101.

BIO L307 Invertebrate Zoology Lab (1-3)
Anatomy, classification, and life histories of invertebrates.
Prerequisites: BIO 1101/L101.
Co-requisite: BIO 3307.

BIO 3315 Introduction to Biostatistics (4)
An important part of the scientific process consists in extracting information from the world by gathering and analyzing data. This course is an introduction to experimental design, data handling skills, and statistics, the three cornerstones of what could be called the “data science triangle.” In addition to the introduction of fundamental concepts such as probability, P-value and confidence interval, a selection of commonly used parametric and non-parametric statistical tests is presented.
Prerequisites: BIO 1101/L101, and MTH 1112 or higher

BIO 3320 Genetics (3)
Principles of heredity, from basic Mendelian concepts through molecular genetics.
Prerequisites: BIO 2220/L220 and CHM 1143/L143.

BIO L320 Genetics Lab (1)
Basic laboratory techniques in genetics, including the genetics of common laboratory organisms.
Prerequisites: BIO 2220/L220 and CHM 1143/L143.

BIO 3325 Plant Form and Function (3)
The development, structure, and function of plant tissues and organs. Primary emphasis on anatomical, morphological, and physiological features of angiosperms.
Prerequisites: BIO 1101/L101.
Co-requisite: BIO L325.

BIO L325 Plant Form and Function Lab (1-3)
The development, structure, and function of plant tissues and organs, with the primary emphasis on structures.
Prerequisites: BIO 1101/L101.
Co-requisite: BIO 3325.

BIO 3328 Environmental Pollution and Control (3)
Sources, effects, and methods of control for air, water, land, and noise pollution.
Prerequisites: BIO 2229/L229, CHM 1143/L143.
Co-requisite: BIO L328.

BIO L328 Environmental Pollution and Control Lab (1-3)
Field and laboratory techniques for air, water, land, and noise pollution.
Prerequisites: BIO 2229/L229, CHM 1143/L143.
Co-requisite: BIO 3328.

BIO 3335 Biogeography (4)
Discussion of historical, ecological, and anthropic factors affecting the worldwide distribution and abundance of biological species, communities and ecosystems. Combination of lectures by instructor, presentation by students and discussion of articles from the primary literature, ecological modelling, and field trips on the biogeography of plants and birds of Alabama.

BIO 3340 Evolution (3)
Evolution is the fundamental unifying theory in biology. The course will introduce the major principles of evolutionary biology such as evolutionary genetics, adaption and natural selection, biological diversity, paleobiology and macroevolution.
Prerequisites: Junior standing or permission of instructor.
BIO 3347  Human Anatomy and Physiology I (3)  
Anatomical terminology, a survey of cell types and tissues, and detailed coverage of the integumentary, skeletal, muscular, and nervous systems of humans. 
Prerequisites: BIO 1100/L100, BIO 2220/L220, CHM 1142/L142. 
Co-requisite: BIO L347.

BIO L347  Human Anatomy and Physiology I Lab (1-3) 
Anatomical terminology, a survey of cell types and tissues, and detailed coverage of the integumentary, skeletal, muscular, and nervous systems of humans. 
Prerequisites: BIO 1100/L100, BIO 2220/L220, CHM 1142/L142. 
Co-requisite: BIO 3347.

BIO 3348  Human Anatomy and Physiology II (3)  
The endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems of humans. 
Prerequisites: a grade of C or better in BIO 3347/L347. 
Co-requisite: BIO L348.

BIO L348  Human Anatomy and Physiology II Lab (1-3) 
The endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems of humans. 
Prerequisites: a grade of C or better in BIO 3347/L347. 
Co-requisite: BIO 3348.

BIO 3372  Microbiology (3)  
Fundamentals of microbiology including historical perspectives, anatomy and growth of bacteria, microbial metabolism, diseases caused by them, and interrelationships of microorganisms with the environment. 
Prerequisites: BIO 1100/L100, BIO 2220/L220 and CHM 1142/L142. 
Co-requisite: BIO L372.

BIO L372  Microbiology Lab (1-3)  
Fundamentals of microscopy, sterile techniques, staining procedures, isolation techniques, identification of unknowns, and biochemical tests. 
Prerequisites: BIO 1100/L100, BIO 2220/L220, CHM 1142/L142. 
Co-requisite: BIO 3372.

BIO 3382  Immunology (3)  
The cellular and humoral system involved in the host response and immunity of organisms to foreign substances. Mechanisms of humoral immunity, cellular immunity, and hypersensitivities. 
Prerequisites: BIO 3372/L372, CHM 3342/342. 
Co-requisite: BIO L382.

BIO L382  Immunology Lab (1-3)  
Analysis of immunological techniques used in research and clinical settings. 
Prerequisites: BIO 3372/L372, CHM 3342/L342. 
Co-requisite: BIO 3382.

BIO 3386  Hematology (3)  
The study of blood cells and blood-forming organs under normal and diseased states. 
Prerequisites: BIO 3320/L320, 3372/L372, CHM 3342/L342. 
Co-requisite: BIO L386.

BIO L386  Hematology Lab (1-3)  
Cytological and instrumental analyses of blood cells and blood forming organs. Hematological analysis of normal and diseased states. Introduction to blood-banking procedures. 
Prerequisites: BIO 3320/L320, 3372/L372, CHM 3342/L342. 
Co-requisite: BIO 3386.

BIO 4405  Entomology (3)  
Orders of insects with the emphasis on morphology, taxonomy, and life cycles. 
Prerequisites: BIO 1101/L101. 
Co-requisite: BIO L405.

BIO L405  Entomology Lab (1-3)  
Morphology, classification, and identification of insects. A collection is required. 
Prerequisites: BIO 1101/L101. 
Co-requisite: BIO 4405.

BIO 4407  Advanced Cell Biology (3)  
Cell structure and function with the emphasis on biochemical and molecular mechanisms. Topics include cell division, movement, differentiation, and recognition. 
Prerequisites: BIO 3320/L320, BIO 3372/L372, CHM 3343/L343. 

BIO L407  Advanced Cell Biology Lab (1)  
Experimental approaches for studying cells at the biochemical and molecular levels. 
Co-requisite: BIO 4407.

BIO 4413  Limnology (3)  
The physical, chemical, geological, and biological aspects of freshwater ecosystems as influenced by activities in surrounding watersheds. 
Prerequisites: BIO 2229/L229, CHM 1143/L143. 
Co-requisite: BIO L413.

BIO L413  Limnology Lab (1-3)  
Field and laboratory exercises in lake and stream science, including instrumentation, measurement, sampling, and analysis. 
Prerequisites: BIO 2229/L229, CHM 1143/L143. 
Co-requisite: BIO 4413.

BIO 4414  Food Microbiology (3)  
This course focuses on topics in microbial metabolism, food spoilage, food preservation techniques, and foodborne pathogens and their control. Some molecular techniques will be introduced. 
Prerequisite: BIO 3372/L372. 
Co-requisite: BIO L414.

BIO 4414  Food Microbiology Lab (1)  
This lab focuses on advanced microbiological laboratory techniques including enumeration and analysis of bacteria in food, water, and dairy products. 
Prerequisites: BIO 3372/L372, CHM 3342/L342. 
Co-requisite: BIO 4414.

BIO 4416  Microbial Ecology (3)  
A study of the diversity and ecology of microbial populations in ecosystems, with the emphasis on the roles they play in biogeochemical cycles, their contributions to metabolic diversity, their interactions with animals and plants, their niches and bioremediation. 
Prerequisites: BIO 3372/L372, CHM 3342/L342. 
Co-requisite: BIO L416.

BIO 4416  Microbial Ecology Lab (1-3)  
A study of the diversity and ecology of microbial populations in ecosystems, with the emphasis on the roles they play in biogeochemical cycles, their contributions to metabolic diversity, their interactions with animals and plants, their niches and bioremediation. 
Prerequisites: BIO 3372/L372, CHM 3342/L342. 
Co-requisite: BIO 4416.

BIO 4418  Food Laws and Regulations (3)  
Introduction to federal, state and local laws pertaining to food safety and sanitation, proper food preservation and labeling, environmental and occupational regulations, Federal Trade Commission regulations, Kosher and Halal food laws, and topics in biotechnology. 
Prerequisite: BIO 3372/L372. 
Co-requisite: BIO 4414/L414.
BIO 4420  Field Vertebrate Zoology (4-7)
The basics of vertebrate identification, with emphasis on phylogeny, anatomy, morphology, life histories, habitats, distributions, and conservation. Prerequisites: BIO 1100/L101, CHM 1143/L143.

BIO 4421  Population Ecology (3)
Animal and plant populations, food supply, competition, disease, fecundity, distribution, and other environmental factors. Management of endangered species and protected ecosystems are included. Prerequisites: BIO 2229/L229, CHM 1143/L143, STAT 2210. Co-requisite: BIO L421.

BIO L421  Population Ecology Lab (1-3)
Field exercises in identifying ecological problems, formulating and testing hypotheses, and evaluating data using standard statistical methods. Prerequisites: BIO 2229/L229, CHM 1143/L143, STAT 2210. Co-requisite: BIO 4421.

BIO 4423  Neurobiology (4)
This undergraduate course is a comprehensive study of the biology of the human nervous system. This course introduces the anatomy and physiology of the central and peripheral divisions of the nervous system. Topics include: neuronal function, synaptic transmission, sensory processing, movement, and clinical disorders of the nervous system. Prerequisites: BIO 2229/L229.

BIO 4425  Field Botany (4-7)
Survey of vascular plants from different habitats in southeast Alabama. Principles of plant taxonomy, including history and systems of classification and nomenclature, the use of dichotomous keys, and general herbarium techniques. Emphasis is placed on plant identification and habitat types. Prerequisites: BIO 3348/L348, BIO 3372/L372.

BIO 4431  Human Genomics and Bioinformatics (3)
The course will introduce the students to the field of genomics, how genome sequence data is obtained and analyzed, what can be learned from an individual’s genome, how mining the genome can uncover the basis of disease susceptibility and treatment of many human diseases. The course will introduce students to a variety of NCBI-and web-based computational tools for solving common problems in biological research and address cutting-edge research in epigenetics, pharmacogenomics, genetic testing, genome editing, and microbiome. Prerequisites: BIO 3320/L320.

BIO 4437  Epidemiology (3)
The course is aimed to provide knowledge about the main concepts of epidemiology, ethics in epidemiological research, the epidemiological definitions of association and frequency, the measurements of disease frequency, mortality data, and health impacts, descriptive and analytical studies, surveillance and prevention, outbreak investigations, the aspects of air and water pollution, the risk assessment and precautionary principle the basics of radiation biology and the growing importance of ecological studies and environmental epidemiology in public health. Prerequisite: BIO 3372/L372.

BIO 4440  Plants of Social Significance (3)
Plants which affected or altered history with emphasis on those which are the source for food, medical, and cultural drugs, beverage production, and poisonous plants.

BIO 4447  Ornithology (3)

BIO L447  Ornithology Lab (1-3)

BIO 4451  Toxicology (3)
Principles related to the adverse effects of chemicals on living organisms. Prerequisites: CHM 3342/L342, and BIO 3348/L348.

BIO L451  Toxicology Lab (1-3)
Assessment of the toxicity of chemical agents following standard protocols. Prerequisites: CHM 3342/L342 and BIO 3348/L348.

BIO 4455  Clinical Pathophysiology (3)
An objective-oriented, problem-solving introduction to general disease processes including mechanisms of health and disease, disorders of organ systems, and developmental disorders. Prerequisites: CHM 3352/L352, BIO 3348/L348, BIO 3372/L372. Co-requisite: BIO L455.

BIO 4456  Virology
This course is aimed to provide knowledge about viruses and their both harmful and potentially beneficial properties for human health, as well as viral diseases of veterinary and agricultural importance. Students will study classification and nomenclature of viruses, their structure, virus-cell interaction, virus replication cycles; attachment and entry of viruses into cells, assembly and exit of virions from cells. Students will learn about viruses that are associated with enteric and respiratory diseases, nerve system disease, sexually transmitted diseases, cancers and blood malignancies, zoonoses and emerging human viral infections as well as viral diseases of veterinary and agricultural importance.

BIO 4460  Critical Issues in Environmental Management (3)
An examination of the scientific socio-economic and political factors that contribute to environment controversies, along with approaches for resolving disputes. Prerequisites: BIO 1100 and SCI 2233.

BIO 4465  Occupational Safety and Health (3)
A study of practical information occupational safety and health technology, management, and regulatory compliance issues and covering crucial topics like an introduction to industrial hygiene; organizing, directing, and evaluating occupational safety programs; and safety-related laws, regulations, and recordkeeping. Prerequisites: BIO 1100 and SCI 2233.

BIO 4471  Parasitology (3)
Taxonomy, structure, life histories, distribution, pathogenesis, and control of parasitic protozoa, helminths, and arthropods, with the emphasis on those of medical importance.
BIO 4479 Environmental Assessment (3)
An examination of theory and practices required in performing stream environmental assessment as currently practiced by state and federal agencies in their attempt to preserve biological integrity. Sustainable management of natural resources and a systems approach to environmental problems will be emphasized. Topics covered include water quality, habitat assessment, indicator species used in ecological inventory with a concentration on macro invertebrate and fish assemblages, and the index of biological integrity. 
Prerequisites: BIO 1101/L101; or BIO 2229/L229.
Co-requisite: BIO L479.

BIO 4480 Histology (3)
Microscopic anatomy and function of cell types and tissues of mammalian organs. 
Prerequisites: BIO 1101/L101, BIO 3347/L347, BIO 3348/L348. 
Co-requisite: BIO L480.

BIO 4481 Methods and Materials for the Secondary Teacher (3)
A survey of teaching methods and materials appropriate for teaching in the content areas for grades 6-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teachers, and lesson planning formats. In addition, teaching methods, selections organization and use of biology/science materials for grades 6-12 will be covered in detail. A professional laboratory experience is included in this course. 
Prerequisite: admission to TEP.

BIO 4482 Molecular Biology (3)
Fundamental principles of chromosomal organization and gene expression, with emphasis on the structure and function of nucleic acids and proteins. 
Prerequisites: BIO 3320/L320, 3372/L372, CHM 3343/L343. 
Co-requisite: BIO L482.

BIO 4488/9 Internship in Biological or Environmental Science (1-3)
Supervised work experience in the biotechnology industry, medical field, a governmental agency, business or industry, public service organization, food production or food service industry, or other working environment in which a student will learn and apply pertinent professional skills. 
Prerequisites: Approval of the student’s academic adviser and department chair. Internship may only be taken for a maximum of six (6) semester hours.

BIO 4491-92 Guided Independent Research (1 to 3) credit hours per course per semester
Additional information is indexed under Independent Study and Research.

BUS 1101 Introduction to Business (3)
Topics covered include management, the free enterprise system, accounting, finance, marketing,
BUS 1110  Orientation to Sorrell College of Business (1)
This course introduces students to the Sorrell College of Business by providing overviews of its degree programs, the GEEKS program, technology utilized in the College of Business, and other resources to ensure success throughout a student’s time in the college.

BUS 1120  The Global Challenge (3)
The Global Challenge will help prepare superior students for thinking globally. This course is as much about how to study and think about global problems and relationships as it is a course about specific global issues. Superior Students will be required to participate in a service learning project during the semester. There will be several options available to students to travel or work locally on international projects.
Prerequisites: SCOB Global Scholar and permission of the associate dean.

BUS 2220  Business Writing (1)
Analysis and composition of business and personal communications including mechanics and content of letters and memoranda. In this course, students will learn techniques for clarifying purpose, understanding readers, and organizing ideas.
Prerequisites: ENG 1102 or 1104 and BUS 1110

BUS 3310  Intermediate Excel (1)
A computer application course in which business students use common business spreadsheet software to design and implement solutions to common business problems and issues.
Prerequisite: Lower-level core.

BUS 3330  Professional Development (1)
This course is designed to provide practical career development skills, build meaningful relationships and provide the student with instruction on general principles of oral communication in classroom and other professional situations, organization of information, and different types of oral presentations. Students will learn how to brand themselves using social media; acquire communication, social influence, and genuine networking skills; and develop an understanding of how to succeed in any workplace.
Prerequisite: BUS 2220

BUS 3382  Business Communication (3)
Analysis and composition of business and personal communications including mechanics and content of letters and memoranda.
Prerequisite: ENG 1102 or 1104 and Lower-Level Business Core Classes.

BUS 4425  Special Topics in Business (3)
Special topics in areas offered by the Sorrell College of Business. Prior credit and topic approval by the Dean of Sorrell College of Business required.
Prerequisite: Approval of the instructor and Dean of the Sorrell College of Business of both topic and credit value. No more than six hours of credit may be earned.

BUS 4450  Global Leadership Experience (3)
Global Leadership Experience is a course designed to help improve the understanding of global citizenship and provide an opportunity to use leadership skills to create a transformative experience for superior students. This class allows students to interact with and learn about new cultures. A ten-day trip which is the integral experiential learning part of this class.
Prerequisite: Lower level core, junior standing, completion of at least 12 hours of the business core.

BUS 4451  Honors Global Leadership Experience (3)
Global Leadership Experience is a course designed to help improve the understanding of global citizenship and provide an opportunity to use leadership skills to create a transformative experience for superior students. This class allows students to interact with and learn about new cultures. A ten-day trip which is the integral experiential learning part of this class.
Prerequisite: Lower level core, junior standing, completion of at least 12 hours of the business core.

BUS 4460  Business Consulting and Research (3)
Small business research and problem-solving with related field experience.
Prerequisite: Permission of the instructor.

BUS 4474  Business and Society (3)
This course focuses on the interrelationships between business organizations and the social, economic, political, and cultural environments in which business organizations function, both nationally and globally. Among other topics, the course will address business ethics, organizational culture and values, social responsibility, and relationships with government, education, and labor unions. This course will be a primary course in which business ethics, and the essential role that ethics must occupy in corporate life, both from national and international perspectives. Particular emphasis will be placed on the concepts of corporate social responsibility (CSR) and sustainability, both nationally and internationally, as essential dimensions of business ethics. What it means to be a good corporate citizen will be a primary theme of this course.
Prerequisite: BUS 3382 or BUS 3330 and Senior Standing

BUS 4476  Strategic Management (3)
Capstone course for business majors. Integrates knowledge, skills, and concepts acquired in all business courses taken. Requires students to analyze various corporations, determine threats and opportunities posed by the external environment as well as the firm’s strengths and weaknesses, formulate strategic plans for firms, and determine how these plans should be implemented.
Prerequisites: senior standing; completion of or concurrent enrollment in remaining business core courses.

BUS 4480  Business Seminar (3) (required-capstone)
This course is a study of the strategic implications of technology and innovation for organizations that operate in a dynamic environment. Emphasis will be placed on understanding emerging organizational and social issues that influence the adoption of technology which, in turn, influences organizations and the society in which they exist. This course serves as the capstone course for the General Business concentration.
Prerequisite: Senior standing.
Co-requisite: Recommended that this course be taken concurrently with the BSBA capstone course, BUS 4476.

<tr>
<td>COOP 3350</td>
<td>Cooperative Education Program</td>
<td>Cooperative Education Programs, or Co-ops, are an extension of the classroom and provide students with experiential, hands-on learning prior to graduation. Co-ops provide the deepest level of industry training and experience, allowing students the opportunity to develop the skills needed to excel in the workplace immediately upon graduation. Co-op will run a full semester or term and are paid, full time positions at a university-approved employer. Students must commit 2-3 semesters/terms to co-op, which will alternate with traditional semesters/terms of study. This class will have a mid-semester and end of semester evaluation. Only one out of the two to three co-op semesters may take place in summer. A minimum of 12-semester hours of Troy University credit, approval by academic adviser, flat fee of $250 per semester. Co-requisite: Contact with co-op coordinator.</td>
</tr>

### CHEMISTRY COURSES (CHM)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHM 1115</td>
<td>Survey of Chemistry (3)</td>
<td>The course will provide an overview of some of the basic concepts and principles of chemistry. Starting with the structure of the atom, the course will proceed on to basic chemical reactions, the formation of ions, states of matter, chemical equilibrium, and chemical bonding, and will incorporate examples from the biological sciences. Co-requisite: CHM L115.</td>
</tr>
<tr>
<td>CHM L115</td>
<td>Survey of Chemistry Lab (1)</td>
<td>The laboratory sessions will provide an overview of some of the basic concepts and principles of general chemistry experiments. The students will conduct experiments that illustrate the concepts and principles learned in the Survey of Chemistry course lectures. Co-requisite: CHM 1115.</td>
</tr>
<tr>
<td>CHM 1142</td>
<td>General Chemistry I (3)</td>
<td>Emphasis is placed on the periodic table and stoichiometry, including chemical properties, physical states, and structure. Prerequisite: Pass MTH 1112 with at least a C (or a score of 0, 1, or 5 on the math placement exam). Co-requisite: CHM L142.</td>
</tr>
<tr>
<td>CHM L142</td>
<td>General Chemistry I Lab (1)</td>
<td>Experiments dealing with the periodic table, atomic structure, the gas laws, and stoichiometry. Co-requisite: CHM 1142.</td>
</tr>
<tr>
<td>CHM 1143</td>
<td>General Chemistry II (3)</td>
<td>Acid-base theory, solutions, chemical equilibria, thermodynamics, kinetics, and electrochemistry. Prerequisites: CHM 1142/L142. Co-requisite: CHM L143.</td>
</tr>
<tr>
<td>CHM 2242</td>
<td>Analytical Chemistry (3)</td>
<td>The theoretical principles of modern quantitative wet-chemical techniques in analytical chemistry. Co-requisite: CHM 2242.</td>
</tr>
<tr>
<td>CHM 3342</td>
<td>Organic Chemistry I (3)</td>
<td>An introduction to the chemistry of carbon compounds that develops the theoretical principles underlying organic materials. Prerequisites: CHM 1143/L143. Co-requisite: CHM L342.</td>
</tr>
<tr>
<td>CHM 3350</td>
<td>Principles of Physical Chemistry (3)</td>
<td>An introduction to the principles of chemical thermodynamics, reaction kinetics and chemical equilibria. Prerequisites: CHM 3343; PHY 2253/L253; or PHY 2263/L263. Co-requisite: CHM L350.</td>
</tr>

</tr>
<tr>
<td>-------------</td>
<td>--------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>CHM 3352</td>
<td>Biochemistry (3)</td>
<td>This course describes the molecular basis of life and discusses the structure, function and metabolism of proteins, carbohydrates, lipids and nucleic acids.</td>
</tr>
<tr>
<td>CHM L352</td>
<td>Biochemistry Lab (1)</td>
<td>This lab illustrates biochemistry lecture material and acquaints the student with biochemistry techniques and equipment.</td>
</tr>
<tr>
<td>CHM 3381</td>
<td>Physical Chemistry I (3)</td>
<td>Theory and applications of thermodynamics, reaction kinetics, and transport properties with an emphasis on the description of ideal/non-ideal gases and solutions.</td>
</tr>
<tr>
<td>CHM L381</td>
<td>Physical Chemistry I Lab (1)</td>
<td>Introduction to methods and techniques used in the physical chemistry laboratory, including experiments in calorimetry, phase equilibria, reaction kinetics, and transport properties.</td>
</tr>
<tr>
<td>CHM 3382</td>
<td>Physical Chemistry II (3)</td>
<td>A continuation of CHM 3381 with an introduction to surface phenomena, quantum chemistry, and spectroscopy with an emphasis on properties of surfaces, atomic and molecular structure, molecular orbital theory, and photochemistry.</td>
</tr>
<tr>
<td>CHM L382</td>
<td>Physical Chemistry II Lab (1)</td>
<td>A continuation of CHM L381 with an introduction to methods and techniques in computational chemistry and spectroscopy.</td>
</tr>
<tr>
<td>CHM 4400</td>
<td>Special Topics in Chemistry (3)</td>
<td>A study of topics of special interest, such as advanced physical chemistry, advanced analytical chemistry, advanced organic, group theory, surface chemistry, and colloid chemistry.</td>
</tr>
<tr>
<td>CHM 4403</td>
<td>Advanced Organic Chemistry (3)</td>
<td>A more in-depth study of many of the topics studied in Organic Chemistry I and II. Topics include reaction mechanisms, synthetic methods, structure determination using spectroscopic techniques, and stereochemistry.</td>
</tr>
<tr>
<td>CHM 4420</td>
<td>Principles of Polymer Chemistry (3)</td>
<td>An introduction to principles governing polymer synthesis, characterization, and the physical properties of polymers. Topics covered will include molecular weight distribution, polymer composition, characterizations, property-structure relationships, step-growth and chain-growth polymerization and copolymerization.</td>
</tr>
<tr>
<td>CHM L420</td>
<td>Principles of Polymer Chemistry Lab (1)</td>
<td>Synthesis, characterization, and analysis of various polymers and copolymers.</td>
</tr>
<tr>
<td>CHM 4440</td>
<td>Travel Study in Chemistry (1-3)</td>
<td>Supervised investigation of relevant topics in Chemistry through travel-study abroad or within the interior of the United States.</td>
</tr>
<tr>
<td>CHM 4444</td>
<td>Advanced Inorganic Chemistry (3)</td>
<td>Spectroscopy of inorganic molecules, detailed molecular orbital applications, descriptive chemistry of the transition elements, including organometallic and bioinorganic compounds.</td>
</tr>
<tr>
<td>CHM L444</td>
<td>Advanced Inorganic Chemistry Lab (1)</td>
<td>Preparation and characterization of inorganic compounds. Experience will be provided in techniques such as using a tube furnace and handling air-sensitive compounds with a glove bag and Schlenk line.</td>
</tr>
<tr>
<td>CHM 4445</td>
<td>Instrumental Analysis (3)</td>
<td>The operating principles of modern analytical instrumentation for determining composition and concentration.</td>
</tr>
<tr>
<td>CHM L445</td>
<td>Instrumental Analysis Lab (1)</td>
<td>The practical application of select modern analytical instruments to qualitative and quantitative examination of matter. Considerable attention is given to the instrument and elementary electronics involved in each.</td>
</tr>
<tr>
<td>CHM 4452</td>
<td>Advanced Biochemistry (3)</td>
<td>This course will present the reactions, regulations, and organization of metabolic pathways. It is a continuation of CHM 3352, with emphasis on carbohydrate metabolism, aerobic metabolism, lipid metabolism, and other advanced topics in biochemistry.</td>
</tr>
<tr>
<td>CHM 4474</td>
<td>Internship in Chemistry Education (9)</td>
<td>The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.</td>
</tr>
<tr>
<td>CHM 4481</td>
<td>Methods and Materials for the Secondary Teacher (3)</td>
<td>A survey of teaching methods and materials appropriate for teaching in the content areas for grades 6-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teachers, and lesson planning formats. In addition, teaching methods, selections organization and use of chemistry/science materials for grades 6-12 will be covered in detail. A professional laboratory experience is included in this course.</td>
</tr>
<tr>
<td>CHM 4490</td>
<td>Internship in Chemistry (1-3)</td>
<td>Supervised work experience in the biotechnology industry, governmental agency, business, or other working environment in which a student will learn and apply pertinent professional skills.</td>
</tr>
</tbody>
</table>
CHM 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)  
Additional information is listed under Independent Study and Research in the section on Academic Regulations.

CHM 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)  
See index for "Independent Study and Research."

CHM 4499 Senior Seminar (1)  
Principles of preparing and presenting an oral presentation on a selected chemical topic in the current literature.

CRIMINAL JUSTICE COURSES (CJ)

Note: Criminal Justice courses for Fire Science and Emergency Management are listed as FS.

CJ 1101 Introduction Criminal Justice and Criminology (3)  
Agencies and processes involved in the administration of criminal justice.  
This course is a prerequisite for all 3000 and 4000 level courses unless waived by student's adviser.  
This course is required for all non-criminal justice majors seeking the Cyber Security minor or certificate. Criminal Justice majors may not apply this course to the Cyber-Security minor or certificate.

CJ 1110 Careers in Criminal Justice (3)  
An exploration of the various options in the criminal justice profession, to include resume building, interviewing and writing.

CJ 2221 Survey of Law Enforcement (3)  
A survey of policing, covering developmental history, the system of law enforcement organizations in the U.S., personnel administration, police roles and behavior, operations, and major issues such as discretion, civil liability, risk, and excessive force.

CJ 2231 Survey of Corrections (3)  
Philosophy, theory, and practices involved in the treatment of convicted law violators, the examination, and the appraisal of the effects of correctional treatment upon post-correctional behavior.

CJ 2241 Survey of Law and Criminal Procedure (3)  
An examination of the American legal system with emphasis on the analysis and processing of criminal offenses, including an examination of constitutional criminal procedure concerning arrest, pre-trial and trial processes.

CJ 3302 Criminal Justice Administration (3)  
A survey of public administration as it applies to criminal justice organizations. The major dimensions of criminal justice organizations examined include organizational theory, organizational design, leadership and decision making, interpersonal and organizational communication, human resource management, legal aspects of administration, financial management, and organizational change.

CJ 3305 Crisis Management (3)  
This course provides an overview of methods used to identify, plan for, mitigate, respond, and recover from a variety of events. The structure of the federal and state level crisis management and functions are considered along with the emergency support functions relied upon. Emphasis is placed on the roles and responsibilities of leadership during a crisis along with the framework of national, regional, and local response. The ability to understand and evaluate the phases of a crisis, continuity of government, and the private sector during incidents is also examined. Case studies, exercises, and discussions will be used to encourage critical review of the philosophy and principles of crisis management. This course addresses development of risk matrices, identification of threat and risk, crisis theory, stress management and the probability of crisis event occurrence.

CJ 3308 Foundations of Intelligence (3)  
An intellectual foundation for the study of intelligence, both as it has been practiced through history and as it is currently practiced by different nations and other entities today.

CJ 3310 Psychology for Criminal Justice Officials (3)  
Behavior of subjects and police officers in normal and unusual conditions, arrest, interrogation, detention, incarceration, protest, demonstrations, riots, public calamities, reactions of special interest groups, minorities, and specialized tests.

CJ 3325 Juvenile Justice (3)  
Provides a basic overview of the American juvenile justice system, beginning with the development of the juvenile court and addressing the jurisdiction, role, responsibilities, administration, and organization of the juvenile justice system. Also examined are the interfaces between police, schools, and the court, the issues of child abuse, and the operation of treatment programs.

CJ 3335 Security Operations (3)  
An introduction to the administration of private security, the analog to the police in the public sector. Issues in private security concerning ethics, law, and policy, as well as administration, are considered.

CJ 3348 Deviant Behavior (3)  
An examination of the various types of social behavior that violates norms (folkways, mores, and taboos). Special emphasis will be given to the social controls that regulate behavior and the consequences of deviant acts.

CJ 3349 Punishment (3)  
This course provides an overview of the how and why behind punishment. Looking at social and criminological theories students will examine various interpretations and justifications for punishment to include various legal decisions.

CJ 3350 Gangs (3)  
An examination of the nature and extent of gangs and gang crime in the United States and around the world.

CJ 3352 Constitutional Law in Criminal Justice (3)  
Constitutional provisions which are relevant to criminal law and procedure, their construction and development through court interpretation, and their application in criminal proceedings.

CJ 3365 Victimology (3)  
This course provides an opportunity for the student to gain an understanding of the crime victim’s position and issues with the criminal justice system. Specifically, trends, applied responses to victimization, offender-victim relationships, typologies, measuring victimization, and prevention are examined.

CJ 3367 History of Criminal Justice (3)  
Upon completion of the course the student must have demonstrated his/her knowledge of criminal justice systems from approximately 1700 B.C. to the present. With that knowledge and comprehension, the student should be able to analyze and apply lessons learned from that historical context to current situations in the United States Criminal Justice System.

CJ 3375 Research Methods (3)  
Principles of pure and applied research for the social sciences. Special emphasis is given to the types of research methods employed by social
CJ 3376 Criminal Justice Statistics (3)
A detailed description of what social scientists do with the information they gather. Particular attention is given to descriptive and inferential statistics, the relationship between research and policy, evaluation research, and research ethics. Prerequisite: General studies math.

CJ 3380 Digital Forensics I (3)
Basic course designed to introduce the students to identifying and collecting digital data, analyzing the data through the use of forensics tools (hands on) and presenting it in a written report.

CJ 3382 Social Media Investigation (3)
The Study of social media and its affects and uses in law enforcement field. The proper way to forensically acquire and preserve social media evidence for use in litigation.

CJ 4405 National Security and the Law (3)
A historical and legal exploration of national security law in the United States.

CJ 4406 Transnational Organized Crime (3)
A critical examination and analysis of major issues, definitions, and controversies associated with organized and transnational organized crime in a modern world. Historical, criminological, and sociological aspects of crime across national and international borders will be studied and researched. Various groups in transnational organized crime will be studied as they impact continents, countries, and globalization.

CJ 4407 Homicide (3)
This course is an examination of Homicide and its investigation. Topics will include types of homicide as well as death by natural and accidental cause.
The course will review and expand on investigative theory, collection and preservation of evidence, sources of information, interview and interrogation, uses of forensic sciences and case and trial preparation.

CJ 4408 Drugs, Alcohol, and Criminal Justice (3)
This course is designed to explore relevant issues of alcohol and drug use, policy and abuse in American society and its relationship with crime and criminal justice.

CJ 4411 Evidence (3)
This course will provide the student with an overview of the rules of evidence applicable in criminal cases. The course will begin with an overview of the criminal trial process.
Basic evidence concepts will then be explored, with particular emphasis placed upon the Federal Rules of Evidence. The course will then specifically focus on evidence concepts including, but not limited to: witness competency and impeachment, hearsay, admissions & confessions, circumstantial evidence, documentary & physical evidence and the exclusionary role.
Prerequisites: None, students are advised to complete CJ 1101 prior to taking this course, if possible.

CJ 4415 Correctional Systems and Practices (3)
An examination of the day-to-day operations and practices in modern correctional facilities in the local, state, and federal systems.

CJ 4420 Comparative Criminal Justice (3)
A comparative examination of criminal justice systems throughout the world with specific attention given to legal and political systems, organization and methods of law enforcement, jurisprudence, correctional policies, and practices. Theoretical frameworks, models, and propositions addressing crime across various societies are also considered.

CJ 4421 Ethics and Civil Liability (3)
An introduction to concepts of ethics and an examination of contemporary ethical issues in the field of criminal justice including the conduct and ethics of criminal justice practitioners that give rise to civil liability and will focus on aspects of risk management to help prevent legal claims. The course will focus not only on the potential liability of police officers, corrections officers and other criminal justice practitioners for deprivation of civilians US Constitutional rights under state and federal law, but will also address officer’s day to day dealings with civil law issues while performing duties mandated under criminal law.

CJ 4425 Violence in America (3)
In-depth study of violence, including types of violence, categories of offenders and victims, social consequences, and potential solutions.

CJ 4430 Selected Topics in Criminal Justice (3)
An examination of a criminal justice topic chosen for its current or special interest and importance and that is not given in-depth coverage in other courses; selection topics will vary with each course offering (although a particular topic may be offered more than once).

CJ 4440 Terrorism (3)
A critical examination and analysis of major issues, definitions, and controversies associated with the development of terrorism in the modern world. Historical, religious, and psychological and sociological aspects and explanations of terrorism will be covered, along with the characteristic means and methods terrorist groups employ.

CJ 4442 Criminal Investigation (3)
A detailed examination of what is necessary to investigate crimes, interview people using various methodologies to solve crimes and/or prepare a case for prosecution.

CJ 4444 Community Corrections (3)
An examination of the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration.

CJ 4445 Current Issues in Law Enforcement Operations and Administration (3)
A detailed examination of applied concepts of leadership and problem solving in law enforcement operations and administrations. Special emphasis is attached to current problems surfacing in law enforcement.

CJ 4446 Current Issues in Correctional Operations and Administration (3)
A detailed examination of applied concepts of leadership and problem solving in corrections and administration. Special emphasis is attached to current problems surfacing in corrections.

CJ 4447 Current Issues in Legal Systems Operation and Administration (3)
A study of the critical issues and concepts involved in modern court administration, including the law governing the presentation of evidence in the trial of criminal cases, analysis of the role of law, and the courts in American Society.

CJ 4455 Advanced Victimology (3)
An examination of a criminal justice topic chosen from its current or special interest and importance and that is not given in-depth coverage in other courses.
Prerequisites: CJ 1101

CJ 4465 Criminal Justice Study Abroad (1-3)
An introduction to study abroad programs with a comparative study of norms, culture, policing.
courts, and punishment. Particular consideration is also given to travel advice and safety while studying abroad.

CJ 4470 Criminal Justice Issues in Homeland Security (3)
An examination of the political and social complexities and dilemmas associated with state and local law enforcement and federal agencies roles in the defense of our nation subsequent to Sept. 11, 2001.

CJ 4472 Cyber Crime (3)
This course will introduce the topics of computer crime and computer forensics. Students will be required to learn different aspects of computer crimes and ways to uncover, protect, and exploit digital evidence. Students will be exposed to different types of tools, both software and hardware, and an exploration of the legal issues affected by on-line and computer-related criminal conduct. The course will examine the evolution of criminal law relative to the development of new technology.

CJ 4475 Seminar in Cyber Security (3)
A capstone course designed to integrate subject matter learned in previous courses, encourage critical analysis of contemporary issues, and seek further information on testing and certifications beyond the university setting.

CJ 4480 Digital Forensics II (3)
In depth study and analysis of operating system artifacts, event log, html, web browsers...analyzing the data and presenting it in a written report. Prerequisite: CJ 3880.

CJ 4481 Operating and File System Forensics (3)
Examination of common file systems and operating system artifacts. Students will learn general components of FAT and NTFS file systems and how data is stored. Explore artifacts from common operating systems such as Apple’s OS X and Microsoft’s Windows family. This course will explore the most commonly used file systems and operating system artifacts in preparation for real-world analysis and digital forensics.

CJ 4482 Digital Evidence Practicum (3)
Examine various techniques and procedures for law enforcement officers related to the forensically sound identification, seizure and collection of evidence through classroom study and practical exercises.

CJ 4488-90 Internship in a Criminal Justice Agency (3)
Experience in a selected criminal justice agency, working in groups or individually. Supervised application and observation of concepts, principles, skills, operation and functions of knowledge acquired by the student in previous or current course work and studies. Problems will be identified with attendant solutions in the areas of police work, the correctional agencies, or the court systems as appropriate to the student’s program of study.

CJ 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

CJ 4498 Criminological Theory (3)
An examination of crime, overall and by category, and an examination of theories of crim causation, their research support and their impact on social policy, categories of crime, etc. The criminological theories covered will be classical, biological, psychological, economic, and multidisciplinary.

CJ 4499 Senior Seminar in Criminal Justice (3)
This is a capstone course designed to (1) help seniors integrate the knowledge gained from their other required criminal justice courses, (2) assist them in developing analytical thinking skills through focusing on selected topics using a seminar approach, and (3) support them in gaining a better understanding of the criminal justice profession and the role they may play in it. Prerequisites: Completion of all Criminal Justice core courses.

CLASSICS COURSES (CLA)

CLA 2210 Greek and Roman Culture (3)
A survey of the cultural achievements of the ancient Greeks and Romans.

CLA 2260 Classical Mythology (3)
Myths of the Greeks and Romans and their influence.

CLA 2290 Classical Literature in English Translation (3)
Greek and Roman masterpieces as expressions of human nature. Prerequisites: ENG 1101, 1102.

CLA 3311 Civilization of Greece (3)
Historical and cultural achievements of the Greeks and their legacy to the modern world. Note: May be taken for credit as an elective in the Department of History.

CLA 3312 Civilization of Rome (3)
Historical and cultural achievements of the Romans and their legacy to the modern world. Note: May be taken for credit as an elective in the Department of History.

CLA 3330 Classical Epic (3)
Homer’s Iliad and Odyssey, Virgil’s Aeneid, and the epic tradition.

CLA 3350 Classical Drama (3)
The ancient theatre and its influence with selected plays by Greek and Roman playwrights.

CLA 4400 Selected Topics in Classics (3)
Selected topics in classical studies generally not covered in other courses. May be repeated once for credit.

CLA 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

CLA 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

COMMUNICATION COURSES (COM)

COM 1101 Introduction to Communication (3)
This course surveys the historical and cultural impact of human and mass communication including newspapers, magazines, radio, television, sound recordings, motion pictures, and the internet. It features the inventions, innovators, and technology that have driven mass communication development since the introduction of the printing press. It also discusses social effects and ethical concerns of communication.

COM 2231 Interpersonal Communication (3)
Study of theories of communication behavior in relatively unstructured face-to-face situations, including small-group discussion.
COM 2241 Fundamentals of Speech (3)
This course is a study of the principles and practices basic to public speaking. This course is designed to enhance the student’s verbal and non-verbal communication skills through oral communication theory and practical application.

COM 2243 Honors Fundamentals of Speech (3)
Study and application of the principles and practices basic to all areas of oral communication. As part of the university’s Honors Program, the course is designed to achieve the student’s leadership objectives through improved verbal and non-verbal communication skills by means of a focus on one substantive area of interest.

COM 2251 Voice and Diction (2)
Study of individual and group practice in the effective use and control of the mechanics of oral delivery with a focus on the "professional dialect" the general American dialect and/or the standard dialect. Includes use of the International Phonetic Alphabet.

COM 3320 Interviewing and Information (3)
Study of the principles and practices of professional and personal interviewing, with an emphasis on oral communication and related topics such as resume writing. In addition, the course will focus on gathering and analyzing information through discussion and practice of the techniques of online research, focus groups and opinion surveys.

COM 3324 Gender Communication (3)
This course examines the communication styles of males and females emphasizing gender-related communication behavior and its implications for the ability to maintain effective personal and professional relationships.

COM 3326 Conflict Management (3)
This course is designed to offer students opportunities to enhance and improve their communication techniques and skills in conflict management. The course teaches students communication methods to manage productively interpersonal disputes between/among parties. It emphasizes building partnerships and long-term positive relationships in the business world and in one’s personal life.

COM 3328 International/Intercultural Communication (3)
This course is designed to introduce students to the basic concepts, principles, and skills needed for improving communication among persons from different minority, racial, ethnic and cultural backgrounds.

COM 3341 American Public Address (3)
Study of the history and rhetorical criticism of major American speakers and their speeches from the Colonial to the Contemporary periods, with references to their biographical, intellectual, political and social contexts.

COM 3342 Argumentation and Debate (3)
Study and application of the principles of argumentation and debate, including selected aspects of the management of a program of competitive forensics.

COM 3345 Group Discussion and Leadership (3)
Study and application of the principles and practices of group problem solving through the study of the dynamics of discussion and group leadership.

COM 3365 Fundamentals of Speechwriting (3)
This course gives a hands-on, detailed instruction in the art and skills of researching and writing solid speeches, including how to make points clearly and maintain the audience interest. Speechwriting is approached from the perspective of writing speeches for others and for yourself.

COM 3380 Travel Study in Journalism and Communication (3)
A Troy University faculty supervised study of journalism, communication and mass media through travel abroad or within the interior of the United States. May be repeated once for credit. Prerequisites: Permission of instructor.

COM 4400 Special Topics in Communication Studies (1 to 3 credit hours)
Examination of selected topics in communication studies not included in the established curriculum. Content may be of a historical, thematic, or technological nature. May be repeated for credit.

COM 4410 Communication Research (3)
This course will help students develop critical thinking skills through an introduction to the concepts and principles of scientific research in communication and journalism. Some of the topics included in this class are the basics of identifying problems, hypothesis formation, measurement construction, validation, research designs, analysis techniques and proper interpretation of results. Prerequisite: Must have Junior Standing or permission of instructor.

COM 4420 Propaganda and Persuasion (3)
This course will explore influence techniques in print, graphics, traditional media and social reality as they migrate to interactive spaces. The course will first examine the history and fundamentals of persuasion, influence, and coercion, and then look at how they have been adapted for use in today's interactive contexts. Throughout this course there will be a discussion of the relative ethics of using propagandistic/persuasive techniques for different purposes.

COM 4422 The Rhetoric of the Civil Rights Movement (3)
This course will focus on civil rights discourse and its relationship to equality and participation in the U.S. and other nations worldwide. Using the struggle of African Americans as an instructive exemplar, this course will examine the philosophical concepts, political issues, moral complexities, and discursive characteristics of civil rights rhetoric.

COM 4424 Rhetorical and Communication Theory (3)
This course presents an introduction to rhetorical theory and communication theory; students will gain experience in applying theoretical approaches to practical applications in criticism and analysis of communication. Students will gain insights into how to communicate effectively in writing, visually and orally as well as how to analyze critically communication occurring in a wide array of contexts and for different purposes, from private and interpersonal settings to public and professional arenas.

COM 4426 Organizational Communication (3)
This course presents both historical and current perspectives on the origins and usefulness of organizational theory relating to communication issues; it emphasizes the relationship between organizational life and communication principles; and provides both theory and the opportunity for the practical application of communication skills in a variety of organizational settings.

COM 4430 Health Communication (3)
This course focuses on an examination of the nature, contexts, theories, and research shaping health care consumers understanding of health communication issues. It provides an overview of provider-recipient communication, communication in health-care organizations, and
public health concerns as they relate to physical, mental, and social health issues.

COM 4441 Oral Interpretation (2)
A study and application of the principles and practices of oral interpretation (reading) of literature, including individual and ensemble performance.

COM 4460 Crisis Communications (3)
Prepares students for anticipating and managing perceived and real crises faced by communication.

COM 4491-92 Guided Independent Research (1 to 3 credit hours per course)
Additional information is indexed under Independent Study and Research.

COM 4493-94 Guided Independent Study (1 to 3 credit hours per course)
Additional information is indexed under Independent Study and Research.

<thead>
<tr>
<th>COMPUTER SCIENCE COURSES (CS)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CS 2250</strong> Computer Science I (3)</td>
</tr>
<tr>
<td>An introduction to the theory and development aspects of a high-level programming language. The course covers programming methodologies, control structures, predefined and user defined functions, input/output streams, control structures, logical expressions, enumeration, repetition, multidimensional array and string manipulation, structures, searching, sorting techniques, and advanced input/output. Program analysis, design, development, and testing are emphasized.</td>
</tr>
<tr>
<td>Prerequisite: MTH 1112</td>
</tr>
<tr>
<td><strong>CS 2255</strong> Computer Science II (3)</td>
</tr>
<tr>
<td>A continuation of Computer Science I to include advanced programming techniques including classes and data abstractions, inheritance and composition, pointers, virtual functions, overloading, exception handling, and recursion. Students analyze, design, implement, and test complex programs.</td>
</tr>
<tr>
<td>Prerequisite: CS 2250</td>
</tr>
<tr>
<td><strong>CS 2265</strong> Advanced Programming I (3)</td>
</tr>
<tr>
<td>Provides student the opportunity to gain experience and training in an additional high-level language. The course focuses on advanced topics including objects, structures, applets, graphics, exception handling, files, and streaming.</td>
</tr>
<tr>
<td>Prerequisite: CS 2255</td>
</tr>
<tr>
<td><strong>CS 3310</strong> Foundations of Computer Science (3)</td>
</tr>
<tr>
<td>A broad perspective of computer science concepts intended as preparation for more in-depth coverage in higher-level courses. Topics include machine and assembly language programming, computer system organization and operation, logic circuits, finite-state diagrams and programming language grammar, Boolean algebra, and circuit design considerations.</td>
</tr>
<tr>
<td>Prerequisite: MTH 1112</td>
</tr>
<tr>
<td><strong>CS 3320</strong> Business Systems Programming (3)</td>
</tr>
<tr>
<td>The study and application of a business-oriented programming language. Students apply a structured, multiphase program development process that features a series of steps involving understanding of problems, formal problem definition, design methodologies, program specification, and file definition as applied to business processing systems. The course includes the study and application of the following concepts: structured design methodology, divisions, arithmetic and intrinsic functions, decisions structures and logical control structures, iterative processes, case structure, error capture, batch processing, file manipulation, table manipulation, and interactive structures.</td>
</tr>
<tr>
<td>Prerequisite: CS 2255</td>
</tr>
<tr>
<td><strong>CS 3323</strong> Data Structures (3)</td>
</tr>
<tr>
<td>A survey of data structures that includes lists, ordered lists, linked lists, stacks, queues and trees. Also included are measurement of program performance and how program performance is affected by alternative data structures. These concepts are presented within an object-oriented framework. Programming labs are included.</td>
</tr>
<tr>
<td>Prerequisite: CS 2255, MTH 1125, 2215</td>
</tr>
<tr>
<td><strong>CS 3325</strong> Operations Research (3)</td>
</tr>
<tr>
<td>Introduction to operations research, linear programming, simplex-based sensitivity analysis and duality, linear programming applications, network models, simulation, waiting line models, Markov processes, forecasting, and inventory models.</td>
</tr>
<tr>
<td>Prerequisites: MTH 1125</td>
</tr>
<tr>
<td><strong>CS 3329</strong> Analysis of Algorithms (3)</td>
</tr>
<tr>
<td>Alternative techniques to solve computer science problems are presented. Problems include sorting, searching, and graph traversal, lists, ordered lists, linked lists, stacks, queues, and trees. These concepts are presented within an object-oriented framework.</td>
</tr>
<tr>
<td>Prerequisite: CS 3323</td>
</tr>
<tr>
<td><strong>CS 3330</strong> Data Structures and Algorithms (3)</td>
</tr>
<tr>
<td>A course in fundamental data structures concepts and alternative techniques for solving real-world problems in computer science. Concepts and application covered include analysis of data representation and associated algorithms, including linked lists, queues, stacks, arrays, graphs, trees, searching, sorting, string matching, and the application of recursive techniques. The course will place an emphasis on the implementation of various algorithms and data structures.</td>
</tr>
<tr>
<td>Prerequisites: CS 2255, MTH 2201, 2215</td>
</tr>
<tr>
<td><strong>CS 3331</strong> Fundamentals of Artificial Intelligence (3)</td>
</tr>
<tr>
<td>Approaches to the definition of artificial intelligence and to the design and implementation of intelligent computer systems. Topics include the Turing Test, Sourly, Chinese Room, blackboard systems, logic programming, knowledge based systems, scripts and schemas, and heuristic search techniques.</td>
</tr>
<tr>
<td>Prerequisite: CS 3323 or 3330</td>
</tr>
<tr>
<td><strong>CS 3332</strong> Software Engineering I (3)</td>
</tr>
<tr>
<td>Topics are presented that focus on the design and development techniques for large high quality software systems. They include project management issues, analysis and design methods, and approaches to testing.</td>
</tr>
<tr>
<td>Prerequisite: CS 3323 or 3330</td>
</tr>
</tbody>
</table>
CS 3333  Introduction to Cryptography (3)
Discussion of mathematical foundations to the theory of cryptography. Topics include information theory, number theory, cryptographic protocols and various algorithms.
Prerequisite: MTH 1125.

CS 3334  Foundations of Cyber Security (3)
Course provides an introduction to cyber security. Topics include security protocols and cryptography; various kinds of cyber threats and defenses; secure software design and development, attack modeling, risk analysis, cybercrime, cyber law, ethics and policies.

CS 3336  Information Assurance (3)
Topics include software security and lifecycle, identity and trust technologies; verification, access control, privacy, personal responsibility intrusion detection, supply chain management.
Prerequisites: CS 3325, CS 3334 and CS 3360.

CS 3347  Advanced Programming II (3)
Provides student the opportunity to gain experience and training in an additional high level language. Topics include interactive techniques, arrays, multiple forms, data files and databases, grids, graphics, OLE, DLL's and custom objects. Emphasis is on finding creative solutions to application problems.
Prerequisite: CS 2255.

CS 3360  Concepts of Object Oriented Programming I (3)
Provides students the opportunity to gain experience and training in an additional high level language. The course focuses on advanced topics including classes, objects, interfaces, applications, encapsulation, exceptions, multithreading, graphics, exception handling, files, and streaming.
Prerequisite: CS 2255.

CS 3361  Concepts of Object Oriented Programming II (3)
The conceptual framework for object-oriented programming and systems. Topics include classes, data hiding, modularity, inheritance, and reusable code presented through the use of some object-oriented language.
Prerequisite: CS 3360.

CS 3365  Introduction to Computer Organization and Architecture (3)
Organization and operation of computer systems. Topics include hardware components of digital computers, micro-programming, memory management, interrupt organization, addressing modes, and instruction formats.
Prerequisite: CS 3310.

CS 3370  Nature of Programming Languages (3)
Basic principles and concepts of programming languages including what a programming language is, various paradigms that a language can follow, and how its syntactical and semantic structures can be specified. The traditional object-oriented paradigm will be presented as well as non-traditional paradigms based on symbolic logic (logic programming) and on functions in lambda calculus (functional programming).
Prerequisite: CS 3323 or 3330.

CS 3372  Formal Languages and the Theory of Computation (3)
Formal language theory, including the Chomsky hierarchy, is presented. Emphasis is placed on regular and context free grammars, finite state automata, and translators.
Prerequisite: CS 3323 or 3330.

CS 3375  Foundations of Networking (3)
An introduction to the principles of data communications and network systems. Topics to be addressed include standards, topologies, network management, LAN, WAN, Internet, basic communication protocols and introductory level network security.
Prerequisite: CS 3310. Students majoring in Applied Computer Science or in the Computer Science Program may not apply this course to the Cyber Security Minor or certificate. Credit will not count toward a major or minor in Computer Science.

CS 4401  Advanced Artificial Intelligence (3)
A continuation of Fundamentals of AI. A topic of research including logic programming, fuzzy sets, genetic algorithms, artificial neural networks, or pattern analysis is included.
Prerequisite: CS 3331.

CS 4420  Introduction to Database Systems (3)
The fundamental concepts and structures necessary for the design and implementation of a database management system. Students design, load, and query a database using tools such as E-R diagrams and SQL. Also includes data normalization and file and index organization.
Prerequisite: CS 3323 or 3330.

CS 4443  Web-Based Software Development (3)
The essentials of Internet programming. Students will design and write Web page applications utilizing Internet programming techniques including scripting languages and hypertext. Programs will manipulate many forms of data including hypertext, graphics, audio, and video. Students use state-of-the-art development tools and design methods to implement an enterprise web application.
Prerequisite: CS 3323 or 3330.

CS 4445  Data Communication and Networking (3)
An overview of local-area and wide-area systems. Issues discussed include standards, topologies, management, communication protocols, and security.
Prerequisite: CS 3323 or 3330. Students majoring in Applied Computer Science or in the Computer Science Program may not apply this course to the Cyber Security Minor or certificate.

CS 4447  Systems Analysis and Design (3)
Study of the analysis of computer-based information systems. Emphasis is placed on analysis, specifications development, design, and development of information systems, including the software and databases that support the business needs of organizations. Both data-oriented and process-oriented design methods are covered. Topics include the systems analyst, the systems development life cycle, methodologies, development technology, systems planning, project management, systems analysis, systems design, systems implementation, and systems support.
Prerequisite: CS 3323 or 3330.

CS 4448  Operating Systems (3)
An overview of operating system functions and components. Issues include process definition, scheduling, and memory management. Various modern operating systems are compared.
Prerequisite: CS 3323 or 3330.

CS 4449  Applied Networking (3)
Computer networks and the use of computer networks in industry environments. Topics covered include client-server networks, network hardware and software, distributed computing, user requirements, considerations in physical media and topology, selection of Network Operating Systems (NOS); computing platforms, network administration, applications software, internetworking components, and key issues in network management.
CS 4451  Computer Security (3)  
Basic security concepts and principles applied to real-world applications. Introduces the major elements that go into a security implementation, including encryption, authentication, access control lists, execution control lists, vulnerability of operating systems, auditing, performing vulnerability analysis and risk assessment, developing a security plan and protecting data, systems and infrastructure. This course also builds on the fundamentals of reliability and safety engineering, which include software reliability, growth models, testing and stopping-rules, safety methods and redundancy.  
Prerequisite: CS 3323 or 3330.

CS 4452  Cyber Security Policies and Compliance (3)  
Course introduces cyber policies, including cyber law, cyber policy, intellectual property, privacy, professional responsibility, and global societal impacts.  
Prerequisite: CS 3334.

CS 4453  Ethical Hacking (3)  
Course provides an introduction to the principles, techniques, and tools of ethical hacking. Topics include information gathering and scanning, vulnerability analysis and exploitation.  
Prerequisite: CS 3323.

CS 4454  Secure Software Development (3)  
Topics include Software Development Life Cycle (SDLC), Vulnerability Mapping, Security requirement planning, threat analysis, software testing.  
Prerequisite: CS 3323.

CS 4455  Cyber Security Techniques and Practices (3)  
This course introduces various tools and techniques used to secure computer systems. Topics include packet analysis with diagnostic software, firewall configuration, conduct forensic investigation, etc.  
Prerequisite: CS 4445.

CS 4461  Software Engineering II (3)  
This course is a continuation of Software Engineering I with additional topics that include software quality insurance and testing techniques. Students will design, implement and test a large project.  
Prerequisite: CS 3332.

CS 4462  Special Topics in Object-Oriented Programming (3)  
This course is a continuation of CS 3361. It presents the conceptual framework for the design of object-oriented systems. Topics include re-factoring designs and design patterns, presented through the use of some object-oriented language.  
Prerequisite: CS 3361.

CS 4499  Internship in Computer Science (1-3)  
The Computer Science Internship is a supervised work experience that provides students with the opportunity to gain applied work experience in their field of study.  
Prerequisites: Chair’s/Program Director’s Approval Needed.

CS 4480  Study Abroad in Computer Science (1-3)  
The Computer Science Study Abroad provides students with the opportunities to take computer science courses at universities overseas.  
Prerequisites: Chair’s/Program Director’s Approval Needed.

CS 4410  Introduction to Machine Learning (3)  
The course introduces machine learning concepts, algorithms, and applications, topics covered included but not limited to regressions, clustering, decision tree, Bayesian learning, support vector machine, deep learning, feature reduction, hypothesis, bias, and model fitting. The course will discuss applications of machine learning with an emphasis on programming and real world problem solving.  
Prerequisite: CS 3375 or CS 4445.

Prerequisites: Chair’s/Program Director’s Approval Needed.

CS 4499 Internship in Computer Science (1-3)  
Approval Needed.

Prerequisites: Chair’s/Program Director’s Approval Needed.

DAN 1112 Contemporary Technique I (2)  
Designed for the dance major, DAN 1112 is the study of beginner/intermediate Contemporary dance, including dynamic alignment, body/mind connection, increased vocabulary and musicality, with emphasis on artistry through the contemporary aesthetic.  
Prerequisite: Placement.

DAN 1115 Ballet Technique I (2)  
Designed for the dance major, DAN 1115 is the study of beginner/intermediate ballet technique, including safe and efficient alignment and clear articulation of movement vocabulary with emphasis on increased vocabulary and musicality.  
Prerequisite: Placement.

DAN 1130 Social Dance in the 21st Century (1)  
A cross-cultural survey of theories and styles of dance, their relationship to societal contexts and other art forms.

DAN 1132 Beginning Contemporary for Non majors (1)  
Refinement of technical skills in contemporary/modern dance at the intermediate level, including intermediate movement capabilities, rhythmic structures, spatial relationships, movement vocabulary with emphasis on aesthetic and expressive qualities that lead to performance.  
Prerequisite: Placement.

DAN 1134 Ballroom Dance  
An introduction to social dancing with an emphasis on American ballroom dances (foxtrot, waltz, swing) and Latin ballroom dances (cha cha, mambo, tango). Equivalent to KHP 1134.

DAN 1135 Beginning Ballet for Non-Majors (1)  
The development of technical skills in beginning ballet, including safe and efficient alignment and clear articulation of movement vocabulary with emphasis on increased vocabulary and musicality.

DAN 1136 Jazz I (1)  
The study and application of the fundamental concepts, skills, movement vocabulary, and artistic expression specific to beginning jazz dance.

DAN 1137 Tap I (1)  
Progressive development of beginning to low/intermediate movement concepts, skills, vocabulary, and styles specific to tap dance.

DAN 1150 Creative Habit (1)  
A component of the Department of Theatre and Dance First Year Initiative program (FYI), Creative Habit is part of the introductory learning community established at the entry level for incoming theatre and dance students. Centering on Twyla Tharp’s book The Creative Habit, the learning community examines strategies for successful studies in theatre and dance. Co-requisites: THE 1130 and TROY 1101.

DAN 2200 Orientation to Dance (2)  
Introduction to the basic concepts and principles common to ballet, contemporary and jazz dance through studio experience, discussions and concert attendance. This is a skills class.

DAN 2212 Contemporary Technique II (2)  
Designed for the dance major, DAN 2212 is the study of intermediate modern, including dynamic alignment, body/mind connection, complex center
and across the floor phrase work with increased vocabulary and musicality. 

Prerequisite: Placement.

DAN 2214  Pointe Ballet Technique I (2)
Designed for the female dance major, DAN 2214 is the foundational study of pointe work technique using specially reinforced shoes called pointe shoes. Students will focus on Barre and center work that will introduce the foundation and basics needed to strengthen the student’s legs and torso to overcome the demands of dancing in pointe shoes. The class will offer an increased vocabulary specific to dance on pointe.

DAN 2215  Ballet Technique II (2)
Designed for the dance major, DAN 2215 is the further development of technical skills in intermediate ballet, including dynamic alignment, body/mind connection, with emphasis on self-expression through the ballet aesthetic, increased vocabulary and musicality.

Prerequisite: Placement.

DAN 2228  Contemporary Partnering (1)
Designed for all skill levels, this class will focus on contemporary partnering and weight-sharing technique. The course will introduce special vocabulary vital to the enhancement of skills needed to become a complete and secure partner.

DAN 2232  Beginning-Intermediate Contemporary for Non-Majors (2)
Refinement of technical skills in contemporary/modern dance at the intermediate/high intermediate level, including complex movement capabilities, rhythmic structures, spatial relationships, movement vocabulary with emphasis on aesthetic and expressive qualities that lead to performance.

Prerequisite: Audition placement or permission of the Department of Theatre and Dance.

DAN 2235  Beginning-Intermediate Ballet for Non-majors (2)
Further development of technical skills in beginner/intermediate ballet, including dynamic alignment, body/mind connection, with emphasis on self-expression through the ballet aesthetic, increased vocabulary and musicality.

Prerequisite: Placement.

DAN 2236  Jazz II (2)
The study and application of the fundamental concepts, skills, movement vocabulary and artistic expression specific to jazz dance.

Prerequisite: Placement.

DAN 2237  Tap II (1)
Progressive development of intermediate to intermediate/high movement concepts, skills, vocabulary, and styles specific to tap dance.

Prerequisite: Placement.

DAN 2240  Writing for Dance (2)
This class will guide the student through a variety of ways to write for and about dance. From free writing to formal research, students will gain skills to think and write critically about dance as an artistic, cultural, educational, social art form.

Prerequisite: ENG 1102  Corequisite: DAN 4410

DAN 2250  Music Fundamentals for Theatre and Dance (2)
Fundamental music skills for theatre and dance, including those for musical theatre, stage management, dance, and actors. The course focuses on reading music (rhythm and melody), vocabulary, development of aural skills, and an introductory recognition of the piano keyboard.

DAN 2252  Methods of Teaching Dance (3)
Social, folk and square dancing, including basic rhythmic activities which can be taught in elementary, middle and high schools. Equivalent to KHP 2252.

DAN 2289  The Dance Professional (1)
A preparation course that provides upper-level students with the tools to launch their professional dance career and livelihood.

Prerequisite: Junior status

DAN 3300  Musical Theatre Dance I (2)
The exploration of the genre of musical theatre dance examining storytelling, script, music, and mood through movement. This course will focus on early American jazz and tap styles related to theatre production by working with selected pieces from the mid-20th century including that of Gene Kelly, Fred Astaire, Jerome Robbins, and other icons of this period.

Prerequisites: DAN 1135.

DAN 3312  Contemporary Technique III (2)
Designed for the dance major, DAN 3312 is the study of advanced modern dance, including dynamic alignment, body/mind connection, and increased vocabulary with emphasis on artistry through the contemporary aesthetic. Students will focus on complex center and across the floor combinations with an emphasis on musicality and a greater understanding of anatomical alignment.

Prerequisite: Placement.

DAN 3314  Pointe Ballet II (2)
Designed for the intermediate/advanced female dance major, DAN 3314 is the further development of pointe work technique using specially reinforced shoes called pointe shoes. Barre and center work will strengthen the student’s legs and torso, increasing vocabulary, comfort, and ease of movement while dancing on pointe.

Prerequisite: Pointe Ballet I or Placement.

DAN 3315  Ballet Technique III (2)
Designed for the dance major, DAN 3315 is the further development of technical skills in advanced ballet, including dynamic alignment, body/mind connection, increased vocabulary, with emphasis on the qualities of self-expression and musicality which lead to performance.

Prerequisite: Placement.

DAN 3330  Special Topics in Dance (1 to 3)
Special topics in dance.

DAN 3332  Intermediate Contemporary for Non-majors (2)
Continued refinement of technical skills in contemporary/modern dance at the high intermediate/advanced level, including complex movement capabilities, rhythmic structures, spatial relationships, movement vocabulary with emphasis on aesthetic and expressive qualities that lead to performance.

Prerequisite: Placement

DAN 3335  Intermediate Ballet for Non-majors (2)
Further development of technical skills in advanced ballet, including dynamic alignment, body/mind connection, with emphasis on self expression through the ballet aesthetic.

Prerequisite: Placement

DAN 3336  Jazz III (2)
The study of the advanced concepts, skills, movement vocabulary and artistic expression specific to jazz.

Prerequisite: Placement

DAN 3340  Dance Composition and Choreography I (2)
An exploration of movement and an analytical study of the art of making dances. The course will concentrate on the four basic elements of composition: space, shape, time and energy.

Prerequisite: Permission of the Department of Theatre and Dance.
DAN 3350 **Conditioning (2)**
Designed to complement the dancer’s regimen, DAN 3350 will focus on a hybrid conditioning experience to include pilates, yoga, floor barre, jogging, and swimming, improving the dancer’s overall strength, stamina, flexibility and muscle tone and will assist in overcoming specific musculature weaknesses.

DAN 3351 **Men’s Ballet Technique (2)**
Designed for male dance majors, the course will focus on the elements necessary for improving the vocabulary of the male dancer, such as jumps, turns, and line. The course will focus on dynamics necessary to increase speed, coordination, and elevation, especially as needed to execute big jumps. Anatomical placement, strength, and musicality will be the emphasis to build confidence in men’s variations, in classical and contemporary styles.

DAN 3352 **Pas de deux (2)**
Designed for the intermediate dance major, DAN 3352 is the study of partnering technique. The course will focus on the elements needed for the female and the male dancer to develop a foundation for dancing together, progressing technically through promenades, lifts, turns, and jumps. The course will introduce special vocabulary that is used only in partnering which enhances the skills needed to become a complete and secure dancer.

DAN 3353 **Anatomy and Alignment (3)**
This course covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique, emphasizing exercises and imagery for floor and center work to correct insufficient muscle patterns and is designed to give dance majors a practical, functional, and theoretical understanding of kinesiology such as identifying bony landmarks, muscles, and joint actions as well as injury prevention.

DAN 3354 **Improvisation (2)**
This course introduces students to the art of improvisation. They will examine the elements of and approaches to the improvisational process as they develop their ability to react imaginatively to extemporaneous situations created through dance. This course will focus on spontaneous problem solving through the exploration of movement and will evoke the student’s individual creative process while maintaining the sense of ensemble.

DAN 3355 **Commercial Dance I (2)**
This course addresses the needs of dancers who aspire to perform in television, music videos, or on stage. Students will receive intermediate technical instruction in a variety of dance forms and styles that will introduce them to the commercial industry. With an emphasis on the artistry of the commercial dance aesthetic, students will develop technical skills, including dynamic alignment and body/mind connection, increased musicality, and movement vocabulary. Special attention will be placed on tricks, jumps, and turns.

DAN 3356 **Commercial Dance II (2)**
This course addresses the needs of advanced dancers who aspire to perform in television, music videos, or on stage. Students will receive advanced technical instruction in a variety of dance forms and styles, which will expand on principles established in Commercial Dance I. **Prerequisite: DAN 3355.**

DAN 3360 **Musical Theatre Dance II (2)**
Further exploration of the genre of musical theatre dance examining storytelling, character, script, score, and mood through movement. This course will focus on late 20th century (1975 forward) and contemporary dance and movement styles related to theatre productions. **Prerequisite: DAN 1135.**

DAN 3380 **Travel Study in Dance (1-3)**
Supervised study of dance through travel abroad or within the United States. **May be repeated for credit.** **Prerequisite: Permission of instructor.**

DAN 3389 **Creative Project Conception (1)**
Part one of a two-part creative process, this course gives students a practical opportunity, working closely with faculty, to conceive, propose, and plan for the presentation of their project: any faculty-approved creative venture focused on the art of dance. **Prerequisite: Junior status and DAN 2289.**

DAN 4400 **Repertory Ensemble (1)**
Designed for auditioned members of the TROY Dance Repertory Ensemble. **Prerequisite: Audition or invitation.**

DAN 4410 **The History of Ballet (3)**
A survey of ballet history from the 16th century through the Balanchine era, focusing on the rise of ballet as a communicative art form. **Prerequisite: ENG 1102 passed with at least a “C” Corequisite: DAN 2240.**

DAN 4411 **The History of Modern-Contemporary Dance (3)**
A survey of the purposes, functions, and manifestations of American and European dance forms from the beginning of the 20th century to the present. Dance History II covers the forerunners and pioneers of modern dance; avant-garde and post-modernists; and the artists of jazz, tap, Broadway, film, and current media, introducing dance students to the innovators, dancers, and choreographers responsible for shaping 20th and 21st century dance.

DAN 4412 **Contemporary Technique IV (2)**
For the Dance major. Study of pre-professional modern dance, including dynamic alignment, body/mind connection, and increased vocabulary with emphasis on artistry through the contemporary aesthetic. Students will focus on complex center and across the floor combinations with an emphasis on musicality and a greater understanding of anatomical alignment. **Prerequisite: Placement.**

DAN 4415 **Ballet Technique IV (2)**
For the advanced major. Further development of technical skills in a semi-professional level ballet class, including dynamic alignment, body/mind connection, increased vocabulary, with emphasis on the qualities of self-expression and musicality, which enhance performance abilities. **Prerequisite: Placement.**

DAN 4440 **Composition and Choreography II (3)**
Exploring movement and analytical study of the art of making dances at the advanced level. Concentration on the four basic elements of composition—space, shape, time, and energy. By Choreography II, students should be crafting full-length dances. **Prerequisite: DAN 3340 passing with a grade of C or higher.**

DAN 4478 **Pedagogy for Contemporary Dance (2)**
A comprehensive study of the pedagogical skills required to plan and deliver an effective class for contemporary dance trends. Students will learn to identify goals, develop objectives, construct, and sequence class instruction with focused attention to phrasing, musicality, proper alignment, and injury prevention particular to trends studied.
DAN 4480 Pedagogy for Ballet (2)
A comprehensive study of the pedagogical skills required to plan and deliver an effective classical ballet class. Students will learn to identify goals, develop objectives, construct, and sequence the ballet class with focused attention to phrasing, musicality, proper alignment, and injury prevention.

DAN 4489 Creative Project Presentation (2)
Part two of a two-part process, this course is designed to give students practical autonomy over the preparation, production, and presentation of the creative project begun in DAN 3389.
Prerequisite: Senior status and DAN 3389.

DAN 4494-94 Guided Independent Study (1-3)
Information is indexed under Independent Study and Research.

EARLY CHILDHOOD EDUCATION (ECE)

ECE 3315 Assessment in ECE (3)
Child observation, documentation, and other forms of assessment central to the practice of all early childhood professionals will be presented. The goals, benefits and uses of assessment will be studied. Systematic observations, documentation, and other effective assessment strategies used in a responsible way, in partnership with families and other professionals, to positively influence the development of every child will be explored.
Prerequisite: Admission to TEP.

ECE 3325 Child Growth & Development (Birth to 8 years) (3)
The purpose of this course is to provide candidates a child development knowledge base. Candidates will use their understanding of young children’s characteristics and needs, and of multiple interacting influences on children’s development and learning, to create environments that are healthy, respectful, supportive, and challenging for each child. This course will include a minimum of 15 hours of clinical field experience in a child care setting.
Prerequisite: Admission to TEP.

ECE 3340 Language Acquisition (3)
The purpose of this course is to assist candidates as they investigate and construct an operational knowledge of young children’s language and literacy acquisition. A wide array of developmentally appropriate approaches, instructional strategies, and tools to connect with children and families and positively influence each child’s development and learning will be explored. This course includes 15 hours of clinical field experiences where students interact with diverse learners through observation and participation in the application of appropriate language and literacy experiences, including technology.
Prerequisite: Admission to TEP.

ECE 3385 Primary Math & Science (3)
The purpose of this course is to assist candidates as they investigate and construct an operational knowledge of young children’s construction of logico-mathematical and physical knowledge. This course includes 15 hours of clinical field experiences where students interact with diverse learners through observation and participation in the application of developmentally appropriate approaches, instructional strategies, and tools to connect with children and families and positively influence each child’s development and learning.
Prerequisite: Admission to TEP.

ECE 3391 Social Studies; Community & Family (3)
This course prepares candidates to understand that successful early childhood education depends upon partnerships with children’s families and communities. Knowledge, understanding, and valuing the importance and complex characteristic of children’s families and communities will be used to create respectful, reciprocal relationships that support and empower families, and involve families in their children’s development and learning. A minimum of 15 hours of clinical field experience will be required.
Prerequisite: Admission to TEP.

ECE 4401 Integrated Program (3)
This course is designed to prepare early childhood majors to use their knowledge of academic disciplines to design, implement and evaluate experiences that promote positive development and learning for each and every young child. The essential concepts, inquiry tools, and structure of content areas, including academic subjects, and resources to deepen their understanding will be explored. A minimum of 15 hours clinical field experience is required.
Prerequisite: Admission to TEP.

ECE 4454 Internship Seminar for Early Childhood Education (3)
This course provides seniors an opportunity during internship to examine broad educational issues and concerns, topics on the state and local levels and those of personal interest. The scope of the course ranges from juvenile law, classroom management professionalism, professional development for teachers and other course topics.
Prerequisite: admission to TEP;
Co-requisite: ECE Internship.

ECE 4474 Internship in Early Childhood Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP.
Co-requisite: ECE 4454.

INTERNATIONAL ECONOMIC DEVELOPMENT COURSES (ECD)

ECD 3362 Applied Spatial Analysis for Business (3)
This introductory course prepares students to become decision makers able to analyze business data, both internal and external, from a spatial perspective utilizing geographic information systems software.

ECONOMIC COURSES (ECO)

ECO 1150 Survey of Economics (3)
This course is a study of commerce and economics and their impact on society, technology, and business. This course will cover basic commerce and economics terminology and concepts important to managers.

ECO 2251 Principles of Macroeconomics (3)
Macroeconomic theory of the national economy with emphasis on income, employment, banking, and public policy.

ECO 2252 Principles of Microeconomics (3)
Microeconomic theories of value, production, distribution of income, and basic international economic analysis.
ECO 2253  **Honors Principles of Macroeconomics (3)**
Macroeconomics theory of the national economy with emphasis on income, employment, banking, and public policy for the superior student.
Prerequisites: SCOB Honors Student/permission of the Associate Dean

ECO 2254  **Honors Principles of Microeconomics (3)**
Microeconomics theories of value, production, distribution of income, and basic international economic analysis for the superior student.
Prerequisites: SCOB Honors Student/permission of the Associate Dean.

ECO 3351  **Intermediate Macroeconomics (3)**
Study of the variables affecting employment, income, and prices. Monetary theory and theories of fluctuation are reviewed. Policies dealing with economic stabilization are examined.
Prerequisite: ECO 2251.

ECO 3352  **Intermediate Microeconomics (3)**
Study of price and distribution theory as it relates to households, firms, and industries. Theories of factor prices and general equilibrium are also examined.
Prerequisite: ECO 2252.

ECO 3353  **Money and Banking (3)**
Principles of money, credit, and banking including monetary systems, theories, and commercial banking operations related to the Federal Reserve System.
Prerequisite: ECO 2251 and ECO 2252.

ECO 3355  **Labor Economics (3)**
Employment, unionism, labor-management relations and human capital.
Prerequisite: ECO 2252.

ECO 3360  **Entrepreneurial Economics (3)**
This course presents a wide-ranging overview of the place of entrepreneurship in economic theory, with a special focus on applications to institutions, organizations, strategy, economic development, and related fields. An emphasis on historical pieces on the economics of entrepreneurship as well as modern applications will be studied.
Prerequisites: ECO 2251, ECO 2252.

ECO 3361  **Sports Economics (3)**
Sports Economics introduces essential core economic concepts and then develops them with examples and applications from the sports industry. The sections are devoted to illustrating prominent areas of economics: industrial organization, public finance, labor economics, and econometrics.
Prerequisites: ECO 2251, ECO 2252.

ECO 3362  **Public Choice (3)**
Public choice applies economic tools and methodology to the study of public decision-making. The emergence of government, collective choice within government, effects of legislative structures on outcomes, the role of interest groups and public policy, the size and scope of government, and alternative forms of governance.
Prerequisites: ECO 2251, 2252.

ECO 3363  **Mathematical Economics (3)**
This course develops the mathematical treatment of theory of firm, household behavior, stabilization policy, growth theory, input-output analysis, and linear programming.
Prerequisites: ECO 2251, 2252, AND MTH 1125, or 2201.

ECO 3365  **History of Economic Thought (3)**
This course surveys the main schools in the history of the development of economic thought.
Prerequisite: ECO 2251, 2252.

ECO 4434  **International Economics (3)**
An advanced analysis of the principles underlying international trade and international finance. This course is for Economics Majors. Students who have taken ECO 4451 cannot take ECO 4434 for credit.
Prerequisite: ECO 2251 & ECO 3352.

ECO 4451  **Economics of Globalization (3)**
Principles underlying international trade and international finance.
Prerequisite: ECO 2252 & Lower-level core.

ECO 4452  **Environmental Economics (3)**
Theoretical and empirical examination of natural resource and environmental economics.
Prerequisite: ECO 2252.

ECO 4453  **Public Finance (3)**
An analysis of the principles underlying government expenditure and taxation programs presented from both a theoretical and a pragmatic perspective.
Prerequisite: ECO 2252.

ECO 4454  **Economic History: The Rise of the Western World (3)**
A study of the institutional factors that contributed to the Western world’s economic growth.
Prerequisite: ECO 2251, 2252 and one introductory HIS course.

ECO 4455  **Comparative Economic Systems (3)**
An analysis of the economic systems of capitalism and socialism focusing upon how a multitude of specific nations in the Americas, Europe, and Asia, such as the United States, Mexico, Germany, Poland, Japan, and China, et al., arrange and conduct economic affairs in the 21st century.
Prerequisite: ECO 2251 or 2252.

ECO 4456  **The Economics and Moral Foundations of Capitalism (3)**
A study of the interrelationship between markets and morals. Investigates the role ethics and ethical ideas play in understanding economic life.
Prerequisite: ECO 2251, 2252.

ECO 4457  **Econometrics (3)**
A study of the methods used to empirically verify economic theory. Statistical inference applied to economic models, both micro and macro.
Prerequisite: ECO 2251, 2252 and QM 2241, or SS 3376, or STAT 2210.

ECO 4458  **Law & Economics (3)**
An economic analysis of the legal system that explores the efficiency of different legal decisions.
Prerequisite: ECO 2251, 2252.

ECO 4459  **Economics Seminar (3)**
Current problems in economics.
Prerequisite: ECO 3351 and ECO 3352.

ECO 4460  **Regional and Urban Economics (3)**
The economics of cities and urban problems and the effects of geographic location on the decisions of individuals and firms. The importance of location in everyday choices is easily assessed from our day-to-day lives, yet traditional microeconomic models are spaceless.
Prerequisites: ECO 3351, 3352.

ECO 4461  **Austrian Economics (3)**
The historical and philosophical roots of the Austrian School, the impact it has had within the economics profession, and the unique insights it has provided in such areas as the theory of value, monetary theory, and business cycles.
Prerequisites: ECO 2251 and ECO 2252.

ECO 4462  **Game Theory (3)**
This course provides an introduction to game theory with applications to economics. Moreover, the course presents an approach to modeling a social situation as a game and develops techniques
EDU 2220 Introduction to International Education (3)
This course is designed as a general introduction to the field of international education, broadly defined. In addition to exploring educational structures, philosophies and curricula of selected countries outside of USA, students will examine educational issues, challenges, and outcomes from a global perspective. Prominent issues related to education, including history, cultural traditions, politics, globalization, poverty, gender issues, and the legacy of colonization will be examined and discussed. Students will also explore and compare US education with the educational systems and contests of other countries.

EDU 2230 Fundamentals of Teaching (3)
The course is designed for students who are interested in pursuing careers in education. It will include in-depth coverage of significant components of the teaching profession, to include lesson development and planning, classroom management, educator dispositions, and curriculum implementation.

EDU 3303 Educational Psychology and Classroom Assessment (3)
Characteristics of the learner and the teaching-learning process. Theories of learning, instruction, and motivation, and their application to students in grades P-12.

EDU 3305 Teaching with Technology (3)
This course is designed to introduce prospective teachers to currently available technology and to prepare them to use various media for their own education as well as in their professional careers. Students are expected to become comfortable in the use of various media and to explore the possibilities for the use of media in the classroom. Emphasis is given to ways in which multimedia can be used to meet the needs of the varying learning styles.

EDU 3308 Integrated STEM (3)
Science, technology, engineering, and mathematics (STEM) literacy is a critical component of 21st century education. The central tenet of STEM literacy is the preparation of people who are knowledgeable of the connections between the content and practices of the STEM fields. This course will foster students’ abilities to teach in an integrative way through real world design based problems that both stimulate and teach students to think critically.

EDU L308 Integrated STEM Lab (1)
Science, technology, engineering, and mathematics (STEM) literacy is a critical component of 21st century education. The central tenet of STEM literacy is the preparation of people who are knowledgeable of the connections between the content and practices of the STEM fields. This course will foster students’ abilities to teach in an integrative way through real world design based problems that both stimulate and teach students to think critically.

Note: should be taken semester prior to internship.
Prerequisites: admission to TEP; must have taken or be concurrently enrolled in ELE 3361, ELE 3362
Co-requisite: EDU L308.

EDU 3310 Introduction to Education (3)
This course provides a broad overview of education, teaching and schools, and an orientation to the Teacher Education Program. Multiple field experiences in school settings are required as part of the course. This is a prerequisite course for most other education courses.

EDU 4400 Classroom Management (3)
This course is designed for all education majors. The purpose of this course is to establish a foundation of content and application relative to classroom management and discipline, emphasizing reflection, decision making, and integrated teaching/learning strategies. Methodologies utilized will include discussion, lecture, field experience, case studies, problem solving sessions, projects, and research.

EDU 4471 Curriculum and Instructional Delivery (3)
This course offers a survey of school curricula, organizational patterns for school systems and classrooms. It is designed for Early Childhood Education, Elementary Education, Special Education, and Middle and Secondary Education majors. Various instructional strategies, major philosophies and learning theories are examined. Note: should be taken semester prior to internship.
Prerequisite: admission to TEP.

EDU 4476 Internship in Elementary/K-6 Collaborative Teacher (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of informed, reflective decision maker throughout the internship experience.
Prerequisite: TEP Admission
Co-requisite: ELE 4454

EDU 4478 Math/Science/STEM Practicum (3)
The practicum is designed to provide a supervised experience related to instruction in the areas of mathematics, science and STEM education. A diverse set of concepts, skills, and pedagogical practices pertaining to these three core areas will be emphasized in the field in conjunction with co-requisite coursework. The application of current research and evidence based mathematical, science, and STEM instructional practices will be hallmarks of the practicum experience.
Prerequisite: Admission to TEP

EDU 4490 Global Identity (1-3)
Studying abroad is a transformative experience that has the power to challenge our thinking and our
perspective on the world. This course aims to attract students across disciplines, to promote interprofessional development, and to prepare them to expand their understanding of their global identity and communicate their growth in intercultural competence toward their personal and professional development. Students make connections between their study abroad experience and the broader range of skills connected with this experience, to become a competitive member of a global workforce.

**EET 2221 Electrical Circuits II (3)**

This course primarily deals with introduction to AC (Alternating Current) circuits such as current, voltage, resistance, Ohm’s Law, Power and Energy, series and parallel circuits, methods of circuit analysis and network theorems. Basics in magnetism and electromagnetism is also covered. Also, a circuit simulation tool is introduced and used to build and test DC circuits.

**Prerequisites:** MTH 1125

**Co-requisite:** EET L220

**EET 2222**

This course primarily deals with introduction to AC (Alternating Current), the laws and concepts which describe the behavior of AC circuits. Topics related to the introduction to capacitors, inductors followed by their behavior in RL, RC and RLC circuits is analyzed using circuit theories. Transformer theory is also introduced and covered. A circuit simulation tool is used to build and test AC circuits and to demonstrate the use of an oscilloscope.

**Prerequisites:** EET 2220, MTH 1125

**Co-requisite:** EET L221

**EET 2221 Electronic Devices I (3)**

This foundational course familiarizes the theory and concepts of modern solid-state devices by introducing the fundamental concepts of P-N junction diodes, Bipolar Junction Transistors (BJT), and Field-Effect Transistors (FET). Also, diode and transistor related circuits along with the biasing AC models are covered. Emphasis is placed on their characteristics and applications, such as rectifiers and amplifiers. Circuit simulation software is used to design and analyze basic diode and transistor circuitry.

**Prerequisites:** EET 2221, EET L221

**Co-requisite:** EET L311

**EET L311**

This course acquaints the theoretical models and concepts of the topics learned in lecture through hands-on experiments and simulations.

**Electronics Devices I Lab (1)**

This course acquaints the theory and concepts of diode, transistors and FET transistor topics learned in lecture through hands-on experiments and simulation.

**Co-requisite:** EET 3311

**EET 3312**

This course is focused on hands-on experimentation, design, analysis and verification of digital circuits. The lab topics include but are not limited to gate logics, adders, multiplexer/de-multiplexer, and counters. Students will also learn to use various devices to build and to test digital circuits. Digital circuits are also implemented using circuit simulation software.

**Co-requisites:** EET 3315

**EET L312**

This course acquaints the theory and concepts of the topics learned in lecture through hands-on experiments and simulations.

**Digital Logic Circuits (3)**

This is an introductory course to the fundamentals of digital electronics. Topics covered include number systems, codes, logic gates, Boolean Algebra, combinational logic systems design, flip-flops, counters and registers. Advanced concepts in combinational circuits, decomposition of switching functions, modular realization of switching circuits, sequential functionality and circuits, and memory elements are also covered.

**Prerequisites:** EET 3311, MTH 1126

**Co-requisite:** EET L312

**EET 3315 Digital Logic Circuits Lab (1)**

This course is focused on hands-on experimentation, design, analysis and verification of digital circuits. The lab topics include but are not limited to gate logics, adders, multiplexer/de-multiplexer, and counters. Students will also learn to use various devices to build and to test digital circuits. Digital circuits are also implemented using circuit simulation software.

**Co-requisites:** EET 3315

**Measurement and Instrumentation (3)**

Topics covered include fundamental of units systems, precision and accuracy, errors in measurement and types of errors, electromechanical instruments, DC ammeters and voltmeters, AC ammeters and voltmeters, andelectrodynamometers in power measurements, bridge DC measurements, bridge AC measurements, transducers concepts and types, oscilloscope principles and applications in measurements.

**Prerequisites:** EET 2222, EET L221

**Co-requisite:** EET L311

**EET L311**

This course acquaints the theory and concepts of diode, transistors and FET transistor topics learned in lecture through hands-on experiments and simulation.

**Co-requisite:** EET 3311
EET 4410  Signal Processing (3)
Prerequisites: EET 2215, EET L215.
Topics covered include fundamental of units systems, precision and accuracy, errors in measurements and types of errors, electromechanical instruments, DC ammeters and voltmeters, AC ammeters and voltmeters, electrodynamometers in power measurements, bridge DC measurements, bridge AC measurements, transducers concepts and types, oscilloscope principles and applications in measurements.
Prerequisites: PHY 3320.

EET 4415  Introduction to Robotics and Automation (3)
This course primarily deals in providing a thorough introduction to robotics and its applications in task automation. Students will get a chance to gain knowledge related to development of robots, different working models of robots, selection of appropriate sensors to a specific application, and programming a certain robot to perform the desired task. Projects may include construction and programming of mobile robots, assembly and test of individual components.
Prerequisites: EET 3315, EET L315.
Corequisite: EET L415

EET L415  Introduction to Robots and Automation Lab (1)
This course acquaints the theory and concepts learned in lecture through the hands-on construction of sensor circuitry and building robots. Students will learn to use DC motors and the motor controllers, sensors, transistors and diode circuitry etc. Also, students get a chance to integrate the sensor and mothers to the microprocessors.
Co-requisite: EET 4415.

EET 4420  Fundamentals of Microcontrollers
Topics covered include but are not limited to microcontroller architecture, instruction sets, programming and interfacing with electronic circuits, interrupts, microcontroller peripherals, microcontroller application development tools and platforms.
Prerequisites: EET 3315, EET L315.
Co-requisite: EET L420.

EET L420  Fundamentals of Microcontrollers Lab (1)
This course is focused on design, implementation and debugging of microcontroller based systems. Students will also learn about timers, ADC, wave generations, RC measurement etc. The course also has a project where students are expected to build and implement a microcontroller.
Co-requisite: EET 4420.

EET 4425  Data Communication and Networking (3)
Topics covered include but are not limited to microcontroller architecture, instruction sets, programming and interfacing with electronic circuits, interrupts, microcontroller peripherals, microcontroller application development tools and platforms.
Prerequisites: EET 3315, EET L315.

EET 4435  LSI/VLSI Design (3)
MOS Transistors – fabrication and characteristics. MOSFET scaling and short-channel effects. Layer representation and layout rules. Analysis and design of inverters and inverter based circuits. Circuit and interconnection delays, driving large loads. Dynamic logic circuits. Memories, VLSI design strategies – Full custom, Standard Cell and Gate Array design, FPGAs, Subsystem design. Testing and testability. CAD for VLSI
Prerequisites: EET 2215, EET 3315.

EET 4440  Electronic Testing with Lab (4)
Topics include, identifying and reading electronic circuit diagrams, using electronic test equipment to analyze circuits, applying a systematic approach to fault finding, and location a range of faults to component level.
Prerequisites: EET 2215, EET 3315.

EET 4444  Optical Electronics I (3)
This course is an introduction to the basics of electromagnetic waves. It also introduces to the fundamental concepts and principles of optics, optical waveguides and devices. Next, the course talks about the introduction to optoelectronics, Gaussian beam propagation, interaction of light and matter, spontaneous and stimulated emission, laser rate equations.
Prerequisites: EET 3312
Co-requisite: EET L444

EET L444  Optical Electronics I CAD Lab (1)
This course acquaints the theory and concepts learned in lecture through the hands-on computer aided design and simulation experiments.
Co-requisites: EET 4444

EET 4445  Optical Electronics II (3)
This course is the second in a two-part sequence on optoelectronics, a continuation of optoelectronics I. This course provides the advanced concepts in semiconductor optics and optoelectronics devices. Topics include the introduction to the light emitting devices, detectors, and modulators. Course also introduces the basic optical, electro-optical and nonlinear properties of semiconductors, semiconductor lasers, optical detectors, amplifiers, modulators and switches. Most importantly, this course helps students to meet the demand of growing semiconductor optoelectronic industry and prepares them to advanced study and research in the semiconductor optics and optoelectronic devices.
Prerequisites: EET 4444
Co-requisite: EET L445

EET L445  Optical Electronics II CAD Lab (1)
This course acquaints the theory and concepts learned in EET 4445 through the hands-on computer aided design and simulation experiments.
Co-requisite: EET 4445

EET 4480  Senior Project I Capstone (3)
This is the first of a two-semester sequence of Capstone course for all EET majors. It provides students with unique opportunity to put together the knowledge and skills developed in his/her curriculum in the design and implementation of a project that culminates in a working solution. The project may be multidisciplinary or oriented toward a single engineering technology discipline. The student is expected to develop a working prototype, required to work on final project report and a formal oral presentation. The project may involve a team of students from more than one discipline, or a student may choose to work alone on a project. The project must be approved by a department faculty.
Prerequisites: Permission of Instructor.

EET 4481  Senior Project II Capstone (3)
This is the second of a two-semester sequence of Capstone courses for all EET majors. The course permits students to complete the project which was initiated in EET 4480.
Prerequisites: Permission of Instructor.

EET 4490  Travel Study in Electronics Engineering Technology (1-3)
Supervised investigation of relevant topics in Electronics Engineering Technology through travel -study abroad or within the interior of the United States.

EET 4498  Internship in Electronics Engineering Technology (1-3)
Supervised work experience in the biotechnology industry, governmental agency, business, or other working environment in which a student will learn
and apply pertinent professional skills.

**ELEMENTARY EDUCATION COURSES (ELE)**

**ELE 3360 Teaching Social Science (3)**
This course provides a study of the varied dimensions of instruction in social sciences. Emphasis is placed on appropriate instruction and resources, including technology for the instruction of students in grades K-6.
Prerequisite: admission to TEP.
Co-requisite: ELE L360.

**ELE L360 Teaching Social Science Lab (1)**
This course includes Lab/Field-oriented experiences designed to enhance understanding of varied dimensions of instruction in social sciences.
Prerequisite: admission to TEP.
Co-requisite: ELE 3360.

**ELE 3361 Teaching Natural Science (3)**
This course provides a study of the varied dimensions of instruction in natural sciences. Emphasis is placed on appropriate instruction and resources, including technology for the instruction of students in grades K-6.
Prerequisite: admission to TEP.
Co-requisite: ELE L361.

**ELE L361 Teaching Natural Science Lab (1)**
This course includes Lab/Field-oriented experiences designed to enhance understanding of varied dimensions of instruction in natural science.
Prerequisite: admission to TEP.
Co-requisite: ELE 3361.

**ELE 3362 Teaching Mathematics (3)**
This course provides a study of the varied dimensions of instruction in mathematics. Emphasis is placed on appropriate instruction and resources, including technology for the instruction of students in grades K-6.
Prerequisite: admission to TEP, completion of MTH 2251 or MTH 2252 with a grade of C or better.
Co-requisite: ELE L362.

**ELE L362 Teaching Mathematics Lab (1)**
This course includes Lab/Field-oriented experiences designed to enhance understanding of varied dimensions of instruction in mathematics.
Prerequisite: admission to TEP, completion of MTH 2251 and 2252 with a grade of C or better.
Co-requisite: ELE 3362.

**ELE 4454 Internship Seminar for Elementary Education (3)**
This course provides seniors an opportunity during internship to examine broad educational issues and concerns, topics on the state and local levels and those of personal interest. The scope of the course ranges from juvenile law, classroom management professionalism, professional development for teachers and other course topics.
Prerequisite: admission to TEP.
Co-requisite: ELE Internship.

**ELE 4474 Internship in Elementary Education (9)**
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP.
Co-requisite: ELE 4454.

**ELE 4481 Methods and Materials for the Elementary Teacher (3)**
Teaching methods, selection, organization and use of materials and resources in the elementary school discipline(s). Observation and teaching experiences will be included.
Prerequisite: EDU 3310 and admission to TEP.

**ELE 4491-92 Guided Independent Research (1 to 3 credit hours)**
Undergraduate research with attention to critical evaluation of research techniques, methods and procedures.
Prerequisites: junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the Office of University Records. Guided independent research may be taken only in the applicant's major or minor field. Also see index for "Independent Study and Research.”.

**ELE 4493-94 Guided Independent Study (1 to 3 credit hours)**
Supervised study through field or laboratory projects, guided readings, creative endeavors or achievement of specific skills.
Prerequisites: junior or senior status, permission of guiding professor, approval of department chair and the dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Also see index for "Independent Study and Research.”.

**ENGLISH COURSES (ENG)**

**ENG 0096 Fundamentals of Grammar and Sentence Writing (3)**
Developmental/remedial instruction in the basic elements of standard American English grammar, with an introduction to the essentials of effective written communication. Involves application of appropriate computer software. Students are placed in this course, ENG 1100 or ENG 1101, depending on placement exam score; see the local campus testing center for specific cut-off scores. Students may also be required to attend weekly sessions at a writing and/or computer center.
Note: Under no circumstance may this course be used to substitute for any general studies requirement; nor may it be used to meet minimum degree requirements. Grade of C or better and successful completion of exit exam required.

**ENG 1100 Preparatory English (3)**
Developmental/remedial instruction in composition and mechanical skills needed to write clear, effective sentences and paragraphs. Involves application of appropriate computer software and a variety of written activities. Students are placed in this course, ENG 0096, or ENG 1101 depending on placement exam score; see the local campus testing center for specific cut-off scores. Students may also be required to attend weekly sessions at a writing and/or computer center.
Note: Under no circumstances may this course substitute for any general studies requirement; nor may it be used to meet minimum degree requirements. Grade of C or better required.

**ENG 1101 Composition And Modern English I (3)**
Intensive instruction in the writing process. Focuses on organization of ideas in well-developed expository and argumentative essays (usually six to eight essays), with stress on grammar, punctuation,
and vocabulary development. A grade of C or better is required for credit. Must be completed within first 30 hours of enrollment.

Prerequisite: Placement Testing.

ENG 1102 Composition and Modern English II (3)
Text-based analyses and application of principles and tools of research in writing short research papers. A grade of C or better is required for credit. Must be taken within first 30 hours of enrollment.  
Prerequisite: ENG 1101 or equivalent.

ENG 1103 Honors English Composition I (3)
Introductory study and practice of composition for the superior student.  
Prerequisite: Minimum English score of 27 on the ACT or 640 on the SAT, or recommendation by an 1101 instructor.

ENG 1104 Honors English Composition II (3)
Continuation of study and practice of composition for the superior student.  
Prerequisite: Minimum grade of C in ENG 1103 or recommendation by a 1101 or 1102 instructor.

ENG 2205 World Literature before 1660 (3)
Introduction to attitudes, philosophies, and reflections of life in world literary masterpieces from the ancient world, Middle Ages, and Renaissance. Requires demonstration of acceptable writing skills.  
Prerequisite: ENG 1102 or equivalent.

ENG 2206 World Literature after 1660 (3)
Introduction to attitudes, philosophies, and reflections of life in world literary masterpieces from the Enlightenment to the present. Requires demonstration of acceptable writing skills.  
Prerequisite: ENG 1102 or equivalent.

ENG 2207 Honors World Literature before 1660 (3)
A course for the superior student, focusing on representative selections of the world’s dramatic masterpieces in prose and poetry.  
Prerequisite: ENG 1104 or permission of department chair.

ENG 2208 Honors World Literature after 1660 (3)
A course for the superior student, focusing on representative selections of the fictional masterpieces in Western literature.  
Prerequisite: ENG 1104 or permission of department chair.

ENG 2211 American Literature before 1875 (3)
Study of works of selected writers in various American traditions and styles from colonial times to 1875.  
Prerequisite: ENG 1102 or equivalent.

ENG 2212 American Literature after 1875 (3)
Study of works of selected writers in various American traditions and styles from 1875 to the present.  
Prerequisite: ENG 1102 or equivalent.

ENG 2244 British Literature before 1785 (3)
A survey of British literature from its beginning to 1785.  
Prerequisite: ENG 1102 or equivalent.

ENG 2245 British Literature after 1785 (3)
A survey of British literature from 1785 to the present.  
Prerequisite: ENG 1102 or equivalent.

ENG 2260 Introduction to Technical and Professional Writing (3)
Technical communications for science, business, and professional work. Emphasis on writing for specific purposes to particular audiences in an organizational setting. Preparation of documents such as technical description of a mechanism or process, instructions, recommendations, reports, and resumes.

Note: course is a prerequisite for all required 3300 and 4400-level courses in the Professional Writing Emphasis. Students may take elective courses concurrently with this course.

ENG 3301 Women’s Literature (3)
Representative works of literature by women.  
Prerequisite: six semester hours of 2000-level English courses.

ENG 3305 Folklore/Mythology (3)
A multicultural survey of the forms and varieties of the mythology and folklore of major western cultures, emphasizing stories of Scandinavian, German, British, and American origin, and the application of these forms in modern cultures and literature. This course is recommended for English teachers seeking middle school certification.  
Prerequisite: six semester hours of 2000-level English courses.

ENG 3310 Fiction and Film (3)
Representation of fiction on film, with attention to visual techniques and the translation and representation of major literary themes.  
Prerequisite: six semester hours of 2000-level English courses.

ENG 3315 Modern Drama (3)
Study of plays written between 1900 and the present. List of plays may vary with each offering.  
Prerequisite: six semester hours of 2000-level English courses.

ENG 3320 Introduction to Linguistics (3)
Overview to linguistics, the scientific study of language. The course will acquaint students with the grammatical, social, biological, and technological applications of language.  
Prerequisites: ENG 1101, 1102.

ENG 3326 Science Fiction (3)
An exploration of the literary, social, and generic importance of science fiction.  
Prerequisite: six semester hours of 2000-level English courses.

ENG 3330 Introduction to Digital Humanities: A Literary Perspective (3)
This course offers students a basic introduction to the concepts, tools, and techniques of Digital Humanities (DH) geared toward applications in writing, literary and cultural studies. The course borders on the intersectionality of literature, in particular, and the humanities in general, with innovations in technology.

ENG 3333 Health, Medicine and the Humanities: The Intersectionality of Health Literature (3)
This course focuses on a study of texts and films by, for, and about health care providers, medical practitioners and patients from various global cultures in order to investigate the intersectionality of the humanities, medicine and health as a whole. We will explore how literature and motion pictures interact with communicable, non-communicable diseases, mental illnesses and other public health concerns paying particular attention to how language is used by both healthcare providers and recipients across cultures. The goal is to sow that even though medicine and healthcare are within the sciences, at their very nucleus is the humanities.

ENG 3341 Advanced Grammar I (3)
Detailed study of the structural system of English grammar.  
Prerequisite: six semester hours of 2000-level English courses.

ENG 3345 Technical and Professional Editing (3)
Principles and practices of editing technical and scientific documents. Overview of the editing process; defining the editor’s rules and responsibilities, revising at structural and sentence
levels, and addressing stylistic conventions of technical fields. Includes technical and scientific documents such as reports, proposals, and user manuals.
Prerequisite: ENG 2260 or permission of instructor.

ENG 3351 Introduction to Creative Writing I (3)
Practice in writing poetry, short stories, and/or plays, along with a concentrated study of the techniques and principles of creative writing in each genre.
Prerequisite: six semester hours of 2000-level English courses.

ENG 3352 Advanced Creative Writing I (3)
Continued practice in writing poetry, short stories, and/or plays, along with a more advanced study of the techniques and principles of creative writing in each genre.
Prerequisite: six semester hours of 2000-level English courses; ENG 3351 or permission of instructor.

ENG 3353 Advanced Creative Writing II (3)
Practice in writing poetry, short fiction, or plays for class and instructor evaluation.
Prerequisite: six semester hours of 2000-level English courses; ENG 3351 or permission of instructor.

ENG 3354 Advanced Nonfiction Writing (3)
The literature of fact. Emphasis on student writing and analysis of nonfiction forms, such as personal narrative, autobiography, lyric in prose, and New Journalism.
Prerequisite: six semester hours of 2000-level English courses; ENG 3351 or permission of instructor.

ENG 3355 Verse Writing (3)
Development of techniques in the practice of poetry, including expression through metrical patterns, rhyme, rhythm, imagery, metaphor, and symbolism.
Prerequisite: six semester hours of 2000-level English courses; ENG 3351 or permission of instructor.

ENG 3356 Form and Theory of Fiction (3)
Primarily a reading course for writers. Examination of the classic texts of literary theory; analysis of the use and purpose of the elements of fiction; and discussion of fiction form, from the short-short to hyper-text.
Prerequisite: six semester hours of 2000-level English courses.

ENG 3357 Form and Theory of Nonfiction Literature (3)
Examination of the theories behind various forms of nonfiction literature, whether autobiography, biography, the essay, diaries, and/or travel writing, with special emphasis on the historical evolution of a particular form. List of readings will vary with each course offering.
Prerequisite: six semester hours of 2000-level English courses.

ENG 3362 The Arthurian Legend through the Ages (3)
Examination of Arthur not only in literary and historical works from its earliest traces in the Middle Ages to the present, but also in archaeology, the visual and decorative arts (especially painting and sculpture), manuscript decoration, film, musical, and opera.
Prerequisite: six semester hours of 2000-level English courses.

ENG 3365 Advanced Technical & Professional Writing (3)
Study of technical communication as a dynamic process in organizational and social environments, including the manner in which organizational hierarchies, purposes, and stylistic conventions interact with the writing process. Professional literature and professional associations concerned with improving communications within students’ disciplines.
Prerequisite: ENG 2260 or permission of instructor.

ENG 3366 Professional Document Design (3)
Overview of the fundamental concepts and techniques of information design and production for both print and online documents, including the coordination of text, typography, and graphics; principles of audience analysis, usability, and readability; and an introduction to computer software for desktop publication and web design.
Prerequisite: ENG 2260 or permission of instructor.

ENG 3371 Literature for Adolescents (3)
Principles of and practice in the selection of literature for upper-elementary and for junior and senior high school students, with attention given to multicultural literature.
Note: No credit toward English major or minor. Credit applied only to middle school education certification program in English.
Prerequisite: six semester hours of 2000-level English courses.

ENG 3380 Sociolinguistics: Language, Culture and Society (3)
The study of the relations of language to culture and society, inclusive of regional, social, and stylistic variation, as well as gendered discourse. The course will introduce students to the socio-cultural factors in language varieties.

ENG 3385 Foundations of Second Language Acquisition (3)
Learning theory, acquisition barriers, various methodologies, communicative approaches and competence, and applied linguistics, including the practical issues of L2 learning.

ENG 4400 Selected Topics in Literature and/or Professional Writing (3)
Study of a topic of special interest and importance not covered in regularly offered courses in English.
Prerequisite: six semester hours of 2000-level English courses.

ENG 4401 Chaucer (3)
Study of Chaucer’s major poetry.
Prerequisite: six semester hours of 2000-level English courses.

ENG 4402 Studies in Medieval Literature (3)
Study of non-Chaucerian British literature from the Middle Ages, including Beowulf, Piers Plowman, Sir Gawain and the Green Knight, mystery plays, Le Morte d’Arthur, and other works.
Prerequisite: six semester hours of 2000-level English courses.

ENG 4403 English Renaissance Literature (3)
English prose and poetry of the 16th and 17th centuries with an emphasis on Sidney, Spenser, Donne, and Jonson.
Prerequisite: six semester hours of 2000-level English courses.

ENG 4404 Milton (3)
Milton’s poetry and major prose.
Prerequisite: six semester hours of 2000-level English courses.

ENG 4405 History of the English Language (3)
Study of the development of English from the Anglo-Saxon period through the present, with reference to the Indo-European background of English.
Prerequisite: six semester hours of 2000-level English courses.

<td>Southern Literature (3)</td>
<td>Study of works by writers from the American South from colonial times to the present. Prerequisite: Six semester hours of 2000-level English courses.</td>
</tr>
</tbody>
</table>
ENG 4452 Medieval and Renaissance English Drama (3)
Survey of drama from the middle ages and Renaissance, excluding Shakespeare. Begins with a brief study of folk and liturgical origins of drama, includes a few medieval mystery and morality plays, and features Renaissance plays by Heywood, Udall, Kyd, Marlowe, Beaumont, Fletcher, Jonson, and Webster. 
Prerequisite: Six semester hours of 2000-level English courses.

ENG 4453 English Drama through the 18th Century (3)
English drama (excluding Shakespeare) from the 9th through the 18th century. 
Prerequisite: Six semester hours of 2000-level English courses.

ENG 4455 Multicultural Literature (3)
A thematic study of minority American writers of various diasporic backgrounds. Works will include fiction and non-fiction by first/second generation immigrants in the United States including those of Native American people, in view of showing how they have contributed to the contemporary multicultural American landscape. 
Prerequisites: Six semester hours of 2200-level ENG courses.

ENG 4460 Victorian Poetry (3)
A study of Victorian poetry, with emphasis upon the works of Tennyson, Browning, Arnold, and Hardy. 
Prerequisite: Six semester hours of 2000-level English courses.

ENG 4461 Victorian Prose (3)
A survey of the works of major Victorian prose writers, with emphasis upon the works of Carlyle, Newman, Mill, Ruskin, Arnold, and Pater. 
Prerequisite: Six semester hours of 2000-level English courses.

ENG 4465 African American Literature (3)
Study of the major African American writers from the beginning of American history to the present. 
Prerequisite: Six semester hours of 2000-level English courses.

ENG 4466 Advanced Grammar II (3)
Advanced Grammar II: Descriptive constituent analysis of syntax in the context of generative grammar its relation to syntactic structures and to sentential meaning (semantics), including error/contrastive analysis, and to pragmatics and discourse analysis. 
Prerequisite: ENG 3341

ENG 4468 Methods and Approaches in Second Language Teaching (3)
This course traces the evolution of language teaching from the methods era (e.g. grammar translation method, audio lingual method) to post-methods approaches (e.g., task-based learning, content-based learning, communicative approaches). Students will develop a repertoire of teaching approaches, and identify appropriate options for different language teaching scenarios.

ENG 4470 Practicum and Assessments (3)
Overview of assessments and application of skills, concepts and principles in supervised experiences related to teaching ESL students. The Practicum is required for the TESOL Certificate. 
Prerequisite ENG 4468

ENG 4474 Internship in English/Language Arts Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience. 
Prerequisite: admission to TEP. 
Co-requisite: SED 4454.

ENG 4478 Theory and Practice of Composition: Writing and Learning Across the Curriculum (3)
A study of the methodology of teaching English composition and practice in advanced writing 
Prerequisites: Six semester hours of 2000-level English courses.

ENG 4481 Methods and Materials for the Secondary Teacher (3)
A survey of teaching methods and materials appropriate for teaching in the content areas for grades 6-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teacher evaluation in the public schools, collaboration with special education teachers, and lesson planning formats. In addition, teaching methods, selections organization and use of English language arts materials for grades 6-12 will be covered in detail. A professional laboratory experience is included in this course. 
Prerequisite: ENG 2260, and completion of at least three required courses and three electives in the major, or permission of instructor.

ENG 4488 Seminar in Professional Writing Portfolio Development (3)
Senior seminar. and development of a professional portfolio containing carefully selected materials that demonstrate seniors’ mastery of specific writing capabilities and skills. 
Prerequisite: senior class standing, ENG 2260, and completion of at least three required courses and three electives in the major, or permission of instructor.

ENG 4489 Internship (3)
Practical experience involving writing and editing skills while working under the supervision of the Alabama Literary Review staff. 
Prerequisite: ENG 3352, 3353 or permission of instructor.

ENG 4490 Professional Writing Internship (3)
Writing Practicum/Internship at a local industry, publisher, arts or public agency. Provides workplace experiences in solving problems in writing, including those of career preparation and development. 
Prerequisite: ENG 2260, and completion of at least three required courses and three electives in the major, or permission of instructor.

ENG 4491-94 Guided Independent Research and Study (3)
Thorough examination of material on a selected subject, requiring a documented research paper. Additional information indexed under “Guided Independent Research and Study.” 
Prerequisite: six semester hours of 2000-level English courses. Note: Students who need re-regmentation of regular classroom to do good academic work should not attempt these courses. Also see index for “Independent Study and Research.”
ENG 4495  Senior Seminar in English (3)
A senior-level course capstone designed to engage the student with the central questions of literary studies and to develop the student's skills in critical thinking and writing and in research. Must make a grade of C or better.
Prerequisite: senior status.

ENG 4498-99  Honors Research and Writing (1 credit hour per course per semester)
The above courses are designed for outstanding students majoring in English. Taken collectively, they constitute the English upper-level honors program in which students may specialize in a selected area of literary study. Upon successful completion of all course work and other requirements, the student will be recognized as a graduate with English honors.
Prerequisite: junior or senior level, grade point average no less than 3.2 in English studies and completion of the English honors application procedure. Consult the department chair for additional information.

ENTREPRENEURSHIP (ENT)

ENT 2200  Innovation and Creative Thinking (3)
What does it mean to be an innovative thinker? Is there a difference between being creative and thinking creatively? Innovation and Creative Thinking will provide students with the opportunity to discover their ability to think creatively through brainstorming, conceptual development, and play discovery.

ENT 2210  Innovation by Design (3)
Innovation by Design will showcase innovative companies, ideas, people, and models around the world. Students will learn about the process, challenges and failures that innovators have endured. Students will learn to identify needs, trends, and industry innovations that have created paradigm shifts and cultural revolutions. Most importantly, this course will attempt to have each student understand and believe in the necessity of innovation. This course is designed to inspire, and support innovative thinking to the aspiring entrepreneur.
Prerequisites: ENT 2200

ENT 3300  Product Development and Mentorship (3)
Product Development and Mentorship will investigate the resources needed to employ the innovative idea. These resources may be identified as, but not limited to, resourcing related to labor, materials and inventory, outsourcing, prototyping and brand identification. Students will conduct test market focus groups related to design, implementation, and brand awareness.
Prerequisites: ENT 2210

ENT 4400  Business Plan Development (3)
Business Plan Development will assist students in developing a comprehensive plan that contains a business summary, profile, market analysis, organization and management, service/product, equipment, marketing and promotion, financial projections, and funding needs. Students completing this course will earn NxtLevel Certification.
Prerequisites: ENT 2210

ENT 4480  Entrepreneurship Capstone (3)
Entrepreneurship Capstone is the culmination of the Troy Bank & Trust Entrepreneurship Program, this capstone course focuses on tying together the functional aspects of an entrepreneurial initiative to position it for growth and longevity. Students will compile a strategy for starting their business, from planning to implementation.

ENGLISH AS A SECOND LANGUAGE (ESL)

ESL 1100  Preparatory English Nonnative Speakers of English (3, with petition)
Instruction for nonnative speakers of English preparing for ENG 1101. Focus on application of rules of standard English grammar and U.S. composition patterns. Involves application of appropriate computer software and a variety of written activities. Students who do not pass the eWrite text are placed in this course. Students write five to seven in-class compositions and may be required to attend weekly session at the ESL Tutoring Center and ESL Computer Lab. Classes meet four days per week.
Note: This course will not substitute for any general studies requirement and will not be used in meeting minimum degree requirements.

ESL 1102  Listening/Speaking VI Advanced
Academic focus: listening strategies for academic lectures, such as anticipating and organizing information; understanding connecting words and pronoun referents; recognizing analogy, quotations, and paraphrasing. Skill-building exercises include listening for main ideas, making inferences, listening for specific information, summarizing, and recognizing vocabulary in context. Speaking focuses on delivering oral presentations, engaging in academic discourse. Computer Lab requirement.

ESL 1104  Reading VI Advanced
Helps the student be ready for academic reading. Vocabulary building through brainstorming vocabulary lists, and close exercises that help learners guess the meaning from context and see regularity in the language. Introduces students to the lifestyles, attitudes, customs, and traditions of Americans. Reading Lab requirement: one hour per week.

ESL 1106  Grammar VI Advanced
Review, expansion, and practice of auxiliaries and phrasal verbs, gerunds and infinitives, introduces adverbs and adverb clauses, noun clauses (subjects and objects), unreal conditionals and other ways to express unreality, and the subjunctive, inverted and implied conditionals. Includes in-depth analysis of sentence structure: sentence types, sentence fragments, parallelism of gerunds and infinitives, sentence and fragments, writing direct and indirect speech, and avoiding run-ons and comma splices. Independent CD-based exercises on topics covered in 1106 – two hours per week.

ESL 1108  Writing VI Advanced
Focus on essay construction. Emphasis is placed on coherence, unity, and writing well-developed and well-organized essays. Explores different rhetorical patterns (chronological order, logical division of ideas, cause-effect, comparison/contrast, etc) as means to the end in fulfilling academic writing assignments. Study of different ways to organize and present ideas for different groups of readers. Emphasis on writing as a process, with frequent group work to generate ideas and practice peer editing. Writing Lab requirement: one hour per week.

ESL 1111  Research Writing Skills
This course is designed for advanced students who have successfully completed Level VI. The objective of the course is to build upon the skills learned in previous levels and better equip the students with college-level skills in writing and research. Students will engage in writing research-
FINANCE COURSES (FIN)

FIN 2210 Personal Financial Planning (3)
Introduction and comprehensive overview of personal financial planning. Topics include introduction to financial planning, managing assets, credit, insurance, investments, retirement and estate planning.

FIN 3331 Managerial Finance (3)
Analysis, planning and control of key financial decisions of the firm. 
Prerequisites: Lower-level Core, ACT 2291, and MTH 1112

FIN 3332 Financial Management II (3)
Second course in a sequence of corporate finance. Continuation of FIN 3331 with focus on topics in financial management not covered in FIN 3331. 
Prerequisites: FIN 3331.

FIN 3333 Financial Mathematics (3)
Analysis of time value of money as it applies to loans, securities, banks, annuities, and insurance. 
Prerequisite: MTH 1112

FIN 3334 Financial Statement Analysis (3)
The process of understanding financial statements by financial analysts and credit analysts, and other uses of financial data. 
Prerequisite: FIN 3331.

FIN 3336 Real Estate Finance I (3)
Procedures and operations of real estate mortgage markets. 
Prerequisite: FIN 3331.

FIN 3360 Entrepreneurial Finance (3)
This course covers financial issues related to entrepreneurship. The focus is on how to apply financial tools and skills to entrepreneurial businesses. The topics covered in this course include financial management and planning, financial statement analysis, time value of money, capital budgeting, working capital management and sustainability. 
Prerequisites: FIN 3331, MGT 4475.

FIN 4419 Derivatives (3)
This course examines theory and usage of forward contracts, future contracts, index futures, Markov and Wiener processes, Black Scholes analysis, options, Indexed options, and hedging using naked and covered positions, and other nonstandard derivative securities.
Prerequisite: FIN 3331.

FIN 4431 Intermediate Financial Management (3)
Analysis of financial management of a firm at the intermediate level, with emphasis on the corporation. Includes more advanced analysis of topics covered in FIN 3331 as well as other advanced topics. 
Prerequisites: FIN 3331.

FIN 4432 Investments (3)
Financial analysis of investments, including markets, institutions, and instruments with emphasis on security analysis, portfolio analysis, and financial planning. 
Prerequisite: FIN 3331.

FIN 4434 Financial Modeling (3)
This course provides an examination of standard financial models used in corporate finance, financial statement stimulation, portfolio problems, options, portfolio insurance, duration, and immunization. The primary focus of study is on the application of strategic models of decision making and marketplace activity within the stimulated environments which approximate real time. 
Prerequisite: FIN 4432.

FIN 4435 International Finance (3)
A comprehensive introduction and overview of international finance with emphasis upon multinational corporation management, international trade, foreign exchange, and international financial markets, institutions, and instruments. 
Prerequisite: FIN 3331.

FIN 4436 Securities Analysis (3)
Introduction and comprehensive overview of securities analysis. Topics include stocks, bonds, mutual funds, taxes, annuities, new issues, IPOs, OTC, exchanges, options, margin trading, short selling, laws and regulations, and fundamental technical, and modern security and portfolio analysis techniques. 
Prerequisite: FIN 4432

FIN 4437 Financial Institutions (3)
A comprehensive study of financial markets, institutions, instruments, etc. 
Prerequisite: FIN 3331 and FIN 4431.

FIN 4438 Bank Management (Capstone) (3)
Introduction and comprehensive overview of bank management. Topics include: organization, regulation, performance, asset management, liabilities management, credit policy, loan evaluation, global banking, bank mergers and acquisitions, etc.
Prerequisites: FIN 3331

FIN 4440 Real Estate Finance II (3)
Second course in a sequence on real estate finance. Continuation of FIN 3336.
FIN 4454 Public Finance (3)  
This course examines and analyses public finance from the perspective of the financial management of governmental enterprises. It examines revenues and expenditures at all levels of government, the financial management of government enterprises, and effects of public finance on business and finance and personal finance.  
Prerequisite: FIN 3336.

FIN 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)  
Additional information is indexed under Independent Study and Research.  
Note: This course may not be substituted for any required course.

FIN 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)  
Additional information is indexed under Independent Study and Research.  
Note: This course may not be substituted for any required course.

FIN 4499 Internship (3)  
The Finance Internship provides a supervised work experience that provides students with the opportunity to gain applied work experience their field of study. Students with the opportunity to gain real-world experience in their field of study. Students are interviewed and selected by the individual companies offering the internship. This course may be repeatable and must comply with the SCOB internship policy. See the Economics/Finance division chair for details.

FRENCH COURSES (FRN)  
Note: For additional information, see Placement in Academic Courses.

FRN 1101 Introductory French I (3)  
Introduction to the French language and culture.

FRN 1102 Introductory French II (3)  
Introduction to the French language and culture.  
Prerequisite: FRN 1101 or permission of instructor.

FRN 2201 Intermediate French I (3)  
Reinforcement of fundamental skills, study of sophisticated language structures and reading of simple French prose and poetry.  
Prerequisite: FRN 1102 or permission of instructor.

FRN 2202 Intermediate French II (3)  
Reinforcement of grammatical skills, reading of simple French prose and poetry, composition and conversation.  
Prerequisite: FRN 2201 or permission of instructor.

FRN 3310 French Culture on Location I (3-TBA)  
An in-depth presentation of French culture combining lectures, readings, films, audiotapes, discussions and intensive language practice on the Troy Campus with on-site visit to a Francophone environment.  
Prerequisite: Permission of instructor.

FRN 3311 French Culture on Location II (3-TBA)  
An in-depth presentation of French culture combining lectures, readings, films, audiotapes, discussions and intensive language practice on the Troy Campus with on-site visit to a Francophone environment.  
Prerequisite: Permission of instructor.

FRN 4491/92 Guided Independent Research (1 to 3 credit hours per course per semester)  
Additional information is indexed under Independent Study and Research.

FRN 4493/94 Guided Independent Study (1 to 3 credit hours per course per semester)  
Additional information is indexed under Independent Study and Research.

GAME DESIGN AND DEVELOPMENT COURSES (GDD)

GDD 2210 History Through Games (3)  
This course will utilize a variety of different game formats, including video games, role-playing games, board games, and sports to explore historical concepts and events. Students will be encouraged to think analytically about the ways games interpret historical events versus textbook explanations.

GDD 3310 History of Game Design (3)  
A focus on the history and development of different types of games and game mechanics. Emphasis placed on integrating games with their particular cultural and political context. Students will produce a working prototype of a game as a part of the class.

GDD 3320 Game Development (3)  
An introduction to the concepts of game development, including theory, playtesting, marketing, crowdfunding, and the publication process. Students will refine and continue development of a game as a part of the class.  
Prerequisite: Either HIS 2210/GDD 2210 History Through Games

GDD 4425 Special Topics in Game Design and Development (3)  
Advanced study of a designed topic of special interest.  
Prerequisites: Either HIS 2210/GDD 2210 History Through Games OR GDD 3310/HIS 3310 Game Design History AND permission of the instructor.

GDD 4490 Internship in Game Design and Development (3)  
Supervised work in an agency that can provide practical experience in the field of study.  
Prerequisites: Senior standing, at least a 2.5 GPA, at least 12 completed hours towards the Game Design and Development minor, and the permission of the minor advisor, supervising instructor, department chair, and/or dean.

GDD 4499 Game Design Capstone (3)  
This course requires the student to synthesize previous coursework in the minor. Students complete design and development of a working game, suitable for crowdsourcing, and public release.  
Prerequisite: 15 hours of Game Design and Development minor coursework, including GDD 3320 Game Development.

SURVEYING AND GEOMATICS SCIENCES COURSES (GEM)

GEM 1100 Computer-Aided Drafting I (2)  
This course gives students basic skills using computer-aided drafting software in fundamental two dimensional drafting and design, and advanced techniques in three-dimensional geometric modeling.

GEM 1101 Computer-Aided Drafting II (2)  
This course gives students skills in surveying.
drafting, map components, and fundamental skills
in drafting basic surveying features using computer
aided software.

Prerequisite: GEM 1100.

GEM 2220 Basics of Surveying (3)
This course provides each student an introduction to
measurement theory, instrumentation, measurement
systems, measurement computations, data accuracy and precision. The structure of the
field of geomatics is explored. Major components
of the course are survey statistics, traverse
computations, coordinate systems and datums, elevations, and mapping. The use of computer-
aided drawing software to produce maps and plats is required.

Prerequisites: MTH 1114.

GEM L220 Basics of Surveying Lab (1)
This field laboratory provides the opportunity to
use instrumentation to make the necessary
measurements to produce computed products.
Focuses on the use of field books to record
measurements, the analysis of field measurements, and the use of survey instrumentation.

Prerequisite: MTH 1114.

GEM 3309 Land Survey Principles (3)
The course includes the basic principles of land
tenure and the cadaster with the major component being the study and application of survey statute and related case law. The concepts underlying the hierarchy of evidence, sequential versus simultaneous conveyances, adverse possession, riparian rights, land descriptions, and the U.S. Public Land Survey System are explored.

Prerequisite: GEM 2220

GEM L309 Land Survey Principles Lab (1)
This laboratory explores the impact of land survey
law on the practice of surveying and mapping in the state of Alabama. Focuses on the practice of writing legal descriptions, the structure of the U.S. Public Land Survey System and courthouse research.

Prerequisite: GEM 2220

GEM 3310 Land Survey Practice (3)
The issues of boundary location and retracement are central to this course. Focuses on Alabama survey history, the practice of surveying in Alabama, professional ethics, and the Standards of Practice for Surveying in Alabama.

Prerequisite: GEM 3309.

GEM L310 Land Survey Practice Lab (1)
Students will participate in surveys of sectionalized land in Pike County. Section corners, quarter corners and other evidence will be located using GPS and traditional surveying methods. Students will also be assigned a township research project and will present the research results to the class.

Prerequisite: GEM 3310.

GEM 3330 Advanced Measurement Analysis (3)
Survey equipment calibration, instrumentation error, topographic mapping, control leveling, instrumentation error, and the propagation of error through survey calculations. This course is the second course of a one-year study of survey fundamentals.

Prerequisite: GEM 2220.

GEM L330 Advanced Measurement Analysis Lab (1)
Field laboratory experience using EDMI calibration baselines, conducting topographic mapping projects and control leveling loops, and testing for instrument errors. The student is introduced to the field use of data collectors.

Prerequisite: GEM 3330.

GEM 3366 Photogrammetry and Remote Sensing (3)
Introduction to metrical photogrammetry, interpretative photogrammetry, and remote sensing. Focuses on the theory, instrumentation, and practical application of photogrammetry to the problem of mapping the earth’s surface. Remote sensing concepts, principles, sensors, and specific satellite platforms are covered in the course. Hands-on exercises are given that makes use of software to create stereo models, orthophotos, and perform image processing.

Prerequisite: MTH 1125, STAT 2210, MTH 2230, GEM 3330.

GEM 3379 Introduction to Least Squares Adjustment (3)
The theoretical principle of error propagation and least squares adjustment theory to compute optimized solutions to geomatics problems involving redundant data. The use of mathematical scripts and least squares software to solve spatial data adjustment problems in land surveying and geomatics applications.

Prerequisite: MTH 1125, STAT 2210, MTH 2230, GEM 3330.

GEM 3395 Cooperative Work Experience I (1)
The course provides students with experience working with an employer approved for the Cooperative Work Experience component of the Surveying and Geomatics Sciences Program. The student is expected to submit a written and oral report to the faculty member directing the project, detailing the work experience.

Prerequisites: GEM 2220, 2.0 overall grade point average, and approval of the Geomatics Program Director.

GEM 4405 Route and Construction Surveying (3)
Explores the theoretical foundations of route and construction surveying. Course topics include coordinate geometry (COGO), horizontal and vertical curve models, spirals, alignments, stationing, cross sections, areas, volumes, and route design elements.

Prerequisites: GEM 3330.

GEM L405 Route and Construction Surveying Lab (1)
This field laboratory applies the principles of route and construction surveying, the use of civil design software, and the use of data collectors for practical design and field layout.

Prerequisite: GEM 4405.

GEM 4407 Land Development (3)
Explores the concepts and problems associated with the design and construction of subdivisions and related infrastructure.

Prerequisites: GEM 4409.

GEM L407 Land Development Lab (1)
This computer laboratory provides the student the opportunity to design and create those drawings necessary for local government approval of the typical subdivision.

Prerequisite: GEM 4407.

GEM 4408 Geodesy and Geodetics (3)
Focuses on mathematical models of the earth, survey astronomy, the earth’s gravity field, and coordinate systems, and geodetic reference framework. Important skills developed in this course include coordinate and datums transformations, map projections, astronomical observation, geodetic computations, surveying network design, and geodetic control survey.

Prerequisites: MTH 1125.

GEM 4409 Hydrology (3)
Explores several models used to compute runoff estimates based on particular rainfall events. Course topics are the hydrologic cycle, rainfall intensity, runoff models, hydrographs, storm sewer design, culvert design, open channel flows, watersheds.
delineation, water detention and retention structures, and onsite sewage disposal systems.

GEM L409 Hydrology Lab (1)
Compute peak runoff estimates, and open channel designs. Computer models are explored with respect to solving and presenting peak runoff solutions. A design project involving the use of large-scale topographic maps will be assigned.

GEM 4410 Introduction to Global Positions (GPS) (3)
Introduction to history and development of GPS and global navigation satellite systems (GNSS); GPS signals and observables; basic principles of GPS operations; GPS error analysis; GPS survey methods and procedures; and GPS data collection, processing; and GPS applications to Geomatics.
Prerequisite: GEM 3390.

GEM 4490 Geomatics Capstone (1)
This course prepares students for the national Fundamentals of Surveying exam to cover all aspects of the exam.
Prerequisite GEM 4409

GEM 4493 Guided Independent Study (1-3)
Supervised study through creative field and laboratory projects in the Surveying and Geomatics field. A written request is to be submitted to the guiding professor and Program Director at least two weeks in advance of the term in which the study is to be undertaken. This study is NOT to be used to repeat a course for which a grade of 'D' or below has been earned. Application forms are available in the office of University Records. For more information see index for "Independent Study and Research".
Prerequisites: GPA of 3.0, permission of guiding professor, approval of Geomatics Program Director, Department Chair, and Dean.

GEM 4494 Guided Independent Study (1-3)
Supervised study through guided readings, creative endeavors in the Surveying and Geomatics field. A written request is to be submitted to the guiding professor and Program Director at least two weeks in advance of the term in which the study is to be undertaken. This study is NOT to be used to repeat a course for which a grade of 'D' or below has been earned. Application forms are available in the office of University Records. For more information see index for "Independent Study and Research".
Prerequisites: GPA of 3.0, permission of guiding professor, approval of Geomatics Program Director, Department Chair, and Dean.

GEM 4496 Cooperative Work Experience II (1)
The student must be in residence at Troy University for a minimum of one semester after completion of GEM 3395 before leaving for cooperative work experience under GEM 4496. The student is expected to submit a written and oral report to the faculty member directing the project, detailing the work experience.
Prerequisites: GEM 3395 and approval of the Geomatics Program Director.

GEO 2210 World Regional Geography (3)
Physical and cultural features, economy, and populations of the geographic regions of the world.

GEO 2299 Basic GIS (3)
This course is for students who are interested in learning the basics about Geographic Information System (GIS) and use of this powerful technology to create maps, collect data, and perform advanced analysis. This course is designed for a broad audience.

GEO 3300 Principles of Physical Geography (3)
Earth geography including climate, soils, natural vegetation, water resources, rocks, minerals, and surface structures.

GEO 3301 Principles of Cultural Geography (3)
Interrelationship of geographical elements in various world situations.

GEO 3307 Geography of Europe (3)
Selected topic studies in the physical and cultural environment, resource distribution, economy, and population characteristics of the European-Slavic land areas. Special attention will be devoted to the study of the geo-political influence of this area or least developed nations and the U. S.

GEO 3309 GIS/Spatial Data Applications in Criminal Justice (3)
An introduction to the use of spatial data applications in a wide range of real world policing endeavors; i.e., monitoring sexual predators, traffic accident reporting and modeling, crime scene analysis. One field trip to the Department of Public Safety in Montgomery, Ala. is required.

GEO 3312 Geography of Latin America (3)
An analysis of the major physical and cultural aspects of Middle and South America.

GEO 3326 Geography of the Russian Realm (3)
An analysis of the physical and cultural aspects of Russia and the other former republics of the Soviet Union.

GEO 3331 Geography of the Middle East and North Africa (3)
Physical setting, resource distribution, economy, population characteristics, and geopolitical importance of the region.

GEO 3350 Weather and Climate (3)
A study of the physical properties of weather and climate.

GEO 4402 Political Geography (3)
Analysis of the reciprocal effects of geography and political organization on the behavior of states including boundaries and frontiers, national resources, spatial strategy, and maritime power.

GEO 4403 Conservation (3)
The conservation of natural and human resources with emphasis on population expansion as the major element in changing ecology.

GEO 4404 GIS/Spatial Data Applications in Economics (3)
An introduction to the use of spatial data applications in the fields of business and economic development, including site selection and analysis of customer characteristics.

GEO 4406 Urbanism (3)
Historical, physical, economic, and societal evolution of the urban area. American metropolitan problems and implications for policy and planning.
Note: One field trip required at student’s expense. This course may be taken for sociology credit.

GEO 4408 Rural America: Past and Present (3)
A study of rural society, its organization, agencies, institutions, population trends and composition,
patterns of settlement, social processes, and change in character.

**GEO 4411** Population and Society (3)
This course provides an overview of how to analyze and think about changing population trends in the U.S. as well as around the world. Students will learn how to relate contemporary and pressing problems such as migration, population growth, fertility, death rates, and other population changes to current social and economic policy debates (e.g., funding for Social Security, education, healthcare, etc.).

**GEO 4415** North American Geography (3)
Survey of agricultural, industrial, and commercial development of Anglo-America. Covers physical and cultural environment, resource distribution, economy, and population characteristics.

**GEO 4435** Historical Geography of North America (3)
An analysis of the physical and cultural factors in the development of North America from early European settlement to the present.

**GEO 4485** Practicum in GIS/Spatial Data (3)
Supervised GIS projects on a topic chosen by the student. Intended to give practical experience for the student seeking GIS employment post-graduation.

**GEO L485** GIS/Spatial Data Modeling Lab (2)
The purpose of this lab is to allow the students to demonstrate their ability to collect, formulate, analyze, and draw conclusions based upon a real world modeling exercise.

**GEO 4491-92** Guided Independent Research (1 to 3 credit hours per course per semester)
Undergraduate research with attention to critical evaluation of research techniques, methods and procedures.
Prerequisites: Junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which the study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”

**GEO 4493-94** Guided Independent Study (1 to 3 credit hours per course per semester)
Supervised study through field and laboratory projects, guided readings, creative endeavors or achievement of specific skills.
Prerequisites: Junior or senior standing, with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which the study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”

**GEO 4498** Honors Independent Study (1 to 3 credit hours)
Advanced research and study for outstanding students in their major field. Culminates in report to a department committee which includes invited faculty members in related fields.

**GERMAN COURSES (GER)**

**GER 1121** Introductory German I (3)
Introduction to the German language and culture.

**GER 1122** Introductory German II (3)
Introduction to the German language and culture. Prerequisite: GER 1121 or permission of instructor.

**GER 2221** Intermediate German I (3)
Emphasis on basic language skills and knowledge of German culture. Prerequisite: GER 1122 or permission of instructor.

**GER 2222** Intermediate German II (3)
Emphasis on basic language skills and knowledge of German culture. Prerequisite: GER 2221 or permission of instructor.

**GER 4493-94** Guided Independent Study (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

**GREEK COURSES (GRK)**

**GRK 1111** Introductory Greek I (3)
Introduction to the ancient Greek language with emphasis on pronunciation, basic vocabulary, fundamentals of grammar, and graded readings.

**GRK 1112** Introductory Greek II (3)
Continuation of GRK 1111. Prerequisite: GRK 1111 or permission of instructor.

**GEOGRAPHIC INFORMATION SCIENCES COURSES (GIS)**

**GIS 3301** Cartography & Geovisualization (3)
Skills and knowledge required to design, produce and reproduce maps, and understand the computation issues relating to these workflows, and capabilities for representing and interpreting spatial information through maps and related mapping products.

**GIS 3305** Spatial Information and Analysis (3)
Skills and knowledge related to spatial processes, point patterns, and autocorrelation in area data, as well as in continuous fields. Prerequisite: GIS 3390

**GIS 3310** Introduction to Remote Sensing (3)
The course introduces the basics and application of remote sensing for earth observation. It covers physical principles of remote sensing technologies, different types of remote platforms and sensors, data acquisition, storage, processing, interpretation, analysis, and applications.

**GIS 3390** Fundamentals of Geographic Information and Analysis (3)
This course is the first course in a one-year study of the fundamentals of Geographic Information Systems (GIS). Topics of study are digital mapping, data capture, data conversion, data structures, and spatial data concepts. Hands-on exercises are included using some of the common GIS software.

**GIS 3391** Application of Geospatial Information Sciences (3)
This course provides a study of common applications of GIS. The course provides further study in database design, digital base map analysis.
and testing, and spatial analysis. Hands-on exercises are included using some of the common GIS applications. **Prerequisite:** GIS 3390.

**GIS 3395 Study Abroad in Geospatial Information Sciences (3)**
This course provides an opportunity for Geomatics/GIS students to explore spatial applications on a global scale through study abroad and an international field trip, to expand their understanding of their global identity, and to enhance their intercultural competence within their personal and professional development. **Prerequisite:** GIS 3390.

**GIS 4401 Spatial Database Design and Management (3)**
Introduction to design, implementation, and management of spatial data base systems; modeling and representation of spatial objects; fundamentals of relational database design, normalization, and SQL; spatial data queries, spatial indices, and integrity constraints; and spatial database management and applications. **Prerequisite:** GIS 3390.

**GIS 4405 Spatial Modeling and Programming (3)**
Introduction to geospatial analysis and modeling process using GIS modeling tools and programming languages. Focuses on GIS customization, integration of basic geoprocessing tools, programming fundamentals of Python, spatial data access and manipulation with Python, design and implementation of geospatial solutions to automate geoprocessing tasks using Python. **Prerequisite:** GIS 3390.

**GIS 4415 Advanced Geospatial Technologies (3)**
This course provides students an introduction to advanced technologies in geospatial data collection and analysis, including GNSS, LiDAR, terrestrial 3D scanner, UAS, and their integration with Geographic Information Systems. **Prerequisite:** GIS 3390.

**GIS 4420 Web Based GIS/ Spatial Data Applications (3)**
The student will learn the techniques and protocols needed to develop and transmit spatial databases for use by a variety of interests on the World Wide Web. “Remote” spatial data analysis on existing databases will be an important component of the course.

**GIS 4490 GIS Senior Project (3)**
This course offers students, with senior status, an opportunity to independently apply fundamental principles and concepts learned in the study of geospatial information science to a specific application. Each student will identify a specific problem, conduct background and literature research, collect and analyze spatial data, design and implement GIS functions/models to solve the problem, state conclusions and present the study in a final report. **Prerequisite:** Senior standing

**GIS 4499 GIS Internship (3)**
The course provides students with real work experience with an employer approved for the internship component of the GIS major. The student is expected to submit a written report and oral presentation to the faculty member directing the project, detailing the work experience. **Prerequisite:** GIS 3391

**HISTORY COURSES (HIS)**

**HIS 1101 Western Civilization I (3)**
Survey of developments in Western history from the pre-historic era to early modern times, including classical antiquity, Middle Ages, and Renaissance and Reformation.

**HIS 1102 Western Civilization II (3)**
Survey of developments in Western history from modern times to the contemporary era, including the Scientific Revolution, Enlightenment, French Revolution and Napoleon, nationalism, imperialism, two world wars, and the postwar era.

**HIS 1103 Honors Western Civilization I (3)**
Chronological coverage same as HIS 1101. Enrollment restricted to superior students. **Prerequisite:** Permission of department chair.

**HIS 1104 Honors Western Civilization II (3)**
Chronological coverage same as HIS 1102. Enrollment restricted to superior students. **Prerequisite:** Permission of department chair.

**HIS 1111 U.S. to 1877 (3)**
Survey of American history from the colonial period through Reconstruction, including the Revolution, Constitution, Early National Era, sectional problems, and the Civil War.

**HIS 1112 U.S. since 1877 (3)**
Survey of American history from post-Reconstruction to the contemporary era, including industrialization, emergence as a world power, World War I, Great Depression, World War II, Cold War, the expanding role of government, and global issues in the post-Communist era.

**HIS 1113 Honors U.S. to 1877 (3)**
Chronological coverage same as HIS 1111. Enrollment restricted to superior students. **Prerequisite:** Permission of department chair.

**HIS 1114 Honors U.S. since 1877 (3)**
Chronological coverage same as HIS 1112. Enrollment restricted to superior students. **Prerequisite:** Permission of department chair.

**HIS 1115 World History to 1500 (3)**
This course surveys the origins, development, and character of the major centers of civilizations and their relationships to one another from the earliest civilizations to 1500.

**HIS 1116 World History from 1500 (3)**
This course surveys the growth, development, and character of the major centers of civilizations from 1500 to the present. The course focuses on the growing interconnections among societies around the globe in politics, economics, culture, and technology and examines the wide processes leading to the emergence of the present world.

**HIS 1117 Honors World History I to 1500 (3)**
Chronological coverage same as HIS 1115. Enrollment restricted to superior students. **Prerequisite:** Permission of department chair.

**HIS 1118 Honors World History II to 1500 (3)**
Chronological coverage same as HIS 1116. Enrollment restricted to superior students. **Prerequisite:** Permission of department chair.

**HIS 2110 History Through Games (3)**
This course will utilize a variety of different game formats, including video games, role-playing games, board games, and sports to explore historical concepts and events. Students will be encouraged to think analytically about the ways games interpret historical events versus textbook explanations.
HIS 2215 History Through Movies and Music (3)
This course will explore historical topics through various popular culture sources, including movies and music. Students will be encouraged to compare the popular culture material with historical events as well as analyze the sources in the context of their times.

HIS 2220 Cultural History of Alcohol and Drug Use in the United States (3)
This course examines attitudes, laws, religious structures, and political movements related to the prohibition and promotion of alcohol and other drugs in various periods in America’s past. The course will examine films, music, novels, and dramatic works in an attempt to understand the role of mood-altering substances in American life. Particular attention will be paid to attempts to provide solutions to problems associated with alcohol and drug use such as the prohibition movement, Alcoholics Anonymous, medical-based treatment programs, and prevention programs.

HIS 2225 The African-American Experience (3)
This course explores African-American history from slavery through the present day, with a focus on societal roles and contributions, along with political thought and cultural movements. The course emphasizes the importance of this history and culture in understanding the world today.

HIS 2230 General Topics in History (3)
Historical examination of a designed topic of special and/or current interest and importance generally not covered in regularly offered courses by the department. This course may be repeated once for credit.

HIS 2280 Travel Study in History (1-3)
Supervised investigation of relevant topics in history through travel-study abroad or within the interior of United States.
Prerequisite: Permission of instructor. Course may be repeated with permission of instructor.

HIS 3302 History of Religion in the United States (3)
A study of the development of religion in the United States, including denominations, beliefs, church life, and the relationship of religious beliefs to other beliefs and institutions.
Prerequisite: HIS 1111 and 1112 or permission of instructor

HIS 3304 Military History of the United States (3)
A study of war in United States history from the Colonial period to the present, with emphasis on the role of warfare in United States history and the relationship of the military to the civilian.
Prerequisite: HIS 1111 and 1112 or permission of instructor

HIS 3314 History of Game Design (3)
A focus on the history and development of different types of games and game mechanics. Emphasis placed on integrating games with their particular cultural and political context. Students will produce a working prototype of a game as part of the class.

HIS 3316 History of Alabama (3)
A study of the demographic, political, social, economic, and religious aspects of Alabama’s history, emphasizing the role of the state within the nation.

HIS 3331 Western Thought since the 17th Century (3)
Principal ideas and political thinking from the Age of the Enlightenment to the present.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor

HIS 3346 Cultural History of the United States to 1877 (3)
A study of American society through its literature, religion, philosophy, and the arts. Emphasis will be on immigration patterns, European cultural transfer, and environmental adaptations that created the American character.
Prerequisites: HIS 1111 and HIS 1112 or permission of instructor.

HIS 3347 Cultural History of the United States since 1877 (3)
This course provides a concentrated study of changing thought patterns resulting from the rise of Big Business, theories of the public interest, and the emergence of the United States as a world power. Wide opportunities for reading offered in religion, philosophy, literature, and the arts
Prerequisites: HIS 1111 and HIS 1112 or permission of instructor.

HIS 3365 Bioethics in Historical Context (3)
This course focuses on the development of bioethics, organized both chronologically and thematically. By situating fundamental ethical questions in historical context, we will analyze the influence of developments in science and technology (e.g., introduction of new drugs, transplantation, dialysis, cloning), as well as the cultural, political, and legal contexts of key ethical issues.

HIS 3375 Research and Methodology (3)
A course designed to acquaint students with research methods and computer skills as related to the history profession. The principal requirement is the successful completion of a formal research paper in which students will demonstrate proficiency in research, writing, and basic computer skills.
Note: It is strongly recommended that history majors complete this course during the first term of their junior year. Prerequisite: Nine semester hours of history surveys including one of the freshman/sophomore-level series. Note: Students must receive a grade of C or better for credit toward completion of degree requirements.

HIS 3382 Travel Study in History (1-3)
Supervised investigation of relevant topics in history through travel-study abroad or within the interior of the United States
Prerequisite: Permission of Instructor
May be repeated for credit with permission of instructor

HIS 4401 French Revolution and Napoleon (3)
A study of absolutist-aristocratic France challenged by democratic-egalitarian ideals and revolution, including the role of Napoleon as conqueror of Europe and as propagator and destroyer of the French Revolution.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.
HIS 4402 Nineteenth Century Europe 1815-1914 (3)  
A study of Europe from the Congress of Vienna to 1900, including political, social, and economic developments in various countries, the rise of nationalism and unification movements, and imperialism.  
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4404 Modern Eastern Europe (3)  
This course examines political, economic, and social developments of nineteenth- and twentieth-century Eastern Europe from the Revolutions of 1848 through the collapse of the Soviet bloc and beyond. The course analyzes the impact of the disintegration of Russian, Ottoman, and Habsburg empires on inter-war Eastern Europe; examines the establishment, development, and eventual collapse of communism in the region; and explores the dynamics of post-Cold War European integration.  
Prerequisites: HIS 1101 and HIS 1102 or HIS 1122 and HIS 1123 or permission of the instructor.

HIS 4405 Old South (3)  
An examination of the cultural, political, religious, and economic trends that shaped the colonial and antebellum South and the Civil War which ended that era.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4406 New South (3)  
An examination of the political, social, racial and religious trends and policies that defined the New South. Topics include reconstruction, redemption, agrarian unrest, Jim Crow, industrialization, Progressive Movement, World War I, the Great Depression, World War II, and the Civil Rights Movement.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4407 Jacksonian America (3)  
A study of the emerging American nation. Topics will include Jeffersonian and Jacksonian democracy, the market revolution and slavery, the Second Great Awakening, and rise of reform movements, Manifest Destiny and the Mexican War.  
Prerequisites: HIS 1111 and HIS 1112 or permission of instructor.

HIS 4409 Infectious Diseases and History (3)  
The courses provides a study of the causes and effects of infectious diseases on major events in human history from the Neolithic revolution to the present. A selected case study will be presented.  
Prerequisites: HIS 1101 and HIS 1102 or HIS 1122 and HIS 1123 or permission of the instructor.

HIS 4410 Gender, Health, and History (3)  
Explores the historical relationships between sex, gender, and medicine in the western world and improves students’ cultural and historical literacy, understanding of major health issues in the health professions, the role of gender and sex in medicine and culture, and the diversity of medical and social practices.  
Prerequisites: HIS 1101 and HIS 1102 or HIS 1122 and HIS 1123 or permission of the instructor.

HIS 4411 Colonial America (3)  
Study of the colonial period from European discovery to the end of the French and Indian War, with emphasis on the political, economic, and social developments that set the stage for the American Revolution.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4412 American Revolution and New Nation (3)  
Ideas and institutions which led to American independence, the creation of an American union, and the development of a distinctive American culture in the period preceding 1800.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4413 Sectionalism, Civil War, and Reconstruction (3)  
Examines territorial expansion, slavery, and sectional strife, and the resulting Civil War and Reconstruction.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4414 Rise of Industrial America, 1877-1920 (3)  
Examines the period in American History between 1877 and 1920. Topics covered include the results of Reconstruction, the development of the New South, agricultural decline and crisis, industrialization and urbanization, Progressive Era reform, the growth of America as a world power, and the causes and effects of World War I.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4415 Post World War II America (3)  
Examines the political, economic, and cultural themes in American history from 1945 to the present. Topics covered include the effects of World War II, the origins and development of the Cold War, the Civil Rights Movement, the social movements of the 1960s and 1970s, the Vietnam War, the economic and political crises of the 1970s, the rise of conservatism in the 1980s, and the effects of America’s rise to superpower status.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4419 World War II (3)  
This course explores the Second World War in its global context from its origins to its conclusion. We will examine the causes, conduct, and consequences of the war, the personalities involved, and the influence the war has had on the modern world. Both the European and Pacific Theatres will be examined, as will the home front. Emphasis will be placed on the political, military, and social developments during the war.  
Prerequisites: HIS 1101/1102 or HIS 1111/1112 or HIS 1122/1123 or permission of instructor.

HIS 4420 History of American Minorities (3)  
Study of selected ethnic, racial, cultural, social, and religious minorities, their treatment within and their contributions to American society.  
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4421 African-American History (3)  
An introduction to the history of African Americans from the 17th century to the present, including slavery, Civil War and emancipation, legalized discrimination, and the struggles for equality in present day American society.  
Prerequisite: HIS 1111 and 1112 or permission of instructor.
HIS 4422 Gender History in America (3)
An introduction to the history of gender in America from the 17th century to the present, exploring the major economic, religious, social, and political ideas and developments which have shaped conceptions about gender in American history.
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4423 History of American Foreign Relations (3)
A study of the factors, forces, and functions in the making of American foreign policy from the 1760s to the present.
Prerequisites: HIS 1111 and HIS 1112 or permission of instructor.

HIS 4425 Introduction to Public History (3)
Introduces students to the field of public history and addresses the relationship of applied and academic history, the major debates in the discipline, and provides an overview of public history’s subfields and historic traditions.

HIS 4426 Arab-Israeli Conflict (3)
This course surveys the origins, development, and prospects for the future in the long-standing conflict between the Arabs and Israelis. Attempting to place the developing conflict within the wider context of the history of the Middle East from the late 18th century to the modern era, as well global politics, we will discuss some of the most important developments, issues and contention that are made surrounding this highly charged issue.
Prerequisites: HIS 1101/HIS 1102 or HIS 1122/1123 or permission of instructor.

HIS 4430 Civil Rights Movement (3)
Study of the origins of the Civil Rights Movement in the late nineteenth and twentieth centuries, the beginnings of change in the 1930s and the World War II era, and the movement itself as defined by legal, political, and social conflict and change from the latter 1940s to the present.
Prerequisites: HIS 1111 and HIS 1112 or permission of instructor.

HIS 4431 The Vietnam War (3)
A study of the period 1946 to 1975 in Indochina with emphasis on American involvement in the region as part of the larger Cold War context. The course covers heavily on the new historiography of the Vietnam War that has emerged following the collapse of the Soviet Union and is based on newly declassified documents from the western world (especially the United States), Vietnam, China, Russia, and the former socialist camp.
Prerequisites: HIS 1111 and 1112 or permission of instructor. Note: may be used for political science credit.

HIS 4433 Modern Russia (3)
The development of the revolutionary movements and tsarist reform attempts. World War I, revolutions of 1917 and the Bolshevism victory, establishment of the Stalinist state, World War II, the Cold War, Soviet domestic problems, and the disintegration of the USSR.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4437 Interwar and World War II America (3)
A study of America in the years between the end of World War I and the end of World War II. Topics will include cultural and economic changes during the 1920s, the causes and effects of the Great Depression, the programs of the New Deal, and the diplomatic, culture, and social causes and effects of World War II.
Prerequisites: HIS 1111 and HIS 1112 or permission of instructor.

HIS 4438 The Cold War (3)
This course explores the history of the Cold War, focusing on its origins, the major events (the Korean War, the Cuban Missile Crisis, the Vietnam War, the Berlin Crises, and so on), and the collapse of the Soviet Union. The emphasis of the course is placed on analyzing newly available primary documents from the Western and former communist sources and their impact on previous Cold War historiography.
Prerequisites: HIS 1101 and HIS 1102 or HIS 1111 and HIS 1112 or HIS 1122 and HIS 1123 or permission of the instructor.

HIS 4441 American Constitutional Development (3)
A study of the American constitutional system with emphasis upon its origin and evolution via amendments and Supreme Court decisions.
Prerequisites: HIS 1111 and 1112 or permission of instructor. Note: May be used for political science credit.

HIS 4443 Late Antiquity (3)
Study of developments in the Mediterranean and Europe during the third through eighth centuries, including the fall of the Roman empire and the rise of barbarian kingdoms. The course examines the interrelatedness of economics, politics, warfare, and religion in shaping late ancient societies.
Prerequisites: HIS 1101 and HIS 1102 or HIS 1122 and HIS 1123 or permission of the instructor.

HIS 4444 The Crusades (3)
Study of the origins and execution of the series of religious wars called the crusades. In addition to analyzing the various campaigns, the course also examines the phenomenon in the context of the social and cultural conditions in medieval Europe, Byzantium and Islam.
Prerequisites: HIS 1101 and HIS 1102 or HIS 1122 and HIS 1123 or permission of the instructor.

HIS 4447 The Holocaust (3)
An examination of the Holocaust, from medieval origins of antisemitism to the persecution of the Jews in the 1930’s, resulting in the Final Solution of the 1940’s. This course will focus on the implementation of the Nazis’ anti-Semitic politics and the responses of other nations to the Holocaust, examining the roles of victims, perpetrators, and bystanders. The course will also survey the impact of the Holocaust on the world today.
Prerequisites: HIS 1101 and HIS 1102, or HIS 1122 and HIS 1123, or permission of the instructor.

HIS 4448 The West in American History
Study of the history of the American West from European contact to the present. Topics will include the role of the US government, the effects of American expansionism on immigrants and indigenous populations, and struggles over resources and territory.
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4449 History of Nazi Germany (3)
An examination of Adolph Hitler and the Nazi Party from their origins in the aftermath of World War I, through their rise to power to defeat of the
HIS 4450 Environmental History of the U.S. (3)
An introduction to environmental history of the United States from the 18th century to the late 20th century, emphasizing the post-World War II period. The course will focus on the historical development of the science of ecology, the origins of environmental problems and solutions attempted by government and experts, as well as responses by grassroots activists over time.
Prerequisites: HIS 1111 and 1112 or permission of instructor.

HIS 4451 Modern East Asia
Study of the development and interaction of Chinese, Japanese, and Korean civilizations, the impact of Western cultures, twentieth-century conflicts, resolutions and accommodations.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4452 History of the Medieval Middle East (3)
This course covers the Middle East from the time of the birth of Islam through the founding of the Ottoman Empire in 1517. This class will provide a thematic treatment of issues like historiography, religious division, slavery, gender, and the status of Jewish and Christian communities under the Islamic Caliphs and Sultans.
Prerequisites: HIS 1101 and 1102 OR HIS 1122 and 1123 or permission of instructor.

HIS 4453 History of the Modern Middle East (3)
This course covers the Middle East from Napoleon’s invasion of Egypt through the present day, covering the 19th Century, Zionism, the fall of the Ottoman Empire, the Arab-Israeli Conflict, and the colonial and postcolonial periods.
Prerequisites: HIS 1101 and 1102 OR HIS 1122 and 1123 or permission of instructor.

HIS 4454 Age of Absolutism (3)
Survey of political and religious controversies that shaped affairs in Europe during the 16th and 17th centuries, emphasizing the cataclysmic developments in scientific, political, humanitarian, and economic thought that prepared the way for the rise of democracy in both the old and the new world.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4456 Europe from 1688 (3)
The final evolution of the English political system from the reign of William and Mary to the contemporary era, including social and economic transformations, the British Empire, the two world wars, the welfare state, and current issues.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4457 Medieval Europe (3)
Western Europe from the fall of Rome to the Renaissance, including religious and intellectual traditions and the revival of governmental institutions.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4458 Europe in the World Wars, 1914-1945 (3)
The course explores Europe from the beginning of the First World War through the end of the Second World War, with examination of the causes, conduct, and consequences of World War I, the interwar period, the growth of fascism and totalitarian regimes, and the outbreak and effects of World War II. Emphasis will be placed on the political, military, economic, and social developments of the European continent during this period.
Prerequisites: HIS 1101 and 1102 OR HIS 1122 and 1123 or permission of instructor.

HIS 4459 Europe since World War II (3)
The course explores political, military, economic, and social developments of Europe after World War II, including the reconstruction and division of Europe, the rise and the end of the Cold War, the establishment and collapse of communism, division of Germany, military alliances, the European Community, and the efforts towards European integration.
Prerequisites: HIS 1101 and 1102 OR HIS 1122 and 1123 or permission of instructor.

HIS 4464 England to 1688 (3)
A survey of English history from the Anglo-Saxons to the Glorious Revolution, emphasizing the interaction of geographical, political, economic, and cultural forces which shaped England as a monarchy.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4465 England from 1688 (3)
The final evolution of the English political system from the reign of William and Mary to the contemporary era, including social and economic transformations, the British Empire, the two world wars, the welfare state, and current issues.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4466 Renaissance and Reformation (3)
Historical review of the transitional centuries bridging the medieval and the modern eras, including the rebirth of art and literature, the Protestant and Catholic reform movements, and the role of kings and states.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4467 Medieval Europe (3)
Western Europe from the fall of Rome to the Renaissance, including religious and intellectual traditions and the revival of governmental institutions.
Prerequisites: HIS 1101 and 1102 or HIS 1122 and 1123 or permission of instructor.

HIS 4468 Europe in the World Wars, 1914-1945 (3)
The course explores Europe from the beginning of the First World War through the end of the Second World War, with examination of the causes, conduct, and consequences of World War I, the interwar period, the growth of fascism and totalitarian regimes, and the outbreak and effects of World War II. Emphasis will be placed on the political, military, economic, and social developments of the European continent during this period.
Prerequisites: HIS 1101 and 1102 OR HIS 1122 and 1123 or permission of instructor.

HIS 4469 Europe since World War II (3)
The course explores political, military, economic, and social developments of Europe after World War II, including the reconstruction and division of Europe, the rise and the end of the Cold War, the establishment and collapse of communism, division of Germany, military alliances, the European Community, and the efforts towards European integration.
Prerequisites: HIS 1101 and 1102 OR HIS 1122 and 1123 or permission of instructor.

HIS 4471 Internship in History Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP. Co-requisite: SED 4454.
HIS 4481 Methods and Materials for the Secondary Teacher (3)
A survey of teaching methods and materials appropriate for teaching in the content areas for grades 6-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teachers, and lesson planning formats. In addition, teaching methods, selections organization and use of history/social science materials for grades 6-12 will be covered in detail. A professional laboratory experience is included in this course. 
Prerequisite: admission to TEP.

HIS 4486 The Caribbean (3)
A history of the Caribbean region from pre-Columbian times to the present. Topics will include the indigenous population, European colonialism and its legacy, the impact of slavery and racial diversity in the region, cultural and political revolutions, and the area’s relationship with the United States.
Prerequisites: HIS 4101 and HIS 4102 or HIS 4122 and HIS 4123 or permission of the instructor.

HIS 4490 Senior Seminar in History (3)
The capstone course for history majors which synthesizes students’ course work through research, historiography, writing, speaking, and reading comprehension.
Prerequisites: senior standing at all institutions and HIS 3375. Note: Students must receive a grade of “C” or better for credit toward completion of degree requirements.

HIS 4491-92 Guided Independent Research (1 to 3 credit hours)
Additional information is indexed under Independent Study and Research.

HIS 4493-94 Guided Independent Study (1 to 3 credit hours)
Additional information is indexed under Independent Study and Research.

HIS 4495 Selected Topics in History (3)
Historical examination of a designed topic of special and/or current interest and importance, which is generally not covered in regularly offered courses by the department. 
Prerequisites: Applicable survey courses and permission of instructor.

HIS 4498 Honors–Independent Study (1 to 3 credit hours)
Advanced research and study for outstanding students in their major field. Culminates in report to a departmental committee that includes invited faculty members in related fields. 
Prerequisite: Senior level and 3.5 overall grade point average. Permission of guiding professor and approval of department chair and the dean of arts and sciences. A written request must be submitted to the department chair at least six weeks in advance of the semester the research is to be undertaken.

HIS 4499 Internship in History (1-3 credit hours)
Supervised work in an agency that can provide practical experience in the field of study. 
Prerequisites: senior standing, at least 2.5 GPA, 12 hours in upper-division courses in the field, and permission of supervising instructor, department chair and/or dean. Course may be repeated for credit with permission of instructor.
HOSPITALITY, SPORT, TOURISM MANAGEMENT COURSES (HSTM)

HSTM 2201  HSTM Industry Fundamentals (3)
This course provides the student with an introduction and broad understanding of professional skills including but not limited to: critical-thinking, issues analytics, business communication, and technology. All students will be introduced to fundamentals of hospitality, sport and tourism industries with emphasis toward practical tools and strategies for successful professional development and career preparation. 
Prerequisite: Declared HSTM Major

HSTM 2210  Introduction to Event Management (3)
This course is a fundamental introduction to the event planning industry with an emphasis on the role and relevance of the industry to society. This course is designed to explore the multi-disciplinary nature of event management to provide a foundation of practical skills and knowledge students need to succeed in the events industry.

HSTM 2220  Introduction to Tourism Management (3)
This course is designed to introduce the student to tourism management, both as an academic major and as a professional endeavor. This course will also provide a broad overview of tourism management sites, functions, and sectors.

HSTM 2230  Introduction to Hospitality Management (3)
This course is designed to introduce the student to hospitality management, both as an academic major and as a professional endeavor. This course will also provide a broad overview of hospitality management sites, functions, and sectors.

HSTM 2240  Introduction to Recreation Management (3)
This course provides an overview of recreation on federal, state, and local levels with respect to history, program, population, facilities and trends.

HSTM 2255  Introduction to Sport Management
This course is designed to introduce the student to sport management, both as an academic major and as a professional endeavor. This course will also provide a broad overview of sport management sites, functions, and sectors.

HSTM 2257  Global Hospitality, Sport and Tourism Management (1-3)
This course allows students to obtain a global hospitality, sport and tourism management perspective by traveling and studying abroad. Classroom lectures, field trips and presentations from international hospitality, sport and/or tourism professionals and academicians will supplement the cultural experience.
Prerequisite: Permission of instructor.

HSTM 3320  Event Information, Communication, and Technology (3)
This course is designed to serve as an introduction and exploration of various common and emerging information technologies in the event management field. This course will encourage the undergraduate students interested in event planning and management to remain with contemporary developments in the field.
Prerequisite: HSTM 2210.

HSTM 3325  Working in Tourism (3)
This course is designed to introduce the student to the diversity of tourism vocations and
opportunities, with a practical approach that will allow students to understand professional aspects in an applied manner. This course will also cover the multifaceted nature of tourism as an industry including an overview of contemporary terms, contexts, activities, experiences, trends and developments related to working in tourism.

Prerequisite: HSTM 2220

HSTM 3330 Festivals and Special Events (3)
This course provides a comprehensive overview of the festival and event industry. Students will be introduced to the various types of festivals and special events as well as their personal, societal, cultural, economic, and environmental consequences. The course also explores management issues and strategies necessary to plan, organize, fund, market, stage, and evaluate festivals and special events.

Prerequisite: HSTM 2220

HSTM 3335 Facility Management (3)
This course is designed to provide the student with information concerning the planning, design, organization, and administration of sport, fitness and recreational facilities.

Prerequisite: HSTM 2220

HSTM 3345 Recreation Programming (3)
This course provides the foundations of basic programming skills, methods, and techniques necessary to deliver recreational activities within a variety of settings, agencies, and organizations.

HSTM 3350 Leadership Principles in Hospitality, Sport and Tourism Management (3)
This course is designed to assist students in undertaking and developing a personal philosophy on leadership. Students will be required to conduct self-evaluation, examine and develop a leadership philosophy, values and moral reasoning skills. Major leadership/ moral/ and ethical issues in hospitality, sport and tourism will be researched and discussed. The student will explore how personal ethics affect leadership and organizational responsibility.

Prerequisite: HSTM 2255, OR HSTM 2220, OR HSTM 2230.

HSTM 3353 Legal Aspects in Sport Management (3)
In this course the student will gain an appreciation for the legal and business matters that pertain to sport and related areas. Students will acquire working awareness and understanding of the basic legal and business responsibilities of coaches, sport managers and practitioners, along with an understanding of legal terms, concepts and issues that influence the management of programs. Students will also develop appreciation for business elements of sport, which encroach upon the law.

Prerequisite: HSTM 2255

HSTM 3365 Research Methods in Hospitality, Sport and Tourism Management (3)
The purpose of this course is to provide undergraduate students with a fundamental understanding of the research and evaluation process in hospitality, sport and tourism industries. The course is intended to familiarize students with research and evaluation principles, concepts, methods, techniques, and application that can be applied in a wide variety of leisure settings.

Prerequisite: HSTM 2220, OR HSTM 2230, or HSTM 2220.

HSTM 3374 Resort and Hotel Management (3)
This course is designed to provide the student with a comprehensive overview of all aspects of hotel, resort, and vacation rental operations, specifically focusing on facility design, revenue management, rooms, housekeeping, safety and security, engineering, and sales.

Prerequisite: HSTM 2230.

HSTM 3377 Domestic and International Tourism (3)
This course examines the tourism industry from a domestic and international perspective. Students will analyze the domestic tourism market and international tourism market. Students will also be exposed to various tourism segments which may include: cultural tourism, heritage tourism, sport tourism, eco-tourism, adventure tourism and others.

Prerequisite: HSTM 2255.

HSTM 4410 Tourism Economics (3)
This course examines the fundamental economic principles as they apply to the tourism industry. Students will be exposed to the application of various economic analyses to tourism and will also examine the impacts of tourism on regional and national economies.

Prerequisite: HSTM 2255.

HSTM 4414 Sustainable Tourism (3)
This course covers the management of sustainable tourism through decision making on the economic, social, and environmental (“triple bottom line”) sustainability of actual cases from the tourism industry. The course comprehensively examines the theoretical and applied dimensions of contemporary sustainable tourism from a local to global perspective. Subject matter includes: alternative tourism or small-scale tourism and its pros and cons; sustainable tourism within the context of mass tourism; green consumerism; transportation, accommodation, attractions, the tour operator, and quality control; destination sustainability including community empowerment and sustainability models; and future directions in sustainable tourism.

Prerequisite: HSTM 2220.

HSTM 4415 Tourism Impacts and Planning (3)
This course concentrates on the study of tourism impacts, both positive and negative, ranging in scope from the local to the global. Students will be exposed to a range of environmental, economic, socio-cultural and political issues and impacts at the local, regional, national, and international level.

Prerequisite: HSTM 2255.

HSTM 4417 Current Issues in Tourism (3)
This course is designed to serve as a mechanism for the introduction of new information and technology issues for the tourism industry. This course will encourage the undergraduate student in tourism management to remain current with contemporary developments in the tourism industry.

Prerequisite: Senior Standing.

HSTM 4418 Tourism Development and Planning (3)
This course provides an introduction to the nature and scope of tourism planning and development at the local, regional, and national levels. Topics to be addressed include economic, social, environmental, and policy considerations within the sustainable development framework. This course also discusses planning and development guidelines to be considered in different geographical areas.

Prerequisite: HSTM 2255.
HSTM 4419 Tourism Enterprises (3)
This course concentrates on the creation and management of tourism business entities and the dynamics of operating these businesses successfully. Students will be exposed to entrepreneurial opportunities, business development and managerial activities associated with successful operation of tourism businesses.
Prerequisite: Senior Standing.

HSTM 4420 Hospitality and Tourism Financial Management (3)
This course investigates principles, concepts, and current trends in financial and revenue management as related to the hospitality industry.
Prerequisite: HSTM 2230 and HSTM 2220.

HSTM 4423 Current Issues in Hospitality (3)
This course is designed to serve as a mechanism for the introductions of new information and technology issues for the hospitality industry. This course will encourage the undergraduate hospitality student to remain current with contemporary developments in the hospitality industry.
Prerequisite: Senior Standing.

HSTM 4425 Human Resource Management in Hospitality (3)
This course focuses on a decision making process that affects the performance, quality, and legal compliance of the hospitality business as a whole. Beginning with a foundation of the hospitality industry, employment law, and HR policies, the coverage includes recruitment, training, compensation, performance appraisal, environmental and safety concerns, ethics and social responsibility, and special issues.
Prerequisite: HSTM 2230.

HSTM 4428 Legal Aspects in Hospitality Management (3)
This course provides coverage of legal issues in hospitality and tourism, including those associated with hotels, restaurants, transportation, travel agents, tour operators, gaming, mixed-use, and timeshare properties.

HSTM 4430 Sport Marketing (3)
This course is designed to introduce the student to marketing principles and practices that are used in the specialized application of sport marketing. This course will also encourage students to consider how traditional marketing strategies may be applied to this substantial and growing industry.
Prerequisite: HSTM 2255.

HSTM 4431 Analytics in HSTM (3)
This course is designed to introduce the student to statistical techniques and methods. Students will learn how to use the results of statistical analysis to make decisions in the hospitality, sport, and tourism industries.
Prerequisites: HSTM 2255, OR HSTM 2220, OR HSTM 2230.

HSTM 4435 Current Issues in Sport Management (3)
This course is designed to serve as a mechanism for the introduction of new information and technology issues for the sport industry. This course will encourage the undergraduate sport management student to remain current with contemporary developments in the sport industry.
Prerequisite: Senior Standing.

HSTM 4440 Governance and Policy in Sport (3)
This course is designed to provide the student with information concerning basic structure and governing principles of various sport agencies. The course will include, but is not limited to, an examination of the National Collegiate Athletic Association, National Association of Intercollegiate Athletics, and national and international professional sports leagues. In addition, students will be introduced to the importance of policy development in the areas of finance, human resources, facility use and control, equipment, travel, public relations, and risk management.
Prerequisite: HSTM 2255.

HSTM 4443 Case Studies in Sport Management (3)
This course is designed to provide sport related cases containing actual and/or hypothetical facts/fact patterns, historical context, data, and related information to undergraduate students. Students are charged with assessing the situation, generating and analyzing potential solutions, and identifying optimal solutions to the problems presented in the case. Students are exposed to the issues facing sport organizations, and how management techniques can be applied to solve business problems. In addition, students will develop effective written and oral communication skills critical to success in the sport industry.
Prerequisite: Permission of instructor.

HSTM 4450 Event Management in Hospitality, Sport and Tourism Management (3)
This course is designed to give advanced students the opportunity to plan, prepare and administer leisure-related events, thus providing students with practical experiences in hospitality, sport and tourism management. Students will gain experiences in event management, including planning, organizing, implementing, evaluating, directing personnel, securing sponsorships and marketing for multiple events.
Prerequisite: Permission of instructor.

HSTM 4451 Sport Finance (3)
This course is designed to provide the student with information concerning the basic theories of finance as applied to managerial control of sport organizations. Included are forms of ownership, financial analysis, financial issues in the sport industry, and economic impact studies.
Prerequisite: HSTM 2255.

HSTM 4452 Sport Communication and Emerging Technology (3)
This course is designed to provide the student with a fundamental understanding of community, media, and public relations in sport with a special focus on message development, image building, and crisis management. This course will also examine how emerging technologies influence communication strategies in sport, and the resultant impact these technologies have on the sport management.
Prerequisite: HSTM 2255.

HSTM 4462 Hospitality and Tourism Marketing
This course is designed to introduce the student to marketing principles and practices of hospitality and tourism. The course will review terminology, systems, techniques, and processes that are used in the specialized application of hospitality and tourism marketing. This course will also encourage students to consider how traditional marketing strategies may be applied to these substantial and growing industries.
Prerequisites: HSTM 2230 and HSTM 2220.
HSTM 4465  Hospitality Service (3)
This course provides students with the study of basic service throughout the various hospitality industries including: food & beverage, gaming, lodging, country clubs, events, and travel and tourism.
*Prerequisite: HSTM 2230*

HSTM 4466  Food and Beverage Management (3)
This course examines the practical application of managerial skills necessary for food service operations, specifically focusing on facility design, equipment usage, food safety, cost controls, and operational function.
*Prerequisite: HSTM 2230*

HSTM 4468  Recreation Administration (3)
This course is designed to provide the student with a comprehensive understanding of the management and administration of leisure and recreation organizations. This course will emphasize leadership roles of administrators, human resource management, budgeting and financial management, marketing, communication, technology, and facility planning and operations.
*Prerequisites: HSTM 3340 and HSTM 3345*

HSTM 4470  Revenue Generation in Hospitality, Sport and Tourism Management (3)
This course will provide professional sales techniques needed to form a framework for revenue generation in the hospitality, sport and tourism industries. Students will examine the foundations, theory, and framework associated with sales, and the dynamics associated with building and fostering relationships necessary for a vibrant client base.
*Prerequisites: HSTM 4462 or HSTM 4430*

HSTM 4480  Event Planning and Operation (3)
This course is an in-depth look at the skills and knowledge required to develop, plan, and execute events. This course is designed to extend beyond basic planning functions and develop core competencies including: strategic planning, project management, risk management, financial management, administration and HR management, site selection, marketing, and event design.
*Prerequisite: Instructor Approval Required*

HSTM 4485/86  Practicum (3)
The practicum opportunity is designed to provide practical experiences for Hospitality, Sport and Tourism Management Students. The practicum allows the student to develop and mature through exposure to and practical experience with a variety of tasks under the guidance of trained, established leaders in the field. This is a supervised learning experience with an approved hospitality, sport, tourism, or event service agency, organization, or institution.
*Prerequisite: Instructor Approval Required*

HSTM 4488  Internship I in Hospitality, Sport, and Tourism Management (3)
A supervised experience in planning, staging, and evaluating a formal practicum in related field. This is the first term in a two term internship experience.
*Prerequisite: Permission of internship coordinator and Troy Online home location.*

HSTM 4489  Internship II in Hospitality, Sport, and Tourism Management (3)
A supervised experience in planning, staging, and evaluating a formal practicum in related field. This is the second part in a two part internship experience.
*Prerequisite: HSTM 4488 and permission of internship coordinator, and Troy Online home locator.*

HSTM 4490  Internship in Area of Concentration (6)
A supervised experience in planning, staging, and evaluating a formal practicum in related field.
*Prerequisite: Permission of Instructor and Troy campus-home location.*

HSTM 4491/92  Guided Independent Research (3)
Additional information is indexed under Independent Study and Research.

HSTM 4493/94  Guided Independent Study(3)
Additional information is indexed under Independent Study and Research.

HSTM 4499  Seminar in Hospitality, Sport and Tourism Management (3)
Students enrolled in this capstone course will examine trends, career paths, and discuss current topics in the hospitality, sport and tourism industries. Students will also prepare cover letters, resumes, undergo a mock job interviews, develop career path portfolios, and undergo supervised experiences in a related field.
*Prerequisite: Permission of instructor.*

**HUMAN SERVICES COURSES (HS)**

**HS 2230  Survey of Human Services (3)**
A survey of the major human service delivery systems to include historical development, populations served, professional roles, and interrelationships between targeted social problems and services delivered. Introduction to the ecological/systems perspective as a tool for understanding these relationships. Includes observations and field trips.

**HS 2240  Ethics (3)**
Ethical decision-making and skill development within the helping professions.

**HS 2250  Fundamentals of Case Management (3)**
This course will introduce the foundation of case management to include the process of assessment, planning, facilitation, care coordination, evaluation, documentation and advocacy of options and service. Case studies will be utilized to facilitate practical application.

**HS 2260  Introduction to Non-Profit Organizations (3)**
This seminar in non-profit organizations is designed to help students develop a basic understanding and knowledge of the history, operation, and structure of non-profit organizations. Will include management, grant writing, and leadership roles.

**HS 3300  US Justice and the Helping Professional (3)**
This course will explore historical and current issues in the US justice system that have resulted in the marginalization of disadvantaged populations, who typically enter into this system. It will provide an overview of the US justice system and how it interests with human services and social work. Specifically, the focus will be an exploration of the juvenile and adult justice systems as well as policies and strategies shown favorable in the promotion of social justice and advocacy on behalf of those within the justice system. This class is designed for the student who has a desire to understand how helping professions (social work, human services, rehabilitation) and the US justice system are relevant to each other. This course is
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HS 3310</td>
<td>Human Behavior In the Social Environment I (3)</td>
<td>The biopsychosocial aspects of human growth and development throughout the life cycle. Emphasis is placed on understanding the individual in interaction with major social systems. Knowledge, skill, and value bases necessary for biopsychosocial assessment are built.</td>
</tr>
<tr>
<td>HS 3325</td>
<td>Wellness Across the Lifespan I (3)</td>
<td>Introductory examination of several aspects of wellness to include nutrition, physical activity, and mental wellness, from birth to young adulthood. This course exposes the student to resources related to a wellness plan.</td>
</tr>
<tr>
<td>HS 3335</td>
<td>Wellness Across the Lifespan II (3)</td>
<td>Introductory examination of several aspects of wellness to include nutrition, physical activity, and mental wellness, adulthood to death and dying. This course exposes the student to resources related to a wellness plan.</td>
</tr>
<tr>
<td>HS 3370</td>
<td>Professional Interviewing Skills (3)</td>
<td>Principles and techniques of interviewing for human services professionals. Major emphasis is the building of empathic skills.</td>
</tr>
<tr>
<td>HS 3375</td>
<td>Diversity and Ethics (3)</td>
<td>This course provides students with an understanding and appreciation of cultural diversity, ethnic and gender sensitivity, as well as ageism, in social work practice with a variety of populations is highlighted.</td>
</tr>
<tr>
<td>HS 3380</td>
<td>Human Services Study Abroad (3)</td>
<td>Students will study abroad and engage in service learning opportunities in another culture. Students will develop an understanding of the economy, culture, customs and human services practices of the country while observing and engaging in direct human service practice. Prerequisites: successful completion of Troy Study Abroad Program requirements and fees.</td>
</tr>
<tr>
<td>HS 3399</td>
<td>Pre-Practicum Seminar (3)</td>
<td>This course will evaluate the student’s ability (knowledge, values, and skills) required to begin Human Service Field Experience. The class will focus upon areas essential for competent human service practice, including social policy and contemporary topics. Human Services majors must complete this course with a grade of “C” or better. Prerequisite: Completing of HS Major requirements. The practicum site must be approved.</td>
</tr>
<tr>
<td>HS 4400 (6)/4420 (3)</td>
<td>Human Service Field Experience</td>
<td>Provides experiences in a variety of social and human services settings with an emphasis on the multiple nature of human problems and the impact these problems have on the disabled and disadvantaged. Includes a weekly seminar plus a minimum of 240 clock hours per course hour spent in a particular agency for HS 4400 I (6). For HS 4420 II (3) it is 120 clock hours. Clinical hours and responsibilities will be determined by internship supervisor. Human Services majors must complete this course with a grade of “C” or better. Prerequisites: Senior level, HS 2230, HS 3370 and HS 3399 or permission of instructor.</td>
</tr>
<tr>
<td>IA 1150</td>
<td>Integrated Arts and the Creative Habit (1)</td>
<td>Discover the Integrated Arts approach to developing creative habits. Engage not only your curiosity and imagination, but also discover new ways of working and connecting through active innovation, boundary-crossing, challenging assumptions, and moving beyond inhibitions.</td>
</tr>
<tr>
<td>IA 2220</td>
<td>Fundamentals of 3D Modeling and Printing (3)</td>
<td>Introduces students to the fundamental skills required to begin designing and printing using CAD (Computer Aided Design) software. Digital design terminology and techniques combined with an understanding of how 3D printers function will be delivered through a series of fundamental projects. Includes access to the Virtual and Physical Lab.</td>
</tr>
<tr>
<td>IA 2230</td>
<td>Large Format Printing and Sustainable Materials (3)</td>
<td>Utilizing sustainable materials like recycled plastics, concrete, and clay, this class will explore eco-innovative approaches to large format design and manufacturing including introduction to 3D scanning, scaling, and intermediate mesh modeling. Students may choose an Arts focus, an Industry focus, or a blend of the two. Includes access to the Virtual and Physical Lab. Prerequisites: IA 2220</td>
</tr>
<tr>
<td>IA 2235</td>
<td>Creative Collaborations, Teams, and Partnerships (2)</td>
<td>Work dynamically together and achieve more. Students explore collaborative ideas and experiment with hands-on application of new communication skills and tools. Emphasis on creative thinking and problem-solving, role play within different types of teams, partnerships, and collaborative groups. Learn how to lead or enrich your participation in creative ventures of any kind.</td>
</tr>
<tr>
<td>IA 3320</td>
<td>Constructive Disruption: Design Process and Workflow (3)</td>
<td>Through 3D design and production, students will learn to offer constructive disruption applying innovative concept, design, and manufacturing workflows and communication. Course will address the entrepreneurial mindset, problem-solving processes, portfolio building, and preparation for internship. Includes access to the Virtual and Physical Lab. Prerequisites: IA 2220</td>
</tr>
<tr>
<td>IA 3330</td>
<td>Product Development and Assistive Design (3)</td>
<td>Product development will be taught and applied through practical and creative 3D printing projects. Students will learn intermediate solid modeling and with an emphasis on assistive design. Includes access to the Virtual and Physical Lab. Prerequisites: IA 2220</td>
</tr>
<tr>
<td>IA 3335</td>
<td>Integrated Arts Concept and Design (2-3)</td>
<td>Students collaborate in the design and conceptual development of a unique creative production or project with a focus on multidisciplinary work and innovative integration of arts with other areas and disciplines. Outcomes aimed at public presentation and/or service. May be repeated for credit.</td>
</tr>
<tr>
<td>IA 3340</td>
<td>Integrated Arts Production (2-3)</td>
<td>Students collaborate in the process for unique creative production or project with a focus on multidisciplinary work and innovative integration of arts with other areas, disciplines, and enterprises culminating in public presentation and/or service. May be repeated for credit.</td>
</tr>
</tbody>
</table>
| IA 4496    | Integrated Arts Internship (3-6)                 | In this individualized internship, students work with an organization, business, or enterprise to engage in
Students will identify or be partnered with a business or enterprise for internship to gain applied experience with the skill sets developed in these courses. Includes access to the Virtual and Physical Lab.

**Prerequisites:** IA 2220, IA 2230, IA 3320 and IA 3330 or permission of chair

### INTERDISCIPLINARY STUDIES COURSES (IDS)

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>IDS 1101</td>
<td>Global Challenges (3)</td>
<td></td>
<td>Students will build knowledge and skills for globally competent citizenship and public service to address global challenges (population, resources, technology, information, economies, governance) faced in the 21st century.</td>
</tr>
<tr>
<td>IDS 2200</td>
<td>Crossroads: Sophomore Interdisciplinary Seminar in Creative Thinking (3)</td>
<td></td>
<td>This seminar examines specific academic themes from a variety of interdisciplinary perspectives that reach across the human, natural, and social sciences. By capitalizing on the distinctive methodologies offered by faculty members from different academic disciplines, the seminar involves students and faculty in creating original approaches to course.</td>
</tr>
<tr>
<td>IDS 2201</td>
<td>Applications in Public Service (3)</td>
<td></td>
<td>An overview of strategies for civic enrichment that engage various forms of community capital (social, religious and governing institutions, citizens, and business/economic interests) to address defined civic issues. Focus is given to diagnosing civic issues, developing and implementing an intervention and evaluating its impact.</td>
</tr>
<tr>
<td>IDS 2230</td>
<td>International Engagement</td>
<td></td>
<td>This course is designed to introduce and connect international students to life and culture in the United States at Troy University. The class explores variety of topics central to being a new international student including the history, geography, and culture of the U.S.; navigating various systems at the university and the U.S. (transportation, medical, employment, and campus resources); and interpersonal qualities and skills for success as an international student.</td>
</tr>
<tr>
<td>IDS 3305</td>
<td>Study Abroad through Partnerships</td>
<td></td>
<td>This course acts as a placeholder for students studying abroad. Students studying abroad for a semester or longer through a Troy University exchange partner should be registered for this course by the Study Abroad Coordinator in the Troy Abroad Office.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Prerequisites:</strong> completion of Troy Abroad advising and application process.</td>
</tr>
<tr>
<td>IDS 3310</td>
<td>Principled Public Service in a Modern Age (3)</td>
<td></td>
<td>This course concentrates on exploring ethical practices when individuals come together and address social problems in their communities. Emphasis will be on ethical leadership in the context of teamwork, participatory decision-making, and citizen empowerment.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Prerequisites:</strong> IDS 1101 and IDS 2201.</td>
</tr>
<tr>
<td>IDS 3315</td>
<td>Systems and Structures of Public Service (3)</td>
<td></td>
<td>Students will learn basic principles of public management and administration, including history and development, organizational structures, and modern functions of public service organizations and advocacy efforts.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Prerequisites:</strong> IDS 1101 and IDS 2201.</td>
</tr>
<tr>
<td>IDS 4410</td>
<td>Social and Policy Entrepreneurship (3)</td>
<td></td>
<td>This course introduces students to social and policy entrepreneurship through case studies, key readings, and primary information resources. The class will explore the sources of funding for social enterprises, such as philanthropy, governmental funding, grant writing, as well as income generating, self-sustaining arrangements that promote long-term change.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Prerequisites:</strong> IDS 1101 and IDS 2201.</td>
</tr>
<tr>
<td>IDS 4495</td>
<td>Capstone Experience in Public Service and Civic Engagement (3)</td>
<td>300 hour field experience internship based at a community agency, healthcare facility, school or government agency focused on application of student’s personal plan for community engagement and public leadership. Through the course, students will build applied public leadership skills and use various applications and strategies for civic enrichment.</td>
<td></td>

<td><strong>Prerequisites:</strong> Junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the Office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”</td>
</tr>
</tbody>
</table>
I ED 4493-94 Guided Independent Study (1 to 3 credit hours)
Supervised study through field or laboratory projects, guided readings, creative endeavors or achievement of specific skills.
Prerequisites: Junior or senior status, permission of guiding professor, approval of department chair and the dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Also see index for “Independent Study and Research.”

INFORMATION SYSTEMS COURSES (IS)

IS 2241 Computer Concepts and Applications (3)
This course provides an interdisciplinary introduction to microcomputer literacy, word processing, spreadsheets, database, business graphics and the internet.

IS 3310 Introduction to Information Systems & Data Analytics (3)
Introduction to the types of information systems used in the global business environment, with an emphasis on describing how information systems support operations and are used to make business decisions.
Prerequisites: Lower-level Business Core, IS 2241.

IS 3315 Advanced Applications for Accounting
A computer software applications course in which students use electronic spreadsheet software and other application software to design and implement solutions to common accounting problems and issues.
Prerequisites: ACT 2292, BUS 3310 and IS 2241.

IS 3320 Data Communication & Networks (3)
This course introduces the theory and practical applications of current technologies in data communication and computer networks. Emphasis is placed on data communication principles, local and wide area networks and an understanding of the basic features, operations, and limitations of data communications and computer networks. Coverage includes wireless technologies, industry convergence, compression techniques, network security, LAN technologies, VoIP, and error detection and correction.
Prerequisite: IS 2241, IS 3310.

IS 3346 Database Management Systems I (3)
This course is an introduction to database management systems (DBMS) and design via conceptual, logical, and physical modeling techniques. Emphasis is on relational DBMS, including modeling organizational data, representation of data relationships, data definition and manipulation, database design and normalization concepts, database generation, and database administration.
Prerequisites: IS 2241, IS 3310, or consent of instructor.

IS 3350 Business Programming (3)
The course introduces and develops programming fundamentals, including program structure, assignment, data types, input/output, flow of control, functions, arrays, pointers, strings, object structures, list processing, and advanced I/O. Emphasis is placed on understanding and developing object oriented programs in an integrated development environment (IDE). Prerequisites: Grade of ‘C’ or higher in IS 2241 and MTH 1112.

IS 4410 Business Data Mining (3)
This course introduces the concepts and practices of extracting information from large databases to support human business decision-making in the areas of summarization, prediction, patterns, relationships, trends, and customer behavior. The course covers various analytical techniques to extract managerial information from large data warehouses using a number of well-defined data mining tasks such as classification, estimation, prediction, affinity grouping and clustering, and data visualization. The course will examine methods and software tools for transforming large amounts of data into new and useful information, uncovering factors that affect purchasing patterns, and identifying potential profitable investments and opportunities. The course will also survey applications and provide an opportunity for hands-on experimentation with algorithms for data mining using software and cases.
Prerequisites: IS 3346, QM 2241, or consent of instructor.

IS 4415 Big Data Analytics and Visualization (3)
This course introduces best practices of data analytics to create a more competitive and profitable organization. Students will learn how Big Data interacts with business, and how to apply data analytic methodologies to create value for an organization. The course includes hands-on applications of sophisticated data-analysis functions and methodologies to real world data sets with cutting edge software and tools. The course also includes business cases of how the leading digital companies embrace big data culture and the use of data analytic techniques to out-compete rivals in their industry and to be more profitable than traditional companies in the global business environments. This course is a capstone course for the concentration.
Prerequisites: IS 3350, IS 4410.

IS 4440 Knowledge Management and Business Intelligence (3)
This course is an introduction to organizational data as a business resource, using business intelligence and knowledge management techniques. Emphasis is on developing database management systems (DBMS) as operational data stores and data warehouses for management decision-making, through business analytics, balanced score card metrics, data visualization, data mining, dashboards, and business performance management.
Prerequisites: IS 3346.

IS 4447 Systems Analysis and Design (3)
This course discusses the processes, methods, techniques, and tools to develop information system. The course covers a systematic methodology to analyze business requirements, design information system solution, implement and test information system. This course is the capstone course for the concentration. This course follows a project-based approach that requires students to complete a software implementation project using a systems development lifecycle methodology.
Prerequisites: IS 3346, IS 3350.

IS 4451 Information Security, Assurance and Compliance (3)
This course introduces information security awareness, governance, assurance, and compliance associated with essential network infrastructure. Emphasis is placed on understanding information systems security policy and technology countermeasures across network infrastructure access points including physical security, authentication, access control, encryption, and system management.
Prerequisites: IS 3320.

IS 4460 E-Commerce Design (3)
This course introduces the basic concepts and language of e-commerce. Coverage includes the planning and development of an e-commerce site, including such issues as security, customer service, payment, and marketing. The course is designed to
teach students to explore and evaluate e-commerce technologies, sites, and issues.
Prerequisite: IS 4447.

**IS 4470**  
**Server-Side Web Development and Administration (3)**  
This course introduces server side web application development and administration technologies. The course emphasizes on the ability to design and implement real-world web applications, and the solutions of server related issues including security and scalability.
Prerequisites: IS 3346, IS 3350.

**IS 4475**  
**Internet Technology Development (3)**  
This course introduces web application development technologies in an Internet environment and the related scripting languages. The course emphasis is on developing secure client-side web applications with HTML and JavaScript, and consuming web services.
Prerequisites: IS 3330.

**IS 4493-94 Guided Independent Study (1 to 3 credit hours per semester)**  
Additional information is indexed under Independent Study and Research.
Note: This course may not be substituted for any required course.

**IS 4498**  
**Information Systems Internship (3)**  
The Information Systems Internship provides students with the opportunity to gain real-world insurance experience in their field of study. Students are interviewed and selected by the individual companies offering the internship. See the Information Systems division chair for details.
Prerequisite: Student must have completed all four required IS courses with a "B" average. Student must have Internship Proposal approved prior to registering for class.

---

**INTERPRETER TRAINING PROGRAM (ITP)**

**ITP 2200**  
**Introduction to Interpreting: Professional Identity and Ethical Considerations (3)**  
Introduces basic principles and practices of interpreting. The course is designed to provide an overview of interpreting with respect to professional orientation and identity, including an overview and history of the interpreting industry and work of interpreters, hearing and deaf interpreting teams, certification and licensure, legislation affecting interpreters, 2d vs 3d interpreting work, multiculturality and the variety of consumers and modalities with which interpreters work. Ethical decision-making models and the Code of Professional Conduct are explored. The course culminates in the students mapping out the competencies required to be successful on interpreting certification exams and resources (including Troy University classes, extra-curricular activities, organizations, etc.) to acquire the competencies.
Pre-requisite: ASL 2242 with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3351**  
**ASL/English Linguistics (3)**  
This course is designed to introduce the linguistics of ASL, including phonology, morphology, syntax and semantics. Geographical, generational, racial and gender differences are explored. English and ASL similarities and differences are highlighted.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242 with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3353**  
**Introduction to Interpreting English to ASL (3)**  
This is a theory-to-practice course in which interpreter trainees are required to analyze message input from a person using the source language (English), and process and produce an equivalent message intended for an individual using the target language (ASL). Cognitive processing skills will be refined with an emphasis on text and situational analyses and self-evaluation. Interpretations will be rendered consecutively.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3360, EDU 3366 with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3354**  
**Introduction to Interpreting ASL to English (3)**  
This is a theory-to-practice course in which interpreter trainees are required to analyze message input from a person using the source language (ASL), and process and produce an equivalent message intended for an individual using the target language (English). Cognitive processing skills will be refined with an emphasis on text and situational analyses and self-evaluation. Interpretations will be rendered consecutively.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3360, EDU 3366 with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3355**  
**Transliteration (3)**  
Focuses on expressive and receptive transliterating skill development in English and manual Codes for English with attention to setting and register. Pre-requisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3353, EDU 3354, EDU 3360, EDU 3366 with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3360**  
**Models of Interpretation / Transliteration (3)**  
Students will be introduced to various interpreting models, eluding the Process Model, the Cokely Model, and the Colonomos Model. Students will use the models to analyze interpretations. Self-assessment techniques will be taught and Demand-Control theory will be introduced.
Prerequisite: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200 with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3364**  
**Introduction to Educational Interpreting/Translating (3)**  
This course surveys the field of interpreting in educational settings. The focus of the course is on an analysis of the educational environment’s impact on the deaf/hard of hearing student and the myriad roles of an interpreter in these settings. Guidelines of professional conduct are presented and specialized subject vocabulary is introduced.
Prerequisite: ASL 2242, ITP 2200, with a grade of C or better, or permission of ITP Academic Advisor.

**ITP 3366**  
**Discourse Analysis I (3)**  
Introduces the concept of discourse analysis as it relates to ASL and English. Transcriptions and analysis of English discourse and texts will be the focus with the implications to interpreters. Emphasis will be on analyzing messages and metamessages within multicultural settings and understanding the biases and filters interpreters often bring to the interpreted task with assumptions made about the meaning of a text based on the interpreter’s own experiences. The overarching goal will be to ensure interpreters are able to analyze a text to understand the conversational signals and devices used.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200 and EDU 3351 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 3375 Introduction to Interactive Interpreting (3)
This is a theory-to-practice introductory course in interactive interpreting in which students will both observe and practice consecutive interactive interpreting, analyze the parts of the process that go into such interactions and interpretations, and analyze the resulting work, creating a continuous feedback loop to build awareness and skills in each of the requisite parts.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3360 and EDU 3366 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4452 Discourse Analysis II (3)
Students will develop a better understanding of the broad methodological areas of discourse analysis and conversation analysis as an approach for understanding signed languages and English, particularly in the context of interpreting. Expands the concepts of discourse analysis as it relates to ASL and interpreted interactions. Transcriptions and analysis of ASL and interpreted discourse and texts will be the focus with the implications to interpreters. Emphasis will be on analyzing messages and metamessages within multicultural settings and understanding the biases and filters interpreters often bring to the interpreted task with assumptions made about the meaning of a text based on the interpreter's own experiences. The overarching goal will be to ensure interpreters are able to analyze a text to understand the conversational signals and devices used are interpreted accurately and effectively across the interpreted boundary from the source message to the target message.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351 and EDU 3366 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4456 Advanced English to ASL (3)
Focuses on interpreting/transliterating from spoken English to ASL or Manual Codes for English.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3353, EDU 3366 and EDU 3375 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4457 Advanced ASL to English (3)
Focuses on interpreting/transliterating from ASL or Manual Codes for English to spoken English. Students develop appropriate use of register and cross-cultural bridging techniques.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3354, EDU 3366 and EDU 3375 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4458 Advanced Interactive Interpreting (3)
Course focuses on consecutive and simultaneous interpreting and transliterating. Students will develop skills in team interpreting in interactive settings.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and ASL 2242, EDU 2200, EDU 3351, EDU 3354, EDU 3366 and EDU 3375 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4462 Practicum I: Seminar and Field Experiences (3)
This is a field experience course in which interpreter trainees have the opportunity to interview, observe, interact with and shadow interpreters in public venues.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and EDU 4452, EDU 4456, EDU 4457 and EDU 4458 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4463 Practicum II: Seminar and Field Experience (3)
This is a field experience course in which interpreter trainees have the opportunity to team interpret with credentialed interpreters. Trainees will interpret in one on-one situations for which they are qualified.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and EDU 4452, EDU 4456, EDU 4457 and EDU 4458 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4465 Internship: Educational Interpreting (6)
Course Description: The internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed interpreter would be expected to perform in an educational setting. The interpreter-in-training is involved in interpreting interactions appropriate to his/her skill level and training. Interns receive feedback and supervision from on-site supervisors, group seminar supervisors, team interpreters, consumers, and faculty members. Interns are assigned to an educational setting (k-12 or postsecondary) for 300 clock hours, 120 of which must be in direct interpreting service. Students are also responsible for developing and fulfilling a Service Learning Project (SLP) equivalent to at least 20 hours of planning and 20 hours of service to the community serving children. The SLP shall be in partnership with the community and sustainable.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and EDU 4462 with a grade of C or better, or permission of ITP Academic Advisor.

ITP 4466 Internship: Community Interpreting (6)
Course Description: The internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed interpreter would be expected to perform in a community setting. A regularly employed interpreter is defined as a person occupying the professional interpreting role to which the student is aspiring. The interpreter-in-training is involved in interpreted interactions appropriate to his/her skill level and training. Interns receive feedback and supervision from on-site supervisors, group seminar supervisors, team interpreters, consumers, and faculty members. Interns are assigned to a business, organization, interpreting agency, qualified interpreter(s), or rehabilitation setting for 300 clock hours, 120 of which must be in direct interpreting service. Students are also responsible for developing and fulfilling a Service Learning Project (SLP) equivalent to at least 20 hours of planning and 20 hours of service to the community setting. The SLP shall be in partnership with the community and sustainable.
Prerequisites: Sign Language Proficiency Interview rating of Intermediate Plus, and EDU 4463 with a grade of C or better, or permission of ITP Academic Advisor.
ITP 4467  Interpreting Mentorship I: Sign Language/English Interpreting (3)
Surveys mentoring approaches in interpreter education in the United States. Topics include definitions of mentorship, knowledge and skills needed to mentor, qualities of mentors and mentees, mentorship management, portfolios as mentoring tools, and approaches to mentoring in the US. Prerequisites for ITP majors: Only by permission of ITP Academic Advisor on the basis of possessing a nationally validated certification prior to admission and completion of all coursework excluding EDU 4462 and EDU 4463.

ITP 4468  Interpreting Mentorship II: Sign Language/English Interpreting (3)
This course builds on the information presented in Mentorship I, providing opportunities to practice various approaches and develop expertise in interpreting assessment and feedback. Students will develop their own approaches to mentoring and design their Internship project. Prerequisites for ITP majors: Completion of all coursework excluding EDU 4462 and EDU 4463 or permission of ITP Academic Advisor.

ITP 4469  Interpreting Mentorship III: Sign Language/English Interpreting Practicum (3)
Supervised mentoring experience with intensive application of mentoring skills. Emphasizes practical application of mentoring through ongoing assessment of interpreting and interpreting settings; provides hands-on opportunities to assess, provide feedback, and receive feedback about both interpreting and mentoring skills. Prerequisites for ITP majors: Only by permission of ITP Academic Advisor on the basis of possessing a nationally validated certification prior to admission to ITP. Completion of all course work excluding EDU 4470 and successful completion (grade C or better) in EDU 4467 and EDU 4468.

ITP 4470  Interpreting Mentorship IV: Sign Language/English Interpreting Internship (3)
Implements a supervised mentoring project designed in Mentorship II: Interpreting. Applies knowledge and skills acquired and integrates them with real-world experiences in mentoring. Projects are implemented in collaboration with students’ home or sponsoring region to provide mentoring in that area. Prerequisites for ITP majors: Only by permission of ITP Academic Advisor on the basis of possessing a nationally validated certification prior to admission to ITP. Completion of all course work excluding EDU 4469 and successful completion (grade C or better) in EDU 4467 and EDU 4468.

ITP 4471  Community Interpreting Internship I (3)
The internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed interpreter would be expected to perform within one or two of the following specialized settings: educational, medical, mental health, religious, performing arts, legal and/or Video Relay Services. The interpreter-in-training is involved in interpreted interactions appropriate to his/her skill level and training. Interns receive feedback and supervision from on-site supervisors, group seminar supervisors, team interpreters, consumers, and faculty members. Interns are assigned to supervising mentor with whom they will identify appropriate learning activities and work experiences for 150 clock hours, 60 of which must be in direct interpreting service. Prerequisite: Sign Language Proficiency Interview rating of Intermediate Plus and ITP 4463 with a grade of “C” or better, or permission of ITP Academic Advisor.

ITP 4472  Specialized Interpreting Internship I (3)
The internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed interpreter would be expected to perform within one or two of the following specialized settings: educational, medical, mental health, religious, performing arts, legal and/or Video Relay Services. The interpreter-in-training is involved in interpreted interactions appropriate to his/her skill level and training. Interns receive feedback and supervision from on-site supervisors, group seminar supervisors, team interpreters, consumers, and faculty members. Interns are assigned to supervising mentor with whom they will identify appropriate learning activities and work experiences for 150 clock hours, 60 of which must be in direct interpreting service. Prerequisite: Sign Language Proficiency Interview rating of Intermediate Plus and ITP 4463 with a grade of “C” or better, or permission of ITP Academic Advisor.

ITP 4473  Community Interpreting Internship II (3)
The internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed interpreter would be expected to perform. The interpreter-in-training is involved in interpreted interactions appropriate to his/her skill level and training. Interns receive feedback and supervision from on-site supervisors, group seminar supervisors, team interpreters, consumers, and faculty members. Interns are assigned to supervising mentor with whom they will identify appropriate learning activities and work experiences for 150 clock hours, 60 of which must be in direct interpreting service. Prerequisite: Sign Language Proficiency Interview rating of Intermediate Plus and ITP 4463 with a grade of “C” or better, or permission of ITP Academic Advisor.

ITP 4474  Specialized Interpreting Internship II (3)
The internship provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed interpreter would be expected to perform within one or two of the following specialized settings: educational, medical, mental health, religious, performing arts, legal and/or Video Relay Services. The interpreter-in-training is involved in interpreted interactions appropriate to his/her skill level and training. Interns receive feedback and supervision from on-site supervisors, group seminar supervisors, team interpreters, consumers, and faculty members. Interns are assigned to supervising mentor with whom they will identify appropriate learning activities and work experiences for 150 clock hours, 60 of which must be in direct interpreting service. Prerequisite: Sign Language Proficiency Interview rating of Intermediate Plus and ITP 4463 with a grade of “C” or better, or permission of ITP Academic Advisor.

ITP 4493  Guided Independent Research I (1-3)
Undergraduate research with attention to critical evaluation of research technique methods and procedures with work specialized to the Interpreter Training Program. Prerequisites for ITP majors: Junior or senior standing and only by permission of ITP Advisor and approval of department chair.

ITP 4494  Guided Independent Research II (1-3)
Undergraduate research with attention to critical evaluation of research technique methods and procedures with work specialized to the Interpreter Training Program. Prerequisites for ITP majors: Junior or senior standing and only by permission of ITP Advisor and approval of department chair.

### JOURNALISM COURSES (JRN)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>JRN 1100</td>
<td>Technologies in Journalism (3)</td>
<td>An introduction to the technological advances in journalism and the promotion of an understanding of the impact of these advancements. Must make a C or better.</td>
</tr>
<tr>
<td>JRN 1102</td>
<td>Writing for the Mass Media (3)</td>
<td>A basic course in preparing written materials for the mass media and for online communication, with emphasis on using Associate Press style and writing leads. Prerequisites: ENG 1101, 1102, JRN 1100, with grade of C or better in each course. May be taken concurrently with JRN 1100. Must make at least C or better in JRN 1102 before taking JRN 2201.</td>
</tr>
<tr>
<td>JRN 1103</td>
<td>Introduction to Radio and Television (3)</td>
<td>An introduction to the electronic forms of mass communication with discussions on the theoretical and business aspects of radio and television, cable and corporate video communications, and an introduction to programming and regulations.</td>
</tr>
<tr>
<td>JRN 2201</td>
<td>Reporting (3)</td>
<td>Gathering, evaluating and reporting the news for traditional and online media. Prerequisite: Completion of JRN 1102 with grade of C or better. Must make at least C or better in JRN 2201 before taking 3000 level or higher Journalism courses.</td>
</tr>
<tr>
<td>JRN 2211</td>
<td>Editing and Design (3)</td>
<td>Editing copy and video, headline writing, layout and design for print, video and electronic publications plus online communications. Prerequisites: JRN 1100 and 1102. Must make a C or better in JRN 2211 to receive credit toward degree.</td>
</tr>
<tr>
<td>JRN 2289</td>
<td>Social Media Practicum (1)</td>
<td>Social Media has become an instrumental tool of communication for businesses and organizations of all sizes. Understanding how to use social media effectively as a professional resource is a skill important for any graduate. This course will provide students with real-world lessons and practical experience in the use and function of social media as a tool for public relations outreach and communication. Prerequisite: ENG 1101 or permission of the instructor.</td>
</tr>
<tr>
<td>JRN 3300</td>
<td>Digital News Photography (3)</td>
<td>Discussion of and practical experience in digital and video photography for print, broadcast, electronic and online media.</td>
</tr>
<tr>
<td>JRN 3302</td>
<td>Feature and Magazine Article Writing (3)</td>
<td>Researching and writing feature stories with emphasis on covering issues and trends in magazines, electronic and online publications, pitching ideas to editors and marketing articles as a freelancer. Prerequisite: JRN 2201.</td>
</tr>
<tr>
<td>JRN 3312</td>
<td>Advanced Editing and Design (3)</td>
<td>Advanced study and practice in layout and design of newspapers, electronic publications and online media, including special pages and editions; typography and graphics; copy editing and video. Prerequisite: JRN 2211.</td>
</tr>
<tr>
<td>JRN 3315</td>
<td>Advanced Reporting (3)</td>
<td>News reporting and writing on sports, business, consumer affairs, the environment, and public affairs, particularly local and state government, the courts and education, in a multimedia environment including print, video and online communications. Emphasis is placed on use of background research and multiple sources and writing on deadline. Prerequisite: JRN 2201. Must make a C or better in JRN 3315 to receive credit toward degree.</td>
</tr>
<tr>
<td>JRN 3318</td>
<td>The Evolution of Broadcast News (3)</td>
<td>From the very first television news broadcasts in the 1940s, to the women who broke barriers in a male dominated business, to news stations in China now using Artificial Intelligence to create virtual news anchors, this class will explore how broadcast news has evolved over the past 75 years. Students will learn how daily newscasts changed the manner in which Americans saw the world, and also how iconic news anchors helped shape the course of American history.</td>
</tr>
<tr>
<td>JRN 3326</td>
<td>Advising Student Publications (3)</td>
<td>Students successfully completing this class will have the ability to teach journalism, including how to produce magazine and newspaper layout; develop copy and/or storyboard for radio and television production; apply techniques of advertising, reporting and editing; and use current and emerging technology in the production of print and non-print journalism.</td>
</tr>
<tr>
<td>JRN 3327</td>
<td>Sports Broadcasting (3)</td>
<td>Advanced methods, techniques and performance styles for broadcast sports news and information.</td>
</tr>
<tr>
<td>JRN 3330</td>
<td>Journalism Practicum (1 to 3 credit hours)</td>
<td>Supervised journalism-related experiences focusing on gathering information, writing, editing, photography, design, online journalism, electronic journalism, broadcast journalism, advertising and/or public relations.</td>
</tr>
<tr>
<td>JRN 3335</td>
<td>Social Media Strategies and Engagement (3)</td>
<td>This course explores and evaluates social media content and campaigns and how organizations can capitalize on social media for communication. Students will gain the knowledge and skills for creating engaging content across platforms such as Facebook, Instagram, Snapchat, and Twitter and learn how to measure the success of those efforts. Additionally, students will absorb the understanding of industry-standard tools for social media management, audience analytics, and paid media.</td>
</tr>
<tr>
<td>JRN 3340</td>
<td>Introduction to Mobile Journalism (3)</td>
<td>The concepts and technologies for this course</td>
</tr>
</tbody>
</table>
include news gathering through multiple digital methods and storytelling across multiple platforms from the field.

Smartphones or computer tablets are required.

JRN 4425 Multimedia Law (3)
The rights and restrictions of the press: the First Amendment, privilege, libel, slander, contempt, right of privacy, etc.
Prerequisite: JRN 2201.

JRN 4427 Sports Reporting (3)
Advanced methods, techniques, and writing styles for reporting sports news and information.
Prerequisite: JRN 2201.

JRN 4430 Processes and Effects of Mass Communication (3)
This course provides students with an understanding of the development of the most notable, historical, social scientific and empirically grounded theoretical perspectives with regard to mass communication. In addition, analysis and interpretation of these theories will be addressed.

JRN 4440 Advanced Technologies in Journalism (3)
An introduction to using advanced technologies and on-line reporting techniques in journalism and public relations.
Prerequisite: JRN 1100 Technologies in Journalism

JRN 4445 Mobile Journalism Practicum (3)
Supervised experience in mobile journalism reporting, including in-depth fieldwork and producing original content to build student portfolios.
Smartphones or computer tablets are required.
Prerequisite: JRN 3340.

JRN 4450 Electronic Publishing (3)
This is a hands-on mastery course in using words, images, video, sound and social media to communicate in an interactive and online environment.

JRN 4460 Network Sports Production (3)
Supervised experience in television sports production, including in-depth fieldwork with the Troy University Athletics Department and the sports network, ESPN3. Students will shoot and edit sporting events for use on ESPN3. Weekend work is required.

JRN 4489 Internship (5)
Supervised work that can provide practical experience in the field of study.

JRN 4490 Field Experience (1-7)
Supervised study in the practical application of issues related to journalism and communication.

JRN 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

JRN 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

JRN 4495 Communication Seminar (1)
Study of issues related to communication theory, the history and future of communication industries, the impact of online communication and ethics. Additionally, students will create a professional portfolio.
Prerequisite: At least a Junior Standing.

KINESIOLOGY AND HEALTH
PROMOTION COURSES (KHP)

KHP 1101 Badminton (1)
Physical education activity course.

KHP 1107 Swimming (1)
Physical education activity course.
KHP 1108  Tennis (1)  Physical education activity course.
KHP 1109  Intermediate Swimming (1)  Physical education activity course.
KHP 1110  Paddle Tennis (1)  Physical education activity course.
KHP 1111  Archery (1)  Physical education activity course.
KHP 1112  Advanced Swimming (1)  Physical education activity course.
KHP 1122  Water Aerobics (1)  Physical education activity course.
KHP 1124  Beginning Yoga (1)  Course will introduce students to yoga as a different type of exercise. Students will explore the opportunity for yoga to become a lifetime activity in order to promote health and wellness in their daily routines.
KHP 1134  Ballroom Dance (1)  An introduction to social dancing with an emphasis on American ballroom dances (foxtrot, waltz, swing) and Latin ballroom dances (cha cha, mambo, tango). Equivalent to DAN 1134.
KHP 1139  Fitness for Life I (1)  Physical education activity course.
KHP 1141  Jogging (1)  Physical education activity course.
KHP 1142  Weight Training (1)  Physical education activity course.
KHP 1144  Step Aerobics (1)  Physical education activity course.
KHP 1146  Physical Defense for Women (1)  Physical education activity course.
KHP 1150  Introduction to Sports Medicine (1)  Acquaints students to the various sports medicine careers and the roles each profession can play within the healthcare of the physical active population.
KHP 2200  Health Concepts (1)  A study of health concepts that characterizes a process in the life cycle that is typical of every individual.
KHP 2201  Camping and Outdoor Education (2)  Camping, leadership and program planning.
KHP 2202  First Aid and Safety and CPRO (2)  Community first aid and safety instruction and CPRO for the professional following American Red Cross techniques.
KHP 2208  Intermediate Tennis (1)  Physical education activity course.
KHP 2211  Human Nutrition (3)  Explores the relationship between nutrition and health. Emphasizes the roles of nutrients, their utilization in the human system and their contributions to the health of individuals of all ages. Includes dietary patterns, of various cultural, ethnic and religious groups, nutritional assessments, and food safety. Open to all majors.
KHP 2212  First Aid and CPRO Recertification (1)  Community first aid and safety instruction and CPRO for recertification. 
Prerequisite: Proof of certification in American Red Cross Community First Aid and Safety/CPRO within 1 year of start date of class. Permission of instructor or department chair.
KHP 2239  Fitness for Life II (1)  Physical education activity course.

KHP 2240  Personal and Community Health (3)  Personal health as it applies to practices, knowledge and behavior.
KHP 2241  Intermediate Jogging (1)  Physical education activity course.
KHP 2242  Intermediate Weight Training (1)  Physical education activity course.
KHP 2246  Advanced Physical Defense for Women (1)  Physical education activity course. 
Prerequisite: Grade B or better in KHP 1146.
KHP 2250  Foundations of Health Science (1)  A study of the historical, philosophical and theoretical foundations of health education and health promotion, including the current status and projected trends in health education and promotion.
KHP 2251  Instructional and Theoretical Practices in Physical Education (3)  This course will discuss research-based instructional practices utilized in group settings and theoretical practices to support application-based practices in physical education 
Prerequisite: Student must be a Health, Physical, Exercise, Elementary, Collaborative K-6, or Collaborative 6-12 Education Major.
KHP 2252  Methods of Teaching Dance (3)  Social, folk and square dancing, including basic rhythmic activities which can be taught in elementary, middle and high schools. Equivalent to DAN 2252.
Prerequisite: Permission of instructor.
KHP 2260  Applied Fitness Concepts (2)  Personal conditioning-based course focusing on training principles, modes of exercise, training tools, performance enhancers, measurement concepts and exercise prescription.
KHP 2263  Lifeguard Training (3)  Organization and teaching of the fundamental skills for water safety and the prevention of drowning. 
Prerequisites: Advanced swimming or permission of instructor.
KHP 2270  Intermediate Military Fitness and Exercise (2)  Students will develop overall cardio-respiratory fitness, muscular endurance and strength; plan and develop an individual physical training program; enhance individual knowledge of fitness and well being; and understand the principles of exercise and components of fitness.
KHP 2276  Theory and Techniques of Coaching Softball (2)  Development of basic skills necessary for team play, squad organization, rules, scouting procedures, team conditioning, and equipment needs.
KHP 2277  Theory and Techniques of Coaching Football (2)  Offensive and defensive techniques, purchase of equipment, budgeting, ethics, rules, scouting and team conditioning.
KHP 2278  Theory and Techniques of Coaching Soccer (2)  The development of basic skills necessary for team play, squad organization, rules, scouting procedures, term conditioning and equipment needs.
KHP 2279  Theory and Techniques of Coaching Volleyball (2)  Offensive and defensive techniques, purchase of equipment, budgeting, squad organization, rules, scouting and team conditioning.
KHP 2281  Theory and Techniques of Coaching Baseball (2)  Offensive and defensive techniques, purchase and care of equipment, budgeting, batting and field drills, rules, scouting and team conditioning.

Offensive and defensive techniques, purchase and care of equipment, budgeting, squad organization, rules, scouting and team conditioning.

This course provides a basic study of the chemical and biological principles of food and food preparation techniques including food quality, nutrition, safety, processing, meal management, and laws regulating food handling.

Prerequisite: KHP L310.

This course provides a study and application of nutrition, safety, processing, meal management, and laws regulating food handling.

Co-requisite: KHP L310. Prerequisites: None. Open to all majors.

Nutritional Assessment (3)

This course provides a study and application of nutrition screening, chronic disease prevention, and intervention effectiveness.

Prerequisite: Grade of “C” or better in KHP 2211 or NSG 2204.

Complementary and Alternative Therapies (2)

This course provides knowledge relevant to public health nutrition and the role of the federal government in establishing nutrition policy in the context of the demographic profile of the United States. Concepts include nutritional epidemiology, public health monitoring through food and nutrition surveys, nutrition programs to reduce health disparities and address diet-related chronic disease, and nutrition issues of special populations.

Prerequisites: Grade of “C” or better in KHP 2211 or NSG 2204.

Community Nutrition (3)

This course covers rules, regulations, terms, origin, development, safety, equipment and performance of skills of specified sport activities including archery, soccer, conditioning and track and field which are related to KHP 4485/4486.

Physical Skills Proficiency I (2)

A course intended to instruct in the proper interpretation of medical and allied health terminology. Topics covered include Arabic, Greek, and Latin prefixes, suffixes, and root works common across medical and health-related fields, and their definitions and rules of usage.

Theory and practical application of psychological factors that impact wellness and performance of individuals and groups.

General anatomy, joint and muscle function, and analysis of body movements.

Prerequisites: Grade of C or better in KHP 3360 or BIO 3347/L347 and BIO 3348/L348.

Physiological Principles of Body Systems (3)

This course will examine the structure, function and control mechanisms of the following body systems: musculoskeletal, nervous, endocrine, cardiovascular, and respiratory. Metabolism, temperature regulation and fluid, electrolyte and acid base balance will also be discussed.

Prerequisites: Grade of “C” or better in BIO 1100/L100 and CHM 1142/L142; or SCI 2233/L233; or PHY 2252/L252.

Integrating HPER into the Curriculum (3)

Methods and materials of teaching physical education for grades K-6.

Lifeguard Training Instructor (3)

Review of all physical skills included in lifeguard training. Course will consist of theory and techniques of organizing and conducting the lifeguard training instructor course.

Prerequisite: KHP 2263.

Water Safety Instructor (WSI) (2)

Organization and teaching swimming and water safety programs.

Prerequisite: Swimming Certificate.

Scuba (2-4)

Basic techniques of scuba diving.

Prerequisites: In addition to lab fee, a student is required to purchase mask, fins, snorkel, weight belt and weights. Students are also required to make two trips for final certification. The student will be responsible for the cost of transportation, food and lodging during the two trips.

Testing and Statistical Interpretation (3)

Test selection, analyzing test scores and measurement as a technique of evaluation in health education, physical education and exercise science.

Care and Prevention of Athletic Injury (2)

The study of basic care and prevention, evaluation, management and rehabilitation of athletic injuries.

Prerequisites: Grade of C or better in BIO 3347/L347 and BIO 3348/L348 or KHP 3360.

Sports Officiating and Programs in Intramurals (3)

Focuses on school and community recreation programs, including sports, games and officiating techniques.

Physical Activity and Disease Prevention (3)

This course will explore the link between physical activity and the major diseases experienced by modern day humans. Evidence for and against the potential benefits of physical activity will be reviewed for conditions such as coronary heart disease, cancer, stroke, diabetes, arthritis, low back pain, asthma, infection, high blood cholesterol, high blood pressure, obesity and stress.

Prerequisites: Grade of C or better in Bio 1100/L100 and CHM 1142/L142 or PHY 2252/L252 or SCI 2233/L233, and KHP 3360 or BIO 3347/L347 and BIO 3348/L348.

Motor Development (3)

An analysis of the ways in which children develop movement capabilities.

Prerequisite: Junior standing or above.

Pathophysiology (3)

This course explores the differences in normal and disordered physiological processes in human body cells, organs, and organ systems. In addition, this course examines the scientific evidence in support of various current clinical applications.
of the beneficial effect of regular physical activity on reduced mortality from all causes including cardiovascular diseases and metabolic disorders. Prerequisites: Grade of "C" or better in BIO 3348/L348 and KHP 4474/L474.

KHP 4427 Health and Fitness Education (3) This course will discuss how to educate various age groups on health and fitness-related components of physical fitness, health behavior, and their application to health practice. Prerequisite: KHP 2240.

KHP 4435 Current Issues in Sport and Fitness Management (3) This course is designed to serve as a mechanism for the introduction of new information and technology issues for the sport industry. This course will encourage the undergraduate sport and fitness management student to remain current with contemporary developments in the sports industry. Prerequisites: KHP 3355 and nine additional hours of 4000 level KHP courses.

KHP 4442 Health Education (3) Course focuses on school health organization, services and institutions, grades N-12. Prerequisite: KHP 4427.

KHP 4458 Lifecycle Nutrition (3) This course provides an examination of nutrition concerns, requirements and metabolism from a biological, psychosocial, and cultural perspective from conception through late adulthood. The impact of nutrition on preconception, pregnancy, lactation, infancy, adolescence, adulthood, and aging will be studied in the context of normal nutrition and nutrition-related special conditions and interventions. Prerequisites: Grade 'C' or better in KHP 2211 or NSG 2204.

KHP 4459 Sport and Exercise Nutrition (3) This course examines the special dietary requirements of physically active individuals and athletes in training. The course will cover the basics of nutrition and bioenergetics along with current issues such as fad diets and disordered eating, pre-competition meals, sports drinks, mineral supplements, and other various ergogenic aids. Prerequisites: Grade of C or better in KHP 4474/L474.

KHP 4460 Principles of Strength and Conditioning (3) This course will enable the student to develop knowledge and expertise in the areas of strength training, cardiovascular endurance, flexibility, reaction time, speed, and agility in traditional and non-traditional sports. Emphasis will be placed on implementation and measurement of the above programs in conjunction with athletic development. Prerequisites: Grade of C or better in KHP 3360 or BIO 3347/L347 and BIO 3348/L348 and KHP 3352. Co-requisite: KHP L460.

KHP L460 Principles of Strength and Conditioning Lab (1) This lab is designed to develop practical knowledge and expertise in the areas of strength training, cardiovascular endurance, flexibility, reaction time, speed, and agility in traditional and non-traditional sports. Emphasis will be placed on implementation and measurement of the above programs in conjunction with athletic development. Co-requisite: KHP 4460.

KHP 4462 Physical Education for Exceptional Children (3) This course explores programs to serve the needs of the exceptional child in schools. Prerequisites: KHP 3361.

KHP 4465 Classroom Management and Organization for KHP (3) This course will explore the issues of organization, curriculum, and classroom management as they relate to the physical education environment. Directed field requirements will be presented and observation hours will be conducted. Prerequisite: Junior Standing or above.

KHP 4472 Internship in Health/Physical Education (9) The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience. Prerequisite: admission to TEP. Co-requisite: IED 4454.

KHP 4474 Exercise Physiology (3) Physiological mechanisms and adaptations of cells, tissues, organs and systems during physical activity. Prerequisites: Grade of C or better in KHP 3360 or BIO 3347/L347 and BIO 3348/L348.

KHP L474 Exercise Physiology Lab (1) Course will provide experience for applied exercise physiology principles as students are introduced to laboratory and field tests of muscular strength, anaerobic power, maximal oxygen uptake, body composition and other physiological measurements. Co-requisite: KHP 4474.

KHP 4475 Exercise Testing and Prescription (3) Course will examine the criteria for evaluation of health status of persons wishing to begin an exercise program, guidelines of establishing current fitness level, and the basic principles of exercise prescription. Levels of certification and criteria by ACSM will also be discussed. Prerequisites: Grade of C or better in KHP 4474/L474.

KHP 4476 Laboratory Practicum in Exercise Performance (2) Students will be introduced to some of the measurement techniques routinely used in exercise physiology and will gain practical experience in administration of these tests. Emphasis will be placed on how to avoid measurement errors. Prerequisite: Grade of C or better in KHP 4475.

KHP 4481 Methods and Materials for the P-12 Physical Educator (3) Teaching methods, selection, organization and use of physical education materials in grades P-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teachers, and lesson plan formatting. A professional laboratory experience is included in this course. Prerequisite: admission to TEP.

KHP 4485 Teaching Individual and Team Sports I (3) Teaching methods, techniques, and officiating secondary team sports and individual physical fitness activities. Prerequisite: KHP 3330, and KHP 3331.

KHP 4486 Teaching Individual and Team Sports II (3) Teaching methods, techniques, and officiating secondary team sports and individual physical fitness activities. Prerequisite: KHP 3330, and KHP 3331.

KHP 4487 Special Topics in Exercise Performance (2) An intensive study of selected topics in exercise science. Topics to be taught each term TBA. Prerequisite: KHP 4474 or permission of instructor.
KHP 4488 Cardiovascular Physiology (3)
This course will cover the function of the cardiovascular system in health and disease. Topics covered will include anatomy and physiology of the heart and circulatory system, regulation of heart rate, blood pressure, and blood flow, as well as regulation of cardiovascular function during rest and exercise.
Prerequisite: Grade of “C” or better in KHP 4474/L474.

KHP 4490 Internship in Area of Concentration (6)
A supervised experience in planning, staging and evaluating a formal practicum in related field.
Prerequisite: KHP 4443, 4499, permission of the department chair.

KHP 4491-92 Guided Independent Research (1 to 3 credit hours)
Additional information is indexed under Independent Study and Research.

KHP 4493-94 Guided Independent Study (1 to 3 credit hours)
Additional information is indexed under Independent Study and Research.

KHP 4495 Advanced Exercise Physiology (3)
This course will allow students to experience and explore advanced concepts and topics related to exercise physiology.
Prerequisites: Grade of C or better in KHP 4474.

KHP 4496 Biomechanics (3)
The study of anatomical, mechanical, and neurophysiological factors influencing human motion. Emphasis is given to the qualitative and quantitative application of biomechanical principles to analyze human movement.
Prerequisites: Grade of C or better in KHP 3352
Co-requisite: KHP L496.

KHP L496 Biomechanics Lab (1)
The measurement and assessment of anatomical, mechanical, and neurophysiological factors influencing human motion. Emphasis is given to the qualitative and quantitative application of bio-mechanical principles to analyze human movement.
Co-requisite: Grade of C or better in KHP 4496.

KHP 4497 Senior Seminar in Exercise Science (1)
Students will examine trends in the industry, career paths, and discuss current topics in wellness, fitness, sport, nutrition, athletic training, and physical therapy. This course will also address the standards, behaviors, and expectations of the exercise scientist.
Prerequisite: Sr. standing or permission of instructor.

KHP 4498 Internship in Exercise Science (3)
A supervised experience in planning, staging, and evaluating a formal practicum in exercise science or a related field.
Prerequisite: Senior standing or permission of instructor.

KOR 1101 Introductory Korean I (3)
Introduction to the Korean Language.

KOR 1102 Introductory Korean II (3)
Introduction to the Korean Language.
Prerequisite: KOR 1101 or permission of instructor.

KOR 2201 Intermediate Korean I (3)
Progressive development of basic language skills in Korean.
Prerequisite: KOR 1102 or permission of instructor.

KOR 2202 Intermediate Korean II (3)
Progressive development of basic language skills in Korean.
Prerequisite: KOR 2201 or permission of instructor.

Korean Courses (KOR)

Language and Culture on Location (LCL)

LCL 2201 Language and Culture on Location I (1-3)
The study of selected languages and/or cultures on location.

LCL 2202 Language and Culture on Location II (1-3)
The study of selected languages and/or cultures on location.

Latin Courses (LAT)

LAT 1131 Introductory Latin I (3)
Introduction to the Latin language with emphasis on pronunciation, basic vocabulary, fundamentals of grammar, and graded readings.

LAT 1132 Introductory Latin II (3)
Continuation of LAT 1131.
Prerequisite: LAT 1131 or permission of instructor.

LAT 2231 Intermediate Latin I (3)
Continuation of LAT 1131-1132.
Prerequisite: LAT 1132 or permission of instructor.

LAT 2232 Intermediate Latin II (3)
Continuation of LAT 2231, culminating in the reading of authentic passages from selected Latin authors.
Prerequisite: LAT 2231 or permission of instructor.

LAT 3331 Readings in Latin Literature (3)
Readings in a selected author, period, or genre.
May be repeated for credit. Prerequisite: LAT 2232 or permission of instructor.

Law Courses (LAW)

LAW 2221 Legal Environment of Business (3)
This course is designed to go beyond LAW 2221 (Legal Environment of Business) and to provide an opportunity to explore in-depth the types of legal concepts, principles, and rules of law and equity that apply to business activities. This course provides an overview of law in general, the American legal system, federal and state court procedures, effects on law-making by legislative, judicial, and administrative procedures. The course may also include constitutional law, business ethics, contracts, products liability, sales and commercial paper.

LAW 3323 Legal and Ethical Aspects of Competition For Entrepreneurs (3)
This course is designed to go beyond LAW 2221 (Legal Environment of Business) and to provide an opportunity to explore in-depth the types of legal and ethical issues that entrepreneurs, small business owners, and family business owners encounter in the worlds of domestic and international aspects of competition.
Prerequisite: Lower-level Core, MGT 4475.

LAW 4420 Administrative Law (3)
Administrative law is the law relating to administrative agencies. An overview of the legal environment of public administration. The focus is on the powers and procedures of administrative agencies including administrative discretion, rule-making, investigations, prosecuting, negotiating and settlement based on Constitutional law, statutory law, common law, and agency-made law and the liability of governments and their officers.
LEADERSHIP COURSES (LDR)

LDR 1100  Introduction to Leadership (3)
This course helps students apply leadership knowledge, skills and techniques to campus and community activities. Practical exercises, role-playing, class interaction and lecture/discussion with established leaders reinforce learning and aid each student in developing a personal leadership plan.

LDR 2200  Tools for Leaders (3)
This course helps developing leaders use tools essential to effective leadership including briefing, writing, delegation, media relations, meeting management and group dynamics skills.
Prerequisite: LDR 1100.

LDR 2210  Leadership and Interpersonal Skills (3)
This course will focus on analyzing and applying the theories and research regarding the interpersonal skills required for leaders. Emphasis will also be placed on enhancing and developing interpersonal leadership skills in each student.

LDR 2220  Contemporary Issues of Women and Leadership (3)
Through an understanding and analysis of culture and current issues, this course will help each student explore the capabilities and leadership women bring to organizations. Through an application of models, styles, and theory, students will develop better self-awareness and understand the unique capabilities of women in leadership positions.

LDR 2221  Case Studies in Leadership I (1)
Case Study/Studies of a specific person or persons who have demonstrated leadership attributes that can be applied to leadership development today.
Permission of Instructor required.

LDR 2222  Case Studies in Leadership II (1)
Case Study/Studies of a specific person or persons who have demonstrated leadership attributes that can be applied to leadership development today.
Permission of Instructor required.

LDR 2223  Case Studies in Leadership III (1)
Case Study/Studies of a specific person or persons who have demonstrated leadership attributes that can be applied to leadership development today.
Permission of Instructor required.

LDR 3300  Leadership Theory (3)
This course helps students understand and apply what writers, theorists and leaders tell us about how to lead effectively in a rapidly changing world. The course also exposes students to what leaders are reading. Experienced leaders will provide guest instruction.
Prerequisite: LDR 2200.

LDR 3320  Great Leaders (3)
We significantly increase our understanding of leadership if we view leadership as practiced in the context of the world around us. An excellent way to do this is to evaluate the lives of those who have been recognized as great leaders in many different eras, fields, and environments. The issues they faced and how they led provide wonderful insight on how to lead. We will analyze their successes and their failures and learn from both. We will evaluate the best of leadership practices by studying the lives of great leaders throughout history.
Prerequisites: LDR 3300.

LDR 4400  Leadership Seminar (3)
A capstone course that includes principles, practices and presentations by experienced leaders from the public and private sectors. This course helps developing leaders synthesize knowledge and prepare for future leadership challenges.
Prerequisites: Leadership minor or enrollment in the University Honors Program or permission of instructor.

LDR 4402  Leadership Seminar Field Experience (2)
This course includes field trips to visit CEOs, senior state government officials and military leaders, as well as business and dinner etiquette training and one-on-one mentoring by campus faculty and administrative leaders. This course is open to a limited number of developing leaders who have been active in campus and/or community activities.
Prerequisite: Permission of instructor.
Co-requisite: LDR 4400.

LDR 4444  Leadership Internship (3 to 6 credit hours, may be repeated for no more than 6 total hours)
Supervised internship in an office or location approved by the director of the Institute for Leadership Development, resulting in deliverables agreed upon by the director and intern.
Prerequisites: junior or senior status, and permission of leadership advisor. Students will submit a written request to the director at least two weeks in advance of the term in which study is to be undertaken.

LDR 4450  Leadership Service Learning (1 to 6 credit hours, may be repeated for no more than 6 total hours)
Supervised service learning leadership on a project with an agency or aligned with a service organization as approved by the director of the Institute for Leadership Development.
Prerequisites: junior or senior status and permission of leadership advisor. Students will submit a written request to the director at least two weeks in advance of the term in which study is to be undertaken.

LDR 4493-94  Guided Independent Study (1 to 3 credit hours)
Supervised study through field or laboratory projects, guided readings, creative endeavors or achievement of specific skills.
Prerequisites: junior or senior status, permission of leadership advisor. A written request must be submitted to the instructor at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course in which a grade of D or below has been earned.

LEGAL STUDIES COURSES (LGL)

LGL 2200  Introduction to Legal Studies (3)
This course provides an introduction to the structure and processes of the American legal system as well as study of the development and patterns of growth of the legal profession (including, but not limited to the responsibilities, requirements and benefits for attorneys, judges,
prosecutors, jury analyst, specialized testimony experts, forensic investigators and paralegals). Focus is placed on the examination of the central issues and processes of the entire legal system and how individuals and “workgroups” cooperatively organize and influence the American legal system. This course will satisfy the prerequisite of CJ 1101 for CJ 3352, CJ 4442 and CJ 4447 for Legal Studies minors.

LGL 3300 Legal Research and Writing (3)
This course will provide a comprehensive working knowledge and understanding of research materials and research tools. Key competencies will include the use of both manual and automated forms of legal references, understanding and distinguishing sources of law, legal research skills and the analysis of legal research problems.
Prerequisite: ENG 1101.

LGL 4400 Seminar in Legal Studies (3)
The course will include an overview of the legal assisting profession, the duties and ethical responsibilities of the legal professionals including the attorney’s code of conduct. It will examine law office practices and procedures, which includes case assignment, document handling and filing, time keeping, billing and law office communication. Furthermore, this course provides the facts and principles that form the basis of law related to Criminal Prosecution and Defense, Bankruptcy, Business Organizations, Litigation, Real Estate, and Estate Planning and Probate.

Prerequisite: ENG 1101.

MARINE BIOLOGY COURSES (MB)
Offered at Dauphin Island Sea Lab (DISL) only
Courses are offered during the summer semester only. Because course offerings change, check current DISL summer bulletin for specific course offerings and descriptions.

MB 4402 Marine Invertebrate Zoology (4)
A study of the natural history, systematics, and morphology of marine invertebrates from a variety of habitats in the Gulf of Mexico. Participation in extended field trips is a required part of the course.
Prerequisites: BIO 1101/L101, 2229/L229, CHM 1143/L143.

MB 4403 Marine Vertebrate Zoology (4)
Biology of marine vertebrates emphasizing systematics, behavior, physiology, and ecology of local forms.
Prerequisites: BIO 1101/L101, BIO 2229/L229, CHM 1143/L143.

MB 4404 Marine Botany (4)
A general survey of algae and vascular plants associated with the marine and estuarine environment.
Prerequisites: BIO 1101/L101, 2229/L229, CHM 1143/L143.

MB 4410 Introduction to Oceanography (4)
A general introduction to the physics, chemistry, geology, and biology of the oceans.
Prerequisites: BIO 1101/L101, 2229/L229, CHM 1143/L143.

MB 4419 Marine Aquaculture (2)
Techniques in live animal culture with an emphasis on basic principals that can be applied to the culture of any organism for research, display, or commercial profit.
Prerequisites: BIO 1101/L101, 2229/L229, CHM 1143/L143.

MB 4423 Marine Ecology (4)
Lecture and laboratory studies of bioenergetics, community structure, population dynamics, predation, competition, and speciation in marine ecosystem.
Prerequisites: BIO 1101/L101, BIO 2229/L229, CHM 1143/L143.

MB 4427 Ecology of the Florida Everglades (2)
This course examines the natural history and ecology of one of the world’s rarest and most endangered wilderness areas. The Everglades is the only area of our planet to be designated as a National Park, an International Biosphere Reserve, and a World Heritage Park. This two-week course will consist of a week of intensive lectures and discussions focusing on the history, geology, hydrology, and biota of this system, and then a week of intense field time to examine the Everglades and associated systems.
Prerequisites: CHM 1143/L143, BIO 2229/L229

MB 4428 Shark and Ray Biology (2)
An introduction to the biology of sharks and rays, with special emphasis on regional shark fauna and field techniques.
Prerequisites: BIO 1101/L101, BIO 2229/L229, CHM 1143/L143.

MB 4430 Dolphins and Whales (2)
Lectures, audiovisual presentations, and practical exercises to guide students to further study of cetaceans.
Prerequisites: BIO 1101/L101, BIO 2229/L229, CHM 1143/L143.

MB 4432 Biology and Conservation of Marine Turtles (2)
An overview of the biology and conservation of marine turtles, including identification, distribution, nesting behavior, migratory behavior, and feeding ecology.
Prerequisites: BIO 1101/L101, BIO 2229/L229, CHM 1143/L143.

MB 4438 Coastal Wetlands Ecology (3)
This course will focus on coastal and near shore wetland areas, with an emphasis on the biogeochemical processes that occur within.
Prerequisites: BIO 1101/L101, BIO 2229/L229, CHM 1143/L143.

MB 4451 Marine Technical Methods (2)
This course will provide an introduction to different methods of sensing the ocean, including building and testing simple sensors, e.g., temperature and light, using Arduino microcontrollers and software, use of instruments to collect high-resolution data, and some background on how technology has led to key advances in marine science. The course will be primarily project-based, with students working together to build instruments, learn basic programming skills to control sensors, and going in the field to test instruments and collect environmental data.
Prerequisite: CHM 1143/L143, BIO 2229/L229

MB 4460 Introduction to Neurobiology (4)
The study of the structure, development, physiology, and pharmacology of the nervous systems and sense organs.
Prerequisite: Permission of instructor.

MB 4461 Environmental Application of Geographic Information Systems (2)
This course consists of learning applied mapping and analysis with GIS and will leverage other geospatial techniques including remote sensing, geometric visualization, and spatial analysis with particular emphasis on environmental application.
Prerequisite: CHM 1143/L143, BIO 2229/L229

MB 4470 Marine Restoration Ecology (2)
The course provides an overview of the scientific and technical principles of marine habitat restoration. The students will discuss the role of key ecological concepts in restoration and the role of restoration in science and society. Students will learn how to design restoration projects and monitoring plans.
**COURSE DESCRIPTIONS · 178**

### MANAGEMENT COURSES (MGT)

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Name</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGT 3300</td>
<td>Principles of Management (3)</td>
<td>An introduction to management functions, principles, and techniques. The course includes a discussion of planning, organizing, influencing through leadership, and control within the organization.</td>
</tr>
<tr>
<td>MGT 3301</td>
<td>Honors Principles of Management (3)</td>
<td>An introduction to management functions, principles, and techniques. The course includes a discussion of planning, organizing, influencing through leadership, and control within the organization for the superior student. Prerequisites: SCOB Honors students and permission of the Associate Dean.</td>
</tr>
<tr>
<td>MGT 3380</td>
<td>Principles of Supervision (3)</td>
<td>An introduction to supervision principles, best practices and concepts. Topics discussed include delegation, planning and goal setting, employee training and motivating team coaching, communicating, and appraising. Prerequisites: Lower-level Core, MGT 3300.</td>
</tr>
<tr>
<td>MGT 4440</td>
<td>Developing and Leading Effective Teams (3)</td>
<td>An in-depth study of team development and team leadership in the work setting focused to better understand team functions under varying task conditions. Special emphasis will be placed on the leadership of work teams in both face-to-face and virtual settings for effective performance and member satisfaction. This course deals extensively with maintenance and task behaviors of team members. Prerequisites: Lower-level Core, MGT 3300.</td>
</tr>
<tr>
<td>MGT 4450</td>
<td>Corporate Social Responsibility and Sustainability (3)</td>
<td>This course will enable students to understand the rationale behind corporate social responsibility (CSR) and sustainability. It will take students through an evaluation of risks and potential impacts in decision making, enabling them to recognize the links between the success of an organization and the well-being of a community/society along with introducing methods and standards of integrating CSR throughout an organization. Prerequisites: Lower-level Core, MGT 3300.</td>
</tr>
<tr>
<td>MGT 4460</td>
<td>Introduction to Project Management (3)</td>
<td>This course provides an introduction to essential principles governing effective project management and an application of tools and techniques that can be applied to defining projects, establishing task structure, planning and budgeting, managing of resources to achieve the project objectives, and post project evaluation. Prerequisites: Lower-level Core, MGT 3300, QM 3345.</td>
</tr>
<tr>
<td>MGT 4471</td>
<td>Leadership and Change (3)</td>
<td>A study of leadership and change concepts applied to foundational concepts of leadership, motivational theories, and organizational change theories. The primary focus of the course will be directed toward the application of these theories, practices, and concepts in an organizational setting, designed to enable an achievement of organizational goals and objectives, while also undertaking application oriented activities that encourage the development of critical thinking skills about the concepts. Emphasis will be placed on key similarities and differences between US organizations and international organizations. Prerequisite: Lower-level Core, MGT 3300.</td>
</tr>
<tr>
<td>MGT 4472</td>
<td>Organizational Behavior (3)</td>
<td>A study of individual and group behavior in business organizations.</td>
</tr>
<tr>
<td>MGT 4475</td>
<td>Entrepreneurial Management (3)</td>
<td>This course examines how startups, small companies &amp; family enterprises reach the marketplace and sustain their businesses. The course centers around the development of the business plan, focusing on creativity and innovation. Emphasizes entrepreneurial opportunities &amp; new venture processes both domestically and internationally. Detailed analysis of the entities. Prerequisite: Lower-level Core, MGT 3300.</td>
</tr>
<tr>
<td>MGT 4478</td>
<td>Managing in a Global Environment (3)</td>
<td>This course is a survey and analysis of topics important to successfully managing multinational business operations. Included in the course are considerations of environmental analysis, modes of entry, planning and cross-cultural issues in directing, decision-making, organizing and staffing operations in multinational enterprises. Capstone for the Global Business Core. Prerequisites: Lower-level Core, ECO 4451, HRM 3375, MGT 4471, and MKT 4468.</td>
</tr>
<tr>
<td>MGT 4479</td>
<td>Management Seminar (3) (capstone)</td>
<td>This course is a study of current management issues which examines the application of traditional management theory in the context of current management problems. This is the capstone course for the management majors. Prerequisites: Lower-level Core MGT 3300, QM 3345, MGT 4440, MGT 4450, and MGT 4472.</td>
</tr>
<tr>
<td>MGT 4484</td>
<td>Entrepreneurial Strategy and Marketing (3) (capstone)</td>
<td>This entrepreneurship concentration capstone integrates theory and practice from prior courses in the discipline, applied to a selected venture, by focusing on a strategic analysis, emphasizing the marketing function. The larger aim is to guide venture growth rationally, creatively, and ethically through the challenges associated with the successive stages of professionalization, maturation, and global presence. The course considers ventures internal and external to existing organizations. Prerequisite: ECO 3360, FIN 3360, MGT 4475. (Simultaneous enrollment is acceptable)</td>
</tr>
</tbody>
</table>
MGT 4486 Honors Leadership and Change (3)
A study of leadership and change concepts applied to foundational concepts of leadership, motivational theories, and organizational change theories for the superior student. The primary focus of the course will be directed toward the application of these theories, practices, and concepts in an organizational setting, designed to enable an achievement of organizational goals and objectives, while also undertaking application oriented activities that encourage the development of critical thinking skills about the concepts. Emphasis will be placed on key similarities and difference between US organizations and international organizations.
Prerequisites: Lower-level Core, MGT 3300, SCOB Honors Student, and permission of the Associate Dean.

MGT 4487 Honors Managing in a Global Environment (3)
This course is a survey and analysis of topics important to successfully managing multinational business operations for the superior student. Included in the course are considerations of environmental analysis, modes of entry, planning and cross-cultural issues in directing, decision-making, organizing and staffing operations in multinational enterprises. Capstone for the Global Business Core.
Prerequisites: Lower-level core, MGT 3301, SCOB Honors Student, and permission of the Associate Dean.

MKT 4461 Professional Selling (3)
This course examines personal selling as a professional marketing activity. It centers on fostering relationships by developing interpersonal communication skills, understanding buyer motivations, and adding value to clients through long-term relationships. Topics focus on the economic, psychological, and social aspects of professional selling, direct selling techniques, and the sales process with an emphasis on building customer relationships.
Prerequisite: MKT 3300.

MKT 4462 Consumer Behavior (3)
This course examines the consumer as a decision maker. Topics focus on the internal and external influences underlying purchase decisions and their implications for marketing strategy. Primary emphasis is on final consumers with a secondary emphasis on organizational buyers.
Prerequisite: MKT 3300.

MKT 4463 Retailing (3)
This course examines the principles and practices of retail management. Topics focus on retail format; store location and layout; merchandise planning; inventory management; atmospherics; and customer service.
Prerequisite: MKT 3300.

MKT 4464 Marketing Research (3)
This course examines the foundational role of research to the formulation of sound strategic marketing decisions. Topics focus on problem definition, research design, data acquisition, analysis, and interpretation. The systematic approach of harnessing data/information to drive effective marketing decision-making is also considered.
Prerequisite: MKT 3300.

MKT 4465 Supply Chain Management (3)
This course examines the key concepts and principles associated with the flow of materials and information from suppliers to customers for both manufacturing and service firms. Topics focus on the procurement, operations, transportation, and integration activities associated with a firm’s distribution system.
MKT 4468 Global Marketing (3)
This course examines the impact the global environment has on marketing strategy. Topics focus on the cultural, political, legal, and economic differences among nations as they affect marketing opportunities and operations.
Prerequisites: Lower-level Core, MKT 3300.

MKT 4469 Marketing Management (3)
This course is the “capstone” marketing course. It examines the managerial aspects of marketing which involve the integration of marketing research, customer analysis, and marketing strategy to provide long-term value to customers. Topics focus on the application of marketing concepts, procedures, and practices to solve marketing problems and develop strategic marketing plans.
Prerequisite: 15 semester hours in marketing courses beyond MKT 3300.

MKT 4470 Honors Global Marketing (3)
This course examines the impact the global environment has on marketing strategy for the superior student. Topics focus on the cultural, political, legal, and economic differences among nations as they affect marketing opportunities and operations.
Prerequisites: Lower-level Core, MKT 3301, SCOB Honors Student, and permission of the Associate Dean.

MKT 4472 Sales Force Management (3)
This course examines the key concepts used to formulate, implement, and evaluate a sales program. Topics focus on forecasting sales and sales management responsibilities including recruitment, training, leadership, organization, motivation and retention of the sales force.
Prerequisites: MKT 3300 and MKT 4461

MKT 4480 Special Topics in Marketing (1-3)
This course examines a selected marketing topic of interest that is not covered in other course offerings. The topic for the semester will be indicated in advance. Students may repeat the course for credit so long as the selected topics are different. Maximum credit of six hours.
Note: This course may not be substituted for any required course.
Prerequisite: MKT 3300

MKT 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
This course involves directed research on marketing topics of mutual interest to a student and faculty member. Maximum credit of six hours.
Note: This course may not be substituted for any required course.
Prerequisite: MKT 3300.

MKT 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)
This course involves directed project work of mutual interest to a student and faculty member. Maximum credit of six hours.
Note: This course may not be substituted for any required course.
Prerequisite: MKT 3300.

MKT 4499 Marketing Internship (3)
This course involves the practical application of marketing principles and theories in an actual business setting. Students gain practical professional experience in conjunction with academic development under the supervision of both a faculty member and a manager within an organization.
Note: This course may not be substituted for any required course.
Prerequisites: Six semester hours in marketing courses beyond MKT 3300 and permission of instructor.

MEDICAL COURSES (MLS)
(Offered in hospital internship only)

MLS 4400 Clinical Urinalysis (1)
The imparting of skills for performing and interpreting routine urinalyses as well as special urinalysis procedures.

MLS 4401 Clinical Urinalysis Lab (1)
This lab section includes specimen handling procedure manual, audio-visual, quality control, record keeping, and reporting system.

MLS 4402 Clinical Microbiology (4)
This lecture course covers areas of bacteriology, mycology, and virology.

MLS 4403 Clinical Microbiology Lab (2)
This lab teaches identification methods, isolation methods, and current clinical techniques for working with bacteria, molds, viral, and rickettsia organisms.

MLS 4404 Clinical Parasitology (1)
Discussions concerning proper collection and handling of specimens for detection of parasites, techniques used to detect parasites and morphological features, and life cycles of important organisms.

MLS 4405 Clinical Parasitology Lab (1)
Use of the laboratory procedures and techniques for isolation and identification of parasitic organisms.

MLS 4406 Clinical Hematology (4)
Detailed studies of blood, including cell types, functions, number of cells, clotting mechanisms, coagulation disorders, platelet disorders, and other pertinent topics.

MLS 4407 Clinical Hematology Lab (2)
Special studies and training involving cell counts, hemoglobin and hematocrit determinations, and other special hematology procedures.

MLS 4408 Immunohematology (3)
This block involves blood banking, studies of the ABO blood group system, the Rh system, blood typing, antibody studies, and effects of transfusion.

MLS 4409 Immunohematology Lab (1)
Blood banking studies and techniques. Clinical applications of procedures under direct supervision.

MLS 4410 Clinical Serology (2)
Lectures emphasizing the principles and interpretations of immunological procedures. The study of the immune systems of the body. Antigen-antibody studies and techniques.

MLS 4411 Clinical Serology Lab (1)
In this lab, the student becomes proficient in running and interpreting serology (immunology) tests.

MLS 4412 Clinical Chemistry (6)
This lecture course focuses on the principles and interpretations of biochemical analytical methods, clinical calculations, and quality control.

MLS 4413 Clinical Chemistry Lab (4)
This lab rotation provides the practical experience of running biochemical tests and interpreting their results. Some prior experience with instrumentation is required in order to understand how to use and care for clinical instruments.
### MILITARY SCIENCE AND LEADERSHIP COURSES (MSL)

<td>MSL 1104</td>
<td>Military Basic Leadership Lab I-A (1)</td>
<td>Leadership lab is required for Army ROTC students. The student will receive training in drill and ceremonies, field craft, individual movement techniques, squad tactics, map reading and land navigation, first aid, and use and maintenance of the M16 Rifle.</td>
<td>Co-requisite: MSL 1104.</td>
<td></td>
</tr>
<tr>
<td>MSL 1105</td>
<td>Military Basic Leadership Lab I-B (1)</td>
<td>Leadership lab is required for Army ROTC students. The student will receive training in drill and ceremonies, field craft, individual movement techniques, squad tactics, map reading and land navigation, first aid, and use and maintenance of the M16 Rifle.</td>
<td>Co-requisite: MSL 1105.</td>
<td></td>
</tr>
<tr>
<td>MSL 2201</td>
<td>Individual Leadership Studies (2)</td>
<td>This course develops the knowledge of self, self-confidence and individual leadership skills as well as develops problem solving and critical thinking skills and the application of communication, feedback, and conflict resolution. Emphasized areas include personal development, goal setting, communication, problem solving and decision-making, leadership, teamwork, the group.</td>
<td>Co-requisite: MSL 2204.</td>
<td></td>
</tr>
<tr>
<td>MSL 2202</td>
<td>Leadership and Teamwork (2)</td>
<td>This course focuses on self-development guided by knowledge of self and group processes by focusing on challenging current beliefs, knowledge and skills.</td>
<td>Co-requisite: MSL 2205.</td>
<td></td>
</tr>
<tr>
<td>MSL 2204</td>
<td>Military Basic Leadership Lab II-A (1)</td>
<td>Leadership lab is required for Army ROTC students. The students will receive training in drill, physical training, rappelling, water survival, tactics, marksmanship, night operations, and land navigation.</td>
<td>Co-requisite: MSL 2205.</td>
<td></td>
</tr>
<tr>
<td>MSL 2205</td>
<td>Military Basic Leadership Lab II-B (1)</td>
<td>Leadership lab is required for Army ROTC students. The students will receive training in drill, physical training, rappelling, water survival, tactics, marksmanship, night operations, and land navigation.</td>
<td>Co-requisite: MSL 2205.</td>
<td></td>
</tr>
<tr>
<td>MSL 3301</td>
<td>Leadership and Problem Solving (3)</td>
<td>This course examines the basic skills that underlie effective problem solving by analyzing the role officers played in the transition of the Army from Vietnam to the 21st Century, analysis of military missions and the planning of military operations, the features and execution of the Leadership Development Program, and the execution of squad battle drills.</td>
<td>Co-requisite: MSL 3304.</td>
<td></td>
</tr>
<tr>
<td>MSL 3302</td>
<td>Leadership and Ethics (3)</td>
<td>This course probes leader responsibilities that foster an ethical command climate by developing cadet leadership competencies and applying principles and techniques of effective written and oral communication. Students are prepared for success at the ROTC National Advanced Leadership Course.</td>
<td>Prerequisite: Permission of the Professor of Military Science for non-contracted cadets.</td>
<td>Co-requisite: MSL 3305.</td>
</tr>
<tr>
<td>MSL 3304</td>
<td>Military Advanced Leadership Lab III-A (1)</td>
<td>Leadership Lab is required for all Army ROTC students. The student will receive training in troop-leading procedures, mission planning, squad tactics, land navigation, individual movement techniques, water survival and rappelling.</td>
<td>Co-requisite: MSL 3305.</td>
<td></td>
</tr>
<tr>
<td>MSL 3305</td>
<td>Military Advanced Leadership Lab III-B (1)</td>
<td>Leadership Lab is required for all Army ROTC students. The student will receive training in troop-leading procedures, mission planning, squad tactics, land navigation, individual movement techniques, water survival and rappelling.</td>
<td>Co-requisite: MSL 3305.</td>
<td></td>
</tr>
<tr>
<td>MSL 4401</td>
<td>Leadership and Management (3)</td>
<td>This course builds on the experience gained at the National Advanced Leadership Course in order to solve organizational and staff problems a discusses staff organization and functions, analysis of counseling responsibilities and methods, the principles of subordinate motivation and organizational change. Students will apply leadership and problem solving principles to a case study and or simulation.</td>
<td>Prerequisite: Permission of the Professor of Military Science for non-contracted cadets.</td>
<td>Co-requisite: MSL 4404.</td>
</tr>
<tr>
<td>MSL 4402</td>
<td>Officier (3)</td>
<td>This course is designed to explore topics relevant to Second Lieutenants entering the U.S. Army and focuses on the legal aspects of decision making leadership, analyzing Army organization from the tactical to the strategic level, assessing administrative and logistical functions performance of platoon leader actions, and an examination of leader responsibilities that foster an ethical command climate.</td>
<td>Prerequisite: Permission of the Professor of Military Science for non-contracted cadets.</td>
<td>Co-requisite: MSL 4405.</td>
</tr>
<tr>
<td>MSL 4404</td>
<td>Military Advanced Leadership Lab IV-A (1)</td>
<td>Leadership lab is required for all Army ROTC students. The student will receive training in troop-leading procedures, mission planning, squad tactics, land navigation, individual movement techniques, water survival and rappelling.</td>
<td>Co-requisite: MSL 4405.</td>
<td></td>
</tr>
<tr>
<td>MSL 4405</td>
<td>Military Advanced Leadership Lab IV-B (1)</td>
<td>Leadership lab is required for all Army ROTC students. The student will receive training in troop-leading procedures, mission planning, squad tactics, land navigation, individual movement techniques, water survival and rappelling.</td>
<td>Co-requisite: MSL 4405.</td>
<td></td>
</tr>
<tr>
<td>MSL 4497</td>
<td>Senior Seminar in Military Science (1-3)</td>
<td>This is a capstone course for Senior Army ROTC Contracted Cadets designed to: 1.) help senior cadets integrate the knowledge gained from their other required Military Science Leadership courses; and 2.) assist them in developing analytical thinking skills through practical use of these skills in simulated leadership roles among their peers using a seminar approach.</td>
<td>Note: This MSL 4497 Senior Seminar in Military Science course is repeatable up to 3 times and</td>
<td></td>
</tr>
</tbody>
</table>
receive 1 credit hour per course per semester. This course may not be substituted for any other required Military Science courses. Prerequisite: Completion of all other advanced level Military Science Leadership courses in the Military Science Leadership minor or Army ROTC program and will require permission of the Professor of Military Science to enroll.

### Mathematics Courses (MTH)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MTH 0096</td>
<td>Pre-Algebra (3)</td>
<td>Developmental / remedial instruction including operations with whole numbers, decimals, and fractions. Ratio, percent and equation solving will be emphasized. Note: This course is for institutional credit only and will not be used in meeting degree requirements. This course will not substitute for any general studies requirement.</td>
</tr>
<tr>
<td>MTH 1100</td>
<td>Fundamentals of Algebra (3)</td>
<td>Developmental / remedial instruction including integer and rational arithmetic, linear equations, inequalities, integer exponents, polynomials and factoring, rational expression. Prerequisite: Placement or a grade of C or better in MTH 0096. Note: This course is for institutional credit only and will not be used in meeting degree requirements. This course will not substitute for any general studies requirement.</td>
</tr>
<tr>
<td>MTH 1105</td>
<td>Intermediate Algebra (3)</td>
<td>Developmental / remedial instruction including real and complex numbers; polynomials and factoring; rational exponents; roots and radicals; linear equations and inequalities; quadratic equations; and graphing. Prerequisite: placement or a grade of C or better in MTH 1100. Note: This course is for institutional credit only and will not be used in meeting degree requirements. This course will not substitute for any general studies requirement.</td>
</tr>
<tr>
<td>MTH 1110</td>
<td>Finite Mathematics (3)</td>
<td>Topics include a survey of logic, sets, counting, permutations, combinations, basic probability, an introduction to statistics, and matrices and their applications to graph theory. Prerequisite: appropriate score on mathematics placement test, advanced placement, or a grade of C or better in MTH 1105. Note: Credit will not count toward a major or minor in mathematics.</td>
</tr>
<tr>
<td>MTH 1112</td>
<td>Pre-Calculus Algebra (3)</td>
<td>Topics include the algebra of functions, including polynomial, rational, exponential, and logarithmic functions. The course also contains systems of equations and inequalities, linear and quadratic equations and inequalities, graphs of polynomials, and the binomial theorem. Prerequisite: appropriate score on mathematics placement test, advanced placement, or a grade of C or better in MTH 1105. Note: Credit will not count toward a major or minor in mathematics.</td>
</tr>
<tr>
<td>MTH 1114</td>
<td>Pre-Calculus Trigonometry (3)</td>
<td>This course covers trigonometric functions including definitions, identities, and trigonometric equations, applications as well as properties and graphs of trigonometric functions and their inverses. Also included are the law of sines, the law of cosines, polar coordinates, vectors, and conic sections. Prerequisite: MTH 1112 with a grade of C or better or advanced placement. Note: Credit will not count toward a major or minor in mathematics.</td>
</tr>
<tr>
<td>MTH 1125</td>
<td>Calculus I (4)</td>
<td>Topics include limits of functions, derivatives of algebraic, trigonometric, exponential and logarithmic functions and their inverses and the definite integral and its application to area problems. Applications of the derivative including maximum and minimum problems, and curve sketching using calculus. Prerequisite: A grade of C or better in MTH 1114 or advanced placement.</td>
</tr>
<tr>
<td>MTH 1126</td>
<td>Calculus II (4)</td>
<td>Applications of integration (such as volume, arc length, work, and average value), techniques of integration, indeterminate forms, infinite series, polar coordinates, and parametric equations. Prerequisite: MTH 1125.</td>
</tr>
<tr>
<td>MTH 2201</td>
<td>Calculus and its Applications (3)</td>
<td>An introduction to the basic ideas and techniques of differential and integral calculus, especially as they relate to problems involving maximum and minimum values of functions and marginal analysis. Prerequisite: MTH 1112 or 1114 with a grade of C or better, or advanced placement. Note: Credit will not count toward a major or minor in mathematics.</td>
</tr>
<tr>
<td>MTH 2215</td>
<td>Applied Discrete Mathematics (3)</td>
<td>Discrete mathematics with a computer science orientation is presented. Topics include sets, relations, logic, algorithms, and recursion. Prerequisite: A grade of C or better in MTH 1112. Note: Credit will not count toward Area III requirements nor will it count toward any major or minor in mathematics.</td>
</tr>
<tr>
<td>MTH 2220</td>
<td>Computer Programming for Mathematics (3)</td>
<td>Structured programming of a mathematical nature, arithmetic computations, algorithm design and control structures, functions and subroutines intrinsic functions, array processing. Prerequisite: MTH 1125.</td>
</tr>
<tr>
<td>MTH 2227</td>
<td>Calculus III (4)</td>
<td>Topics include vector functions, multi-variable functions, partial derivatives and their applications, quadric surfaces, multiple integrals, and vector calculus, including Green’s theorem, curl, divergence, surface integrals, and Stoke’s theorem. Prerequisite: MTH 1126.</td>
</tr>
<tr>
<td>MTH 2230</td>
<td>Applied Linear Algebra (3)</td>
<td>This course covers some topics in Linear Algebra with an orientation towards applications in fields that use least squares regression. Topics include the algebra and geometry of vectors, matrices and their operations, determinants, systems of linear equations, linear independence, transformations, linearization and least square problems. Prerequisite: MTH 1125.</td>
</tr>
<tr>
<td>MTH 2251</td>
<td>Mathematical Concepts for K-6 Teachers I (3)</td>
<td>An examination of some of the major topics encountered in the teaching of elementary mathematics with emphasis on number theory order of operations, definitions of and operations with rational and irrational numbers, estimation, definitions and algorithms of the four operations, numeration systems, bases Other than 10, and problem solving. Prerequisite: MTH 1110 or 1112. Note: Credit will not count toward Area III requirements nor will it count toward any major or minor in mathematics.</td>
</tr>
<tr>
<td>MTH 2252</td>
<td>Mathematical Concepts for K-6 Teachers II (3)</td>
<td>An examination of some of the major topics encountered in the teaching of elementary school geometry with emphasis on measurement, area, volume, congruence, polygons, circles, constructions, motion geometry, polyhedra, and similarity.</td>
</tr>
</tbody>
</table>
MTH 4415 Introduction to Partial Differential Equations (3)
Topics include first order methods, linear equations, the Laplace transforms, systems of equations, and applications.
Prerequisite: MTH 2227.

MTH 4420 Graph Theory (3)
The elements of graph theory including: trees; bipartite, chordal and planar graphs; graph coloring; graph traversals; and flows.
Prerequisites: MTH 2227 and 3318 or permission of instructor.

MTH 4422 Numerical Analysis (3)
Topics include finite differences, interpolation, numerical integration and differentiation, solutions of equations of one variable, linear systems, and numerical solutions of ordinary differential equations.
Prerequisites: MTH 2220, 2227 and 3331, or permission of instructor.

MTH 4424 Real Analysis I (3)
The real number system, completeness, limits, continuity, sequences, differentiation, and the Riemann integral.
Prerequisites: MTH 2227 and 3318.

MTH 4425 Real Analysis II (3)
Sequences and series of functions, series, and a continuation of the integral to include the Fundamental Theorem of Calculus.
Prerequisite: MTH 4424.

MTH 4426 Complex Analysis (3)
Complex numbers, elementary functions and their mappings, complex limits and power Cauchy integral formula.
Prerequisites: MTH 2227 and 3318 or permission of instructor.

MTH 4436 Number Theory (3)
Divisibility, congruencies, prime numbers, Fermat’s theorem, Diophantine equations, number theoretic functions.
Prerequisites: MTH 2227, 3318.

MTH 4441 Abstract Algebra I (3)
Properties of the integers, modular arithmetic. Elementary theory of groups, finite groups, subgroups, cyclic groups, permutation groups. Group isomorphisms and homomorphisms.
Prerequisites: MTH 2227, 3318, and 3331.

MTH 4442 Abstract Algebra II (3)
Prerequisite: MTH 4441.

MTH 4460 Topology (3)
An introduction to metric and topological spaces and associated topics, separation axioms, compactness, and connectedness.
Prerequisites: MTH 2227, 3318.

MTH 4474 Internship in Mathematics Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP.
Co-requisite: SED 4454.

MTH 4480 Study Abroad in Mathematics (1-3)
Provides the opportunity for students to experience mathematics in the global community through cultural immersion in a study abroad program.
Prerequisites: 6 credit hours at the 4000-level, permission of instructor, and successful completion of TROY Study Abroad Program requirements and fees.

MTH 4481 Methods and Materials for the Secondary Teacher (3)
A survey of teaching methods and materials appropriate for teaching in the content areas for grades 6-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teachers, and lesson planning formats. In addition, teaching methods, selections organization and use of mathematics materials for grades 6-12 will be covered in detail. A professional laboratory experience is included in this course.
Prerequisite: admission to TEP.

MTH 4490 Senior Seminar (1 to 3 credit hours)
Individualized study of a topic in mathematics culminating in a written and oral presentation.
Prerequisites: MTH 3318 and senior status.
MUI 3315 Song Writing (2)
Additional information is indexed under Independent Study and Research.

MUI 4493-94 Guided Independent Study (1 to 3 credit hours)
Additional information is indexed under Independent Study and Research.

MUI 4499 Internship in Mathematics/Statistics (1-3)
A supervised experience in planning, staging, and evaluating a formal practicum in a related field. Prerequisites: 6 credit hours at the 4000-level or MTH 4431, or permission of the department chair.

MUI 1101 American Popular Music Ensemble (1)
An examination and application of music and music performance focused in the American popular music genres. Students will experience and perform popular music styles/genres including rock, R&B, mainstream pop, country, and hip hop among others. In addition, students will experience studio production process and procedure in the recording of music tracks for release through a record label. Prerequisite: By audition.

MUI 2201 Improvisation (1)
An introduction to basic improvisation through guided performance practices. Chord symbols and terminology will be used to describe various chords and scales. The “musical vocabulary” presented in this course is designed to provide a strong foundation that can be applied to multiple styles of American popular music. Students who complete the course will have the necessary tools to improvise at a basic harmonic level. Prerequisite: MUS 1103.

MUI 2230 Survey of Music Industry (3)
An introduction to practices and inter-relationships of the music industry, such as retail, recording, distribution, legal aspects, publishing media and employment.

MUI 3305 Music Technologies (3)
Study of the computer-based applications as currently used in the music industry for audio production including MIDI sequencing, multi-track recording, audio editing and music notation. Prerequisite: MUI 2230.

MUI 3310 Audio Principles and Techniques I (3)
A basic course to develop the understanding and skills to produce audio recordings. Listening skills will be emphasized along with editing, recording, and basic sound design for film/video. Prerequisite: MUI 2230, MUI 3305.

MUI 3315 Song Writing (2)
Study of basic skills and techniques of songwriting including lyric writing, melodic construction, and harmonic progression. Prerequisites: MUI 2230, MUI 3305, MUS 1103.

MUI 3325 Recording Studio I (2)
An examination of the art of studio recording. The mixing console, microphones, signal processing and digital recording systems will be studied and experienced. Prerequisite: MUI 3360.

MUI 3326 Recording Studio II (2)
In-depth study of audio recording in the studio environment. Remote and studio recording techniques, studio process/protocol, and post production will be studied and experienced. Students will prepare a recording project portfolio. Prerequisite: MUI 3325.

MUI 3340 Live Sound Reinforcement (2)
An overview of contemporary live sound reinforcement techniques. Students will experience various aspects of working in the live sound environment including: audio component types, venue/acoustical considerations, signal processing/application, specific technical considerations, microphone techniques, mixing techniques, and sound crew protocol. Prerequisite: MUI 3360.

MUI 3345 Audio for Producers (2)
An overview of audio production in the recording studio environment, including industry-standard process and procedures. In addition, the roles of the producer, engineer, and musician are explored through a series of recording sessions while working in digital audio environments. A final recording project will be completed as a part of the student’s portfolio. Prerequisite: MUI 3310.

MUI 3346 Studio Repair & Maintenance (2)
Course includes basic electric instrument adjustment, maintenance, and repair, common industry standards and guidelines, practical evaluation, and hands-on adjustment and repair. Prerequisite: MUI 3326, MUI 3340.

MUI 3360 Audio Principles and Techniques II (2)
This course is an in-depth examination of audio recording. The curriculum will cover remote and studio recording techniques. The related areas of sound reinforcement and post-production will be covered at length. Students will apply advanced microphone techniques, utilize digital editing and plug-ins, and prepare a recording project portfolio. Prerequisite: MUI 3310.

MUI 4410 Arts Management/Concert Production (2)
A study of artist management and concert production including show development, venue management, marketing, booking and touring. A music concert production will be developed, staged and presented in a variety of performance environments. Prerequisite: MUI 2230, MUI 3305.

MUI 4420 Film Scoring (2)
Examination of the process and preparation of digital music for film, digital video and animation. Prerequisite: MUI 3310.

MUI 4430 Marketing of Recorded Music (2)
An in-depth study of the process of studio production, manufacturing, promotion, marketing and distribution of contemporary recordings. Prerequisites: MUI 2230, MUI 3305.

MUI 4435 Music Merchandising (2)
Examination of the production, marketing, merchandising and distribution of musical products in the current music marketplace. Prerequisites: MUI 2230, MUI 3305.

MUI 4448 Audio Mixing and Mastering (2)
An exploration and application of audio mixing and mastering techniques used in contemporary audio production. Prerequisite: MUI 3325.

MUI 4460 Senior Practicum (3)
Career preparation in student’s area of emphasis including a culmination project/presentation, internship placement, and portfolio development. Prerequisite: approval of adviser/coordinator.

MUI 4480 Seminar in Music Industry (3)
An advanced course focused on the development of the professional skills portfolio. The student will develop a project to be added to their portfolio upon completion. Prerequisite: MUI 4460.
| MUS 1102 | Music Theory I (3) | Study of music fundamentals including rhythm and meter, note names, intervals, major and minor scales, key signatures, triads, seventh chords, cadences, introduction to Roman Numeral and Macro analysis, non-chord tones and suspensions, and beginning part-writing. Co-requisites for music majors: MUS 1105, 1107. |
| MUS 1105 | Class Piano I (1) | Introduction to basic keyboard musicianship and music reading skills. Focuses on beginning improvisation techniques, harmonization and beginning choral playing. |
| MUS 1106 | Class Piano II (1) | Development of intermediate-level keyboard skills including improvisational techniques, choral playing, sight reading and transposition. Prerequisite: MUS 1105. |
| MUS 1107 | Aural Skills I (1) | Beginning sight-singing and rhythmic reading, melodic, harmonic and rhythmic dictation, and interval and chord quality identification. |
| MUS 1108 | Aural Skills II (1) | Intermediate-level sight-singing and rhythmic reading, melodic, harmonic and rhythmic dictation, and interval and chord quality identification. Prerequisite: MUS 1107. |
| MUS 1110-4429 | Private Instruction (1 credit hour per semester, 1 lesson per week) | Students will be assigned an internship position in the music industry. The intern will be supervised by a music industry faculty member. Prerequisite: MUS 4460. |

**MUSIC COURSES (MUS)**

| MUS 1131 | Music Appreciation (3) | Orientation, vocal and instrumental media, forms, historical development and guided listening. Credit for this course does not apply toward any program in music. |
| MUS 1140 | World Music Workshop (2) | A hands-on course that surveys traditional music from around the globe, with an emphasis on exploratory play. |
| MUS 1145 | Folk Music of the Americas (1) | An ensemble that plays traditional music from many regions throughout the Americas. The group performs old time songs and folk tunes from the United States, as well as indigenous songs, folk songs and tunes from Central and South America, and syncretic music, exploring a broad variety of American cultural traditions. |
| MUS 1146 | Chinese Folk Ensemble (1) | A traditional music group dedicated to promoting cultural exchange through playing a variety of traditional Chinese instruments and melodies from various regions around the country. |
| MUS 1147 | Celtic Ensemble (1) | A traditional music group that performs tunes and songs of Irish, Scottish, Welsh, Galician, Breton, and Scandinavian origins. It has a varied instrumentation and an emphasis on learning melodies aurally. |
| MUS 1149 | Sangeet Ensemble (1) | The ensemble will explore traditional and classical musics from the rich variety of cultures throughout India and the surrounding regions of Nepal, Pakistan, and Bangladesh through learning songs, melodies, rhythms and lore. |
| MUS 1150 | Guitar Ensemble (1) | This course is designed to increase student knowledge of guitar ensemble and chamber music repertoire through performance, listening and concert attendance. |
| MUS 1155 | Opera Workshop (1) | This course is a performance workshop, uniquely tailored to showcase enrolled students. Students will be assigned a scene or a role, be expected to learn music independently, coach music and presentation during class hours and perform on designated concert date(s). This course is open to all students interested in classical singing and performance. Students will audition for roles and be coached with positive reinforcement to be part of a successful performing ensemble representing the School of Music. |
| MUS 1181 | Band (1) Fall; (1) Spring | Marching Band (fall) and concert band (spring). Open to all students by permission of director. |
| MUS 1183 | Collegiate Singers (1-3) | Choral group devoted to performance of choral masterworks. Note: open to all students with permission of instructor. |
| MUS 2202 | Music Theory III (3) | Study and analysis of structures and procedures of the Common Practice period, beginning with phrase and period structures and continuing through binary, ternary, sonata-allegro, sonata-rondo, fugue, variation, and through-composed forms. Prerequisite: MUS 1103. Co-requisite for music majors: MUS 2207. |
| MUS 2203 | Music Theory IV (3) | Study and analysis of music from the Late Romantic period through 21st Century compositional and analytical practices. Prerequisite: MUS 2202. |
MUS 2207  Aural Skills III (1)
Advanced sight-singing and rhythmic reading, melodic, harmonic and rhythmic dictation including chromatic harmonies, and interval and chord quality identification.  
Prerequisite:  MUS 1108.

MUS 2235  Listening to Jazz (3)
An exploration of jazz in American culture.

MUS 2240  World Music Cultures (3)
A survey of diverse musical traditions from around the globe. Musical cultures are approached anthropologically, and each culture will be examined to understand how music is entwined with human experience.

MUS 2245  Classic Vinyl: Rock and Roll Revisited (3)
An exploration of Rock and Roll in American culture.

MUS 2250  Survey of Western Music History I (3)
This course traces the development of Western music from the ancient and medieval worlds through the Renaissance and baroque periods.

MUS 2251  Survey of Western Music History II (3)
This course traces the development of Western music from the 18th century through the classical, romantic and contemporary periods.

MUS 3305  Music Technologies (3)
Study of the applications of the microcomputer to music teaching and to the management, planning, and record-keeping tasks of the music educator.

MUS 3306  Conducting (3)
Basic conducting techniques for instrumental and choral groups. Includes score study, rehearsal techniques and interpretation of various styles.  
Prerequisite:  MUS 1103.

MUS 3335  Choral Leadership (1)
Intensive score study, performance practices, and conducting practice of standard repertoire.

MUS 3340  Diction for Singers (1)
Focuses on student understanding and application of singing of the English, Italian, Latin, German and French languages through use of the International Phonetic Alphabet and appropriate art song repertoire.  
Prerequisites:  ENG 1102, MUS 2216.

MUS 3341  Vocal Pedagogy (1)
A study of vocal teaching methods with an emphasis on application for private voice and choral teachers. This course also includes a review of vocal/choral pedagogical literature.  
Prerequisite:  MUS 2216.

MUS 3346  Educational Psychology & Classroom Assessment in Fine Arts (3)
This course provides a broad foundation in aspects of assessment and educational psychology.

MUS 3351  Class Brass (1)
Group instruction in techniques of playing and teaching brass instruments.

MUS 3352  Class Woodwinds (1)
Introduction to each of the principal woodwind instruments, emphasizing teaching techniques suitable for band classes.

MUS 3353  Class Percussion (1)
Group instruction in playing and teaching the principal pitched and non-pitched percussion instruments.

MUS 3354  Class Strings (1)
Group instruction in techniques of playing and teaching stringed instruments.

MUS 3356  Class Voice (1)
Introduction to the use of the singing voice for non-voice principals in music education.

MUS 3360  Wind and Percussion Methods (1)
Students will demonstrate theoretical, pedagogical and performance knowledge of/ on selected wind/ percussion instruments and awareness of instrument materials and rehearsal techniques, and will review the role of the instrumental music educator in music education.

MUS 3361  Integrating Music into the Curriculum (3)
Basic skills and methods of presentation and evaluation for music in grades P-6. Role-playing experiences are used to demonstrate appropriate materials, student involvement and motivational techniques.  
Prerequisite:  MUS 1131.

MUS 3365  Class Composition (1)
Creative musical writing, criticism, and study of compositional techniques.  
Prerequisite:  permission of instructor.

MUS 3380  Travel Study in Music (1-3)
Supervised study of music through travel abroad or within the United States. May be repeated for credit.  
Prerequisite:  permission of instructor.

MUS 3382  Choral Techniques (3)
Organizational and instructional strategies for teaching music through performance in choir. Includes a field component.  
Prerequisite:  MUS 1103 and junior standing.

MUS 3384  Band Techniques (3)
Organizational and instrumental strategies for teaching music through performance in band. Includes a field experience component.  
Prerequisite:  MUS 1103 and junior standing.

MUS 3385  Symphony Band (1)
Select concert organization for performance of advanced literature for band and wind ensemble.  
Prerequisite:  Audition.

MUS 3386  Jazz Ensembles (1)
Select ensemble for performance in a wide variety of jazz styles.  
Prerequisite:  Audition.

MUS 3387  Concert Chorale (1)
This mixed chamber choir performs challenging classical, traditional, and contemporary choral repertoire.  
Prerequisite:  Audition.

MUS 4400/4400/ 01/02  Selected Topics (1-3 per course)
Detailed investigation of a specialized topic not covered in regularly offered courses, or an advanced section for intensive study.

MUS 4403  Classroom Management for the Music Educator (3)
The purpose of this course is to establish a foundation of content and application relative to classroom management for the music educator (P-12). Provides opportunities for analysis and application of behavioral management techniques in general music and performance-based pedagogical settings.

MUS 4430  Flute Choir (1)
This course is designed to increase student knowledge of flute choir repertoire through performance, listening, and discussion.

MUS 4431  Trumpet Ensemble (1)
Ensemble course open to all students.

MUS 4432  Percussion Ensemble (1)
Ensemble course open to all students.

MUS 4433  Clarinet Choir (1)
Ensemble course open to all students.

MUS 4435  Campus Concert Band (1)
Ensemble course open to all students.
MUS 4436 Vocal Jazz Ensemble (1)
This ensemble is designed to provide a quality performance experience for students of all majors and levels, utilizing excellent ensemble vocal jazz repertoire. 
Prerequisite: Audition.

MUS 4440 Marching Band Techniques (3)
This course is designed to provide students with tools and techniques to successfully administer a high school marching band program, select and rehearse music, write and rehearse drill, and examine various marching techniques. Also included are intensive work with the Pyware Drill Design software and experiences with writing drill and creating working frameworks for marching bands.

MUS 4460 Music for the Exceptional Learner (3)
Theoretical and practical exploration of the use of music to teach various populations of exceptional learners. Hands-on experience provided with exceptional populations and designing musical activities for each. 
Prerequisite: sophomore standing.

MUS 4461 Orchestration and Arranging (2) 
Ranges, transpositions and other characteristics of standard instruments and voices. Arranging/ composition projects. 
Prerequisite: MUS 2202.

MUS 4470 Instrument Repair (2) 
Course includes basic musical instrument adjustment, maintenance and repair, common industry standards and guidelines, practical evaluation and hands-on adjustment and repair.

MUS 4471 Music for ECE and Elementary School (3-4)
Materials and planning techniques for music in grades P-6. Singing, listening, movement, instrument playing and creative activities will be explored. Multicultural elements, observation, teaching experiences, and practical application of ideas will be included.
Prerequisites: MUS 1103 and junior standing.

MUS 4472 Internship in Music Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP. 
Co-requisite: IED 4454.

MUS 4481 Methods and Materials for the Secondary Music Teacher (3-4) 
Teaching methods, selection, organization and use of music materials in grades 6-12. Observation and teaching experiences will be included.
Prerequisites: MUS 4471 and admission to TEP.

MUS 4491-92 Guided Independent Research (1 to 3 credit hours per course) 
Additional information may be found under Independent Study and Research.

MUS 4493-94 Guided Independent Study (1 to 3 credit hours per course) 
Additional information may be found under Independent Study and Research.

MUS 4499 Senior Recital (1) 
Required for all music majors.
Prerequisite: Approval Jury.

NURSING COURSES (NSG) 

(ASN Program)

NSG 1130 Basic Nursing Concepts (2) 
Introduces the nursing process and the concept of evidence-based practice as a basis for making clinical nursing judgments. Incorporates theoretical knowledge from nursing, scientific, environmental and humanistic disciplines. Introduces the concepts of client needs, safety, communication, teaching/ learning, critical thinking, ethical-legal, cultural diversity, nursing history, and the program’s philosophy of nursing. Requires basic understanding of medical terminology. Focuses on the role of the professional nurse in providing care to diverse patient populations.
Prerequisites: Admission to the ASN Program, ENG 1101, MTH 1112 or MTH 1110, PSY 2200.
Prerequisites or Co-requisites: BIO 3347/L347.

NSG 1131 Basic Nursing Concepts Practicum (2-4) 
Introduces psychomotor nursing skills needed to assist individuals in meeting basic human needs. Skills necessary for maintaining microbial, physical, and psychological safety are introduced along with skills needed in therapeutic interventions. Focuses on the role of the professional nurse in applying basic nursing skills to diverse patient populations with common health alterations.
Prerequisites: admission to the ASN Program, ENG 1101, MTH 1112 or MTH 1110, PSY 2200, BIO 3347/L347.
Prerequisites or Co-requisites: NSG 1130, NSG 1135.

NSG 1135 Health Assessment Practicum (1-2) 
Focuses on applying knowledge and skills required to perform health assessments on diverse patient populations. Utilizes an evidence-based systemic approach to collect data in the assessment phase of the nursing process.
Prerequisites: Admission to the ASN Program, ENG 1101, BIO 3347/L347, PSY 2200, MTH 1112 or MTH 1110.

NSG 1140 Foundations of Adult Health Nursing (3) 
Builds upon knowledge from previous nursing courses and other scientific disciplines to explore patient-centered care for adults with actual or potential health deviations. Focuses upon an evidence-based approach to the nursing process within a culture of quality and safety. Emphasizes the role of the professional nurse as educator, collaborator and change agent within the interprofessional health team.
Prerequisites: NSG 1130, 1131, 1135, 1151, KHP 2211 OR NSG 2213, BIO 3348/L347, PSY 2210, and TROY 1101.

NSG 1141 Foundations of Adult Health Nursing Practicum (3-6) 
Utilizes an evidence-based approach in the application of the nursing process, emphasizing clinical decisions that are safe, ethical, patient-centered and collaborative, to assist a diverse population of adults with common health alterations.
Co-requisite: NSG 1140.
Prerequisites: NSG 1130, 1131, 1135, 1151, KHP 2211 OR NSG 2213, BIO 3348/L348, PSY 2210, TROY 1101.

NSG 1151 Hospital Measurements (1) 
An introduction to using mathematical computations in health-related situations. Focuses on mathematics computations as applied in selected healthcare settings. Different systems of measurement will be a priority. Includes an exam
COURSE DESCRIPTIONS · 188

on computation of dosages and solutions, requiring completion with 90% accuracy.
Prerequisites: admission to the ASN Program, ENG 1101, MTH 1112 or MTH 1110, PST 2200, BIO 3347/347.

NSG 2202 Pharmacology (2)
Focuses on specific classification of drugs, pharmacokinetics, pharmacodynamics, clinical usage, methods of administration, dosages, side effects, contraindications, reactions, and related nursing implications.
Prerequisites: NSG 1130, NSG 1131, NSG 1135, NSG 1151.

NSG 2213 Nutrition (2)
An evidence-based study of macro and micronutrients as they impact health promotion and disease prevention of diverse individuals across the lifespan. Focus is placed on basic nutrition concepts as they relate to body systems, medical nutrition therapies, drug interactions, food safety, and nutrition assessment.

NSG 2255 Maternal-Infant Nursing (2)
Focuses on the nursing process and evidence-based practice as a basis for in assisting the family during childbirth experiences. Applies theoretical knowledge from nursing, scientific, environmental and humanistic disciplines.
Prerequisites: NSG 1140, 1141, 2202, 2271, 2272. BIO 3372/372.

NSG 2256 Maternal-Infant Nursing Practicum (2-4)
Focuses on the role of the professional nurse in providing high quality nursing care to childbearing individuals and families. Utilizes antepartal, intrapartal, postpartal, and neonatal experiences.
Pre or Co-requisite: NSG 2255.
Prerequisites: NSG 1140, 1141, 2202, 2271, 2272. BIO 3372/372.

NSG 2265 Nursing of Children (2)
Focuses on the use of the nursing process and evidence-based practice as a basis for assisting the family during childbearing experiences. Applies theoretical knowledge from nursing, scientific, environmental and humanistic disciplines.
Prerequisites: NSG 1140, 1141, 2202, 2271, 2272. BIO 3372/372.

NSG 2266 Nursing of Children Practicum (2-4)
Focuses on the role of the professional nurse in providing high quality nursing care to children and their families. Concepts of growth and development are applied in the care of children with altered health states including multiple disabilities.
Pre or Co-requisite: NSG 2265.
Prerequisites: NSG 1140, 1141, 2202, 2271, 2272. BIO 3372/372.

NSG 2271 Psychosocial Nursing Concepts (2)
Focuses on the role of the professional nurse utilizing evidence-based practice to promote the adaptation of diverse individuals and families experiencing bio-psychosocial stressors.
Prerequisites: NSG 1130, 1131, 1135, 1151, BIO 3348/L348, PST 2210, TROY 1101, KHP 2211 or NSG 2213.

NSG 2272 Psychosocial Nursing Practicum (2-4)
Focuses on the role of the professional nurse in the application of evidence-based nursing process in the care of diverse individuals and families experiencing bio-psychosocial stressors.
Pre or Co-requisite: NSG 2271.
Prerequisites: NSG 1130, NSG 1131, 1135, 1151, 2204, 2213, BIO 3348/L348, PST 2210, TROY 1101, KHP 2211.

NSG 2280 Advanced Nursing Concepts (4)
Provides advanced knowledge for care of individuals and families in complex or life threatening situations. Focuses on the leadership role of the professional nurse using evidence-based practice while providing safe, high-quality, holistic, patient-centered care for diverse patient populations in complex or life-threatening situations.
Prerequisites: NSG 2202, 2255, 2256, 2265, 2266, 2282, 2283.

NSG 2281 Advanced Nursing Practicum (6-12)
Provides opportunity to demonstrate the role of professional nursing using judgment in practice, substantiated by evidence to assess and provide high quality care for individuals and families with complex multi-system stressors. Emphasizes health promotion, prevention, education and evidenced-based intervention in complex and life-threatening situations. Facilitates transition into the professional nursing role by examining legal, ethical, political, economic, and socio-cultural issues in nursing.
Provides opportunity to apply leadership knowledge, refine nursing skills and develop greater understanding in a selected clinical area under the guidance of an approved professional nurse.
Pre or Co requisite: NSG 2280.
Prerequisites: NSG 2202, 2255, 2256, 2265, 2266, 2282, 2283.

NSG 2282 Adult Health Nursing II (2)
Continues to explore patient-centered care for adults with acute health alterations. Focuses on an evidence-based approach to the nursing process within a culture of quality and safety. Emphasizes the role of the professional nurse for adults in acute and long-term settings. Applies theoretical knowledge from nursing, scientific, environmental and humanistic disciplines.
Prerequisites: NSG 1140, 1141, 2202, 2271, 2272, BIO 3372/372.

NSG 2283 Adult Health Nursing II Practicum (2-4)
Focuses on the role of the professional nurse in providing high quality nursing care to adults. Utilizes an evidence-based approach in the continued application of the nursing process, emphasizing clinical decisions that are safe, ethical, patient-centered and collaborative to assist a diverse population of adults with acute health alterations.
Pre or Co-requisite: NSG 2282.
Prerequisites: NSG 1140, 1141, 2202, 2271, 2272, BIO 3372/372.

(BSN Program)
Course credit hours/contact hours (if different) per week are noted in parentheses

NSG 1101 Health Concepts (1)
Provides opportunity for exploration of individual health values, beliefs, and behaviors. Examines impact of exercise, nutrition, and stress on health. Explores beliefs of time management, relaxation, and play in promoting and maintaining health. Open to all majors.

NSG 1105 Medical Terminology (1)
Develops the use of Latin and Greek prefixes, root words, and suffixes to understand medical terminology. Open to all majors.

NSG 1150 First Responder (1-2)
Provides the learner with cognitive and psychomotor skills to act in emergency situations. Topics include CPR, patient head-to-toe evaluation, bleeding and shock, internal and external body injuries, splinting, poisons, bites, burns, and drownings. May audit for recertification. Open to all majors.

NSG 1160 Introduction to Technology in Nursing Education (1)
Provides a foundation for using computer technology in nursing education. Addresses digital communication, resources, and research used in learning. Includes communication through
electronic mail and course discussion using the World Wide Web as an information tool, online scholarly research, and digital presentations. Open to all majors.

**NSG 2204 Nutrition (2)**
A study of macro and micronutrients, their metabolism in the body, and their influence on health states of individuals from diverse cultural, ethnic and religious groups of all ages. Examines nutritional research and health policy. Compares nutritional adequacy to evidence-based national standards. Open to all majors.

**NSG 2205 Human Growth and Development (3)**
Examines developmental theories and internal and external dimensions of growth and development. Emphasizes tasks, stressors, common health alterations, and anticipatory guidance specific to developmental stages throughout the life span. Open to all majors.

**NSG 2211 Human Nutrition (3)**
Explores the relationship between nutrition and health. Emphasizes the roles of nutrients, their utilization in the human system and their contributions to the health of individuals of all ages. Includes dietary patterns of various cultural, ethnic and religious groups, nutritional assessments, and food safety. Open to all majors.

**NSG 2220 Health Science Informatics (3)**
Provides a foundation for the study of information and its utilization through computer technology; encompasses access, dissemination, and management of health science information and Internet communication. General topics include communication through electronic mail, using the World Wide Web as an information tool, online scholarly research, and digital presentations and publishing. Course focus is the application of technology skills in health science fields. Open to all majors. 
Prerequisite: sophomore standing.

**NSG 2230 Advanced Medical Terminology (3)**
Focuses on health and disease medical terms and building of knowledge of medical vocabulary with an emphasis on prefixes, suffixes, roots, and combining vowels. Anatomical, physiological, and pathological terminology are covered. Includes terminology related to the body systems. Open to all majors.

**NSG 2240 Spanish for Healthcare Providers (2)**
Elementary-level instruction in Spanish language and culture, all oriented to the practice of medicine with Spanish-speaking patients. No prior knowledge of Spanish is required. Students develop basic listening, speaking, reading and writing skills to successfully perform linguistic tasks allowing them to communicate in everyday situations (e.g. greeting, narrating present and past events, describing, ordering, comparing and contrasting). Prerequisite: permission of instructor.

**NSG 2285 Perspectives of Aging (3)**
Presents interrelationships among physical, psychosocial, cultural, and spiritual components related to the older adult. Identifies senescence and alterations associated with the aging process in response to internal and external environmental dimensions. Open to all majors.

**NSG 2290 Nursing in the Global Community (1)**
Explores issues, philosophies and cultural differences in nursing in the global community.

Compares nursing and healthcare in the United States to that of other nations. 
Prerequisite: sophomore standing or permission of instructor.

**NSG 2291 Nursing Study Abroad (1-3)**
Provides the opportunity for students to experience nursing in the global community through a cultural immersion in a study abroad program. Focuses on the comparison of nursing in the United States to nursing in the international community.

**NSG 3300 Dosage Calculations (1)**
Uses mathematical principles, symbols, conversions and computations for accurate calculation of dosages for safe and effective medication administration for patients of all ages. Explores current evidence and health care policy related to safe and effective medication administration. 
Prerequisite: admission to BSN program.

**NSG 3301 Pharmacology (3)**
Focuses on key pharmacological principles and the role of the nurse in management of drug therapy, including appropriate evidence-based patient teaching, counseling, and safety and quality controls. Presents drug classifications and related nursing implications for individuals of all ages. 
Prerequisite: NSG 3300, NSG 3306, NSG 3309/3310, NSG 3313/3314, NSG 3315

**NSG 3306 Perspectives of Professional Nursing (2)**
Explores the roles of the baccalaureate degree nurse. Presents the principles, standards, and values implicit in the profession of nursing. Introduces the theories used in the definition of concepts of humanity, environment, health, and nursing. Introduces the development of key elements used in professional nursing practice: caring, evidence-based clinical decisions, communication, collaboration, cultural humility, ethical competence, research, and information technology. Explores the influence of internal and external dimensions on professional nursing practice. 
Prerequisite: admission to the BSN Program.

**NSG 3309 Health Assessment (2)**
Focuses on the assessment phase of the nursing process as a means of collecting data for use in making clinical decisions for the promotion of safe, quality care. Emphasizes acquisition of knowledge and skills required to perform health assessments focusing on physical, psychosocial, cultural, and spiritual components of individuals at various ages and communication of findings. 
Prerequisites: BIO 3347/L347, 3348/L348. Corequisite: NSG 3310.

**NSG 3310 Health Assessment Practicum (1-2)**
Provides opportunities for students to practice health assessment skills required for culturally diverse individuals of all ages. Includes analysis and communication of findings for the promotion of safe, quality care. Requires demonstration of effective communication and performance of health assessment skills consistent with best practices. 
Prerequisites: BIO 3347/L347, 3348/L348. Co-require: NSG 3309.

**NSG 3313 Nursing Concepts (3)**
Explores common health alterations for individuals of all ages in response to internal and external environmental dimensions. Examines the physical, psychosocial, cultural, and spiritual components influencing health states. Introduces the concept of illness as an alteration in health. Presents fundamental skills used in the implementation of therapeutic nursing interventions. Introduces evidence-based clinical decisions in the application of the nursing process for health promotion and clinical prevention.
**NSG 3314 Nursing Concepts Practicum (3-6)**
Provides clinical learning opportunities for students to develop basic nursing knowledge and skills for the care of individuals of all ages who require assistance in meeting basic health needs and adapting to common health alterations. Uses key elements in professional nursing practice in the application of the nursing process as a systematic approach to clinical prevention, health promotion and maintenance, and illness and restorative care. Requires validation of competencies related to safe performance of basic nursing skills.
Prerequisite or Co-requisite: NSG 3300, 3306, 3309/3310, 3315. Co-requisite: NSG 3314.

**NSG 3315 Pathophysiology (3)**
Explores the relationship between normal and altered physiology in human systems. Examines physiological adaptive responses to internal and external dimensions, including genetics, ethnicity, environment and age. Emphasizes pathophysiologic responses to altered states of health and disease on structures and functions of body cells, organs and systems. Open to all majors.
Prerequisites: BIO 3347/L347, 3348/L348.

**NSG 3319 Informatics in Nursing (3)**
Focuses on development of knowledge and skills in information management and patient care technology, including data gathering, technological supports for therapeutic nursing interventions, and clinical decision-support systems. Explores use of technology to gather evidence for support of best practices for the delivery of safe and quality nursing care. Presents software applications used in nursing informatics.
Prerequisites: NSG 3325/3326, 3334/3335 or admission to the RN Mobility Program.

**NSG 3323 Maternal-Infant Health Nursing (3)**
Explores both normal childbearing families and childbearing families with health alterations in response to internal and external environmental dimensions. Examines the interrelationships among the physical, psychosocial, cultural, and spiritual components of the childbearing experience. Emphasizes evidence-based clinical decisions for the utilization of therapeutic nursing interventions, communication, and collaboration in a caring environment for the promotion of optimal health states of childbearing families.
Prerequisites: NSG 3301, 3325/3326, 3334/3335. Co-requisite: NSG 3324.

**NSG 3324 Maternal-Infant Health Nursing Practicum (2-4)**
Provides clinical learning opportunities for students to provide nursing care for childbearing families during the antepartum, intrapartal, postpartal, and neonatal periods. Emphasizes the use of clinical reasoning in the application of the nursing process in facilitating human adaptive responses to childbearing in the provision of safe, quality nursing care.
Prerequisites: NSG 3301, 3325/3326, 3334/3335. Co-requisite: NSG 3323.

**NSG 3325 Adult Health Nursing I (3)**
Continues to explore the concept of illness as an alteration in health states. Presents principles of safe, effective medication and intravenous therapy administration. Explore health alterations in adults in response to internal and external environmental dimensions, focusing on surgery, gastrointestinal, endocrine, integumentary, immune, and musculoskeletal systems. Examines selected
theories for interrelationships among physical, psychosocial, cultural, and spiritual components. Emphasizes evidence-based clinical decisions in a caring environment for the utilization of therapeutic interventions, communication, and collaboration for promotion of optimal health states in adults.
Prerequisites: NSG 3300, 3306, 3309/3310, 3313/3314, 3315. Co-requisite: NSG 3326.

**NSG 3326 Adult Health Nursing I Practicum (3-6)**
Provides clinical learning opportunities for students to refine basic clinical skills and provide nursing care of adults with health alterations. Emphasizes clinical reasoning in the application of the nursing process in facilitating human adaptive responses to health alterations in the adult. Validates competencies related to medication and intravenous therapy administration.
Prerequisites: NSG 3300, 3306, 3309/3310, 3313/3314, 3315. Prerequisite or Co-requisite: NSG 3301. Co-requisite: NSG 3325.

**NSG 3334 Psychiatric-Mental Health Nursing (3)**
Explores mental health alterations of all ages in response to internal and external environmental dimensions. Examines selected theories of mental health and illness for interrelationships among physical, psychosocial, cultural, and spiritual components. Emphasizes evidence-based clinical decision-making in the utilization of therapeutic nursing interventions, communication and collaboration for the promotion of optimal states of mental health.
Prerequisites: NSG 3300, 3306, 3309/3310, 3313/3314, 3315. Co-requisite: NSG 3335.

**NSG 3335 Psychiatric-Mental Health Nursing Practicum (2-4)**
Provides clinical learning opportunities for students to provide illness and restorative care for individuals experiencing alterations in mental health states. Emphasizes evidence-based clinical reasoning in the application of the nursing process in facilitating human adaptive responses to mental health alterations.
Prerequisites: NSG 3300, 3306, 3309/3310, 3313/3314, 3315. Co-requisite: NSG 3334.

**NSG 3336 Adult Health Nursing II (3)**
Continues to explore health alterations for adults in response to internal and external environmental dimensions, focusing on cardiovascular, respiratory, nervous, sensory, renal, reproductive, and multi-system trauma and shock. Examines selected theories for interrelationships among physical, psychosocial, cultural, and spiritual components. Emphasizes evidence-based clinical decisions in a caring environment for the utilization of therapeutic interventions, communication, and collaboration for promotion of optimal health states in adults.
Prerequisites: NSG 3300, 3325/3326, 3334/3335. Co-requisite: NSG 3337.

**NSG 3337 Adult Health Nursing II Practicum (2-4)**
Provides clinical learning opportunities for students to further refine clinical skills and provide nursing care for adults with alterations in health states. Emphasizes clinical reasoning in the application of the nursing process in facilitating human adaptive responses to health alterations in the adult in the provision of safe, quality nursing care.
Prerequisites: NSG 3301, 3325/3326, 3334/3335. Co-requisite: NSG 3336.

**NSG 3340 Ethics in Nursing (3)**
A discussion of traditional ethical theories, principles and meta-ethical concerns will provide
the necessary background required to explore a variety of controversial issues such as euthanasia, abortion, and the new reproductive technologies. Objective and critical reflection about the issues will be developed into active discussions by the students.

Prerequisite: Permission of instructor.

**NSG 3345 Physical Examination for Allied Health Professionals (2)**
Focuses on physical examination of individuals by allied healthcare professionals as a means of collecting data for use in the making of clinical decisions. Emphasizes acquisition of knowledge and skills required to perform health assessments focusing on physical, psychosocial, and cultural components of individuals at various ages and communication of findings.

Prerequisites: BIO 3347, BIO L347, BIO 3348, BIO L348.
Co-requisites: NSG 3346.

**NSG 3346 Physical Examination for Allied Health Professional Practicum (1)**
Provides opportunities for allied health professional students to practice physical examination skills required for culturally diverse individuals of all ages. Includes analysis and communication of findings for the promotion of safe, quality care. Requires demonstration of effective communication and performance of physical examination skills consistent with best practice.

Prerequisites: BIO 3347, BIO L347, BIO 3348, BIO L348.
Co-requisites: NSG 3345.

**NSG 3350 Case Management in Healthcare (3)**
Provides theoretical foundation and practical information about case management in healthcare. Introduces the roles of the nursing case manager in a changing healthcare environment.

Prerequisite: NSG 3309/3310 or NSG 3345/3346.

**NSG 3370 Professional Nursing (2)**
Explores current issues, trends, principles, values, and standards impacting the profession of nursing. Examines theories related to the leadership/management role of the professional nurse. Discusses evidence-based practice, information technology, quality improvement, patient safety and other current nursing practice topics related to meeting the emerging health needs in changing diverse global society in response to internal and external environmental dimensions.

**NSG 3380 Pathophysiology and the Human Response (3)**
Explores the relationship between normal and altered physiology in human systems. Examines physiological adaptive responses to internal and external dimensions, including genetics, ethnicity, environment and age. Emphasizes pathophysiologic responses to altered states of health and disease structures and functions of body cells, organs, and systems. Open to all majors.

Prerequisite: BIO 3347/L347, 3348/L348.

**NSG 3390 Global Identity: Connecting Your International Experience to Your Future (3)**
Studying abroad is a transformative experience that has the power to challenge our thinking and our perspective on the world. This course aims to attract students across disciplines, to promote interprofessional development, and to prepare them to expand their understanding of their global identity and communicate their growth in intercultural competence toward their personal and professional development. Students make connections between their study abroad experience and the broader range of skills connected with this experience, to become a competitive member of a global workforce.

**NSG 4403 Child Health Nursing (3)**
Explores health alterations in children in response to internal and external environmental dimensions. Examines selected theories of child health for interrelationships among developmental, physical, psychosocial, cultural, and spiritual components. Emphasizes evidence-based clinical decisions, communication and collaboration in a caring environment. Presents the role of the nurse in the promotion of optimal health for children of all ages.

Prerequisites: NSG 3319, 3323, 3324, 3336, 3337.
Co-requisite: NSG 4404.

**NSG 4404 Child Health Nursing Practicum (2–4)**
Provides clinical learning opportunities for students to integrate clinical prevention, health promotion and maintenance, and illness and restorative care for children experiencing alterations in health states. Emphasizes clinical reasoning in the application of the nursing process in facilitating human adaptive responses to health alterations in the child in the provision of safe, quality nursing care. Uses a variety of hospital and community settings.

Prerequisites: NSG 3319, 3323, 3324, 3336, 3337.
Co-requisite: NSG 4403.

**NSG 4405 Public Health Nursing (3)**
Provides a theoretical and empirical foundation for public health nursing practice. Explores the environmental, global, cultural, political and financial dimensions of public health. Emphasizes the nurse’s role in the delivery of public health nursing care in health promotion and clinical prevention for individuals, families, communities and populations.

Prerequisites: NSG 4403/4404, 4413/4414, 4419.
Co-requisite: NSG 4406.

**NSG 4406 Public Health Nursing Practicum (2–4)**
Provides clinical learning opportunities for students to engage in public health nursing practice. Explores use of advocacy and application of environmental, global, cultural, political, and financial dimensions of public health practice in health promotion and clinical prevention for individuals, families, communities and populations. Emphasizes clinical reasoning in the application of the nursing process for promotion of optimal public health.

Prerequisites: NSG 4403/4404, 4413/4414, 4419.
Co-requisite: NSG 4405.

**NSG 4407 Clinical Nutrition (1)**
A study of clinical nutrition therapy for support of adaptive responses to potential or actual major disease-specific health alterations. Presents best practices with consideration of physical, psychosocial, cultural and developmental components for clinical decisions in the design and implementation of therapeutic nursing interventions for health promotion and clinical prevention for individuals, families, communities, and population.

Prerequisites: NSG 4403/4404, 4413/4414.

**NSG 4410 Population Health Nursing (3)**
Provides a theoretical and empirical foundation for nurses to explore the environmental, global, cultural, political and financial dimensions of a specific population. Emphasizes the nurse’s role in the delivery of population-focused care in health promotion, clinical prevention, and overall health for diverse communities.

Prerequisites: Admission to the RN Mobility Program.
Co-requisite: NSG 4411.
NSG 4411 Population Health Nursing Preceptorship (2-2)
Provides clinical learning opportunities for students to engage in population-focused care. Explores use of advocacy and application of environmental, global, cultural, political, and financial dimensions of population-focused nursing practice in health promotion, clinical prevention, and overall population health. Emphasizes clinical reasoning in the application of the nursing process for promotion of optimal population health.
Prerequisites: Admission to the RN Mobility Program
Co-requisite: NSG 4410.

NSG 4413 Complex Nursing (3)
Interprets complex, multi-system health alterations in response to internal and external environmental dimensions. Examines theories related to stress and crisis management. Emphasizes evidence-based clinical decisions in a caring environment, utilization of communication and collaboration, and the integration of information technology, research findings, ethical competence, and cultural humility in nursing practice for the promotion of optimal health in individuals with complex, multi-system health alterations.
Prerequisites: NSG 3323/3324, 3336/3337, 3319.
Co-requisite: NSG 4414.

NSG 4414 Complex Nursing Practicum (2-4)
Provides clinical learning opportunities for students to provide nursing care for individuals and groups experiencing complex, multi-system health alterations in response to internal and external dimensions. Emphasizes clinical reasoning in the application of the nursing process in collaboration for promotion of optimal health states in response to complex, multi-system health alterations. Focuses on performance of complex care skills required for safe, quality nursing care.
Prerequisites: NSG 3323/3324, 3336/3337, 3319.
Co-requisite: NSG 4413.

NSG 4415 Nursing Leadership/Management (2)
Provides the theoretical foundation for implementation of the leadership and management roles of the professional nurse within nursing and health care organizations. Evaluates effective models and strategies for organizational management. Emphasizes evidence-based decisions in the management of the nursing organization within a caring environment.
Prerequisites: NSG 4403/4404, 4413/4414, 4419.
Co-requisite: NSG 4421.

NSG 4417 Professional Nursing Seminar (1)
Provides analysis of internal and external dimensions of selected professional, legal, ethical, political, economic, and sociocultural issues affecting nursing. Discusses the transition from student into the professional nurse’s role, professional role development, and preparation for licensure. Requires satisfactory completion of exit exam per BSN program policy.
Prerequisites: NSG 4403/4404, 4413/4414, 4419.
Co-requisite: NSG 4421.

NSG 4419 Research and Evidence in Nursing Practice (2)
Explores the process for research and evaluation of best evidence in developing strategies for improvement of clinical outcomes. Examines the interrelationships among theory, practice, and research. Emphasizes the ethical and legal considerations in the conduct of research and appraisal of evidence.
Prerequisites: NSG 3323/3324, 3336/3337, 3319.

NSG 4421 Professional Nursing Clinical Preceptorship (3-12)
Facilitates transition into professional nursing practice. Provides opportunities for refinement of roles as a designer, manager, and coordinator of nursing care and provider of direct and indirect nursing care for individuals and families in a selected clinical area under the guidance of an approved preceptor.
Prerequisites: NSG 4403/4404, 4413/4414, 4419.
Co-requisite: NSG 4415, 4417.

NSG 4430 Leadership and Management in Nursing (3)
Prerequisites: Admission to the RN Mobility Program
Co-requisite: NSG 4431.

NSG 4431 Leadership and Management in Nursing Preceptorship (2-2)
Provides clinical learning opportunities for students to apply leadership and management theories in the management of individuals, families, communities, or populations adapting to internal and external dimensions in a variety of healthcare settings. Emphasizes the leadership and management roles of the baccalaureate nurse. Integrates evidence-based practice, quality improvement, patient safety, information technology and healthcare policy.
Prerequisites: Admission to the RN Mobility Program
Co-requisite: NSG 4430.

NSG 4440 Research and Evidence for the Practicing Registered Nurse (3)
Designed for practicing registered nurses to develop knowledge and understanding in the research process, to become research consumers, and evaluate and integrate current evidence for best practice. Examines the interrelationships among theory, practice, and research. Emphasizes the ethical and legal considerations in the conduct of research and appraisal of evidence. Incorporates professional writing skills in the appraisal and dissemination of evidence.
Prerequisites: Admission to RN Mobility Program; PSY 3301, QM 2241, OR STAT 2210

NSG 4493-94 Guided Independent Study (1 to 3 credit hours)
Additional information is indexed under Academic Regulations.
Prerequisite: Permission of instructor. Also see index for “Independent Study and Research.”

PHI 2201 Introduction to Political Philosophy (3)
Major Classical sources of political thought and the application of these sources to contemporary political issues.

PHI 2203 Introduction to Philosophy (3)
Brief history of philosophical ideas and the basics of Aristotelian logic.

PHI 2204 Ethics and the Modern World (3)
An introduction to basic ethics and to contemporary ethical issues.

PHI 2205 Introduction to Logic (3)
An introduction to the basic concepts, principles, and methods of argument analysis and evaluation.

PHI 2210 Critical Thinking (3)
Examines problem solving techniques; decision making; basic concepts of inductive and deductive reasoning. Promotes reasoning skills applicable to career- and real-life situations.

<tr>
<td>PHY 3325</td>
<td>Thermodynamics (3)</td>
<td>In this course, students will be introduced to the basic principles of thermodynamics. Topics include, energy conservation, entropy, isolated systems at constant pressure and temperature and the corresponding thermodynamic potentials. Students will learn to apply these principles to other branches of science and engineering. Prerequisites: PHY3310/PHYL310.</td>
</tr>
<tr>
<td>PHY 3359</td>
<td>Waves and Optics (3)</td>
<td>Topics of study in this course will include properties of waves, image formation, refraction, diffraction, origin of spectra, polarized light, and optical activity. Prerequisite: PHY 2253/L253 or PHY 2263/L263. Co-requisite: PHY L359.</td>
</tr>
</tbody>
</table>
PHY L359 Waves and Optics Lab (1)
Students will conduct selected experiments in waves, geometric and physical optics. Laboratory work emphasizes the basic principles of optics, the use of measuring instruments, and the interpretation of data.
Co-requisite: PHY 3359.

PHY 4420 Mechanics (3)
Introduction to the kinematics and dynamics of particles: escape and terminal velocity, drag, rotational motion and rotating frames, Foucault pendulum, planetary motion and Kepler's laws.
Prerequisites: PHY 2253/L233 or PHY 2262/L262 and MTH 1126.

PHY 4435 Electricity and Magnetism (3)
Topics include static electric and magnetic phenomena, electric and magnetic fields, motion of charged particles, dielectric and magnetic media, and fields in conductors.
Prerequisite: PHY 2263/L263, MTH 2227.

PHY 4438 Electromagnetic Fields (3)
Topics include electric and magnetic circuit elements. Maxwell's equations and boundary condition problems in one, two and three dimensions.
Prerequisite: PHY 4435.

PHY 4440 Dynamics of Particles & Systems (3)
Introduction to the dynamics of rigid body rotation, calculus of variations and minimization and the canonical formalism.
Prerequisite: PHY 4420.

PHY 4445 Quantum Mechanics I (3)
Introduction to the principles of quantum mechanics, one dimensional systems including the square well and the simple harmonic oscillator, uncertainty relations and multi-particle systems.
Prerequisites: PHY 3310, MTH 2227 or PHY 3320.

PHY 4446 Quantum Mechanics II (3)
Topics include quantum mechanics higher dimensional systems, angular momentum in quantum mechanics, spin, the Hydrogen atom, addition of angular momentum, WKB approximation, and perturbation theory.
Prerequisite: PHY 4445.

PHY 4460 Relativity I (3)
Topics include Lorentz transformation, inertial coordinates, causal Structure of Spacetime, equivalence principle, gravitational effects in SR, curved Spacetime, and introduction to black holes.
Prerequisites: Permission of Instructor

PHY 4475 Particle Physics (3)
The basic building blocks of matter and their interactions will be developed emphasizing their relationship to symmetry groups. We will introduce the photon, basic quantum electrodynamics, and introduce Feynman rules for interacting theories.
Prerequisite: PHY 4445.

PHY 4478 Relativity II (3)
Topics include rotating black holes, Hawking radiation, cosmology, tensor calculus, and Einstein field equations.
Prerequisites: Permission of instructor.

PHY 4483-85 Seminar in Relativity (1)
Selected topics of interest within the field of relativity. Note: may be taken up to three times for credit.

PHY 4490 Travel Study in Physics (1-3)
Supervised investigation of relevant topics in Physics through travel-study abroad or within the interior of the United States.

PHY 4491-92 Guided Independent Research (1 to 4 credit hours)
A physics research project under the direction of a faculty member. The project must culminate in a written report with the results reported at a department seminar.
Prerequisite: Senior standing or permission of department chair. Also see index for “Independent Study and Research...”

PHY 4493-94 Guided Independent Study (1 to 4 credit hours)
Independent study for advanced students under the direction of a faculty member.
Prerequisite: Permission of department chair. Also see index for “Independent Study and Research...”

PHY 4495 Topics in Physics (3)
Focus on a topic of timely nature and/or special interest.
Prerequisites: Permission of instructor.

PHY 4498 Internship in Physics (1-3)
Supervised work experience in the biotechnology industry, governmental agency, business, or other working environment in which a student will learn and apply pertinent professional skills.

PHY 4499 Senior Seminar (2)
The main objective of this course is to complete a research project in physics. You will be bringing together many of the ideas presented to you in your physics classes. In addition, you will need to acquire skill in project definition, time management, project completion timeline and schedule, clear and concise writing, and project presentation.
Prerequisite: Permission of the instructor.

POL 1101 Pop Culture and Politics (3)
Politics and popular culture have always been closely connected. Politicians seek to show how connected they are to the public, and try to use media and popular culture to do this. In this class, we will spend time learning how to define "politics" and "popular culture" so that we can understand how they interact. We will identify examples of politics being expressed in popular culture, and explore times when popular culture appears to have affected politics. There is an emphasis on the historical progression of mass media, as well as the influence of the media on politics and policies.

POL 1110 Social Media and Politics (3)
The digital age has revolutionized the way that people get information and communicate. Where communication and information-gathering once took time and expertise, in the digital age, information and communication is now virtually instantaneous. This is both a benefit and hindrance to politics. On the one hand, candidates can have instant communication with supporters and the people that they represent. On the other hand, the ease of sharing information and communication lends itself to false narratives and presenting alternative truths. This class will examine digital media as a political tool. Students will learn how different digital media is from traditional media. They will learn positive and negative aspects of politics in the digital age. Students will be expected to actively engage in the political process through digital media. This class is a general studies course and will fulfill the general studies requirement.

POL 2240 Hours American National Government (3)
This course explores the stable political values that frame the US Constitution and have guided our societal environment for two hundred years. The course is intended for superior students and political science majors.
POL 2241  American National Government (3)
A study of the Constitution, federalism, the Presidency, Congress, the courts, and politics on the national level.

POL 2260  World Politics (3)
An investigation of the development, nature, and process of political actions across national boundaries in the global system. Topics include international security, comparative government, international political economy, international organizations, and new global issues.

POL 2270  Terrorism and Counterterrorism (3)
This introductory course introduces students to the study of terrorism and a discussion and critique of common counterterrorist strategies. It considers terrorist violence as a politically motivated act employed to yield calculated political results. Thus, the goal of the course is to examine theoretical explanations of terrorist violence, the history of terrorism as a political strategy, and the difficulties encountered by states seeking to engage in counterterrorism.

POL 2275  Elections (3)
Students taking this course will learn to apply critical thinking skills to the task of understanding the process by which citizens of democratic societies elect their political leaders. Not limited to elections in the U.S., and among other things, this course emphasizes the role of elections in democratic theory, the electoral process and how it has changed over time, how citizens process the information needed to make decisions in elections and the role of the media, as well as the impact that gerrymandering and demobilization efforts have on electoral outcomes. We will explore the impact of elections on public policy, and the impact of public opinion on elections. Discussion topics will include political parties, interest groups, voter fraud, voter intimidation, candidate-centered campaigns, campaign advertisement, ethics, and the role of rhetoric in elections.

POL 3300  Foundations of Political Science (3)
An introduction to the discipline of political science, this course offers an overview of the sub-fields and methods within the discipline.

POL 3330  Political Theory (3)
An examination of selected advanced sources of classical and modern political theory. Theoretical perspectives, which are prominent in contemporary political science, are investigated.

POL 3338  Women in Politics (3)
This course identifies and analyzes, from a historical and contemporary point of view, the political, social, and economic trends and issues facing women. The course analyzes political theories and public policies that shape women’s political participation in the United States and elsewhere. This includes and examination of political institutions and processes at the national, state, and local governmental levels facing women.

POL 3339  African-American Politics (3)
This course identifies and analyzes, from a historical and contemporary point of view, the political, social, economic trends and issues facing African-Americans. The course analyzes political theories and public policies that shape African-American political participation in the United States and elsewhere. Topics will vary to include the Civil Rights Movement, Black Presidential Bids, racism in American public policy, and U.S. Courts and Congress.

POL 3340  U.S. Government – Executive Branch (3)

POL 3341  U.S. Government – Legislative Branch (3)
An analysis of the structure and dynamics of the U.S. Congress in the context of its relationships to the Constitution, the presidency, the judiciary, political processes and subordinate levels of government.

POL 3342  U.S. Government – Judicial Branch (3)
An analysis of the American federal judiciary in the context of its relationships to the Constitution, American political processes, the legislative and executive branches, state governments, and public opinion.

POL 3343  American Political Processes (3)
This course examines key topics in U.S. politics, specifically looking at national problems, actors and proposed solutions.

POL 3351  International Relations (3)
This course provides a comprehensive investigation of the relationship of both state and non-state actors in the international arena. It offers a framework for the further analysis of the discipline of International Relations including the principal schools of IR theory, the historical development of the contemporary international system, foreign policies of states, the search for state security, and the economic relationships between states within a global political context.

POL 3355  Southern Politics (3)
This course examines the history and processes of Southern politics, including the one-party system, the exclusion of African-Americans and poor whites from voting, the role of Southerners in the U.S. Senate and House of Representatives, and the current voting patterns and habits of the region. The course looks specifically at the politics of Alabama, Florida, Georgia, Mississippi, Louisiana, and South Carolina.

POL 3364  State and Local Politics (3)
An investigation of political processes and organization at the state and local level in the United States.

POL 3390  The Art of Political Science Research (3)
This course introduces students to the art and process of consuming and conducting political science research. Among topics to be covered are the epistemological and methodological skills. Prerequisites: POL 3300 Foundations of Political Science.

POL 4402  Political Geography (3)
An analysis of the reciprocal effects of geography and political organization on the behavior of states, including boundaries, national resources, spatial strategies, and maritime power.

POL 4405  Political Behavior and Public Opinion (3)
This course focuses on political behavior and public opinion, both of which play important roles in democratic governance. The course surveys the major concepts of importance and some of the major scholarly debates in the areas of behavior and opinion research. This course is also designed to teach students how political scientists study actions and attitudes relevant to contemporary politics. Although the course concentrates mainly on the role that behavior and opinion play in US politics, comparisons will be made to other countries. Prerequisites: POL 3390.

POL 4410  International Political Economy (3)
An examination of the interrelationships between international politics and economics; states and markets, trade, foreign investment, international monetary affairs, foreign aid, state development strategies, and globalization.
POL 4415  International Conflict (3)
This course provides a detailed examination of patterns of international conflict and methods employed to manage them: bases, emergence, escalation, de-escalation, negotiation, mediation, termination, and consequences. Specific episodes of international conflict will be investigated.

POL 4420  Constitutional Law (3)
A survey of the legal, political, and methodological problems in constitutional law.

POL 4421  Introduction to Public Administration (3)
An introduction to the historical, institutional, and political context of the profession; current trends and issues; and the role of public administration in the larger governmental system.

POL 4422  Public Policy Making (3)
An introduction to the processes by which American public policy is formulated, implemented, and evaluated and to the roles of policy analysts in solving various public problems.

POL 4424  Contemporary American Foreign Policy (3)
This course examines the foreign policy processes of the United States: historical traditions, political institutions, economic and military capabilities, the Congress, the Presidency, interest groups, the media, and public opinion.

POL 4432  Comparative Public Policy (3)
This course examines the processes of policy making in a cross-comparative framework that illustrates how different nation states, both in the developed and the developing worlds, formulate and implement public policy.

POL 4433  Comparative Government (3)
A comparative analysis of state governments in the world with an emphasis upon political cultures, governmental institutions and political processes that lead to differences and international tensions.

POL 4440  Advanced Research Methods (3)
Development and application of critical thinking skills necessary in basic, applied, and evaluative research methodologies and data analysis techniques. Students apply these advanced methodologies to issues, programs, and research problems in political science.

Prerequisites: POL 3390.

POL 4445  Inter-American Relations (3)
This course examines the relationship between the United States and the remainder of the Western Hemisphere, with an emphasis on historical and contemporary Latin American relations.

POL 4450  Latin American Politics (3)
An introduction to the social and political institutions of Latin America.

POL 4451  Public Personnel Administration (3)
A survey of the basic principles and functions of personnel administration in the public service and of the current strategies for managing recruitment, placement, salary and benefit strategies, training, retirement, and other personnel functions.

POL 4452  International Law (3)
This course examines the sources and development of international law from a historical, political, jurisprudential, and philosophical standpoint. It will include a comprehensive investigation of state sovereignty, jurisdiction, the role of the United Nations, the regulation of the use of force in world affairs, and international human rights law.

POL 4453  Bureaucratic Politics (3)
A study of the theories of organizations and their structures as they affect the policymaking environment, examining goals, resources, effectiveness, equilibrium, and change relating to organizations and their relationship to administration.

POL 4460  Intercultural Relations (3)
An analysis of the influence of culture on interstate relations including theories, concepts, and applications.

POL 4464  Arab-Israeli Conflict (3)
This course focuses on the Arab-Israeli conflict since 1948 with a special focus on the challenges to conflict resolution on both the Arab and Israeli sides and the role great powers play in Middle Eastern politics. The course will begin by examining the major historical events from the birth of Israeli to the present day. Attention will be given to important groups, events, movements that will allow the complexity of this relationship to come to light. Additionally, the course will focus on the relationship between the West, particularly Europe and the United States, and the Middle East.

POL 4465  Politics of the Developing World (3)
This course examines the political and economic challenges faced by developing states. Theories and models of development will be analyzed in a variety of ways.

POL 4466  Middle Eastern Politics (3)
An introduction to the social and political institutions of the contemporary Middle East.

POL 4467  Asian Politics (3)
An introduction to the social and political institutions of Contemporary Asia.

POL 4468  Russian Politics (3)
This course provides an introduction to Soviet, post-Soviet, and Russian politics and the way we in the West study and think about them. The substantive focus is on the political process and its policy outcomes. Primary attention will be directed to post-1991 (i.e., post-Soviet) political institutional, elite, and policy concerns.

POL 4469  Religion in Politics (3)
This is a course that deals with the intersection between two contentious topics in the United States, religion and politics. In this course, the focus is on the manner in which religion, defined in organizational terms, as a system of beliefs, as a source of faith and morality, and as specific types of behaviors, intersects with and influences various aspects of American politics. These aspects of politics include morality and "moral politics" issues, political behaviors, public and individual opinions, campaigns and electoral mobilization, as well as domestic and foreign policy.

POL 4470  European Politics (3)
An introduction to the social and political institutions of contemporary Europe.

POL 4472  Administrative Law (3)
This course examines the legal environment in which government agencies function, including the powers and procedures that control administrative discretion, rule-making, investigations, prosecuting, negotiating, and settling; constitutional law, statutory law, common law, and agency-made law; the liability of governments and their officers; and selected court cases and decisions.

POL 4474  Terrorism and Political Violence (3)
This course is designed to introduce students to the origins and significance of contemporary political violence with an emphasis on the phenomenon of terrorism. It employs an interdisciplinary, case-study approach.

POL 4476  Politics of Southeast Asia (3)
This course involves the study of politics in the Philippines, Indonesia, Vietnam, Laos, Kampuchea, Malaysia, Singapore, Brunei, Myanmar, and Thailand. It investigates the historical and cultural
students will work closely with faculty prior to and from 1-3 credit hours.

**POL 4479 Study Abroad in Political Science (1-3)**
Guided investigation of different political systems and political cultures through study abroad. Students will work closely with faculty prior to and during a study abroad trip to understand these political systems and cultures. Student can earn from 1-3 credit hours.

Prerequisites: Must have permission of the instructor and the Chair of the Political Science Department to register for this class.

**POL 4490 Internship in Political Science (1 to 3 credit hours)**
Supervised work in an agency that can provide practical experience in the field of study.

Prerequisites: senior standing and approval of supervising instructor and the department chair.

**POL 4491-92 Guided Independent Research (1 to 3 credit hours each)**
Note: Additional information is indexed under Independent Study and Research.

**POL 4493-94 Guided Independent Study (1 to 3 credit hours each)**
Note: Additional information is indexed under Independent Study and Research.

**POL 4495 Selected Topics in Political Science (3)**
Examines selected topics of a timely nature and/or special interest within the field of political science.

---

**PUBLIC RELATIONS JOURNALISM (PRJ)**

**PRJ 2230 Principles of Public Relations (3)**
This introductory course examines the communication and persuasion concepts underpinning public relations, in addition to public relations history, role, ethical and professional standards, strategic planning and tactical planning.

**PRJ 3321 Public Relations Cases and Strategies (3)**
A case study and project-based approach to public relations research, strategy setting and tactical implementation.

Prerequisites: PRJ 2230 and either JRN 1102 or PRJ 3375.

**PRJ 3375 Public Relations Writing (3)**
This course (designed for non-journalism majors) focuses on developing the professional writing skills required for public relations practitioners, AP style and how to write effectively for clients, the media and for online publications.

**PRJ 4419 Advanced Public Relations Tactics (3)**
Practical experience in preparation of public relations messages for a client. This course is limited to juniors and seniors

Prerequisite: PRJ 3321.

Co-requisite: PRJ 4423.

**PRJ 4423 Public Relations Case Studies (3)**
Application of public relations theory and best practices resulting in the creation of a complete public relations campaign for a client. This course is limited to juniors and seniors

Prerequisite: PRJ 3321.

Co-requisite: PRJ 4419.

---

**PSYCHOLOGY COURSES (PSY)**

**PSY 2200 Introduction to Psychology (3)**
A survey of the basic theories, concepts, principles, and research findings in the field of psychology.

**PSY 2201 Honors General Psychology (3)**
A survey of the basic theories, concepts, principles, and research findings in the field of psychology.

**PSY 2205 Psychology of Adjustment (3)**
A course in mental health, designed to assist the individual in making a good adjustment to the changing requirements of the environment.

**PSY 2210 Developmental Psychology (3)**
A study of human development across the life-span with emphasis on psychosocial, physical, emotional, and cognitive changes.

**PSY 2230 Orientation to the Psychology Major (3)**
Introduction to the language of psychology, APA writing style, and library research. Also includes an over view of career paths in psychology.

**PSY 3301 Basic Statistics (3)**
An introduction to descriptive and inferential statistical concepts, methods, and tools. Topics to be covered include basic terminology, measurement, data description, probability, hypothesis testing, and inferential tests (parametric and non-parametric). May be used for Sociology credit.

Prerequisite: MTH 1110 or higher, with a grade of C or above.

**PSY 3304 Abnormal Psychology (3)**
The study of mental disorders emphasizing their etiology, classification and amelioration as described in the current classification system of the American Psychiatric Association.

**PSY 3309 Advanced Statistics (3)**
Advanced quantitative methods in psychology. Topics include linear regression, analysis of variance, non-parametric techniques, estimation procedures, individual and multiple comparisons, and experimental design.

Prerequisite: PSY 3301.

**PSY 3310 Sensation and Perception (3)**
A study of how sensory information helps both the human species and other animals to thrive. Exploration of the senses including their physiological makeup, development and functioning. Theoretical and empirical foundations of perception and the applications of perceptual knowledge are emphasized.

Prerequisite: six semester hours of psychology and sophomore standing or above.

**PSY 3311 Research Methods (3)**
An introduction to the design, analysis, and interpretation of behavioral research, including strategies for reviewing scientific literature and organizing a research report.

Prerequisite: PSY 2230 and PSY 3301.

**PSY 3312 Psychology of Women (3)**
The study of women’s experience and gender issues in the context of psychological theory and research.

**PSY 3315 Cultural and Diversity Psychology (3)**
This course is a theoretical and empirical analysis of how culture is connected to human behavior. Global cultural differences and perspectives will be discussed including research studies, theory, and comparative analyses (i.e. Eastern vs. Western comparative analyses). Discussions will include human behavior across different countries, the evolution of culture, self and personality, mental and physical health, and living in multicultural worlds. Diversity topics will cover such issues as gender, ethnicity, classism, disability, worldviews, and role constructions. Diversity discussions will include stereotypes, biases, ageism, ableism, and gender role development. Sexual orientation and evolving cultural laws will be examined.

**PSY 3316 Mixed Methods Research (3)**
This course examines the advantages and techniques of mixing quantitative research methods in order to answer scientific questions within the field of psychology and other related fields. By learning how to integrate qualitative methodologies, when
appropriate, students should gain an understanding that research should be guided by the questions we want to answer and not limited by the methodologies we prefer. Students will learn techniques for collecting, analyzing, interpreting, and reporting data from mixed methods research.

Prerequisite: PSY 3301.

**PSY 3317 Ethics in Research and Practice (3)**

This course introduces the student to ethical practices in psychology by focusing on the underlying principles of the 80+ standards of the APA Ethics Code. The course begins by covering the basics of the APA Ethics Code, including a brief history and an overview of general concepts. Next, it explores the four ethical concepts applicable to all psychologists: competence, informed consent, privacy and confidentiality, avoiding harm and exploitation. Finally, it relates these key concepts to specific situations, including assessment, treatment, research and publication, and teaching and supervision.

**PSY 3320 Child Psychology (3)**

The development of children from conception to puberty. Includes physical, cognitive, perceptual, language, social and emotional development.

**PSY 3322 Abnormal Child Psychology (3)**

A study of theories, research, etiology, assessment and diagnosis of mental disorders first seen in childhood or adolescence as defined by the current edition of the Diagnostic and Statistical Manual of Mental Disorders. Includes such disorders as ADHD, conduct problems, anxiety, mood, mental retardation, and autism.

**PSY 3325 Adolescent Psychology (3)**

Adolescents from puberty to early adulthood. Includes physical, cognitive, social, emotional, and personality development in cultural context.

**PSY 3330 Health Psychology (3)**

This course studies the science that connects behavior to health, including psychological processes and the relationship between health and human behavior.

**PSY 3332 Family Violence (3)**

An in-depth study of violence in families, including spousal abuse, child abuse, elder abuse, relationship dynamics, protection services, treatment programs, legal defense strategies, and current legislation.

*Note: May be taken for psychology or sociology credit, but not both.*

**PSY 3340 Psychology of Learning (3)**

Introduction to learning and behavior in human and nonhuman animals, including fundamental principles and findings from laboratory investigations of classical, instrumental, cognitive, and social learning.

**PSY 3346 Educational Assessment (3)**

This course provides a study of measurement and evaluation techniques for the classroom teacher. Emphasis will be placed on the selection, evaluation, administration, scoring and interpretation of selected measures of student performance, achievement and behavior. The student will demonstrate skills in utilizing measurement data to plan appropriate learning activities for students.

*Prerequisite: admission to TEP. Note: May not be used to meet the requirements for the psychology major or minor.*

**PSY 3351 Theories of Learning (3)**

Critical analysis of the major theories of learning, including the works of Pavlov, Thorndike, Guthrie, Tolman, Hull, Skinner, and Mowrer.

**PSY 3360 Forensic Psychology (3)**

Forensic psychology is the application of the science and profession of psychology to questions and issues relating to law and the legal system. This course will introduce students to the specialty area of forensic psychology. Particular emphasis will be on applied aspects of the field.

*Prerequisite: six semester hours of psychology.*

**PSY 3365 Human Factors Psychology (3)**

Analysis of theoretical issues and research methods related to the interaction between people and machines and human performance. Topics include information processing theory, human control systems and displays, task simulation, perceptual and motor factors limiting human performance.

*Prerequisite: six semester hours of psychology.*

**PSY 3370 Comparative Psychology (3)**

This course examines the development, causal mechanisms, evolutionary history, and function of the behavior of animals, including humans.

**PSY 3380 Social Psychology (3)**

A theoretical and empirical analysis of social behavior, including selected topics related to social perception, social influence, social interaction, and applied social psychology.

**PSY 3385 Evolutionary Psychology (3)**

An examination of human behavior and cognition from an evolutionary perspective.

**PSY 3390 Special Topics in Psychology (3)**

An examination of selected topics or issues in psychology.

*May be repeated for credit when course content varies.*

**PSY 4400 Advanced General Psychology (3)**

A comprehensive study of the discipline of psychology designed to expand the student’s depth and breadth of knowledge in psychology.

*Prerequisite: Senior status (90 semester hours of undergraduate courses) and a minimum of 15 semester hours of psychology.*

**PSY 4401 Psychological Tests and Measurements (3)**

Selection, evaluation, administration, scoring, interpretation and uses of tests of intelligence, proficiency, interests, personality, aptitude and social adjustment.

*Prerequisite: Additional three semester hours of psychology.*

**PSY 4402 Principles of Counseling (3)**

Overview of major counseling theories and techniques, interviewing, assessment, professional issues and ethics, and a review of research and practical problems.

*Prerequisite: six semester hours of psychology.*

**PSY 4405 Experimental Psychology (3)**

Various techniques for conducting scientific research in psychology will be discussed. Course objectives include designing and conducting an experiment as well as analyzing and reporting the results.

*Prerequisite: PSY 2230 and PSY 3301.*

**PSY 4410 Industrial/Organizational Psychology (3)**

Application of psychology in business and industry, including employee selection, performance appraisal, motivation, organizational psychology, consumer motivation, group structures, and personnel problems.

**PSY 4420 Physiological Dynamics of Alcohol and Other Drugs (3)**

Study of physiological and psychological dynamics and resultant behavioral implications in use of alcohol and other drugs. Based on assessment of dynamics and behavior and application of diagnostic procedures using appropriate manuals and materials.

**PSY 4421 Physiological Psychology (3)**

The physiological correlates of behavior will be examined, including such topics as neurotransmitters and hormones, drugs, and the biological roots of mental disorders.
PSY 4430 Intro to Substance Abuse Counseling (3)
This course provides an introduction to substance abuse counseling through studies of mind-altering substances; etiological theories of addiction; assessment interviewing and screening tests; individual, group, family, and other treatment options; relapse prevention; and community prevention programs.

PSY 4434 Drug Education, Prevention and Intervention (3)
A study of commonly abused drugs, drug abuse prevention, and treatment techniques. Examines characteristics of people at high risk to become substance abusers/addicted.

PSY 4435 Treatment of Addictive Family Diseases (3)
A study of typical characteristics of dysfunctional families. Provides the basis for suggested intervention techniques, appropriate areas of family education, and guidelines for effective therapy.

PSY 4436 Treatment Theories and Modalities of Addictive Diseases (3)
A study of historical perspectives and the most effective treatment and assessment approaches of addictive diseases.

PSY 4450 Theories of Personality (3)
Critical analysis of major theories and systems of personality. Prerequisite: six semester hours of psychology.

PSY 4451 History and Systems of Psychology (3)
Study of the development of psychology from its historical antecedents with special emphasis placed on contemporary schools and systems of psychological thought. Prerequisite: PSY 2230 and Senior Status (90 semester hours of undergraduate courses).

PSY 4456 Gerontology (3)
The study of aging. Emphasis on biomedical, psychological, and social aspects of middle and late adulthood.

PSY 4459 Applied Behavior Analysis (3)
This course covers the characteristics of behavior analysis as well as the basics of behavior-change procedures. Students will design, plan, implement, and present a behavior-change project.

PSY 4460 Cognitive Psychology (3)
A study of human intellectual functioning including attention, perception, memory, problem solving, reasoning and language. Prerequisite: PSY 2230 and an additional three semester hours of psychology.

PSY 4461 Applied Behavior Analysis Field Experience (3)
Students will be provided individual supervision by an approved supervisor according to the behavior analysis certification board’s (BACB) standards while engaged in the practice of applied behavior analysis. Travel to the assigned clinical site will be required. Regular and prompt attendance at the clinical site will be required. The supervisor must directly observe the student engaged in the practice of applied behavior analysis with their client at least once during every supervisory period in accordance to BACB standards. Students will engage in a variety of activities approved by the BACB such as (a) conduct behavioral assessments; (b) provide behavioral therapy to clients; (c) read related articles from the behavior analytic literature; (d) collect, graph, and analyze client and/or procedural integrity data; and (e) design and implement caregiver and/or staff training. This course may be taken for repeat credit with a different assigned client.

PSY 4462 Applied Behavior Analysis Pre-Practicum (1)
Prerequisite: PSY 4459 AND Instructor approval.

PSY 4463 Applied Behavior Analysis Pre-Practicum (1)
This course prepares students for participating in the applied behavior analysis practicum courses. Students must obtain liability insurance and pass a criminal background check. Students must pass a test on the ethics of working with special populations (e.g., client confidentiality). Students are required to take and pass the behavior analysis certification board’s training module on experience and supervision standards. Students are required to complete 15 hours of observation of the practice of applied behavior analysis. Prerequisite: PSY 4459 AND permission of the course instructor.

PSY 4470 Advanced Theories of Developmental Psychology (3)
Comparative study of major developmental theories from the exogenous, endogenous, and constructivist paradigms. Includes history, structural components, contributions, criticisms, evaluation, and relevant research of each theory. Prerequisite: six semester hours of psychology.

PSY 4472 Applied Behavior Analysis Fourth to Fifth Edition Bridge Course (4)
This course allows Applied Behavior Analysis Minors who have taken one or more of Troy University’s Board Certified Assistant Behavior Analyst (BCaBA) verified course sequence courses under the Behavior Analysis Certification Board (BACB) Fourth Edition Standards to meet the coursework standards for the Fifth Edition. This course covers topics from the BACB Compliance Code and Disciplinary Systems, Professionalism, Measurements, Data Display and Interpretation, Experimental Design, Behavior Assessment, Behavior-Change Procedures, Selecting and Implementing Interventions, and Personnel Supervision and Management.

PSY 4474 Evaluation of Research for the Behavioral Treatment of Individuals with Autism and Developmental Delays (3)
This course will present a behavioral view of autism and provide a brief overview of the history of behavioral treatment of autism and other developmental delays. This course will provide a brief overview of single-subject research designs and data analysis. Students will evaluate research studies that are seminal in the field of the behavioral treatment of children with autism and developmental delays in terms of (a) ethics, (b) research design, and (c) visual analysis.

PSY 4475 Behavioral Treatment of Individuals with Autism and Developmental Delays (3)
In this course, students will identify, describe, and practice behavioral change procedures using: (a) positive and negative reinforcement, (b) positive and negative punishment, (c) shaping, (d) each type of verbal operand, (e) extinction, and (f) differential reinforcement. Students will contrast discrete-trial teaching and incidental teaching methods and practice using both. Prerequisite: PSY 4459.

PSY 4477 Behavioral Assessment of Individuals with Autism and Developmental Delays (3)
This course will prepare the student to conduct behavioral assessments including a functional behavior assessment (FBA), VB-MAPP, and ABBLs. Based on the results of the assessment, students will write a behavioral treatment plan. Prerequisite: PSY 4459.
PSY 4478  The Behavior Analyst as a Professional and Ethical Practitioner (3)
Through a variety of topics and activities, this course will prepare the student for working in a professional setting. Topics covered include the Professional and Ethical Code for Behavior Analysts and a selection of topics from Behavior Analyst Certification Board’s BCBA/BcBA Task List.
Prerequisites: PSY 4474, PSY 4477.

PSY 4480  Senior Seminar in Psychology (3)
A capstone course designed to integrate subject matter learned in previous courses, encourage critical analysis of contemporary issues, and contemplate future educational and employment opportunities in psychology.
Prerequisite: Senior standing.

PSY 4485  Psychology Study Abroad (3)
This course examines how culture is related to human behavior. Relates major principles and theories of psychology to two or more cultures during a Study Abroad experience in a host country or countries.
Prerequisites: PSY 2200 or Psychology Major or Minor.

PSY 4490  Field Experience in Psychology—I
This course is designed to provide students majoring or minoring in psychology with practical work experience in a psychology-related work setting within an approved agency or business. Students are required to complete a minimum of 45 documented, supervised clock hours during the semester or term in which enrolled in the course (transportation not provided). This class meets once a week in a seminar format. Students are required to meet with the Field Experience instructor the semester/term prior to the class in order to secure an approved site.
Prerequisites: Junior or senior standing, instructor approval, and an overall institutional GPA of 3.0.

PSY 4491  Guided Independent Research (3)
This course is designed to provide supervised research in the area of psychology. Opportunities for undergraduate research will be approved with attention to critical evaluation of research techniques, methods, and procedures. Selection of the problem must be approved by the professor under whom the study is to be conducted and the department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. Preparation of a scholarly paper and oral defense may be required.
Prerequisite: Junior or senior standing with a minimum overall GPA of 3.0. Guided independent research may be taken only in the applicant’s major or minor field. May not be used to repeat a course for which a grade of D or below has been earned. Also see index for “Independent Study and Research.”

PSY 4492  Guided Independent Research (1 to 3 credit hours)
This course is designed to provide supervised research in the area of psychology. Opportunities for undergraduate research will be approved with attention to critical evaluation of research techniques, methods, and procedures. Selection of the problem must be approved by the professor under whom the study is to be conducted and the department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. Preparation of a scholarly paper and oral defense may be required.
Prerequisite: Junior or senior standing with a minimum overall GPA of 3.0. Guided independent research may be taken only in the applicant’s major or minor field. May not be used to repeat a course for which a grade of D or below has been earned. Also see index for “Independent Study and Research.”

PSY 4493-94  Guided Independent Study (1 to 3 credit hours)
Supervised study through field or laboratory projects, guided readings, creative endeavors or achievement of specific skills.
Prerequisite: Junior or senior status, permission of guiding professor, approval of department chair and the dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Also see index for “Independent Study and Research.”

PSY 4495  Field Experience in Psychology- II
This course is designed to provide students majoring or minoring in psychology with practical work experience in a psychology-related work setting within an approved agency or business. Students are required to complete a minimum of 45 documented, supervised clock hours during the semester or term in which enrolled in the course (transportation not provided). This class meets once a week in a seminar format. Students are required to meet with the Field Experience instructor the semester/term prior to the class in order to secure an approved site.
Prerequisites: Junior or senior standing, instructor approval, PSY 4490 and an overall institutional GPA of 3.0.

PSY 4496  Applied Behavior Analysis Practicum I (3)
Prior to enrollment, students must have a criminal background check and professional liability insurance. Students must complete 250 hours of supervised experience delivering applied behavior analysis services in a clinical setting. Students must meet with the instructor for class, which counts as the group-supervision component. During class, students will practice delivering behavioral-analytic services. Students must meet weekly with an approved Board Certified Behavior Analyst (BCBA) for individual supervision. During individual supervision, the BCBA must (a) observe the student engage in practice and (b) provide written and verbal feedback on that practice according to the BACB guidelines for supervision. The course is limited to 10 students.
Prerequisites: PSY 4462 AND permission of the instructor.

PSY 4497  Applied Behavior Analysis Practicum II (3)
Prior to enrollment, students must have a criminal background check and professional liability insurance. Students must complete 250 hours of supervised experience delivering applied behavior analysis services in a clinical setting. Students must meet with the instructor for class, which counts as the group-supervision component. During class, students will practice delivering behavioral-analytic services. Students must meet weekly with an approved Board Certified Behavior Analyst (BCBA) for individual supervision. During individual supervision, the BCBA must (a) observe the student engage in practice and (b) provide written and verbal feedback on that practice according to the BACB guidelines for supervision. The course is limited to 10 students.
Prerequisites: PSY 4496 AND permission of the instructor.

PSY 4498  Applied Behavior Analysis Practicum III (3)
Students must complete 250 hours of supervised experience delivering applied behavior analysis services in a clinical setting. Students must meet with the instructor for class, which counts as the group-supervision component. During class, students will practice delivering behavioral-analytic services. Students must meet weekly with an approved Board
Certified Behavior Analyst (BCBA) for individual supervision. During individual supervision, the BCBA must (a) observe the student engage in practice and (b) provide written and verbal feedback on that practice according to the BACB guidelines for supervision. The course is limited to 10 students. Prerequisites: PSY 4497 AND permission of the instructor.

**PSY 4499**  
**Applied Behavior Analysis Practicum IV (3)**  
Students must complete 250 hours of supervised experience delivering applied behavior analysis services in a clinical setting. Students must meet with the instructor for class, which counts as the group-supervision component. During class, students will practice delivering behavioral-analytic services. Students must meet weekly with an approved Board Certified Behavior Analyst (BCBA) for individual supervision. During individual supervision, the BCBA must (a) observe the student engage in practice and (b) provide written and verbal feedback on that practice according to the BACB guidelines for supervision. The course is limited to 10 students. Prerequisites: PSY 4498 AND permission of the instructor.

---

**QUANTITATIVE METHODS COURSES (QM)**

**QM 2241**  
**Business Statistics and Data Analytics (3)**  
An introduction to statistics and data analytics in business that supports business decisions and the solution to business problems utilizing descriptive and inferential statistical concepts and methods. Topics include grouping of data, measures of central tendency and dispersion, probability concepts, sampling, statistical estimation, and statistical hypothesis testing. Prerequisite: MTH 1112 and IS 2241.

**QM 3342**  
**Introduction to Operations Research (3)**  
An introduction to quantitative techniques applicable to business and economics. Topics include queuing analysis, transportation programming, PERT/CPM, and simple linear regression. Prerequisite: QM 2241.

**QM 3345**  
**Operations Management (3)**  
A study of how organizational processes add value as they convert inputs to outputs. Topics covered include the strategic relationship of operations with other functional organizations, value chain concepts, and quantitative methods including forecasting models, inventory models, statistical process control, process models and project management methods. The course also provides a review of current supply chain philosophies such as JIT, MRP, and EOQ inventory management methods. Prerequisites: Lower-level Core, MGT 3300, QM 2241, IS 2241.

---

**READING/LITERACY COURSES (RED)**

**RED 0098**  
**Reading I (3)**  
A Developmental / Remedial instruction course for those students who are deficient in basic reading skills such as word recognition comprehension and study skills. A placement test will be required. Notes: May not be audited. Institutional credit only.

**RED 3310**  
**Language and Literacy K-6 (3)**  
Literacy instruction for the K-6 learner with emphasis on child development, learning theories, individual differences, emergent and early literacy, principles of reading and language arts instruction, teaching strategies, and examination of current materials and instructional practices used in teaching literacy. Prerequisite: admission to TEP. Co-requisite: RED 3310.

**RED L310**  
**Language and Literacy Lab (1)**  
This course includes Lab/Field-oriented experiences designed to enhance understanding of Literacy instruction for the K-6 learner with emphasis on child development, learning theories, individual differences, emergent and early literacy, principles of reading and language arts instruction, teaching strategies, and examination of current materials and instructional practices used in teaching literacy. Prerequisite: admission to TEP. Co-requisite: RED 3310.

**RED 3380**  
**Children’s Literature (3)**  
The purpose of this course is to assist undergraduate students as they investigate and construct an understanding of and techniques to incorporate children’s literature across the curriculum. Pertinent topics include award-winning authors and titles found in children’s literature among a variety of genre, along with developmentally appropriate instructional techniques.

**RED 4401**  
**Reading in the Content Areas (3)**  
This course provides a study of teaching reading in grades P-12, emphasizing methods in the content areas. Prerequisites: Admission to TEP.

**RED 4465**  
**Literacy Practicum (3)**  
The practicum is designed to provide a supervised experience related to instruction in the area of literacy development, which may include phonemic awareness, phonics, fluency, vocabulary, sequencing, and comprehension, among others. The application of literacy skills, concepts, and principles acquired in corequisite course work, as well as current research and evidence based literacy instructional practices, will be hallmarks of the practicum experience. Prerequisites: Admission to TEP.

**RED 4483**  
**Reading Intervention Strategies (3)**  
Principles of assessment and evaluation for improving the language and literacy learning. Pre-service teachers will be introduced to the variety of screening and testing instruments for use in modifying students’ instructional programs. Formal and informal methods for classroom observations will be explored, and methods for translating data collected for classroom management and/or communication to learners’ parents will be introduced. The issues of privacy and ethical treatment of confidential records will also be addressed. Prerequisites: (1) Admission to TEP and (2) RED 3310 or with the permission of the department chair or designee. Co-requisite: RED L483.

**RED L483**  
**Reading Intervention Strategies Lab (1)**  
This course includes Lab/Field-oriented experiences designed to enhance understanding of principles of assessment and evaluation for improving the language and literacy learning. Prerequisite: admission to TEP. Co-requisite: RED 4483.
COURSE DESCRIPTIONS  ·  202

RHB 3330  Introduction to Attachment Theory and Mental Health (3)
This is an undergraduate level course and will provide a broad overview of Attachment theory from its origins to current research and understanding. Pathology versus wellness will be understood through the use of the Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood (DC:05) and other models of cultural and societal influences including policy, ethics and Infant/Early Childhood Mental Health trends. Additionally, reflective supervision/consultation models will be explored. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources.

RHB 3335  Introduction to Infant/Early Childhood Neuroscience, Testing, and Assessment in Mental Health (3)
This is an undergraduate level course and will provide a broad overview of Neuroscience and interpersonal neurobiology, which will be discussed and considered together with ethics, cultural and other specific influences. Additionally, various models of assessment will be examined, such as, biopsychosocial development and cultural formation of infants and their families through reflective lens of attachment, neurobiology, ethics, case conceptualization, and other factors using clinical observations of infants, families, and relationships; informal and formal assessments. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources.

RHB 3340  Social Policy and Planning (3)
Exploration of the social policy formulation process and the building of analysis skills in the evaluation of social policy and programs. The impact of political, economic, and social forces is a focal point, and the process of incrementalism in implementation is examined.

RHB 3345  Foundations of Rehabilitation (3)
Review of historical, philosophical, and legislative development of the rehabilitation movement; focuses on current service delivery systems and trends.

RHB 3350  Disability and Employment (3)
An orientation to the complex interaction between disability and employment along with the meaning and importance of work to the individual, family and community. Includes career development theories and strategies for integrating people with disabilities into meaningful careers.

RHB 3355  Introduction to Developmental Infant/Early Childhood Mental Health (3)
This is an undergraduate level course and will provide a broad overview of early human development for infants and their families. A basic understanding of influences that lead to mental health wellbeing and influences that can push development off track will be examined through the lens of attachment, neurobiology, and biopsychosocial factors. A clinical mental health and reflective perspective will be employed to inform understanding, case conceptualization, assessment and treatment of infants and their families. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources.

RHB 3360  Vocational Assessment (3)
Processes, principles, and techniques used to diagnose vocational assets and liabilities of the individual. Emphasis upon the use of psychometric tests, work samples, and job samples.

RHB 3365  Introduction to Visual Impairment (3)
This course will provide an understanding of the medical, psychological, social, educational, and vocational issues that professionals must understand in order to work effectively with persons who are visually impaired.
RHB 3375 Diversity (3)  
This course provides students with an understanding and appreciation of cultural diversity, Ethnic and gender sensitivity, as well as ageism, in social work practice with a variety of populations is highlighted.

RHB 3380 Medical and Vocational Aspects of Disabilities (3)  
Examines specific physical, psychiatric, and cognitive disabilities from medical, psychological, and vocational points of view. Covers a number of disabling conditions including etiology, characteristics, and implications for treatment and accommodation.

RHB 3385 Rehabilitation of Persons with Severe Disabilities (3)  
Course explores rehabilitation needs of persons with severe disabilities. Concepts, approaches, philosophy and ethical considerations related to independent living, supported employment, and advocacy efforts.

RHB 4400 Juvenile Rehabilitation and Counseling (3)  
Treatment modalities, diagnostic techniques, intervention systems, concurrent problems, and counseling techniques with adolescents. Emphasis is upon evaluation of services, i.e., vocational, self-concepts, academic, psychotherapy, peer relations, group counseling, family relations, and life skill development.

RHB 4410 Rehabilitation Pre-practicum (1)  
Preparation for RHB 4420.  
Prerequisites: RHB major with senior standing or permission of instructor.

RHB 4420 Rehabilitation Practicum I (3)  
Supervised experience in a rehabilitation setting with an emphasis on the diversity of human problems and the impact these problems have on people with disabilities. Includes a weekly seminar plus a minimum of 120 hours in a particular agency setting.  
Prerequisites: Rehabilitation major, RHB 4410.  
Practicum site must be approved by instructor during RHB 4410.

RHB 4430 Rehabilitation Practicum II (3)  
Supervised experience in a rehabilitation setting with an emphasis on the diversity of human problems and the impact these problems have on people with disabilities. Includes a weekly seminar plus a minimum of 120 hours in a particular agency setting.  
Prerequisites: Rehabilitation major, RHB 4410.  
Practicum site must be approved by instructor during RHB 4410.

RHB 4440 Rehabilitation Practicum III (3)  
Supervised experience in a rehabilitation setting with an emphasis on the diversity of human problems and the impact these problems have on people with disabilities. Includes a weekly seminar plus a minimum of 120 hours in a particular agency setting.  
Prerequisites: Rehabilitation major, RHB 4410.  
Practicum site must be approved by instructor during RHB 4410.

RMI 3335 Principles of Risk Management and Insurance (3)  
An introduction to the legal principles underlying insurance, the basics of risk management, the application of risk management techniques to personal risk management problems, personal property and liability insurance contracts including the personal auto policy and the homeowner’s package, insurance regulation, and the insurance marketplace.  
Prerequisite: Lower-level Core or permission of department chair.

RMI 3346 Life and Health Insurance (3)  
Study of types of life insurance and annuity contracts and their uses; regulations of life and health insurers; development of financial plans utilizing life insurance products; Social Security; group and individual health insurance products.
RMI 3348 Property and Casualty Insurance (3)
This course examines the fundamental coverage and policy provisions of the major types of commercial and personal property and liability insurance contracts. Also examined are the fundamentals of property and casualty insurance, including analysis of contracts, rating, underwriting, regulation, and financial strength of insurers.
Prerequisite: RMI 4442

RMI 4425 Special Topics in Risk Management and Insurance (3)
This course examines selected risk management and insurance topics of interest that are not covered in other course offerings. The topic for the semester will be indicated in advance. Students may only take this course once for a maximum credit of three hours.
Note: This course may not be substituted for any required course within the Global Business RMI major.
Prerequisite: RMI 4442

RMI 4430 Surplus Lines Insurance Operations & Products (3)
A study of the surplus lines insurance markets as well as the reinsurance sector of the insurance industry. The course covers the formation and classification of these companies, their distribution systems, their regulation, their accounting procedures, and a comparison of these companies to admitted insurers. Special attention is paid to surplus lines insurance products designed for major types of commercial and personal property and liability risks.
Prerequisite: RMI 4442

RMI 4440 Corporate Risk Management (3)
A study of the analysis and treatment of the risks faced by the business organization. Topics include the assessment and treatment of traditional risks (such as, property, personnel, and environmental risks) and emerging risks (such as, cyber, social media, and supply chain risks).
Prerequisite: RMI 4442

RMI 4442 Insurance Operations (3) (capstone)
An introduction to the various functions performed within an insurance company and a study of insurance ethics. Topics include insurance regulation, marketing, underwriting, ratemaking, adjusting, reinsurance, and accounting. This course is the capstone course for the concentration.
Prerequisites: RMI 3335
Corequisites: RMI 3348

RMI 4465 Insurance Law (3)
An introduction to the legal principles underlying insurance contracts and the issuing of insurance contracts, with special emphasis on the U.S. legal system, contract law, property law, tort law, agency law, and employment law.
Prerequisite: RMI 3335

RMI 4478 Employee Benefit Planning (3)
The course is designed to provide the student with a foundation of knowledge regarding the design and management of employee benefit plans. Topics include pensions, profit-sharing plans, 401(k) plans, group life and health plans, and flexible benefit programs.
Prerequisites: RMI 3335

RMI 4491-92 Guided Independent Research (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.
Prerequisite: RMI 4442

RMI 4499 London Study Abroad (3)
The London study abroad trip provide students with first-hand exposure to the center of the excess and surplus lines market, Lloyd’s. See the RMI department for specific requirements.

RUSSIAN COURSES (RUS)

RUS 1101 Introductory Russian I (3)
Introduction to the Russian language.
Prerequisite: RUS 1101 or permission of instructor.

RUS 1102 Introductory Russian II (3)
Introduction to the Russian language.
Prerequisite: RUS 1101 or permission of instructor.

SCIENCE COURSES (SCI)

SCI 1110 Exploring the Solar System (3)
This course examines each of the major planets; their surfaces, interiors and atmospheres, and why they are all so different. The course also examines the major moons of the planets, any planetary ring systems, and many minor bodies such as comets and asteroids. Other topics covered include the exploration of the solar system with robotic spacecraft. Extra-solar planets, possibilities of extraterrestrial life and the search for extraterrestrial life.
Co-requisite: SCI 1110

SCI L110 Exploring the Solar System Lab (1)
Hands-on exercise to study the planets, moons, and planetary motions. Night-time observing of constellations, the Moon and any visible planets.
Co-requisite: SCI 1110

SCI 2233 Physical Science (3)
Basic chemistry and physics for non-science majors
Co-requisite: SCI L233. Note: Credit does not count toward a major in any science curriculum

SCI L233 Physical Science Lab (1)
Laboratory experiments in basic chemistry and physics.
Co-requisite: SCI 2233.

SCI 2234 Earth and Space Science (3)
Basic astronomy and geology for non-science majors.
Co-requisite: SCI L234. Note: Credit does not count toward any major in the sciences.

SCI L234 Earth and Space Science Lab (1)
Laboratory experiments in basic astronomy and geology.
Co-requisite: SCI 2234.

SCI 2240 Principles of Astronomy, Stars, Galaxies and Cosmology (3)
Basic facts and theories related to astronomical phenomena.
Co-requisite: SCI L240.

SCI L240 Principles of Astronomy, Stars, Galaxies and Cosmology Lab (1)
Star and constellation identification and observations using the telescope.
Co-requisite: SCI 2240.
SCI 3335  Physical Geology (3)
Constructive and destructive processes which alter the earth.
Co-requisite: SCI L335.

SCI L335  Physical Geology Lab (1-2)
Laboratory studies of constructive and destructive processes which alter the earth.
Co-requisite: SCI 3335.

SCI 3365  Principles of Applied Science (3)
In this course, we will learn the scientific method, and how it applies investigations in science and engineering. Students will learn how to ask well-defined questions, propose hypotheses, test hypotheses, and learn on what basis one rejects or accepts a hypothesis. We will go on to see how these methods are applied in the fields of biology, chemistry, physics, and engineering. Finally, we will also see how misapplications of the scientific method leads to questionable pseudoscience.

SCI 3366  Survey of Electronics Technology (3)
In this course, students will develop understanding of basic concepts in electronics, including component identification and behavior, dc and ac circuit principles, solid-state devices, and both linear and switching circuits without getting into rigors of mathematics. Students will also learn how digital electronics fed to microprocessor technology. Students will be able to apply these learned concepts in design and analysis of electronics systems.

SCI 3370  Toxic, Radioactive, & Hazardous Materials (3)
In this course, students will learn the basic principles of hazardous materials management. The course will be suitable for students with limited scientific background knowledge in chemistry and physics. Students will learn how to classify toxic, radioactive, and hazardous materials and evaluate the dangers associated with them. Students will study current industry practices and learn how to manage hazardous materials in a safe, legal, and economical manner.

SCI 4440  Travel Study in Comprehensive General Science (1-3)
Supervised investigation of relevant topics in Comprehensive General Science through travel-study abroad or within the interior of the United States.

SCI 4450  Science in a Regulatory Environment (3)
An examination of the applications of Biology, Chemistry, and Physical Sciences for compliance with select environmental regulations.
Prerequisites: Biology, Chemistry or Physical Science.

SCI 4474  Internship in Science Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP.
Co-requisite: SED 4454.

SCI 4481  Methods and Materials for the Secondary Teacher (3)
A survey of teaching methods and materials appropriate for teaching in the content areas for grades 6-12. Topics addressed will include teacher evaluation in the public schools, collaboration with special education teachers, and lesson planning formats. In addition, teaching methods, selections organization and use of biology/science materials for grades 6-12 will be covered in detail. A professional laboratory experience is included in this course.
Prerequisite: admission to TEP.

SCI 4491-92  Guided Independent Research (1 to 4 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

SCI 4493-94  Guided Independent Research (1 to 4 credit hours per course per semester)
Additional information is indexed under Independent Study and Research.

SCI 4498  Internship in Comprehensive General Science (1-3)
Supervised work experience in the biotechnology industry, governmental agency, business, or other working environment in which a student will learn and apply pertinent professional skills.

SECONDARY EDUCATION COURSES (SED)

SED 4400  Classroom Management (3)
This course is designed for all secondary and P-12 education majors. The purpose of this course is to establish a foundation of content and application relative to classroom management and discipline, emphasizing reflection, decision making, and integrated teaching/learning strategies. Methodologies utilized will include discussion, lecture, field experience, case studies, problem solving sessions, projects, and research.

SED 4445  Internship Seminar for Secondary Education (3)
This course provides seniors an opportunity during internship to examine broad educational issues and concerns, topics on the state and local levels and those of personal interest. The scope of the course ranges from juvenile law, classroom management, professionalism, professional development for teachers and other course topics.
Prerequisite: admission to TEP.
Co-requisite: SED 4454.

SED 4474  Secondary Internship in Grades 6-12 (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.
Prerequisite: admission to TEP.
Co-requisite: SED 4454.

SED 4481  Methods and Materials for the Secondary Teacher (3)
Teaching methods, selection, organization and use of materials and resources in the secondary school discipline(s). Observation and teaching experiences will be included.
Prerequisites: EDU 3310 and admission to TEP.

SED 4491-92  Guided Independent Research (1 to 3 credit hours)
Undergraduate research with attention to critical evaluation of research techniques, methods and procedures.
Prerequisites: Junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the
SOCIOLOGY COURSES (SOC)

<td></td>
<td>Prerequisite: SOC 2275.</td>
</tr>
<tr>
<td>SOC 3333</td>
<td>Criminology (3)</td>
<td>Study of crime and its causes and measurements. Topics include various</td>
</tr>
<tr>
<td></td>
<td></td>
<td>explanations of criminal behavior, typology of crime, criminal justice</td>
</tr>
<tr>
<td></td>
<td></td>
<td>system, and social relations to crime. Prerequisite: SOC 2275.</td>
</tr>
<tr>
<td>SOC 3334</td>
<td>Deviant Behavior (3)</td>
<td>This course will explore the social meaning and construction of social</td>
</tr>
<tr>
<td></td>
<td></td>
<td>behavior outside normative boundaries. Deviance is relative social behavior</td>
</tr>
<tr>
<td></td>
<td></td>
<td>that occurs outside social norms. By the end of this course, students will</td>
</tr>
<tr>
<td></td>
<td></td>
<td>be familiar with, and think critically about the attitudes, behaviors, and</td>
</tr>
<tr>
<td></td>
<td></td>
<td>meanings associated with society and social deviance. In addition, students</td>
</tr>
<tr>
<td></td>
<td></td>
<td>will be introduced to topics related to law, social change, social power,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>conflict, structure, and culture. Prerequisite: SOC 2275.</td>
</tr>
<tr>
<td>SOC 3335</td>
<td>Sociology Study Abroad (1-3)</td>
<td>Supervised investigation of relevant topics in sociology through travel</td>
</tr>
<tr>
<td></td>
<td></td>
<td>study abroad or within the interior of the United States.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisites: Applicable survey courses and permission of the instructor.</td>
</tr>
<tr>
<td>SOC 3336</td>
<td>Death and Dying (3)</td>
<td>This course provides an examination of individual and societal attitudes</td>
</tr>
<tr>
<td></td>
<td></td>
<td>toward death and the dying process. It will include the emotions experienced,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>cultural variations, theoretical perspectives and institutional relationships</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite: SOC 2275.</td>
</tr>
<tr>
<td>SOC 3337</td>
<td>Sociology of Aging (3)</td>
<td>Sociological examination of global social changes precipitated by the</td>
</tr>
<tr>
<td></td>
<td></td>
<td>demographic phenomenon of the aging of U. S. society and other societies.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Addresses the heterogeneity of the older population, their locations,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>perceptions, and constraints. Issues such as housing, transportation,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>health care, and death and dying are explored. Prerequisite: SOC 2275.</td>
</tr>
</tbody>
</table>
SOC 3357 Sociological Aspects of Human Sexuality (3)
An examination of the cultural and social components of sexuality including current perspectives on sexuality, sex research and theory, cross-cultural perspectives and sexual diversity, gender issues, sexual relationships, sexual orientations, pregnancy and parenthood, sexually transmitted diseases, sexual victimization, sexuality across the life span, and recent social changes affecting sexuality in society. Prerequisite: SOC 2275.

SOC 3360 Introduction to Qualitative Research Methods (3)
This course will provide students with an overview of qualitative (non-statistical) research methods. It will also familiarize students with the various areas of sociological study in which qualitative methods is preferred to quantitative research and will offer students the necessary training to engage in high-quality qualitative research. Special emphasis will include: participant observation, interviews, and online methodologies. Prerequisite: SOC 2275.

SOC 3370 Society and Environment (3)
This is a course that will focus on the relationship between society and the environment. It will include individual, group (social movements) and institutional impacts on the environment and reciprocal effects. Prerequisite: SOC 2275.

SOC 3375 Research Methods in Sociology (3)
The purpose of this course is to provide a structured opportunity to review, learn, and apply sociological research methods – both qualitative and quantitative methodologies. Using primarily sociological examples, exercises, and theory, each student will develop a research question and a general research design report.

SOC 3376 Sociological Statistics (3)
A detailed description of what sociologists do with the information they gather. Qualitative and quantitative data from sociological examples are discussed. Particular attention is given to descriptive and inferential statistics, the relationship between research and policy, evaluation research, and research ethics.

SOC 3380 Sociological Social Psychology (3)
A survey of Social Psychology from a sociological perspective. Emphasis is placed on classic topics such as the self-concept, the process of socialization, symbolic interactionism and the social construction of reality, as well as contemporary topics such as small group dynamics, power, social exchange and collective behavior. Prerequisite: SOC 2275.

SOC 4406 Urban Sociology (3)
Historical, physical, economic, and social evolutions of urbanized areas. Emphasis on contemporary urban problems with implications for policy and planning. Prerequisite: SOC 2275.

SOC 4408 Rural Sociology (3)
A study of rural society, its organization, agencies, institutions, population trends and composition, patterns of settlement, social processes and change in character. Prerequisite: SOC 2275.

SOC 4409 Political Sociology (3)
An overview of politics and political systems from earliest times to the present with some emphasis on democratic systems in the U.S. and other modern countries. Prerequisite: SOC 2275.

SOC 4411 Population and Society (3)
This course provides an exciting overview of how to analyze and think about changing population trends in the U.S. as well as around the world. Students will learn how to relate contemporary and pressing problems such as migration, population growth, fertility, death rates, and other population changes to current social and economic policy debates (e.g., funding for Social Security, education, healthcare, etc.). In this way, students can see the true impact of how population issues affect our society. Prerequisite: SOC 2275.

SOC 4413 Sociology of Race and Ethnicity (3)
This course explores the dynamics of race and ethnicity from a sociological perspective. Students will be introduced to the major sociological concepts and issues concerning racial and ethnic identity, intergroup relations, prejudice, discrimination, racism, immigration, and multiculturalism, including current trends. Prerequisite: SOC 2275.

SOC 4421 Social Inequality (3)
This course examines the structure of social inequality both in the U.S. and in the international context. It reviews theories of inequality and also explores empirical data on stratification both domestically and globally. It also examines how we can try to achieve more social equality and social justice both nationally and globally. Prerequisite: SOC 2275.

SOC 4430 Sociology of Religion (3)
An examination of the social institution of religion. The course will discuss modes of worship, the relationship between various religious systems and other aspects of society, the categorization of religious groups into cults, sects, denominations and ecclesia, and the rise of secularization in the 21st Century. Prerequisite: SOC 2275.

SOC 4434 Sociology of Gender (3)
Provides an analysis of the conceptualization of gender with a focus on the methods of studying gender, historical perspectives on gender, biological and social bases of gender, and how gender intersects with other stratification systems within societies globally. Using a multicultural perspective, special emphasis is placed on how gender is manifested in the family as well as other major social institutions. Prerequisite: SOC 2275.

SOC 4444 The Sociology of Cinema (3)
This course is designed to critically examine sociological issues within American Society via the lens of cinema. Prerequisite: SOC 2275.

SOC 4445 Trends in Globalization (3)
The concept of “globalization” explores issues of social, cultural, political, and economic connectivity that are taking place between societies (of people) on our planet. This course examines the historical foundations and current trends of globalization. It also explores the opportunities and constraints that globalization brings to citizens throughout the world. Prerequisite: SOC 2275.

SOC 4446 Sociology of Education (3)
This course provides an overview of the theories, methods and issues in the sociology of education today. Issues include text censorship, school and class size, race and gender inequalities, violence in schools, etc. Classroom activities will also explore various social influences on education and different learning modalities. Prerequisite: SOC 2275.
SOC 4451  Peace, Conflict and Human Rights (3)  Sociological analysis of peace, conflict and human rights, with a focus on the last 100 years. Emphasis will be placed on non-violent struggles at the nation-state level internationally. The role of ethnic and religious affiliations in current war and conflict at home and abroad will also be examined.  Prerequisite: SOC 2275.

SOC 4456  Gerontology (3)  Gerontology is the study of the process of human aging in all its many aspects: Physical, psychological, and social. There is a specific emphasis on important elements of aging, such as socialization, family interaction, retirement, physical and psychological aging, and perceptions of older persons in contemporary society.  Prerequisite: SOC 2275.

SOC 4459  Sociology of Health, Medicine and Illness (3)  The sociological perspective applied to medicine. Topics include changing ideas of disease causation, the role of practitioners and patients, the institutional setting, differential delivery of health services, differential patterns of morbidity and mortality based on age, gender, race and sociocultural variables, and the politics of health.  Prerequisite: SOC 2275.

SOC 4462  Applied Sociology (3)  This course will provide an overview of applied sociology.  Prerequisite: SOC 2275.

SOC 4465  The Sociology of Sport (3)  An examination of the sociological perspective of sport as an institution. Particular emphasis is placed on the impact of sport on the individual, small groups, other institutions, and society.  Prerequisite: SOC 2275.

SOC 4490  Internship in Sociology (1-3)  Applications of skills and knowledge of sociology in government agency, foundation, public service institution or similar situation under the supervision of a faculty member.  Prerequisite: Approval of the student’s academic advisor and department chair and SOC 2275.

SOC 4491-92  Guided Independent Research (1 to 3 credit hours per course per semester)  Undergraduate research with attention to critical evaluation of research techniques, methods and procedures.  Prerequisites: SOC 2275, Junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which the study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”.

SOC 4493-94  Guided Independent Study (1 to 3 credit hours per course per semester)  Supervised study through field and laboratory projects, guided readings, creative endeavors or achievement of specific skills.  Prerequisites: SOC 2275, Junior or senior standing, with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair or dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which the study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”.

SOC 4495  Selected Topics (3)  Designed as a vehicle for the exploration of topics of current interest within the major discipline of sociology.  Prerequisite: SOC 2275.

SOC 4498  Sociological Theory (3)  A survey of the major theorists in sociology, emphasizing those who made critical contributions influencing the sociology discipline and beyond. In addition, the course will also explore contemporary theorists’ contributions.  Prerequisite: SOC 2275.

SOC 4499  Professional Seminar in Sociology (3)  In this course, the senior-level sociology student prepares for the transition to graduate school/career. The student explores himself/herself as a person and as a sociologist in an effort to choose a fulfilling career path. In addition to career exploration, students conduct a senior project in an area of interest consistent with their academic program.
transition planning within the IEP, along with writing vocation and transitional goals. Teacher candidates will demonstrate how to work with state vocational rehabilitation services, families, appropriate additional personnel, and the community. 

**Prerequisites:** SPE 3303, 3304, 3340, and admission to TEP.

**SPE 3306 Teaching Students with High Incidence Disabilities (3)**
The course requires special education teacher candidates to learn about and demonstrate proficiency with specifically designed instruction for students with high incidence disabilities. Teacher candidates will demonstrate skills in writing specifically designed instruction specific to supporting IEP goals. The teacher candidates will then identify and develop key components of a functional behavior assessment (FBA) and a Behavior Intervention Plan (BIP) to support behavior struggles with identified students. The course must be completed with a special education field experience.

**Prerequisite:** Admission into TEP

**SPE 3307 Strategies Instruction (3)**
This course bridges the gap between research and practice and extends knowledge of specific methods for teaching students K-6 with mild disabilities. The premise of this course is that strategic learning is critical for many students with mild disabilities in order that they may achieve academic success and function at the level of their potential.

**Prerequisite:** admission to TEP

**SPE 3309 Teaching Students with Low Incidence Disabilities (3)**
The course requires special education teacher candidates to demonstrate competence in the understanding and application of evidence-based, specifically designed instruction (SDI) for students with low incidence disabilities. Teacher candidates will engage with and demonstrate the use of augmentative communication devices to support communication and academic language skills. Special education teacher candidates will learn to teach and support socially-normed social behavior. The class also focuses on community-based instruction, which promotes generalization. Many students with Low Incidence Disabilities require medication support and teacher candidates will learn to identify and support medically fragile students. Teacher candidates will also acquire skills in planning and learning supports for paraprofessionals.

**Prerequisite:** admission to TEP

**SPE 3340 Diverse Learners (3)**
The course provides general and special education teacher candidates with an overview of exceptional students found within current general and special education classrooms. Examples of exceptional students are 1) receiving services through IDEA, 2) identified as at-risk for academic and/or behavioral failure, 3) outside of the social majority, or 4) struggling with social and emotional risk factors. The class introduces teacher candidates to key terminology and procedures in IDEA and Civil Rights Laws.

**SPE 3362 Policies and Procedures in Special Education (3)**
This course is an advanced undergraduate course for prospective special education collaborative teachers K-6. This course outlines the legal responsibilities and role of the special education teacher in the procedures and services of special education. The assessment/program planning program is emphasized.

**Prerequisite:** admission to TEP.

**SPE 4407 Inclusive Strategies (3)**
The course teaches skills required for the creation of lessons using universal design, differentiated instruction, and specifically designed instruction. Teacher candidates also take an in-depth look into collaborative, co-teaching practices between special and general education teacher candidates. Teacher candidates will demonstrate their understanding of writing co-taught lesson plans based on their field experience. To support collaborative success, teacher candidates will learn and practice conflict resolution skills.

**Prerequisite:** Admission to TEP.

**SPE 4445 Educational Evaluation of Exceptional Children (3)**
This course is designed to provide the pre-service teacher with knowledge and skills in the selections, evaluation, administration, scoring and interpretation of standardized instruments in the areas of academic achievement, diagnostic tests, adaptive behavior, and behavior rating scales. Students will demonstrate the utilization of test results for the development of an individualized education plan, individualized family service plan, and learning outcomes for the general education classroom.

**Prerequisite:** admission to TEP.

**SPE 4454 Internship Seminar (3)**
The course supports teacher candidates (K-6 and 6-12) as they engage in teacher preparation assessment, which can be evaluated either at the national or state level. Teacher candidates also, participate in interview readiness, job searches, and application for an Alabama Teaching License. Classroom management, internship, and other beginning teacher topics will be discussed in the class.

**Corequisite:** SPE 4465 or SPE 4474

**SPE 4465 Collaborative Teacher (6-12) Internship (9)**
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in grades 6-12 Special Education/Collaborative teaching field. The Professional Internship Program provides the teacher candidate with the opportunity to lead large and/or small group instruction while assuming the role of the lead teacher. Teacher candidates, while leading, receive coaching and supervision from the mentor teacher and university supervisor. The period of supervision lasts for one full semester. The teacher candidate must demonstrate skills in relationship to national, state, and local standards.

**Prerequisite:** Completion of all TEP required classes

**Corequisite:** SPE 4454

**SPE 4474 Collaborative Teacher K-6 Internship (9)**
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in the K-6 Special Education/Collaborative teaching field. The Professional Internship Program provides the teacher candidate with the opportunity to lead large and/or small group instruction while assuming the role of the lead teacher. Teacher candidates, while leading, receive coaching and supervision from the mentor teacher and university supervisor.
The period of supervision lasts for one full semester. The teacher candidate must demonstrate skills in relationship to national, state, and local standards. 

Prerequisite: Completion of all TEP required classes 
Corequisite: SPE 4454 

SPE 4491-92 Guided Independent Research (1 to 3 credit hours)
Undergraduate research with attention to critical evaluation of research techniques, methods and procedures. 
Prerequisites: Junior or senior standing with a minimum overall GPA of 3.0, permission of guiding professor, approval of department chair and dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Application forms are available in the Office of University Records. Guided independent research may be taken only in the applicant’s major or minor field. Also see index for “Independent Study and Research.”. 

SPE 4493-94 Guided Independent Study (1 to 3 credit hours)
 Supervised study through field or laboratory projects, guided readings, creative endeavors or achievement of specific skills. 
Prerequisites: Junior or senior status, permission of guiding professor, approval of department chair and the dean. A written request is to be submitted to the department chair at least two weeks in advance of the term in which study is to be undertaken. May not be used to repeat a course for which a grade of D or below has been earned. Also see index for “Independent Study and Research.”.

SPN 3335 Medical Spanish (3)
Practical Spanish for the medical and health-related professions. 
Prerequisite: SPN 2241 and SPN 2242 or permission of instructor. 

SPN 3350 Spanish Culture on Location I (3-TBA)
Local orientation followed by study in a Spanish-speaking environment. 
Prerequisite: Permission of instructor. 

SPN 3351 Spanish Culture on Location II (3-TBA)
Local orientation followed by study in a Spanish-speaking environment. 
Prerequisite: Permission of instructor. 

SPN 3370 Selected Topics in Spanish (3)
Selected topics generally not covered in other Spanish courses. May be repeated for credit. 
Prerequisite: SPN 2241 and SPN 2242 or permission of instructor. 

SPN 4448 Peninsular Spanish Literature (3)
Selected authors, periods, or genres in the literature of Spain. 
Prerequisite: SPN 2241 and SPN 2242 or permission of instructor. 

SPN 4449 Latin American Literature (3)
Selected authors, periods, or genres in the literature of Latin America. 
Prerequisite: SPN 2241 and SPN 2242 or permission of instructor. 

SPN 4451 Peninsular Spanish Civilization (3)
Geography, history, cultural achievements, and institutions of Spain. 
Prerequisite: SPN 2241 and SPN 2242 or permission of instructor. 

SPN 4452 Latin American Civilization (3)
Geography, history, cultural achievements, and institutions of Latin America. 
Prerequisite: SPN 2241 and SPN 2242 or permission of instructor. 

SPN 4491-92 Guided Independent Research (1 to 3 credit hours)
Additional information is indexed under Independent Study and Research. 

SPN 4493-94 Guided Independent Study (1 to 3 credit hours per course per semester)
Additional information is indexed under Independent Study and Research. 

SS 2220 Introduction to Social Science
An introduction to the study of society approaches its study from a common-sense perspective, rather than a formalistic perspective more common in social science. Students will see how seemingly diverse disciplines intermingle and connect to one another—anthropology and economics, for example. The goal of this course is to teach students critical thinking and problem-solving skills that will allow them to approach social issues in an objective and informed way. 

SS 3350 Social Science Study Abroad (1-3)
Supervised investigation of relevant topics in social sciences through travel study abroad or within the interior of the United States. 
Prerequisites: SS 2220 and permission of the instructor. 

SS 3375 Research Methods in the Social Sciences (3)
Principles of pure and applied research for the social sciences. Special emphasis is given to the types of research methods employed by social scientists including survey techniques, field research, quasi-experimental designs and analytical procedures.
SS 3376  Statistical Applications of Social Science Inquiry (3)
A detailed description of what social scientists do with the information they gather. Particular attention is given to descriptive and inferential statistics, the relationship between research and policy, evaluation research, and research ethics. 
Prerequisite: General studies math.

SS 4450  Selected Topics (3)
Designed as a vehicle for the exploration of topics of current interest within the major discipline of social science. 
Prerequisite: SS 2220

SS 4474  Internship in Secondary Social Science Education (9)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience. 
Prerequisite: admission to TEP. Co-requisite: SED 4454.

STAT 2210  Introductory Statistics (3)
A beginning course in statistics intended for students in a wide variety of fields of study. Course topics include descriptive statistics, normal distribution, correlation and regression, basic concepts of probability, binomial distribution, sampling distribution, confidence intervals and hypothesis testing for mean(s) and proportion(s). Students also have the opportunity to analyze data sets using Statistics software. 
Prerequisite: A grade of C or better in MTH 1110 or MTH 1112. Note: Credit will not count toward Area III requirements nor will it count toward any major or minor in mathematics.

STAT 3350  Statistical Methods and Computations (3)
This course is designed to provide students with a foundation in statistical methods, including data exploring and strategies in sample surveys, estimation and testing hypotheses of means and variances, analysis of variance, regression analysis, contingency tables. These concepts are taught with heavy emphasis on statistical computing software and real world datasets. Students will learn basic skills of statistical packages that are widely used in business, industry, government, and research. 
Prerequisite: STAT 2210

STAT 4451  Mathematical Statistics I (3)
Probability theory, sample spaces, random variables, mutual exclusion, independence, conditional probability, permutations and combinations, common discrete and continuous distributions, expected value, mean, variance, multivariate distributions, covariance, Central Limit Theorem. 
Prerequisite: MTH 1125 and STAT 2210.

STAT 4452  Mathematical Statistics II (3)
Fundamentals of the theory of statistics, the Central Limit Theorems, point estimation, sufficiency, consistency, hypothesis testing, sampling distributions, confidence intervals, linear regression models, interpretation of experimental results, Bayesian Estimation. 
Prerequisite: STAT 4451.

STAT 4456  Mathematics of Finance (3)
The fundamental concepts of financial mathematics and how these concepts are applied in calculating present and accumulated values for various streams of cash flows as a basis for future use in the following: reserving, valuation, pricing, asset/liability management, investment income, capital budgeting, and valuing contingent flows.

STAT 4459  Regression Analysis (3)
Topics include simple linear regression, inferences in regression analysis, techniques of multiple regression and model building, ANOVA as regression analysis, analysis of covariance, model selection and
diagnostic checking techniques, nonlinear regression, and logistic regression. Computations are an integral part of the course and will involve the use of SAS and R statistical software. Prerequisite: STAT 4451.

STAT 4464 Multivariate Analysis (3)
Possible topics to be covered include multivariate descriptive statistics, multivariate normal distribution, analysis of covariance, MANOVA, multivariate regression, principal components, discriminant analysis, cluster analysis, factor analysis. Some familiarity with R and SAS is expected. Prerequisite: STAT 4451, and STAT 3350.

STAT 4465 Categorical Data Analysis (3)
In recent years, the use of specialized statistical methods for categorical data has increased dramatically, particularly for applications in the biomedical and social sciences. The course gives an introduction to analyzing categorical data. Principal topics include: contingency tables, generalized Linear Models, log-linear models, logistic regression, and models for matched pairs. Two statistical software packages SAS and R will be used appropriately throughout the course. Prerequisite: STAT 4451.

STAT 4466 Data Mining (3)
Data Mining is a fast growing interdisciplinary field between Statistics and Computer Science due to the emergence of massive datasets. This course covers an information extraction activity whose goal is to discover hidden facts from large data warehouses. A number of data mining tasks including description, classification, selection, estimation, prediction, and affinity grouping and clustering will be discussed. Also, students will learn how to use data mining software to perform data mining functionalities. Prerequisite: STAT 4459.

STAT 4467 Experimental Design (3)
Fundamental principles of designing and analyzing experiments with application are considered. The concepts of experimental unit, randomization, blocking, replication, error reduction and treatment structure are introduced. The design and analysis of completely randomized, randomized complete block, incomplete block, Latin square, split-plot, repeated measures, factorial and fractional designs will be covered. Prerequisite: STAT 4451.

SOCIAL WORK COURSES (SWK)

SWK 2250 Introduction to Social Work (3)
The student is introduced to the profession of social work. Class focuses on the knowledge, skills and values essential for effective practice. Each student will be provided an opportunity to have direct contact with a practicing social worker.

SWK 2260 Introduction to Non-Profit Organizations (3)
This seminar in non-profit organizations is designed to aid helping professional students develop a basic understanding and knowledge of the history, operation, and structure of non-profit organizations. Will include management, grant writing, and leadership roles.

SWK 2280 Social Work Research I (3)
Introduction to statistical analysis concepts and principles necessary for understanding research reports and for the interpretation of data. Use of microcomputer statistical programs in the analysis of univariate, bivariate, and multivariate data including parametric and non-parametric analysis techniques. Topics include descriptive techniques, averages and measures of variation, tests of statistical significance, correlation and regression, and analysis of variance. Prerequisite: MTH 1110 or 1112 and IS 2241.

SWK 2281 Social Work Research II (3)
Introduction to evidenced based assessment and case management to include understanding and using the current DSM and other assessment materials. Introduction to writing assessments based on standardized criteria to include a treatment plan and preliminary measurement of goals. The use of research journal articles and technical and research reports generated by corporate and governmental agencies will be demonstrated. Recommend taking HS 2250 prior to this course.

SWK 3300 US Justice and the Helping Profession(al) (3)
This course will explore historical and current issues in the US justice system that have resulted in the marginalization of disadvantaged populations, who typically enter into this system. It will provide an overview of the US justice system and how it interests with human services and social work. Specifically, the focus will be an exploration of the juvenile and adult justice systems as well as policies and strategies shown favorable in the promotion of social justice and advocacy on behalf of those within the justice system. This class is designed for the student who has a desire to understand how helping professions (social work, human services, rehabilitation) and the US justice system are relevant to each other. This course is advantageous with or without future plans of working in the criminal justice system.

SWK 3301 Children and Family Services (3)
Child welfare services from both the public and private sectors of social work practice will be assessed, emphasizing the availability and effectiveness of services for children and their families in the United States. The historical development of the child welfare movement will be examined.

SWK 3302 Social Service Resources (3)
Examination of social welfare services and institutions, public and private, to include historical development, philosophical basis, structure, and function.

SWK 3303 Crisis Intervention (3)
Case management techniques for dealing with crisis. Crisis theory, stress management, and time-limited intervention will be examined.

SWK 3304 Social Work Practice In Health Settings (3)
A survey of the use of professional social work in a variety of health care delivery settings. Exposure to basic medical terminology needed by social workers. Overview of the social aspects of disease, illness, and disability.

SWK 3320 Human Behavior In the Social Environment II (3)
An examination of the social dynamics of discrimination and oppression and particularly how discriminatory and oppressive environments have potential for negatively affecting biopsychosocial growth and development.

SWK 3330 Social Work with Military Families (3)
This course is designed as an elective for undergraduate students who wish to increase their knowledge and skills for practice with military personnel, Veterans, and their families. Students will learn about the role of social work within the military and in the Department of Veterans Affairs in meeting the needs of active duty service members, National Guard and Reserve members, Veterans, and their families. Students will develop a working understanding of the history of military social work, aspects of military culture that they will need to know in order to be able to engage and intervene with the social and mental health needs and issues facing this ethnically and culturally diverse population.
SWK 3340 Social Policy and Planning (3)
Exploration of the social policy formulation process and the building of analysis skills in the evaluation of social policy and programs. The impact of political, economic, and social forces is a focal point and the process of incrementalism in implementation is examined.

SWK 3375 Diversity and Ethics (3)
This course provides students with an understanding and appreciation of cultural diversity, ethnic and gender sensitivity, as well as ageism, in social work practice with a variety of populations is highlighted.

SWK 3390 Social Work with Individuals and Families (3)
The melding of the systems and developmental perspectives and the problem-solving approach as a basis for generalist social work practice with individual and family systems. Assessment, intervention, and evaluation skills are developed.
Prerequisite: admission to the professional social work curriculum or permission of instructor.

SWK 4463 Research III (3)
The course will look at the general overview of social work theories, including but not limited to, human growth and development and the biopsychosocial approach of the individual, families, and the community. The theories utilized in generalist social work practice, key elements to social work documentation and writing assessment based on standard social work practice criteria will be demonstrated and evaluated.

SWK 4471 Social Work with Groups (3)
The student learns to identify group processes and use these in assessment and intervention with the group as a client system. Evaluation of practice is extended to group settings.
Prerequisite: SWK 3390. Co-requisite: SWK 4480.

SWK 4472 Social Work with Organizations and Communities (3)
Assessment and intervention with the community or organization as a client system. Skill building in evaluation of one's own practice continues.
Prerequisite: SWK 3390.

SWK 4480 Pre-Practicum Seminar (3)
This course will evaluate the student's ability (knowledge, values and skills) required to begin Social Work Field Experience. The class will focus upon areas essential for competent social work practice. In addition, the student will engage in resume development, interviewing skills and other exercises necessary to secure an approved Field placement. Rules and legislation governing social works on the state and federal level will be reviewed.
Prerequisite: Completing SWK Major Requirements.

SWK 4481 Social Work Practicum (12)
Placement in a social service agency which provides the opportunity to practice and develop beginning professional social work skills under the joint supervision of a faculty and an agency supervisor. Includes a weekly seminar plus a minimum of 500 hours in a particular agency setting.
Prerequisites: Social work major in good standing, SWK 4480. Practicum site must be approved by instructor during SWK 4480.

SWK 4482 Social Work Practicum II (6)
Placement in a social service agency which provides the opportunity to practice and develop generalist practice social work skills under the joint supervision of a faculty and an agency supervisor. Includes a weekly seminar plus a minimum of 200 contact hours in a particular agency setting. This is the first of two required Practicum courses.
Prerequisite: Social Work Major in good standing. Practicum must be approved by instructor in 4480.

SWK 4483 Social Work Practicum III (6)
Placement in a social service agency which provides the opportunity to practice and develop generalist practice social work skills under the joint supervision of a faculty and an agency supervisor. Includes a weekly seminar plus a minimum of 200 contact hours in a particular agency setting. This is the second of two required Practicum courses. The student must complete this course in the same agency as SWK Practicum II.
Prerequisite: Must complete Social Work Practicum II.

THEATRE COURSES (THE)

THE 1115 Performance and Production Practicum I (1-3)
Provides hands-on training related to theatrical productions in the Department of Theatre and Dance. Practicum students are assigned to casts (performers selected by audition) or crews in design, management, and/or technical theatre areas including scenery, props, lighting, sound, costumes, make-up, business, box office, and publicity. May be repeated for credit.

THE 1130 Introduction to Theatre (3)
An introduction to theatre as a fine art and as a vital part of our western culture, the course focuses on the aspects of audience, production, and performance. It is designed for the student who wishes to gain a fundamental understanding and an appreciation of the theatrical arts in our society.

THE 1132 Introduction to Film (3)
A historical and critical perspective of film production from North America, Europe, and Asia through which modern film production is interpreted, analyzed, and discussed. It is designed for the student who wishes to gain a fundamental understanding and an appreciation of film and its impacts on our culture and society.

THE 1150 Creative Habit (1)
Part of the introductory learning community established at the entry level for incoming theatre and dance students. Centering on Twyla Tharp's book The Creative Habit, the learning community examines strategies for successful studies in Theatre and Dance. Co-requisites: THE 1130, TROY 1101 and permission of department.

THE 1160 Audition and Portfolio Techniques (1-2)
This course provides an introduction to the practices and tools in the development of a professional audition, interview, and portfolio, and offers guidance in refining and presenting a professional self-image.
Prerequisite: THE 1150, or the permission of instructor.

THE 2215 Performance and Production Practicum II (1-3)
Provides hands-on training related to theatrical productions in the Department of Theatre and Dance. Practicum students are assigned to casts (performers selected by audition) or crews in design, management, and/or technical theatre areas including scenery, props, lighting, sound, costumes, make-up, business, box office, and publicity. May be repeated for credit.
Prerequisite: THE 1115.

THE 2216 Performance and Production Practicum III (1-3)
Provides hands-on training related to theatrical productions in the Department of Theatre and Dance. Practicum students are assigned to casts (performers selected by audition) or crews in design, management, and/or technical theatre areas including scenery, props, lighting, sound, costumes, make-up, business, box office, and publicity. May be repeated for credit.
Prerequisite: THE 2215.
THE 2211 Theatre for Youth (1-3)
Provides introductory exposure to the field of Theatre for Young Audiences, including hands-on experience in skills related to performance, production, literature, creation and development, and pedagogical implications and opportunities.

THE 2221 Scenic Techniques (2-3)
A study of standard scenic practices and equipment for the theatre.
Prerequisite: THE 2271

THE 2230 Performance Studio (1-3)
This course provides a studio structure offering opportunities for student performance and production as well as development of new works, with emphasis on audience response and discussion. May be repeated for credit.

THE 2232 Musical Theatre Repertoire (2-3)
This course offers students opportunities to explore the musical theatre canon through historical context, vocal stylization, and performance techniques.

THE 2233 Survey of the Broadway Musical (3)
Traces the origins and surveys major works of Broadway musical theatre repertoire.

THE 2245 Stagecraft Lab (1-3)
Stagecraft Lab provides the basic elements of theatrical production through participation in acting (actors selected through audition), management, and/or technical theatre, including scenery, props, lighting, sound, costumes, makeup, business and publicity.

THE 2251 Voice and Diction (2)
Study of individual and group practice in the effective use and control of the mechanics of oral delivery with a focus on the “professional dialect,” the general American dialect and/or the standard dialect. Includes use of the International Phonetic Alphabet.

THE 2271 Fundamentals of Scenery and Lighting (2-3)
A study of standard technical practices for the theatre within the scenery and lighting production areas.

THE 2272 Fundamentals of Costumes and Makeup (2-3)
A study of standard technical practices for the theatre within the costume and makeup production areas.

THE 2291 Dramatic Literature I (3)
A continual, enthusiastic, and serious reading of plays is essential to the developing theatrical artist. Students will read a carefully chosen variety of works for the stage and study their historical context/impact, critical merit, and dramatic structure.

THE 3300 Fundamentals of Acting (2-3)
An introduction to the basic principles, terminology, and disciplines of the actor.

THE 3301 Acting I (2-3)
A study of basic principles, terminology, and disciplines of the actor, including relaxation, concentration, movement, and characterization.

THE 3302 Costume Techniques (2-3)
A study of the techniques of costume construction, including methods of drafting patterns, building and/or modifying costumes, and the application of arts and crafts.
Prerequisite: THE 2272

THE 3303 Makeup Techniques (1-2)
A study of the theory and techniques of stage makeup. Includes makeup for theatre, film, and video.

THE 3304 Lighting Techniques (2-3)
A study of stage lighting equipment and lighting practices.
Prerequisite: THE 2271

THE 3313 Creative Drama (2)
Study and application of the techniques of creative drama and children’s theatre.

THE 3315 Performance and Production Practicum IV (1-3)
Provides hands-on training related to theatrical productions in the Department of Theatre and Dance. Practicum students are assigned to casts (performers selected by audition) or crews in design, management, and/or technical theatre areas including scenery, props, lighting, sound, costumes, make-up, business, box office, and publicity. May be repeated for credit.
Prerequisite: THE 2216.

THE 3316 Acting II (3)
A study of advanced concepts of acting, focusing on script analysis and character development along with further study of voice, movement, and scene dynamics.
Prerequisite: THE 3301 or permission of instructor.

THE 3321 Scenic Design (3)
The principles and techniques of drafting and designing in a variety of theatrical spaces.
Prerequisite: THE 2221 or permission of instructor.

THE 3329 Special Topics in Theatre (1-3)
Examination of selected topics in theatre not included in the established curriculum. Content may be out of a historical, thematic, technological, design, or specialized performance nature.
May be repeated for credit.

THE 3330 Special Topics in Theatre (1-3)
Examination of selected topics in theatre not included in the established curriculum. Content may be of a historical, thematic, technological, design, or specialized performance nature.
May be repeated for credit.

THE 3331 Costume Design (3)
A study of the theory, principles, and techniques of costume design applied to a series of theatrical projects.
Prerequisite: THE 3302

THE 3335 Movement I (2)
This course centers on the development of physical awareness and expressiveness building an understanding for a psychophysical approach to acting. The course examines personal body use and employs a variety of exercises, techniques, and theories of movement training designed to improve an actor’s awareness of impulse and expressiveness of ideas.

THE 3336 Acting III (3)
Acting III is an in-depth exploration of advanced concepts of acting focusing on script analysis, character development, period styles, dialects, freedom of movement, and a professional work ethic. Students will also explore ways to find opportunities in film, television, major American markets, and graduate schools. In addition, emphasis will be placed on student’s ability to instruct and coach other actors.
Prerequisites: THE 3301, THE 3316 or permission of the instructor.

THE 3344 Lighting Design (3)
A study of the principles of lighting design and equipment applications. Also covers drafting techniques for lighting.

from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience.

Prerequisite: admission to TEP. Co-requisite: IED 4454.

THE 4481 Methods and Materials for the Theatre Teacher (3)
Teaching methods, selection, organization and use of theatre related materials and resources in grades P-12. Units of study will be categorized by grade levels. Observation and teaching experience will be included.
Prerequisites: THE 3313, 4456, EDU 3310, admission to TEP.

THE 4491-92 Guided Independent Research (1 to 3 credit hours per course)
Information is indexed under Independent Study and Research.

THE 4493-94 Guided Independent Study (1 to 3 credit hours per course)
Information is indexed under Independent Study and Research.

THE 4496-97 Internship (3 to 6 credit hours per course)
An internship with a recognized professional theatre program or company in which the student is assigned specific tasks in one of the recognized areas of theatre arts. The number of credit hours earned will depend upon the number of hours contracted for in the internship agreement. The course is designed to give the student an opportunity for practical application of skills in theatre arts in a professional theatre setting. The student must apply and meet admission requirements.

TROY UNIVERSITY COURSES (TROY)

TROY 0095 The Learning Mindset (1 or 3)
The purpose of this course is to educate and equip Troy University students with information, skills and experiences necessary for current and long-term success, both in college and in life. Students will be presented with practical application techniques for inclusion in other courses offered at Troy University, specifically within English and Mathematics courses. Growth Mindset Theory and metacognitive learning strategies will be introduced to students. Self-awareness, self-management, time management, goal setting, and other topics will be discussed.
Note: TROY 1103 is 3 credit hours for Troy Campus students and 1 credit hour for Dothan Campus students. This course is for institutional credit only and will not be used in meeting degree requirements. This course will not substitute for any general studies requirement.

TROY 1101 The University Experience (1)
The primary purpose of this course is to assist entering students in acquiring the necessary knowledge and skills to manage effectively the Troy University campus environment in order to maximize their potential for success at the University, in their careers, and throughout their lives.

TROY 1102 Major Exploration and Planning (1)
The primary purpose of this course is to assist students who are exploring their educational career paths to identify interests, skills and values, and to develop goals. It also serves to assist non-traditional students considering a career change.
Note: TROY 1103 is 3 credit hours for Troy Campus students and 1 credit hour for Dothan Campus students. This course is for institutional credit only and will not be used in meeting degree requirements. This course will not substitute for any general studies requirement.

TROY 1104 Informed Citizenship (1)
This course is designed to examine the role of academic scholarship and the intellectual, civic and interpersonal outcomes of higher education. Through the course, students will engage in a service learning project while studying and reflecting on readings and activities to promote critical thinking skills, civic engagement and student success.
Prerequisite and/or co-requisite: TROY 1101, Membership in First Year Studies Program Learning Community.

TROY 1120 Peer Mentor Training (1)
Students seeking a position as a peer mentor must participate in the class seminar for each topic. This course involves student’s active engagement in the delivery of peer education programs and services to the Troy campus community. The intent of this course is to provide students with the skills to facilitate one-on-one mentoring, health promotion among peers, and group presentations on health-related content to their peers. Students will learn about the programs and services at Troy University and will be able to articulate this to students in need of services. Students will also learn basic wellness, mental health and alcohol and other drug information in preparation for presentation to their peers.

TROY 1160 Public Issues First Year Seminar (2)
Students will develop academic skills needed for college success while exploring civic and global issues faced in the 21st century. Students will develop an understanding of Troy University, career and scholastic development while engaging in critical thinking, readings and a service learning project focused on a public issue.

TROY 3300 College to Career (3)
The primary purpose of this course is to aid students in making a successful transition from college to career. It also serves to aid non-traditional students in career transition.

UNMANNED AERIAL SYSTEMS COURSES (UAS)

UAS 2200 Unmanned Aerial Systems Overview (3)
The purpose of this course is to provide the student with an overview of the Spectrum of UAS design, operations, and employment considerations. The student will study the developmental history of UAS systems. UAS operations within the National Airspace System and existing and proposed Federal Aviation Administration regulations will be extensively covered. Students will understand the basic physics of atmospheric flight.

UAS 2202 Principles of UAS Design (3)
An in-depth look at military and civilian UAS designs. The Northrop-Grumman Global Hawk, General Atomics Predator, micro-UAVs and U.S. Army small reconnaissance vehicles will be featured.

UAS 2204 Principles of UAS Sensors & Sensing Systems (3)
Course will cover the design considerations, packaging, and employment of various sensors and systems for UAS. Electro-optical, Forward Looking Infrared, low light, electronic sensing, and other remote sensors will be featured. Systems Integration Factors in Platform Selection is included.

UAS 2206 Human Factors in UAS Operations & Accidents (3)
The physical, emotional, and environmental aspects of military and civilian UAS operations will be analyzed. The impact of human error including workload, fatigue, poor situational awareness, inadequate training, lack of crew coordination and poor ergonomic design on increasing UAS accident rates will be discussed. The effects of the unique
remote piloting environment on mental workload will be considered.

UAS 2208  Legal & Ethical Considerations for UAS Operations (3)
Discuss FAA guidelines and ethical issues, including international laws of war. Case studies on drone strikes, police surveillance, and other relevant topics.

UAS 2210  Real World Applications (3)
Using UAS technology in the real world, such as law enforcement, national security, public affairs, natural resources, forest fire detection, remote sensing, aerial surveillance, oil-gas exploration, transportation, conservation, and scientific research. Case studies in actual applications.

UAS 2212  UAS Piloting Familiarization (3)
This will be a laboratory split between UAS operations instruction and actual UAS piloting. The student will learn basic flight and mission planning techniques, and will be prepared to pass the FAA part 107 “Remote Pilot” certification. Students will participate in quadcopter and fixed wing drone setup, flight safety, mission programming, virtual practice, and “hands on” flight experience (fixed wing drone flight will be simulated using student input).
