COURSE DESCRIPTIONS

ACCOUNTING

ACT 6625  
**Specialized Study in the Area of Accounting (1-3)**  
Study of problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, instructor under whom the study is to be made, and the appropriate dean. The study must contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in the General Regulations section. Prerequisites: All business and accounting foundation courses or equivalent.

ACT 6632  
**Corporate Financial Reporting (3)**  
A study of corporate financial accounting topics, including income and expense recognition, recording of assets and liabilities, and financial statement presentation.

ACT 6651  
**Accounting Systems and Controls (3)**  
An advanced study of accounting information systems concepts, applications, and how those systems support management decision-making. The course will provide students opportunities to relate problems encountered in management decision making to the analysis, design, and implementation of accounting systems. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6652  
**Financial Accounting Research (3)**  
An individual study of specific accounting topics utilizing the accounting authoritative literature and written and oral communication of the results of the research. A grade of “B” or better is required. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6653  
**Advanced Financial Reporting & Analysis (3)**  
A study of advanced financial accounting topics from a practical perspective with emphasis on relevant pronouncements by professional organizations and governmental agencies. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6654  
**Advanced Auditing and Assurance Services (3)**  
A study of advanced auditing theory, standards, practices and problems encountered in the practice of public accounting. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6655  
**Advanced Management Accounting (3)**  
A study of accounting as related to making decisions. Course will include readings, cases, and problems dealing with managerial accounting issues, accounting concepts, budgeting and cost control using accounting information in planning and control. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6656  
**Professional Certification I (3)**  
A certification review course. This course requires co-enrollment in an independent professional certification review course designated by the School of Accountancy. Verification of enrollment is required. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6657  
**Professional Certification II (3)**  
A certification review course. This course requires co-enrollment in an independent professional certification review course designated by the School of Accountancy. Verification of enrollment is required. Prerequisites: Admission to Master of Accountancy degree program and completion of all MAcc foundation and accounting prerequisites.

ACT 6684  
**Federal Tax Research (3)**  
A study of how to identify federal tax issues, locate the applicable tax authorities, evaluate the weight of the authorities, reach conclusions, and communicate the results of the research. Prerequisites: Admission to the Master of Accountancy degree program and completion of all MAcc accounting prerequisites.

ACT 6691  
**Financial and Managerial Accounting for the Global Manager (3)**  
A study of sources and classifications of accounting data, classification and behavior of revenues and costs, use of accounting data for profit planning and cost control, and use of accounting data for special analysis. Prerequisite: Graduate standing, acceptance into the MBA program and all undergraduate business prerequisite courses or equivalents completed.

ACT 6692  
**Advanced Accounting Problems (3)**  
A consideration of problems relating to pension plans, long-term leasing arrangements, refunding of bonds payable, stock options, allocation of income taxes, changing price levels, cash flow statements, and other financial accounting topics with emphasis on relevant pronouncements by professional organizations and governmental agencies. Prerequisites:
ADE 6605  Computer Based Instructional Technologies (3)  
This graduate level advanced survey course is designed to prepare students to use classroom adaptable technologies. Emphasis is given to historical and social context, computer systems, software, hardware, and curriculum adaptation.

ADE 6606  Current and Emerging Instructional Technologies (3)  
This course focuses on current and emerging instructional technologies. The emphasis of this class is on the instructional use of production software, desktop publishing, graphics, hypermedia, on-line services, optical technology, and telecommunications.

ADE 6608  Curriculum Integration of Technology (3)  
The purpose of this course is to prepare students to apply knowledge and competency in instructional technologies in relation to curriculum design, diverse models, and teaching situations at all developmental levels. Included is evaluation of software, audio/visual production, and instructional design using technology as a basis for instruction.

ADE 6610  Workforce Development and Training (3)  
This course will explore the differences in personnel training and workforce development. It will provide an exploration of the scope, values, and purposes of the field of Workforce Development. The course will address theories and application of adult training.

ADE 6612  Workforce Management and Organizational Development (3)  
This course provides an introduction to the field of Workforce Management and Organizational Development (WMOD). It examines basic concepts and principles of human performance, the theoretical underpinnings of the field, research and application literature, and various approaches to solving human performance problems. A systematic approach to the analysis, design, development, implementation, and evaluation of performance improvement interventions within organizations is emphasized.

ADE 6617  Seminar in Personnel Planning and Leadership (3)  
This course focuses specifically on an understanding of how leadership is distributed among leaders (formal and informal) and followers within an organization. Special emphasis will be given to building leadership capacity with an organization.

ADE 6620  Seminar in Communication and Human Relations (3)  
An investigation of literature and research related to verbal and nonverbal communication, listening, and human relations appropriate to adult education.

ADE 6630  Programs for Adult Education (3)  
A study of current concepts and objectives of adult education programs, courses and activities. Includes study of adult education programs and agencies serving diverse adult learners.

ADE 6640  Social Context of Adult Education (3)  
This course examines the social context of adult education in terms of the impact of social, political, economic, global, and technological changes. Special emphasis will be given to the analysis of trends and
issues, synthesis of complex concepts, and development of reflective practice.

ADE 6641 Organizational Behavior and Group Dynamics (3)
An overview of paradigms, theories, models, and constructs of organizational cultures designed to provide students with an understanding of group dynamics within organizations.

ADE 6645 Power, Politics and Organizational Change (3)
This course is designed for participants to understand the intertwined intricacies between the different forces within an organization and how to maneuver and persuade organizational outcomes.

ADE 6653 Educational Evaluation (3)
This course is designed to assist participants with the development of knowledge and skills that can be applied to successful student outcomes assessment and curriculum program evaluation. Specifically, the course will focus on planning and constructing teacher made tests and performance assessments. In addition, the course includes the study of basic models and approaches used in evaluating curriculum/programs for effectiveness.

ADE 6670 Adult Learning and Development (3)
This course is a study of the distinctive characteristics of adult development and the implications for adult learning. Emphasis will be given to the understanding of philosophical orientations related to the nature of adult learners and their learning processes; principles of motivation and effective facilitation geared toward adult learners; and social and cultural influences on adult learning.

ADE 6674 Methods and Strategies for Teaching Adults (3)
A study of methods and formats used in organizing educational materials for adult learners. Emphasis is given to designing effective instruction which matches methods and strategies to educational demands.

ADE 6680 Curriculum Development for Adult Education (3)
A study of concepts, learning theories, materials, and media related to curriculum and program development in adult education.

ADE 6691 Research Methodology (3)
The study and evaluation of research methods commonly used in the social sciences. The course will provide information necessary to understand and apply research processes, synthesize knowledge and writing, and plan and organize research problems for interpretation and application of research results. Application of these skills in the form of a written project using the Publication Manual of the American Psychological Association (APA) is required. A grade of “B” or better is required.

ADE 6694 Special Problems in Adult Education (1-3)
A study of problem or problems using research techniques. Selection of problem to be approved by student’s adviser and instructor under whom study is to be made. Study should contribute to student’s program. Preparation of scholarly paper or project required and may involve oral defense.

ADE 6695 Thesis (1-6)
The thesis must be related to both the student’s concentration area and adult education. Information regarding thesis guidelines and requirements may be obtained from the Graduate School office. Grading system is Pass/Fail.

ADE 6696 Practicum in Adult Education (1–3)
ADE 6697 Supervised experiences related to instruction in area of specialization. Emphasis on application of skills, concepts, and principles acquired in previous courses. Grading system is Pass/Fail. Prerequisite: Completion of coursework and approval of adviser are required.

ADE 6699 Capstone (3)
This course is a culminating experience that helps students integrate and apply the knowledge they have gained in their program. Emphasis is placed on challenging students to view the adult educational process from many perspectives. Working independently students will create an educational portfolio to demonstrate mastery of program objectives and proof of readiness to receive a master’s degree, which will be submitted in portions throughout the term/semester for feedback from the instructor and classmates. An oral presentation will be required. A second option for Capstone is the completion of an internship in the student’s field of interest. The internship must be approved by the Capstone instructor. Grading system is Pass/Fail. Prerequisites: Completion of all core (ADE 6600, ADE 6640, ADE 6670, ADE 6691) and at least four of the six required concentration classes. Students must obtain a 3.0 GPA before entering ADE 6699.

ANT 6620 The Rise and Fall of Complex Societies (3)
This course is a survey of the world’s earliest complex societies and the legacy they left behind. Taught from the perspective of anthropological archaeology, the course will cover the basics of method and theory necessary to interpret the evidence of humanity’s transition from a hunting and gathering life to sedentary life. This class compares the rise of complex societies in Americas, Africa, the Middle East, the Indian subcontinent, and East Asia. Evidence and theories put forth to explain the rise and collapse of different civilizations and how this knowledge can be used to both document the past and better understand contemporary life.
ANT 6625  Specialized Study in Anthropology (3)
This course provides the student an opportunity to pursue in-depth study on a topic or issue of personal interest under the guidance and direction of a department faculty member. May be repeated up to a total of six credit hours. See semester hour limits listed under General Regulations section.

ANT 6627  Anthropology of Sex and Gender (3)
This course offers a cross-cultural and anthropological approach to a study of gender and sex. The course will explore some of the main questions that have concerned anthropologist over the years, such as the concept of sex versus the concept of gender, the theoretical debate about the status of women, and the gendering of work and social relations. The course will also cover the relationship between the body, sex, and gender; the historical roots of Western notions of the sexed body, third or alternative genders, and the intersections between gender, race, class, and ethnicity.

ANT 6630  Anthropological Perspectives of Religion (3)
This course introduces students to cross-cultural and anthropological approaches to the study of religion. The course will explore multiple religious beliefs, meanings, experiences, expressions, and practices across diverse environments. Through an engagement with anthropological works on topics such as ritual, sacrifice, and death, the course will cover how religion is understood, experienced, and expressed across the globe. By the end of this course, you will have the theoretical knowledge and analytical tools needed to critically examine dimensions of the religion and situate them within historical and global context.

ANT 6633  Food Justice (3)
This seminar studies the vibrant and growing range of social movements around food and agriculture. We will begin by examining several theoretical and conceptual frameworks for understanding historical changes and current dynamics in the international food and agriculture system. We will then examine different positions in fraught debates around population growth, hunger, and the appropriate role of biotechnology and agribusiness relative to low-input, peasant agriculture in feeding a growing global population. The remainder of the course will examine several case studies of social movements around land, food, and agriculture. We’ll end the term with a look at emerging paradigms and alternative models, and examine dynamic current debates around food sovereignty and food justice.

ANT 6635  Ethnographic Methods (3)
This course will explore the various methods used by cultural anthropologist to collect and evaluate ethnographic data.

ANT 6640  Forensic Anthropology (3)
This course is a broad overview of forensic anthropology, the application of the science of physical anthropology to the legal process. Students will learn the techniques used by forensic anthropologist to identify human remains, both skeletal and decomposed. Topics include the determination of age, sex, ancestry, stature, and unique features of a decedent from the skeleton and how these are used to establish a positive identification. An overview of trauma and other pathological conditions of the skeleton show how forensic anthropologist can provide information to help determine the cause and manner of death. Classes will be a combination of lecture and laboratory exercises.

ANT 6645  Medical Anthropology (3)
This course provides an in-depth study of multiple theoretical approaches and topics of research in socio-cultural anthropology related to health, illness, medicine, and healing institutions. In the current pandemic context, we will pay particular attention to critically examining how trust between medical experts and populations is constructed and challenged.

ANT 6665  Advanced Readings in Anthropology (3)
This course is designed to allow graduate students the opportunity to acquire a basic background in Anthropology literature. The readings will be in specific areas in Anthropology. May be repeated (with different topic) for credit. See semester hour limits listed under Course Restrictions in General Regulations section.

ANT 6680  Field Techniques in Archaeology (3)
Advanced instruction in survey and excavation methods and techniques used in the discipline of archaeology.

ANT 6681  Internship 1 in Anthropology (3)
Internship with a recognized, professional anthropology related agency in which the student is assigned a specific task related to the field of anthropology. Pre-requisites: SS 6690, SS 6691, SS 6698, and approval of the academic advisor and/or graduate coordinator.

ANT 6682  Internship 2 in Anthropology (3)
Internship with a recognized, professional anthropology related agency in which the student is assigned a specific task related to the field of anthropology. Pre-requisites: SS 6690, SS 6691, SS 6698, and approval of the academic advisor and/or graduate coordinator.

ANT 6696  Selected Topics in Anthropology (3)
An examination of a particular subject which is not offered under the normal course offerings. May be repeated (with different topics) for credit. See semester hour limits listed under General Regulations section.
ART

ART 5581  Methods and Materials in Art (3)
Theory and practice in the selection, organization, and use of art materials.

ART 5599  Advanced Studio Projects (3)
Independent studio projects in an area not included in the student's undergraduate studies.

ART 6605  Seminar in Art History (3)
Recent developments in art history with emphasis on sources and approaches to art history as they interact with contemporary culture.

ART 6625  Specialized Study in Area of Art (1-3)
Art history and criticism in various areas of specialization. Specialized study in area not included in the student's undergraduate studies.

ART 6626  Seminar in Art Education (3)
Topics of interest in art education and the presentation of a scholarly paper. Prerequisite: ART 6662.

ART 6627  Seminar in Art History (3)
Recent developments in art history with emphasis on sources and approaches to art history as they interact with contemporary culture.

ART 6664  Research in Art Education (3)
A review of contemporary research in art education and the presentation of a scholarly paper. Prerequisite: ART 6662.

ATHLETIC TRAINING

AT 6610  Health Care Management & Quality Improvement (2)
This course focuses on the developing problems of administration and evaluation of the delivery of athletic training services in the context of the larger health care system. Strategies to achieve the best patient outcomes by collecting, analyzing, and effecting change using qualitative and quantitative information will be emphasized. Prerequisite: AT 6645 Professional Practice in Athletic Training.

AT 6620  Foundations of Athletic Training (2)
Introduction to basic components of the athletic training profession including the prevention, recognition and evaluation and immediate care of athletic injuries. Medical terminology, emergency procedures, tissue healing, taping procedures, and documentation, and professional considerations will be covered. Corequisite: AT L620 Foundations Athletic Training Lab.

AT L620  Foundations of Athletic Training Lab (1)
The practice of basic components of the athletic training profession including the prevention, recognition and evaluation and immediate care of athletic injuries. Medical terminology, emergency procedures, tissue healing, taping procedures, and documentation, and professional considerations will be covered. This course contains a clinical experience component for application of these skills. This course is taken Fall Semester, Year One. Corequisite: AT 6620 Foundations of Athletic Training.

AT 6631  Examination & Therapeutic Management I (4)
The study of athletic training competencies as they relate to the evaluation of athletic-related injuries. In this class, students will learn basic principles and approaches to examination and treatment techniques and apply them to examination. Prerequisite: Acceptance into the MSAT Program.

AT 6632  Examination & Therapeutic Management II (4)
The study of athletic training competencies as they relate to the evaluation of athletic-related injuries. The examination process emphasizes connecting identified impairments to the patient's functional abilities and then subsequent design of interventions to maximize participation. Prerequisite: AT 6631 Examination & Therapeutic Management I.

AT 6633  Examination & Therapeutic Management III (3)
This course will focus on application of the principles of prevention, examination, diagnosis, and treatment of patients with musculoskeletal conditions. The examination process emphasizes connecting identified impairments to the patient's functional abilities and then subsequent design of interventions to maximize participation. Prerequisite: AT 6632 Examination & Therapeutic Management II.

AT 6640  Therapeutic Interventions (3)
An overview of tissues response to injury, pain transmission, and pharmacology provides the foundation from which students will learn about physical agents and specific conditions from a medical perspective. Students will become familiar with the theoretical and practical application of physical agents as it relates to tissue response to injury and pain control. Prerequisite: Acceptance into the MSAT Program.

AT 6645  Professional Practice in Athletic Training (1)
The advanced study, writing, and discussion of specialized topics and contemporary issues related to professional practice. Emphasis will be on historical perspectives, professional preparation, leadership, credentialing, governance, ethics, and scope of practice. Initial clinical competencies will be instructed to prepare the student for clinical practice. Prerequisite: Acceptance into the MSAT Program.

AT 6650  Pharmacological Considerations in Athletic Training (2)
This course provides a survey of pharmacology and covers key concepts related to the cellular actions, therapeutic uses, and side effects of major drug classes that are relevant to the practice of allied health clinicians.
AT 6655 Research & Analysis in Sports Medicine (3)
This course is designed to introduce students’ theoretical understanding of the profession, enhance their critical thinking ability, increase their writing skills, and advance the knowledge of the discipline. Students will learn about the design of a research proposal, including the identification of a problem, conducting a literature review, developing a hypothesis, understanding the steps of submitting to an Institutional Review Board, designing a study, and analyzing data through the use of statistical software programs.

AT 6660 General Medical Concerns & Special Populations (3)
Examination and discussion of general clinical medicine as well as issues related to sports nutrition and behavioral health. Survey of injury and illness risk factors associated with sports participation by the preadolescent/adolescent, geriatric, disabled, male, and female athlete.

AT 6661 Clinical Experience I (2)
This clinical experience provides students with an introduction to clinical care. This course emphasizes foundations of clinical care, including but not limited to the use of evidence-based practice, cultural competence, communication, ethical-decision making, documentation, and patient-centered care. Within the didactic portion of this course, students gain proficiency in concepts learned in preceding semesters while gaining competence in skills being learned during the current semester. This portion may be delivered in-person, remotely, or hybrid. This course is taken Spring Semester, Year One.

AT 6662 Clinical Experience II (2)
This clinical experience provides students with interprofessional experience a variety of healthcare providers. The clinical opportunity emphasizes examination and treatment of the non-athletic patient population. Within the didactic portion of this course, students gain proficiency in concepts learned in preceding semesters while gaining competence in skills being learned during the current semester. This portion may be delivered in-person, remotely, or hybrid. This course is taken Summer Semester, Year One. Prerequisite: AT 6661 Clinical Experience I.

AT 6663 Clinical Experience III (4)
This clinical experience provides students with continued clinical care opportunities. This course continues to emphasize foundations of clinical care including but not limited to the use of evidence-based practice, cultural competence, communication, ethical-decision making, documentation, and patient-centered care. Within the didactic portion of this course, students gain proficiency in concepts learned in preceding semesters while gaining competence in skills being learned during the current semester. This portion may be delivered in-person, remotely, or hybrid. This course is taken Fall Semester, Year Two. Prerequisite: AT 6662 Clinical Experience II.

AT 6664 Clinical Experience IV (9)
This full-time clinical experience is designed for immersion into supervised athletic training practice at any location chosen by the student based off career goals and program requirements. Students will be working with preceptors that resemble their own goal of clinical practice while gaining experience in all aspects of athletic training practice. A web-based didactic component facilitates critical thinking, reflects on practice, and prepares students for the Board of Certification (BOC) Exam while allowing the student to be fully immersed in their clinical experience. This course is taken Spring Semester, Year Two. Prerequisite: AT Clinical Experience III.

AT 6665 Clinical Experience V (1)
This clinical experience provides students with continued clinical care opportunities. This course continues to emphasize foundations of clinical care including but not limited to the use of evidence-based practice, cultural competence, communication, ethical-decision making, documentation, and patient-centered care. Within the didactic portion of this course, students gain proficiency in concepts learned in preceding semesters while gaining competence in skills being learned during the current semester. This portion may be delivered in-person, remotely, or hybrid. This course contains the Capstone Project for the MSAT Program. This course is taken Summer Semester, Year Two. Prerequisite: AT 6664 Clinical Experience IV.

BIOLOGY

BIO 5505 Entomology (4)
A study of the orders of insects with the emphasis on morphology, taxonomy, and life cycles. Prerequisites: General Biology.

BIO 5506 Dendrology (4)
Dendrology is a field and laboratory investigation of ecologically and commercially important species of trees, shrubs, and woody vines in the United States with a particular focus on native and naturalized taxa in the Southeast. The roles of these arborecent species in shaping the natural communities and ecoregions of Alabama are emphasized along with global comparisons. Herbarium specimens of taxa present in local natural areas are prepared. Prerequisites: General Ecology with lab course, or permission of instructor.

BIO 5513 Limnology (3)
A study of the physical, chemical, geological, and biological aspects of freshwater ecosystems as influenced by activities in surrounding watersheds. Prerequisites: general biology, general ecology, general chemistry. Corequisite: BIO L513
BIO L513 Limnology Lab (1)
Field and laboratory exercises in lake and stream science, including instrumentation, measurement, sampling, and analysis. Co-requisite: BIO 5513

BIO 5514 Food Microbiology (3)
This course focuses on topics in microbial metabolism, food spoilage, food preservation techniques, and foodborne pathogens and their control. Some molecular techniques will be introduced. Prerequisites: BIO 3372/L372. Corequisite: BIO L514.

BIO L514 Food Microbiology Lab (3)
This lab focuses on advanced microbiological laboratory techniques including enumeration and analysis of bacteria in food, water, and dairy products. Prerequisites: BIO 3372/L372. Corequisite: BIO 5514.

BIO 5516 Microbial Ecology (3)
A study of the taxonomy, diversity, and ecology of microbial populations in ecosystems, with an emphasis on the roles that they play in biogeochemical cycles, their contributions to metabolic diversity, their interactions with animals and plants, their niches and bioremediation. Prerequisites: microbiology, organic chemistry. Corequisite: BIO L516.

BIO L516 Microbial Ecology Lab (1)
Microbial ecology laboratory techniques including isolation, identification, and enumeration of microorganisms from aquatic and terrestrial environments. Corequisite: BIO 5516.

BIO 5520 Field Vertebrate Zoology (4)
A study of the basics of vertebrate identification, with emphasis on phylogeny, anatomy, morphology, life histories, habitats, distributions, and conservation. Prerequisites: General Biology, General Chemistry.

BIO 5521 Population Ecology (3)
This course covers animal and plant populations, food supply, competition, disease, fecundity, distribution, and other environmental factors. Management of endangered species and protected ecosystems are included. Prerequisites: General Ecology, Genetics, General Chemistry, Statistics. Corequisite: BIO L521.

BIO L521 Population Ecology Lab (1)
Field exercises in identifying ecological problems, formulating and testing hypotheses, and evaluating data using standard statistical methods. Corequisite: BIO 5521.

BIO 5525 Field Botany (4)
A survey of vascular plants from different habitats in southeast Alabama. Principles of plant taxonomy, including history and systems of classification and nomenclature, the use of dichotomous keys, and general herbarium techniques. Emphasis is placed on plant identification and habitat types. Prerequisites: General Biology, General Ecology. See semester hour limits listed under Course Restrictions in General Regulations section.

BIO 5547 Ornithology (4)
Biology, ecology, evolution, and the conservation of birds. Topics include the origin and diversification of birds, seasonal migrations, bird communities, and the consequences of global change for bird diversity. Labs are integrated and include field trips for the observation and identification of birds and a project developed by students. Prerequisites: General Biology, General Ecology (BIO 2229), or permission of the instructor.

BIO 5550 Environmental History (3)
An introduction to environmental history of the United States from the 18th century to the late 20th century, emphasizing the post WWII period. The course will focus on the historical development of the science of ecology, the origins of environmental problems and solutions attempted by government and experts, and responses by grassroots activists over time. Prerequisite: Graduate standing at Troy University.

BIO 5551 Toxicology (3)
A study of the principles related to the adverse effects of chemicals on living organisms. Prerequisite: Organic Chemistry, Anatomy and Physiology.

BIO L551 Toxicology Lab (1)
An assessment of terrestrial and aquatic toxicity of chemical agents following standard protocols.

BIO 5553 Biogeography (3)
This course provides a comprehensive review of the historical, ecological, and anthropic factors (such as plate tectonics, glacial-interglacial cycles, soil, climate change) affecting the geographic distribution and abundance of animals and plants, with an emphasis on mammals, birds, and their habitats. The course includes lectures by the instructor and students and discussion of articles from the primary literature. Prerequisite: General Ecology with lab course, or permission of the instructor. Corequisite: BIO 5554.

BIO 5554 Biogeography Field Study (1)
Biogeography Field Study is an introduction to the distribution of flora and fauna across the ecoregions of Alabama, the fifth most biodiverse state in America, gained through immersion in selected natural areas. Discussions and student presentations focus on natural communities and species assemblages with an emphasis on adaptations of flora and fauna to different environments. Comparisons with similar regions on other continents are investigated. Prerequisite: General Ecology with lab course, or permission of the instructor. Corequisite: BIO 5553.

<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 5556</td>
<td>Human Virology (3)</td>
<td>The course is aimed to provide knowledge about the human viruses and zoonoses, their impact on human health, and the epidemiology of human viral infections, the geographic spread, host ethic disparities, the role of host genes and other factors, preventive measures, available treatment and vaccination. Students will also study the classification and nomenclature of viruses, their replication strategies as well as key viral genes and proteins that are explored as targets for antiviral therapy and vaccine development. Prerequisites: Molecular Biology/Lab.</td>
</tr>
<tr>
<td>BIO 5571</td>
<td>Parasitology (3)</td>
<td>This course covers the taxonomy, structure, life histories, distribution, pathogenesis, and control of parasitic protozoa, helminths, and arthropods, with the emphasis on those of medical importance. Prerequisites: Any 3000-level BIO lecture and lab. Corequisite: BIO L571</td>

| BIO 6610    | Principles and Methods for the Teaching Assistant (1-2) | This course will provide each student with significant “hands-on” experiences in college level instruction and develop the knowledge and skills teachers need to implement inquiry-based instruction. Students will work under the direct mentorship and super-
vision of the course instructor and will be trained in techniques, current presentations, and teaching methods of laboratory-based biology. (Students seeking one (1) semester hour credit will be required to assist in one laboratory course. Students seeking two (2) semester hour credit will be required to assist in two laboratory courses or laboratory courses with multiple sections.)

BIO 6611 Global Pollution and International Environmental Policy (3)
An examination of global environmental issues, such as global climate change, ozone depletion, and acid precipitation. This course also deals with alternative in developing global policies and treaties to address these problems.

BIO 6612 Environmental Impact Studies and Risk Management (3)
An examination of practices used in analysis of land, water, and air to determine the impact of human activities such as construction, mining, clearing, and industrial operation. Planning approaches and ecological constraints, economic evaluation, and quantitative approaches to predict impact.

BIO 6617 Seminar in Environmental and Biological Sciences (1)
Presentations on interdisciplinary principles and concepts, current issues, and new studies and research from a variety of fields, with environmental science serving as a unifying theme. Faculty members and outside speakers will present guest lecturers. Candidates for the master’s degree in the thesis option will present their research findings and conclusions.

BIO 6619 Environmental Negotiations and Conflict Resolution (3)
An examination of the approaches to resolving environmental disputes through alternative dispute resolution techniques.

BIO 6621 Environmental Toxicology (3)
This course is a foundation for scientific decision-making involving contaminants and their effects on biological systems. It covers the basic principles of environmental toxicology including bioaccumulation, the biological effects of toxicants from the molecular to global level of organization, and a basic understanding of the risk of environmental pollutants and the science of risk assessment. Prerequisites: Eight semester hours of equivalent of chemistry

BIO 6624 Public Health (3)
The impact of the environment on humans as well as the human impact on the environment serve as the dual focus of this course. Environmental agents of physical, chemical, and biological nature with adverse effect on human health will be considered. The physiological, molecular, cellular, genetic, and biochemical mechanisms of action of environmental carcinogens, toxins, pollutant, and other disease-causing environmental agents and the interaction of various environmental agents with biological systems will be addressed.

BIO 6625 Specialized Study in Biology (1-4)
6626 The student has the opportunity to engage in intensive study of a particular subject or learn a pertinent skill, which fits his/her academic and/or professional needs but is not available in the regular curriculum. This study may include educational activities or training outside of the University. The student will follow the guidelines that the Department established for the supervision and the pursuance of this study. Requires approval of the student’s adviser and chairs.

BIO 6630 Pollution Science (3)
A study of pollution of atmosphere, surface water, and soil and groundwater from animate activities and inanimate processes. Adverse effects, fate, and transport of pollutants in air, soil, and water. Prerequisite: general chemistry.

BIO L630 Pollution Science Lab (1)
Theory and analytical techniques used in both field and laboratory for the analysis of air, water, and soil contaminants. Prerequisite: general chemistry

BIO 6632 Land Use Planning (3)
An introduction to land use planning and land use tools, including zoning and comprehensive planning. The course also examines the interaction between land use and environments and explores strategies to reduce environmental impacts and protect natural resources.

BIO 6635 Water Quality and Resources (3)
This course is designed to present the basic aspects of water quality, quantity, and policy to the students to help them make informed decisions on how to manage the social science issues related to water supply, demand, and sustainable water management within the U.S. and globally. This course specifically covers properties of water, ecological implications of water, water resources, hydrologic cycle, physical, chemical and biological characteristics of water, stream, lake and reservoir water quality, water pollution, best management practices, water laws, regulations, and standards, and water economics. This course is an elective for all concentrations within the Environmental and Biological Sciences program.

BIO 6637 Epidemiology (3)
The course is aimed to provide knowledge about the epidemiological concepts and methods used in Epidemiology, the key terms and definitions used in Epidemiology such as the epidemiological triangle, chain of infection, reservoir, the portals of entry and exit, the modes of transmission, susceptible host, association and causality, Henle-Koch relationships, the strength of association, ratios, proportions, rates, prevalence, incidence, mortality data, measures of
health impact, type of mortality rates, descriptive studies – case reports and case series, ecological studies, cross-sectional / prevalence studies, case-control studies, odds ratio cohort studies, 2x2 tables, as well as Analytic and experimental studies, randomized controlled trials, confounding and effect modification, surveillance and prevention, disease prevention, screening tests, and outbreak investigations. Prerequisites: Human Population Genetics

BIO 6638 Cancer Genetics and Epidemiology (3)
The course is aimed to provide knowledge about cancer the definition of cancer, the common features of cancer cells and tumors, the cancer cell theory, the genetic and epigenetic pathways leading to the development of cancers, the epidemiological aspects of various cancers and some clinical aspects of cancer diagnostic and treatment. Prerequisites: Molecular Biology / Lab

BIO 6641 Environmental Law, Permitting, and Regulatory Compliance (3)
A study of the steps needed and programs required to insure that public and private sector organizations are in compliance with federal and state environmental regulations. Prerequisites: An undergraduate ecology or environmental course, or approval of adviser.

BIO 6645 Human Population Genetics (3)
Fundamental principles of population genetics with a focus on human populations

BIO 6647 Environmental Economics (3)
Introduction to the micro and macro aspects of environmental economics. The course will explore the various economic and institutional means of controlling environmental problems for effectiveness, efficiency and equity.

BIO 6650 Spatial Analysis Using Geographical Information Systems (3)
A graduate level GIS course geared for beginners that presents the understanding behind the four functional and physical components of a GIS: data input; storage and retrieval; manipulation; and data output. Multiple GIS applications are also discussed. Prerequisites: BIO 6630, BIO L630, or permission of chair. Corequisite: BIO L650

BIO L650 Spatial Analysis Using Geographical Information Systems Lab (1)
This lab is intended for average computer users with little or no experience in ArcView GIS or any other GIS software. At the end of the labs, students will be able to use ArcView to view, query, analyze, chart, and map geographic data. Corequisite: BIO 6650.

BIO 6655 Clinical Biochemistry (3)
This course is the discipline of pathology (or laboratory medicine) that is concerned with the detection and measurement of biochemical changes in disease. This course will give a succinct overview, the “big picture” and relevance of biochemistry and essential pathways that regulate and affect various disorders. Discussion of potential targets for research and drug development through the use of case studies will be included. Prerequisites: Cell Biology/Lab, General Chemistry/Lab, Genetics or equivalent, or by permission of instructor.

BIO 6660 Issues in Aquatic Ecology (3)
Case studies on the overexploitation and degradation of aquatic ecosystems and their resources, with a primary focus on freshwater systems. Prerequisite: An undergraduate ecology course is highly recommended.

BIO 6661 Conservation Biology (3)
Examination of the principles, practices, and philosophy of measuring, maintaining, and enhancing biological diversity. The course focuses on the applications of ecology, population biology, and genetics of the conservation of keystone and rare species and ecosystems. Prerequisite: An undergraduate ecology course is highly recommended.

BIO 6665 Sustainable Development (3)
This course will increase student awareness of sustainability issues concerning the future survival of humans and other organisms on the planet. The course specifically covers the following: biological diversity trends, human population growth, agriculture and food consumption issues, water use and supplies, global warming and effects on biological diversity, sustainable fisheries, forest products and services, and other issues.

BIO 6670 Special Topics (1-4)
BIO 6671 Specialized topics not generally included in course offerings. A maximum total of 4 semester hours is allowed for program credit.

BIO 6691 Research Methodology and Experimental Design (3)
This course will include hands-on statistical experience emphasizing hypothesis testing using a statistical software system. It will combine several elements of research methodology including developing a grant proposal that will include topic selection, literature search, question formulation, methods, statistics, and a budget. Prerequisite: Three semester hours in probability and statistics or permission of instructor. A grade of “B” or better is required.

BIO 6682 Immunogenetics (3)
The course is aimed to provide knowledge about the human major histocompatibility complex (MHC) and its human equivalent – human leukocyte antigens (HLA); the master systems for self-nonself-recognition. The students will learn about the variations in HLA loci and their association with human disorders, such as autoimmune and inflammatory diseases, infectious diseases, cancers, gastrointestinal diseases, neurological and psychiatric disorders, et al.,
as well as transplantation immunology, the variations in the immune response to infectious diseases and vaccination, immunodeficiencies and the treatment of human cancers. Prerequisites: Immunology/Lab.

**BIOMEDICAL SCIENCE**

**BMS 6615** Medical Microbiology and Immunology (3) Emphasizes the basic clinical applications of microbiology and immunology in the treatment and prevention of infectious diseases. Prerequisite: Microbiology/Lab

**BMS 6625** Medical Cell Biology (3) Focuses on the cellular and molecular bases of human diseases and disease processes. Prerequisite: General Chemistry/Lab, Cell Biology/Lab, Microbiology/lab, or Genetics/Lab

**BMS 6630** Medical Pharmacology (3) This course reviews the beneficial and harmful actions of drugs on the tissues and organs of the body. Provides the foundation for understanding drug actions in health and disease. Prerequisites: General Chemistry/Lab and Physiology

**BMS 6635** Medical Physiology (3) Reviews the functions of the various organ systems and their integration in the human body at an advanced level. Prerequisite: Cell Biology

**BMS 6655** Clinical Biochemistry (3) This course is the discipline of pathology (or laboratory medicine) that is concerned with the detection and measurement of biochemical changes in disease. This course will give a succinct overview, the “big picture”, and relevance of biochemistry and essential pathways that regulate and affect various disorders. Discussion of potential targets for research and drug development through the use of case studies will be included. Prerequisites: Cell Biology/Lab, General Chemistry/Lab, Genetics or equivalent, or by permission of instructor.

**BMS 6660** Histology & Embryology (4) The Histology and Embryology course is designed to help students develop an understanding of human tissues and organs at the microscopic level, as well as an understanding of the tissues and organs of the embryo and fetus. The course format will emphasize the link between the development of an organ or tissue with its mature structure and function. The lecture and laboratory portions of this course will overlap and reinforce each other, with lectures emphasizing concepts and laboratory exercises emphasizing identification of cell and tissue types. Prerequisite: Anatomy & Physiology with lab

**BIO 6695** Thesis Research (1-6) Under the guidance of the student’s adviser and the chair of the department, the student may pursue original research (independent acquisition and interpretation of data) in a particular area of environmental or biological science. The completion of a thesis is required. The results and conclusions must be successfully defended before the student’s graduate committee. Grading system is Pass/Fail. Prerequisites: 3.0 GPA and permission of the Chair of the Biological and Environmental Sciences department.

**BMS 6665** Neuroanatomy (4) This graduate course is a comprehensive study of the anatomy of the human nervous system. Special emphasis will be placed on relating clinical disorders to the relevant neuroanatomical structures and pathways. Prerequisites: Anatomy and Physiology, Biochemistry, Microbiology

**BMS 6695** Thesis Research (1-3) Under the guidance of the student’s adviser the Chair of the Department, the student may pursue original research (independent acquisition and interpretation of data) in a particular area of the biomedical sciences. The completion of a thesis is required. The results and conclusions must be successfully defended before the student’s graduate committee. Grading system is pass/fail. Prerequisites: 3.0 GPA and permission of the Chair of the Department of Biological and Environmental Sciences.

**BUSINESS**

**BUS 6600** Survey of Business Concepts (3) An overview course of the business management field including the functional areas of economics, marketing, quantitative methods, human relations, and human resource management. A grade of “B” or better is required.

**BUS 6611** Global Business Strategy (3) This course integrates the skills and knowledge developed in earlier MBA core courses and emphasizes case analysis. Formulation and implementation of strategies are stressed. This course serves as the capstone requirement for the MBA degree and may not be transferred into the MBA program. Prerequisites: 24 semester credit completed in the MBA program to include all other core courses. A grade of “B” or better is required.

**BUS 6625** Specialized Study in the Area of Business **6626** Administration (1-3) **6627** Study of problem or problems using research techniques. Selection of the problems must be approved by the student’s adviser, the instructor under whom the study is to be made, and the appropriate dean. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in
CHEMISTRY

CHM 5500 Special Topics in Chemistry (3)
A study of topics of special interest, such as advanced physical chemistry, advanced analytical chemistry, advanced organic, group theory, surface chemistry, and colloid chemistry. *Prerequisite: CHM 2242 and CHM 3343*

CHM 5503 Advanced Organic Chemistry (3)
A more in-depth study of many of the topics studied in Organic Chemistry I and II. Topics will include reaction mechanisms, synthetic methods, and structure determination using spectroscopic techniques. *Prerequisite: CHM 3357*

CHM 5544 Advanced Inorganic Chemistry (3)
This course covers the spectroscopy of inorganic molecules, detailed molecular orbital applications, descriptive chemistry of the transition elements, including organometallic and biorganic compounds. *Prerequisites: CHM 2242, 5552 and L552*

CHM L544 Advanced Inorganic Laboratory (1)
A study of the preparation and characterization of inorganic compounds. Experience will be provided in techniques such as using a tube furnace and handling air-sensitive compounds with a glove bag and Schlenk line. *Corequisite or prerequisite: CHM 5544*

CHM 5545 Instrumental Analysis (3)
A study of the operating principles of modern analytical instrumentation for determining composition and concentration. *Prerequisites: CHM 2242, CHM 3343, PHY 2253 and L253 or PHY 2263 and L263. Corequisite: CHM L545*

CHM L545 Instrumental Analysis Laboratory (1)
The practical application of select modern analytical instruments to qualitative and quantitative examination of matter. Considerable attention is given to the instrument and elementary electronics involved in each. *Corequisite: CHM 5545*

CHM 5552 Physical Chemistry I (3)
A study of the theory and applications of thermodynamics, reaction kinetics, and transport properties with an emphasis on the description of ideal/non ideal gasses and solutions. *Prerequisite: CHM 3343: PHY 2253 and L253 or PHY 2263 and L263; MTH 1126. Corequisite: CHM L552*

CHM L552 Physical Chemistry I Laboratory (1)
An introduction to methods and techniques used in the physical chemistry laboratory, including experiments in calorimetry, phase equilibria, reaction kinetics, and transport properties. *Corequisite: CHM 5552*

CHM 5553 Physical Chemistry II (3)
A continuation of CHM 5552 with an introduction to surface phenomena, quantum chemistry, and spectroscopy with an emphasis on properties of surfaces, atomic and molecular structure, molecular orbital theory, and photochemistry. *Prerequisite: CHM 5552*

CHM L553 Physical Chemistry II Laboratory (1)
A continuation of CHM L552 with an introduction to methods and techniques in computational chemistry and spectroscopy. *Corequisite or prerequisite: CHM 5553*

CHM 6625 Specialized Study in Area of Chemistry (1–4)
A study of a problem or problems using research techniques. Selection of problem must be approved by the professor under whom the study is to be made and the Dean of Arts and Sciences. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve oral defense. *Total credit for any combination of enrollments in these courses may not exceed four semester hours. A Specialized Study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.*

CRIMINAL JUSTICE

CJ 6610 Principles of Administration (3)
A survey of the basic principles and functions of personnel administration with special attention paid to criminal justice applications.

CJ 6620 Current Trends in Criminal Law and Procedure (3)
This course is divided into two main sections, substantive and procedural criminal law. The course examines the development of criminal law, elements of offense, types of offenses and defenses, and case analysis. We provide a critical review through case studies of recent trends and developments on the interpretation of major portions of the United States Constitution concerning individual liberties, and the rights of criminal defendants in the criminal justice system.

CJ 6621 Current Issues in Corrections (3)
An analysis of the contemporary problems surrounding corrections. Examples of topics include, but are not limited to, police unionization, court reforms, correctional problems, community-based correctional philosophy, comparative issues, and contemporary problems related to correctional officers’ retention and employment practices.

CJ 6622 Seminar in Administration of Justice (3)
A critical examination of the administration of the criminal justice system in America, including the myths and misconceptions it generates, the controversial issues and trends it produces, and the current
and future policies and administrative decision making it promotes.

CJ 6624 Court Administration (3)
A study of the judicial process from the standpoint of its situational and legal basis, organization and management, and the technical aspects of the judicial function at both trial and appellate levels.

CJ 6625 Specialized Study (3)
This course provides the student an opportunity to pursue in-depth study on a topic or issue of personal interest under the guidance and direction of a department faculty member. May be repeated up to a total of six credit hours. See semester hour limits listed under Course Restrictions in General Regulations section.

CJ 6630 Juvenile Justice (3)
An examination of the agencies, institutions, and personnel that work with juvenile offenders. Of special interest will be how the police, courts and correctional agencies interact and deal with juvenile offenders, as well as a review of the current issues and proposals being discussed at the national level.

CJ 6635 Community-Based Corrections/Correctional Systems (3)
This course will advance the concept of the development of programs for offenders which substitute treatment in the community for institutionalization or imprisonment. Collectively, these programs constitute what is termed “Community-Based Corrections.”

CJ 6638 Seminar in Civil Liberties Related to Corrections (3)
This course is concerned with prisoners’ rights as they are guaranteed by the United States judicial system. Because of the ongoing nature of the process defining rights of prisoners currently, decisions of federal appellate and district courts as well as state courts are utilized. This course is a critical review of recent trends and developments affecting personal liberties of incarcerated individuals.

CJ 6639 Seminar in Homeland Security (3)
Homeland Security introduces students to current public policies and issues relevant to the security of the United States. The coordination of federal, state, and local government agencies and nonprofit organizations which respond to threats is vital to the security of people, property, and our way of life. The course relies upon theories, concepts, and case studies to explore the challenges facing organizations which are a part of protecting our homeland security.

CJ 6640 Seminar in Law Enforcement (3)
An in-depth examination of the various issues and problems currently being experienced in American policing.

CJ 6641 Capital Punishment (3)
The purpose of this course is to examine different aspects of capital punishment. To reach this goal, this course considers the history as well as various perspectives about different dimensions of this method of punishment. Students will study different views that oppose or support the death penalty and the consequences of using capital punishment by the criminal justice system.

CJ 6642 Cyber and Information Threat Management (3)
Presented from an operational perspective, this course introduces students to the interdisciplinary field of cyber-security, discusses the evolution of information security into cybersecurity, and explores the relationship of cybersecurity to organizations and society. Students will be exposed to multiple cybersecurity environments, technologies, processes, and concepts, analyze the threats and risks to/in these environments, and understand how to develop an appropriate strategy to mitigate potential cybersecurity impacts in the modern information environment.

CJ 6643 Transportation and Border Security (3)
This course provides students with an analysis of issues that concern the protection of our nation’s borders and United States’ policy regarding the safety of the US transportation system. Moreover, the course will analyze border security issues such as immigration, Mexican Drug Wars, physical border security strategies to include the use of the US military and the Bracero Program.

CJ 6644 Administrative Law (3)
A study of the legal environment in which the public administrator functions. The process and procedures of administrative agencies including administrative discretion, rule-making, investigating, prosecuting, negotiating, and settling; constitutional law, statutory law, common law, and agency-made law. Liability of governments and their officers. Selected cases and decisions.

CJ 6645 Ethics in Criminal Justice Organizations (3)
The study of philosophical and practical issues related to ethical decision making in criminal justice organizations. Emphasis is given to the analysis of ethical dilemmas confronting the contemporary criminal justice system and the development of analytical skills and a values framework to act as ethical criminal justice professionals.

CJ 6646 Sentencing and Punishment (3)
Sentencing and punishment are critical features of the criminal justice system and are primarily used as a last method of social control. Countries have different punishment and sentencing systems affected by their cultural, historical, and economic conditions. This course investigates various approaches to the punishment as well as potential outcomes produced by each approach.

<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CJ 6647</td>
<td>AI and Game Forensics (3)</td>
<td>This course is a practical and theoretical study of Artificial Intelligence and Gaming consoles. Topics include the collection and analysis of artificial intelligence and the use of artificial intelligence to enhance the analysis of digital evidence. This framework investigates how to analyze human intelligence or human behavior for criminal investigation. Also, collecting and analyzing game consoles and the use of consoles by bad actors. Discuss various techniques for analyzing digital evidence and legally acceptable methods for preserving, collecting, and reporting findings from these investigations.</td>
</tr>
<tr>
<td>CJ 6648</td>
<td>Cyber Forensics (3)</td>
<td>This course is an introduction to the framework of cyber forensics and the process of identifying, collecting, analyzing, and reporting digital evidence for judicial review. Cyber Forensics involves computer science knowledge, hands-on application, and theoretical issues in current practice. Topics to be addressed will include: how to forensically acquire digital evidence, various techniques for analyzing digital evidence, and legally acceptable techniques for preserving, collecting, and reporting findings from these investigations. In addition, students will be exposed to various software and hardware involved in the cyber forensics process.</td>
</tr>
<tr>
<td>CJ 6649</td>
<td>Statistics for Criminal Justice Research (3)</td>
<td>This course provides a review of advanced statistical techniques with emphasis upon their application in a criminal justice setting.</td>
</tr>
<tr>
<td>CJ 6650</td>
<td>Survey of Research Methods in Criminal Justice (3)</td>
<td>An analysis of research strategies employed to study the causes of crime and the societal response to it. A grade of “B” or better is required.</td>
</tr>
<tr>
<td>CJ 6652</td>
<td>Seminar in Corrections (3)</td>
<td>An in-depth examination of the various issues and problems in corrections with a special emphasis relating to administration and management.</td>
</tr>
<tr>
<td>CJ 6653</td>
<td>Seminar in Intelligence (3)</td>
<td>This course examines the principle roles of intelligence in a post 9-11 environment and in national security formulation. Moreover, the course covers the intelligence cycle (planning and direction, collection, processing, analysis and dissemination). It also covers key aspects of intelligence such as warning and surprise, denial and deception; covert action; oversight and civil liberties; role of policy makers, and intelligence reform.</td>
</tr>
<tr>
<td>CJ 6655</td>
<td>Selected Topics in Criminal Justice (3)</td>
<td>An examination of a particular subject which is not offered under the normal course offerings. May be repeated (with different topics) for credit. See semester hour limits listed under Course Restrictions in General Regulations section.</td>
</tr>
<tr>
<td>CJ 6656</td>
<td>Selected Topics in Security (3)</td>
<td>An examination of a particular subject which is not offered under the normal course offerings. May be repeated (with different topics) for credit. See semester hour limits listed under Course Restrictions in General Regulations section.</td>
</tr>
<tr>
<td>CJ 6660</td>
<td>Advanced Readings in Criminal Justice (3)</td>
<td>This course is designed to allow beginning graduate students the opportunity to acquire a basic background in criminal justice literature. The readings will be in specific areas in criminal justice. May be repeated (with different topics) for credit. See semester hour limits listed under Course Restrictions in General Regulations section.</td>
</tr>
<tr>
<td>CJ 6665</td>
<td>Emergency and Crisis Management (3)</td>
<td>An examination of the theory and practice of emergency management. Course reviews principles and practices of emergency and crisis management. The issues, policies and responses necessary to coordinate and collaborate with other agencies in an emergency situation will be examined. Application of these policies, issues and principles will involve using cases and scenarios.</td>
</tr>
<tr>
<td>CJ 6667</td>
<td>Intelligence Analysis (3)</td>
<td>Examines the disciplines of criminal and intelligence analysis as an evolving interdisciplinary approach to address and support the Homeland Security function, and complex investigations such as organized crime. The course is an integration of theory, software application for investigative analysis, and application of information management.</td>
</tr>
<tr>
<td>CJ 6669</td>
<td>Legal Aspects of Security (3)</td>
<td>A historical and legal exploration of security law in the United States.</td>
</tr>
<tr>
<td>CJ 6671</td>
<td>Organization Theory (3)</td>
<td>An examination of the theories of modern criminal justice organization, including current trends and development.</td>
</tr>
<tr>
<td>CJ 6680</td>
<td>Criminal Justice Study Abroad (3)</td>
<td>An examination of the differences in criminal justice system between the US and a chosen foreign country, unique crime problems faced by the chosen country, and their tactics to handle the problems.</td>
</tr>
<tr>
<td>CJ 6692</td>
<td>Internship 1 in Criminal Justice (3)</td>
<td>Application of skills and knowledge of Criminal Justice in government agency, public service institution or similar situation under the supervision of a faculty member. Prerequisite(s): CJ 6620, CJ 6622, CJ 6636, CJ 6650, and approval of the student’s academic advisor and/or graduate coordinator.</td>
</tr>
</tbody>
</table>
| CJ 6693     | Master’s Project (3)                                  | An applied professional research project involving the analysis of a management or public policy problem, designed for the student who does not wish to
write a thesis but nonetheless desires to prepare a major written work in the field of criminal justice.

**COM 5542 Rhetoric (3)**  
A study of the historical development of rhetorical theory in Western thought from the Classical to the Contemporary periods and its relationship to practice and criticism. The course includes opportunities for advanced public speaking and small group discussion.

**COM 6605 Strategic Communication Theories (3)**  
Students will explore communication theories from classical to current times along with their practical applications. Special attention is placed on crisis communication and the role of new technologies.

**COURSE DESCRIPTIONS**

**COM 6610 Leadership and Media Strategies (3)**  
Using leadership skills to approach communication effectively with a variety of media tools. Topics include media relations, media characteristics, media decisions, the impact of emerging communication technologies on the communication process, mentoring communication skills, presentation skills and media budgets.

**CJ 6694 Thesis Practicum (3)**  
This course is designed to offer the student who elects to write a thesis an opportunity to review research strategies, initiate a literature search, and prepare preliminary drafts of the thesis. The student will receive a letter grade of “IP” until the completion of the thesis. Enrollment is available ONLY to students in residence at the Troy, Alabama campus.

**CJ 6695 Thesis (3)**  
The completion and oral defense of the thesis. Grading system is Pass / Fail. Enrollment is available ONLY to students in residence at the Troy, Alabama campus.

**CJ 6696 Internship 2 in Criminal Justice (3)**  
Application of skills and knowledge of Criminal Justice in government agency, public service institution or similar situation under the supervision of a faculty member. Prerequisite(s): CJ 6620, CJ 6622, CJ 6636, CJ 6650, and approval of the student's academic advisor and/or graduate coordinator.

**COM 5531 Interpersonal Communication (3)**  
A study of theories of Communication behavior in relatively unstructured face-to-face situations, including small-group discussion.

**COM 5541 Oral Interpretation (3)**  
A study and application of the principles and practices of oral interpretation (reading) of literature, including individual and ensemble performance.

**COM 5542 Rhetoric (3)**  
A study of the historical development of rhetorical theory in Western thought from the Classical to the Contemporary periods and its relationship to practice and criticism. The course includes opportunities for advanced public speaking and small group discussion.

**COM 6600 Communication and Influence (3)**  
This class is designed to increase the students’ understanding of and ability to use social media in an advocacy role. Students will study argument, interaction and political communication in personal, print, and online environments. Emphasis is placed on persuasion theories and the role of messages as agents for change.

**COM 6605 Strategic Communication Theories (3)**  
Students will explore communication theories from classical to current times along with their practical applications. Special attention is placed on crisis communication and the role of new technologies.
COM 6699  Strategic Communication Capstone (3)
This course provides a culminating experience in which students will integrate the theoretical and practical strategic communication skills developed in prior courses. Students will apply these skills by developing an effective communication campaign. A grade of “B” or better is required. This course is open only to students who have successfully completed 24 hours of coursework (including COM 6600, COM 6605, COM 6691 and JRN 6640) in the program. This course may only be taken in the students final term of the program.

COM 8801  Topics in Communication (3)
This course examines the multifaceted world of communication in the 21st century: concepts, terms, and processes. Additionally, students explore the history, score and structure of communication in the United States and globally.

COM 8802  Seminar in Conflict and Communication (3)
Conflict in the organization influences communication. Students will explore conflict as a part of the communication process, analyzing issues, problem-solving, and critically thinking.

COM 8803  Survey of Communication Studies (3)
This course explores communication in the organization from the perspective of real-life issues, using case-studies.

COM 8804  Readings in Contemporary Issues in Communication (3)
This course explores contemporary issues in communication, evolving technologies, and how communication is impacted by changes in the globalization process.

COM 8805  Communication Capstone (3)
This course examines communication from a global leadership perspective. Communication in the complex organization impacts the culture and working environment of the organization. Communication will be explored through theory as well as real-life settings.

COM 8806  Seminar in Media Processes & Effects (3)
Communication as a medium is explored. The course examines the medium of communication as representation, reflection, and an influencer.

COUNSELING

CP 6600  Professional Orientation and Ethics (3)
An introductory course to the world of professional counseling. Course content includes historical overview, concepts, approaches, philosophy and development of the counseling profession. Professional roles, organizations, credentialing, legal/ethical issues, and professional standards of care are covered. Prerequisites: Recommended first course.

CP 6601  Legal, Ethical, and Professional Standards (3)
This course assists counseling personnel in acquiring information and understanding necessary to effectively deal with legal, ethical and professional standards of the counseling profession.

CP 6602  Seminar in the Prevention/Treatment of Chemical Dependency (3)
An examination of specified issues which must be addressed to promote successful recovery in the treatment of chemical dependency.

CP 6605  Foundations of Mental Health Counseling (3)
A study of the historical, philosophical, societal, cultural, economic, and political dimensions within mental health practice. This course will address the professional identity, functions, and issues facing mental health practitioners: principles, theories, and practice of community intervention and the human services network; fiscal and administrative management of programs; and public policy and governmental relations impacting mental health services.

CP 6610  Facilitation Skills and Counseling Techniques (3)
A focus on the development and application of basic facilitation skills necessary for becoming an effective helping professional. Skills are developed through a combination of didactic, experiential, and demonstrated learning activities to train the beginning counselor in the establishment and maintenance of therapeutic relationships.

CP 6616  Treatment of Addictive Family Diseases (3)
A study of typical characteristics of dysfunctional families. Provides the basis for suggested intervention techniques, appropriate areas of family education, and guidelines for effective therapy.

CP 6617  Treatment Theories and Modalities of Addictive Disease (3)
A study of historical perspectives and the most effective treatment and assessment approaches of addictive diseases.

CP 6618  Counseling Military Service Personnel and their Families (3)
Examines essential knowledge and current research on counseling issues that impact military personnel and their families. Analyzes the concerns that affect military families through pre-, during, and post-deployment, as well as significant issues for children and adults in school and agency settings. Also addresses issues relating to student veterans pursuing post-secondary education.

CP 6619  Assessment, Diagnosis, Treatment Planning, and Community Reintegration for Military Service Populations (3)
Utilizes essential knowledge and current research on counseling issues that impact military personnel and their families. Obtains, analyzes and applies assessments, evaluative data, and diagnostic information to
the development of comprehensive treatment planning for behavioral symptoms, short-term objectives, long term goals and therapeutic interventions for military personnel and their family members in personal, educational, and community environments. Psychopharmacology treatment interventions are covered.

CP 6620 Readings in Counseling and Psychology (1-3)
An independent exploration of the literature related to verbal and nonverbal communication, listening, and human relations under the supervision of a faculty member. An examination will be required upon the conclusion of the course. This course may be offered as a seminar. See semester hour limits listed under Course Restrictions in General Regulations section.

CP 6625 Specialized Study in Counseling (1-3)
A study of a problem or a topic using research techniques or a guided program of readings. Preparation of a scholarly paper is required and may involve an oral defense. A specialized study may be substituted for only one required course or elective in a student’s program. Approval by the student’s advisor, the course instructor, and department chair is required. See semester hour limits listed under Course Restrictions in General Regulations section.

CP 6633 Spiritual Issues in Counseling (3)
Spiritual issues in counseling is a course designed to assist students to become more informed about and aware of spiritual issues that affect themselves, their clients, and society. The topics discussed in class have to do with a survey of religious/spiritual traditions, assessing religious/spiritual dimensions, theories of religious/spiritual models, ethics of working with clients around religious/spiritual issues, and strategies and techniques for treatment interventions around religious/spiritual dimensions.

CP 6634 Drug Education, Prevention, and Intervention (3)
A study of commonly abused drugs, drug abuse prevention, and treatment techniques. Examines characteristics of people at high risk to become substance abusers/addicted.

CP 6635 Crisis Response Management (3)
This course provides community personnel, school personnel and other education and/or health professionals/paraprofessionals information about the nature of global and local disasters. Course content includes appropriate responses to a variety of crisis scenarios and information on major theories of crisis intervention.

CP 6636 Foundations of Student Affairs (3)
This course is designed to provide a comprehensive introduction to the field of student affairs in higher education through a review of its historical and philosophical influences; purpose, roles, and functions; and contemporary issues and trends.

CP 6637 Administration of Student Affairs Programs (3)
This course is designed to provide the knowledge and skills required for effective administration of student affairs in higher education. The course will focus on designing, managing, and evaluating student affairs programs.

CP 6638 Internship: Student Affairs Counseling (3)
This course provides supervised student affairs counseling experiences in the college environment. The experience is accompanied by scheduled on-campus supervision with the university supervisor. Internship equals 300 clock hours, to include 120 hours of direct student affairs service. Prerequisite: CP 6650. Grading system is Pass/Fail.

CP 6639 Internship: Student Affairs Counseling (3)
This course provides supervised student affairs counseling experiences in the college environment. The experience is accompanied by scheduled on-campus supervision with the university supervisor. Internship equals 300 clock hours, to include 120 hours of direct student affairs service. Prerequisite: CP 6638. Grading system is Pass/Fail.

CP 6641 School Counseling and Program Management (3)
In this course students will study planning, designing, implementing, and evaluating a comprehensive developmental school guidance program. The school counselor’s role as an advocate and school leader will be emphasized. Historical perspective, new academic achievement, guidance curriculum and ethical and legal issues will be included.

CP 6642 Group Dynamics and Counseling (3)
The study of group dynamics and group counseling theories, including ethics, group leadership styles, types of groups, group counseling methods and skills, group developmental stages, and therapeutic factors of group work. Experiential activities included. Prerequisite: CP 6610

CP 6644 Community Counseling Services (3)
A study of multifaceted, comprehensive, community counseling and school psychological services, needs assessment, resource identification, program development, and program evaluation. Alternative models of service delivery and alternative sources of funding and program regulation are explored.

CP 6645 Current Trends in School Counseling (3)
The course is designed to provide the students with relevant information and current trends in the school counseling profession.

CP 6649 Theories of Counseling (3)
A study of the major theoretical approaches in counseling including the affective, behavioral, and cogni-
COURSE DESCRIPTIONS

CP 6650 Practicum (3)
This study provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed professional counselor would perform. Practicum provides for the development of counseling skills under supervision. The student must complete 100 clock hours including a minimum of 40 hours of direct service with clients. Experiences are accompanied by regularly scheduled, weekly on-campus group supervision designed to provide opportunity for analysis and evaluation of supervised activity. Grading system is Pass / Fail. Prerequisites: Permission of instructor and department chair required. CP 6600, CP 6610, CP 6642, CP 6649. This practicum does NOT meet criteria for licensure.

CP 6651 Counseling Diverse Populations (3)
A study of the psychological and sociological factors relative to cultural diversity. Special emphasis is placed on current practices utilized in counseling interventions with culturally diverse populations. Special emphasis is placed on current practices utilized in counseling interventions with diverse populations as well as increasing counselor sensitivity to the unique needs and experiences of such populations.

CP 6652 Rehabilitation Delivery and Process (3)
A study of the rehabilitation process including historical developments, philosophical bases, and legal aspects, with an emphasis on the operational aspects of rehabilitation service delivery systems.

CP 6654 Sexual Minority Issues in Counseling (3)
Examines essential knowledge and current research on counseling issues that impact Lesbian, Gay, Bisexual, Transgender, Queer, Questioning, Intersex, Asexual, Ally and Two-Spirited populations. Analyzes the historical and current perceptions and concerns that affect LGBTQQIA2S adults, adolescents and children. Examines counseling competencies, developmental models and treatment modalities in relation to these populations’ needs.

CP 6655 Practicum: General Counseling (3)
This study provides an opportunity for the student to perform, under supervision, a variety of activities that a regularly employed counselor would perform. Practicum provides for the development of counseling skills under supervision. The student must complete 100 clock hours including a minimum of 40 hours of direct service with clients. Experiences are accompanied by regularly scheduled, weekly on-campus group supervision designed to provide opportunity for analysis and evaluation of supervised activity. Grading system is Pass / Fail. Prerequisites: Permission of instructor and department chair required. CP 6600, CP 6610, CP 6642, CP 6649. This practicum does NOT meet criteria for licensure.

CP 6656 Marriage, Family, and Sex Therapy Counseling (3)
The course is designed to provide the student with a conceptual framework for dealing with marriage, family, and sex problems. Students will be equipped with the skills necessary for working with all members of the family.

CP 6657 Internship: School Counseling (3)
This course provides supervised school-based experience at both the elementary and secondary levels. The school-based experience will be accompanied by scheduled on campus supervision with the university supervisor. Course equals 300 clock hours of internship, to include 120 hours of direct student service. Grading system is Pass/Fail. Prerequisite: CP 6650.

CP 6658 Internship: School Counseling (3)
This course provides supervised school-based experience at both the elementary and secondary levels. The school based experience will be accompanied by scheduled on campus supervision with the university supervisor. Internship equals 300 clock hours, to include 120 hours of direct student service. Grading system is Pass/Fail. Prerequisite: CP 6657.

CP 6659 Internship: Mental Health (3)
This course provides an opportunity for the student to perform under supervision a variety of activities that a regularly employed professional counselor in an agency setting would be expected to perform. Experiences are accompanied by regularly scheduled, weekly group supervision. Course equals 300 hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail. Prerequisite: Completion of CP 6650 and adviser approval.

CP 6660 Internship: Mental Health (3)
This course provides an opportunity for the student to perform under supervision a variety of activities that a regularly employed professional counselor in an agency setting would be expected to perform. Experiences are accompanied by regularly scheduled, weekly group supervision. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system
CP 6661 Internship: Mental Health (3)
This course provides an opportunity for the student to perform under supervision a variety of activities that a regularly employed professional counselor in an agency setting would be expected to perform. Experiences are accompanied by regularly scheduled, weekly group supervision. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail. Prerequisite: Completion of CP 6650 and adviser approval.

CP 6662 Internship: Community Counseling (3)
This course provides supervised, on-the-job, experiences in Community Counseling. These field experiences are accompanied by weekly, on-campus, supervised sessions. Students must receive individual and group supervision. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail. Prerequisite: Completion of CP 6650 and adviser approval.

CP 6663 Internship: Community Counseling (3)
This course provides supervised, on-the-job, experiences in Community Counseling. These field experiences are accompanied by weekly, on-campus, supervised sessions. Students must receive individual and group supervision. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail. Prerequisite: Completion of CP 6650 and adviser approval.

CP 6665 Internship: Addictions Counseling (3)
This course provides an opportunity for the student to perform a variety of activities that a regularly employed professional counselor in an Addictions Counseling Treatment setting would be expected to perform. Experiences are accompanied by regularly scheduled, weekly group supervision. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail.

CP 6666 Internship: Addictions Counseling (3)
This course provides an opportunity for the student to perform a variety of activities that a regularly employed professional counselor in an Addictions Counseling Treatment setting would be expected to perform. Experiences are accompanied by regularly

CP 6670 Internship: Rehabilitation Counseling (3)
This course provides supervised experiences in a rehabilitation setting. The experience will be accompanied by scheduled on campus supervision with the university supervisor. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail. Prerequisite: CP 6650

CP 6671 Internship: Rehabilitation Counseling (3)
This course provides supervised experience in a rehabilitation setting. The experience will be accompanied by scheduled on campus supervision with the university supervisor. Course equals 300 clock hours of internship. Students may take up to six semester hours of internship per semester with adviser approval. Each student must complete 120 hours of direct service with clients. Grading system is Pass/Fail. Prerequisite: CP 6650

CP 6680 Counseling Approaches to Working with Individuals who are Deaf/Hard-of-Hearing (3)
This course offers students an opportunity to learn the principles of deaf culture and apply medical, psychological, and sociological research/techniques to counseling with individuals who are deaf or hard-of-hearing. Prerequisite: Permission of instructor.

CP 6681 Seminar: Counseling Approaches to Working with Visual Impairment (3)
This course is taken in conjunction with the practicum/internship in rehabilitation counseling, offers students an opportunity to apply medical, psychological and sociological research/techniques to counseling with individuals who are visually impaired. Prerequisite: Permission of instructor.

CP 6682 Leadership and Advocacy: Deaf and Hard-of-Hearing Services (3)
The purpose of this course is to develop an appreciation for the organization, administration, and coordination of services for individuals who are deaf or hard-of-hearing. Strategies for consulting with various agencies, educating the general public, counseling with individuals who are deaf or hard-of-hearing, and their families as well as approaches for advocating for these populations will be explored. Prerequisites: CP 6652 or permission of instructor.
CP 6683 Leadership and Advocacy: Visual Impairment (3)
The purpose of this course is to develop an appreciation for the organization, administration and coordination of services for the visually impaired. Strategies for consulting with various agencies, educating the general public, counseling with the visually impaired and their families as well as approaches for advocating for these populations will be explored. Prerequisites: CP 6650, CP 6652, PSY 6653. Taken in conjunction with internship.

CP 6685 Case Management (3)
A study of the case management process, including case findings, service coordination, referral and utilization of other disciplines, and client advocacy.

CP 6686 Job Development and Placement (3)
A study of the analysis of job development and placement in the rehabilitation process and related fields.

CP 6687 Job Development, Placement, and Workplace Accommodations for Individuals with Severe Disabilities (3)
This course is a study of effective job development and placement techniques and workplace strategies in the rehabilitation process for individuals who are Blind, Deaf, Hard-of-Hearing, Mentally Ill, and individuals who have Traumatic Brain Injuries, Spinal Cord Injuries, Learning Disabilities, and Multiple Disabilities.

CP 6691 Research Methodology (3)
The study and evaluation of research methods commonly used in the social sciences. The course will provide information necessary to understand and apply research processes, synthesize knowledge and writing, and plan and organize research problems for interpretation and application of research results. Application of these skills in the form of a written project using the Publication Manual of the American Psychological Association (APA) is required. Students enrolled in the Counseling and Psychology programs are required to take CP 6691 Research Methods at Troy University. This course cannot be substituted with another Troy University research course. However, a graduate-level Research Methods course taken at another CACREP-accredited program can be transferred upon approval. A grade of “B” or better is required.

CP 7700 Advanced Practicum in Group Leadership (3)
Supervised training in group leadership, including experiential and didactic activities, focusing on group facilitation. Prerequisites: CP 6642 and CP 6650 or equivalents and permission of the instructor. Enrollment restricted to Ed.S. students.

CP 7701 Seminar in Counseling and Student Personnel Work (3)
Individual readings and conferences, group discussions and reports focusing on the advanced student’s special interest in counseling and human development. Emphasizes research findings.

CP 7702 Advanced Theories and Techniques of Counseling (3)
An in-depth study of current viable theories of counseling utilizing techniques appropriate for each framework. Some areas to be covered include the cognitive, affective, and eclectic approaches. Prerequisite: CP 6649 or equivalent

CP 7725 Advanced Studies in Counseling (1-3)
CP 7726
CP 7727 A study of a problem or topic using research techniques or a guided program of readings. Preparation of a scholarly paper is required and may involve an oral defense. A specialized study may be substituted for only one required course or elective in a student’s program. Approval by the student’s advisor, the course instructor, and department chair is required.

CP 7740 Theories of Counseling Supervision (3)
A focus on the theories and techniques utilized in counseling supervision will be studied. Students will experience components of the process involved in the supervisor/supervisee relationship and will be provided with basic supervisory skills. Prerequisite: Advisor Approval

CP 7753 Internship: Advanced Counseling (1-3)
CP 7754 CP 7755 This course provides advanced graduate students with full-time, supervised, on-the-job experience in settings appropriate to their area of specialization. Experiences accompanied by weekly on-campus meetings designed to provide opportunity for analysis and evaluation of supervised activity. Grading system is Pass/Fail.

CP 7791 Research Seminar (1-3)
CP 7792 CP 7793 This course provides in-depth assistance to prepare students for development of, research for, and preparation of theses or field project proposal.

CP 7794 Field Project (3)
An independent study of a problem of a practical nature which is encountered in a field setting. A proposal for the study and a written report of the findings must be approved by the student’s advisory committee. The advisory committee will administer an oral examination covering the research findings. Grading system is Pass/Fail. Enrollment limited to Ed.S. students.

CP 7795 Thesis (3-6)
CP 7796 Research for and preparation of a scholarly paper
Related to a counseling and guidance problem or situation under the supervision of the student’s advisory committee. Grading system is Pass/Fail. Enrollment limited to Ed.S. students.
An examination of a particular subject which is not and the societal reaction to criminals. of the etiology of criminal behavior, criminal law, and drug abuse. It describes traditional and modern approaches to solve the problem of drug abuse. The course also discusses and evaluates various criminal justice drug policies and their impacts on society.

This course explores relationships between crime policy and empirical evaluation research. Students will learn to critically analyze empirical evidence regarding specific criminal justice and crime-related policies, identify factors that influence policy making, and describe challenges associated with evaluation research of crime-focused programs.

This course provides an in-depth analysis of criminal justice policy and its association with the American Criminal Justice System. It examines the current nature of crime and criminal justice policies and evaluates their effectiveness, outcomes, and implications. Finally, this course discusses some contemporary issues and future trends related to criminal justice policy.

An in-depth overview of major criminological perspectives as well as their nature and extent, especially those found in the United States, and an analysis of the etiology of criminal behavior, criminal law, and the societal reaction to criminals.

An examination of a particular subject which is not offered under the normal course offerings. May be repeated (with different topics) for credit. See semester hours limited list under Course Restriction in General Regulations section.

This is a survey of the field of victimology. We shall examine the risks, and consequences of crime for its victims. Issues considered include victim-offender relationships, characteristics of victims, the nature, and consequences of the injuries they experience, and criminal justice response to crime victims.

This course provides a comprehensive overview of the history of proliferation, and types of transnational crime. The course will also discuss the major issues related to criminal justice policies, national and international approaches to control transnational crime.

Functional descriptions of the major components of digital computer architectures are explored, explored, such as arithmetic and control units, memory hierarchies, channels and characterizations and interactions of individual major components of small and large computers. Also included are minicomputer architectures, specialized computer architectures, and distributed data processing architectures.

This course provides an introduction to cyber security. Topics include security protocols and cryptography; cyber threats and defenses; attack modeling and risk analysis: cybercrime: cyber law, ethics and policies.

This course involves the study of a problem or problems using research techniques. Selection of problem is to be approved by the student’s advisor, instructor, college dean, and Dean of the Graduate School. The study should contribute to a student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in the specialized study courses may not exceed three (3) semester hours. The course may not be substituted for a required course. See semester hour limits listed under Course Restrictions in General Regulations.

This course covers the computational methods for analyzing information about the sequence, structure, and function of biological molecules and systems, including DNA, RNA, proteins, metabolites, and other small molecules. Topics include: multiple
sequence alignment, Hidden Markov Models, mathematical analysis of phylogenetic trees, physical mapping and assembly of sequences, genome rearrangement.

CS 6632 Computer Vision (3)
Computer Vision is a topic that combines techniques from several different subfields of applied mathematics and computer science. Broadly, computer vision algorithms are used to process, analyze, and understand static and motion picture data. Frequency/time-domain transformations and Machine Learning algorithms serve as the backbone of Computer Vision.

CS 6634 Cloud Computing (3)
This course will cover a wide range of cloud computing related concepts. Topics include but not limited to cloud computing principles, economics, protocols, infrastructures, components, services architectures and implementations. In addition, popular cloud solutions such as AWS, and Azure are discussed. Students will become familiar with the details of the major services related to Compute, Storage, Network and Security.

CS 6635 Image Processing (3)
This course introduces fundamentals and research directions in image processing. Topics include but are not limited to image representation and description, image transformation and filtering, image enhancement, restoration and reconstruction, image segmentation, image compression, object recognition, as well as image information retrieval.

CS 6636 Data Visualization and Exploration (3)
Science of data visualization and exploration are discussed to understand data. Various visualization methods are compared for their applications and effectiveness. Data visualization techniques are applied to various application domains.

CS 6640 Advanced Database Concepts (3)
This course discusses design and implementation issues associated with relational and object-oriented databases. Topics include E-R modeling, relational modeling, normal forms, data storage, and concepts of object-oriented data modeling.

CS 6643 Theory and Design of Compilers (3)
The formal properties of grammars, lexical and syntactic analysis, macro generators, and code selection are presented. Additional topics include hardware compilers, extensibility of languages, and implementation of simple compilers.

CS 6645 Performance in Analytical Models (3)
The fundamental concepts and structures for understanding the different approaches in analytical structures. Techniques such as Indexing, Distributed Databases, Parallel Queries, Virtualization, Fitness Function Optimization, and Biological Computing will be covered.

CS 6646 Information Systems for Operations and Management (3)
Conceptual and practical foundations of information processing systems’ support for management and decision-making functions are examined. Computer system project management, economic and legal considerations of management information systems, systems implementation and evaluation are additional topic areas covered in this course.

CS 6647 Simulation and Modeling (3)
The theory and design of modeling problems, validation and verification of simulation models for dynamic queuing and static Monte Carlo problems are reviewed. Discrete event and continuous simulation models are analyzed. Random number generation used in simulation languages and the implementation of models on computer hardware and software engineering using general purpose and simulation languages represented in this course.

CS 6648 Optimization Modeling (3)
A systems approach is explored as it relates to using various algorithms to solve different classes of managerial problems with a computer.

CS 6649 Special Topics in Computer Science (3)
A series of advanced topics in areas of computer science is offered. The course details a structured discussion of varied subjects to include technological updates, a more intense study of topics covered in other course offerings, and an introduction to advanced concepts such as artificial intelligence, the theory of computability, and formal languages.

CS 6660 Algorithmic Graph Theory (3)
Theory and algorithms for solving computational problems in graphs and hypergraphs. The topics may include minimum transversals, maximum matchings, trees and bipartite graphs, chordal graphs, planar graphs and graph coloring, hypertrees, chordal hypergraphs, planar hypergraphs and hypergraph coloring, colorability, perfection, and chromatic spectrum.

CS 6661 Big Data Algorithms and Systems (3)
Algorithmic techniques and information system platforms to handle big data are discussed in this course. Topics include but not limited to randomized methods, data stream algorithms, various big data platforms, such as Hadoop, and Spark.

CS 6664 High-Performance Computing (3)
This course teaches the methods and technology of high-performance computing and its usage in solving scientific problems. Topics focus on advanced computer architectures, parallel algorithms, parallel languages, performance-oriented computing, and grid and cluster computing.
CS 6666  Computer Graphics (3)
This course covers the theory, design, implementation and applications of computer graphics. Topics include common graphics hardware, 2D and 3D transformations and viewing, basic raster graphics, concepts image processing, modeling, rendering, illumination, shadows, textures, programmable shaders, and animation.

CS 6668  Network Security (3)
The course covers theory and practice of communication security in computer systems and networks. Topics include authentication and access control, virtual networks, shared key encryption, public key encryption, and digital signature.

CS 6670  Applied System Analysis and Design (3)
Introduction to information systems development process. Systems analysis methods, covering activities, tools, and techniques for requirements gathering, modeling and specification. Systems design methods, including activities, tools and techniques for design, with an emphasis on architecture, rapid development and prototyping, and detailed design. Introduces classical approaches such as information engineering as well as object-oriented analysis and design.

CS 6672  Distributed Algorithms (3)
This course will study issues in distributed computing through models, algorithms and bounds, with an emphasis on fundamental problems. Topics in this course will include but not limited to basic models and complexity measures, leader election, mutual exclusion, consensus, fault-tolerance, broadcast and multicast, causality, synchronization, simulations among models.

CS 6674  Network and Information Security (3)
The goal for students in this course is to learn the fundamentals of network and information security. The topics include introduction to network security, basic cryptography, authentication, cipher techniques, attacks and defenses on computer systems, overview of essential concepts and methods for providing and evaluating security in information processing systems, importance of management and administration, social issues such as individual privacy and public policy.

CS 6676  Advanced Computer Network (3)
The goal of this course is to discuss contemporary issues of computer networks such as Wireless networks, Sensor networks, Optical Networks etc. Students are expected to review research papers and work on semester long projects. Topics will cover issues related to network communication protocol stacks and simulation of these computer networks. This course assumes good knowledge of object-oriented programming.

CS 6678  Advanced Artificial Intelligence (3)

CS 6679  Advanced Penetration Testing and Network Defense (3)
The course focuses on modern state of art information system technologies, their security vulnerabilities and possible defense strategies. Topics include but not limited to penetration tools, cyber security strategies, threat intelligence, log analysis.

CS 6680  Advanced Software Engineering (3)
This course covers advanced theoretical concepts of software engineering. Topics include software development models, requirement analysis, project planning and management, software architecture and design, implementation, and testing and validation.

CS 6681  Video Game Design and Development (3)
This course introduces students to digital game design. Broad topics include but not limited to design, prototyping, coding, and testing of digital games. The course emphasizes on the use of modern tools, techniques, and game development engines.

CS 6682  Machine Learning (3)
Introduction to Machine Learning, covering key algorithms in supervised, unsupervised, and reinforcement learning, such as Kernel Methods, Bayesian Networks, Hidden Markov Models, K-Means, etc. The class will also address key concepts and challenges in Machine Learning, such as the bias-variance tradeoff, generalization, regularization, boosting, etc. The course is project-based, with a focus on application in computational biology/bioinformatics. A basic knowledge of statistics and probability is a must.

CS 6699  Research and Thesis (1-6)
Guided research in Computer Science results in the preparation of a scholarly thesis. The thesis includes a discussion of the research design and methodology available to plan and conduct a systematic, thorough, critical, interpretative and analytical research in an area appropriate to the interest of the individual student and consistent with the degree program. The course requires students to prepare a thesis within guidelines provided by the faculty member and to defend it before a thesis committee.

DRAMA

DRA 5543  Theatre History I (3)
A history of the theatre from the origin of tragedy through English drama of the 17th century. A study of dramatic literature and elements of the theatre designed to enhance the student’s appreciation of
contemporary theatrical practices in the staging of the “classics.”

DRA 5551  Directing I (3)
Script analysis and directing principles with studies in the direction of contemporary scenes one-act plays.

DRA 6625  Specialized Study in Area of Theatre (1-3)
Under the supervision of the faculty course supervisor, the student may pursue an extensive study of a particular area which fits his/her academic needs but is not available in the regular curriculum. Each proposal must be approved the preceding term by the student’s advisor, the faculty course supervisor, and the department chairperson. Total credit for any combination of enrollments in these courses may not exceed six semester hours. See semester hour limits listed under Course Restrictions in General Regulations section.

EDUCATIONAL ADMINISTRATION & LEADERSHIP

EAL 6609  Communication and Problem Solving (3)
This course is designed to develop communication and problem solving skills required for effective leadership of people, processes, and organizations. Emphasis will be placed on verbal, interpersonal, and written communication, group dynamics, conflict resolution and consensus building. Special attention will be given to working diverse populations.

EAL 6625  Specialized Topics in Educational Leadership (3)
A seminar concerned with an in-depth examination of one topic that is acutely important to educational leadership. Students are expected to use primary resources, journals, and the Internet to research and discuss the topic. The primary format of the class will be discussion, although group exercises, individual presentations and written response will also be used.

EAL 6633  Leadership: Theory and Practice (3)
This course deals with the development of knowledge and skills needed for key leadership challenges such as vision, motivation, staff development, inclusive decision making and strategic planning are stress. The concept of leadership is discussed from both a theoretical and practical standpoint. Distinctions between management skills and leadership skills are emphasized. The ethical and moral aspects of leadership are examined.

EAL 6643  Administration of School Personnel (3)
This course develops capacities to effectively recruit, coordinate, and develop human resources within an educational environment. Administrative procedures such as facilities management, materials management, and technology management will also be discussed.

ECE 5544  Internship Seminar (3)
This course provides interns an opportunity to develop analytical thinking skills through examining broad educational issues and concerns, topics on the state and local levels, and those of personal interest. The scope of the course ranges from juvenile law, classroom management, professionalism, professional development for teachers, and other course topics. This course must be taken concurrently with internship. Grading system is Pass / Fail.

ECE 6618  Designing Prosocial Learning Environments (3)
An examination of early childhood education learning environments. Program models such as the English Infant School, the Open School, Montessori’s Prepared Learning Environment and other selected models will be studied. In addition, techniques for creating, maintaining, and assessing an environment that fosters knowledge construction, integration of technology resources, the development of autonomy, and independence will be examined. Students will investigate and implement these techniques with young children.

ECE 6620  Inquiries into Physical Knowledge (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding about their own questions related to young children’s construction of physical knowledge and the facilitation and evaluation of that knowledge construction in the early childhood classroom. In addition, the students will interact with young children through observation and participation in the application of appropriate physical knowledge experiences and the investigation and evaluation of children’s construction of knowledge.

ECE 6622  Parents as Partners in Education (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding of and develop techniques to strengthen the school-parent relationship while developing mutual supporters for the total development of the young child. Pertinent topics include: stress and children, parents and families in crisis, and helping children cope with the future.

ECE 6625  Specialized Study in Early Childhood Education (1-3)
A study of a problem using research techniques. Selection of problem must be approved by the professor under whom the study is to be made and the Dean of Education. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed four semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semes-
COURSE DESCRIPTIONS

ECE 6628  Inquiries into Literacy Acquisition (3)
The purpose of this course is to assist graduate students as they investigate and construct knowledge of symbolic representation in all of its form. Topics include: children’s talk, play, art, writing process, music, movement and construction.

ECE 6630  Inquiries into Representation (3)
The purpose of this course is to assist graduate students as they investigate and construct knowledge of developmentally appropriate techniques for focusing curriculum delivery through quality children’s literature. Pertinent topics include: award winning authors and titles found in children’s literature among a variety of genre, along with developmentally appropriate techniques for focusing curriculum delivery through quality children’s literature.

ECE 6631  Historical Perspectives in Early Childhood Education (3)
The purpose of this course is to assist graduate students in constructing a sense of identity with the field of early childhood education through an understanding of the past as a prologue to contemporary thought and practice. The philosophy, history, and impact of education from the time of Plato to the present will be examined with special emphasis on the major influences in early childhood education.

ECE 6632  Authentic Assessment in the Early Childhood Classroom (3)
The purpose of this course is to explore the investigation and evaluation of teaching and learning in the early childhood education program through the use of human and material resources. Purposes, types, and designs for developmentally appropriate evaluation will be examined.

ECE 6633  Integrated Thematic Curriculum (3)
The purpose of this course is to assist graduate students as they construct an operational knowledge of integrated thematic curriculum. The course will focus on theory, planning, implementation, and evaluation of an integrated thematic curriculum. Additionally, issues surrounding the implementation of innovative teaching methodology in traditional settings will be examined. This course serves as the capstone course for the MS ECE program and must be taken as one of a student’s final four courses. A grade of “B” or better is required. Advisor approval required.

ECE 6634  Inquiries into Logico-Mathematical Knowledge (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding about their own questions related to young children’s construction of logico-mathematical knowledge and the facilitation and evaluation of that knowledge construction in the early childhood classroom. In addition, the students will interact with young children through observation and participation in the application of appropriate logico-mathematical knowledge experiences and the investigation and evaluation of children’s construction of knowledge.

ECE 6635  Program Evaluation in Early Childhood (3)
The purpose of this course is to explore emergent literacy and the role of developmentally appropriate practices for young children, N-3. The course includes emphasis on: role of the teacher and teaching reading to young children, children and multiple learning styles, the reading process, and developing a developmentally appropriate reading program for young children, N-3.

ECE 6640  Integrating Children’s Literature (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding of and develop techniques to incorporate quality children’s literature across the curriculum. Pertinent topics include award winning authors and titles found in children’s literature among a variety of genre, along with developmentally appropriate techniques for focusing curriculum delivery through quality children’s literature.

ECE 6674  Early Childhood Internship Grades P-3 (6)
The professional internship program is the culmination of a student’s experience as they begin a career in early childhood education by implementing their knowledge and skills in a supervised practice setting. Students will interact with young children through observation and participation in the application of appropriate logico-mathematical knowledge experiences and the investigation and evaluation of children’s construction of knowledge.

ECE 7725  Specialized Study in ECE (1-3)
A study of the problem using research techniques. Selection of problem must be approved by the professor under whom the study is to be made. See General Regulations for procedures. Total credit for any combination of enrollments in these courses may not exceed four semester hours.

ECE 7760  Leading for Learning in the School Environment (3)
This course is designed to extend the teacher leader from the classroom to the school environment. Students will be provided with a study of the processes involved in evaluating school settings and the problems faced by instructional leaders. Major emphasis will be placed on the transition to a teacher leader from the classroom to the school environment. Characteristics of leading for learning will be explored. Topics that affect today’s teacher leaders and positive ways to deal with instructional issues will also be investigated.
ECE 7761 Effective Schools and Teachers (3)
This course is designed to examine the knowledge base for effective schools to enable teacher leaders to develop skills in their own practices. There will be emphasis through in-depth study of the research literature on effective school settings. Students will critically examine, analyze, and evaluate the components and characteristics of effective school environments.

ECE 7762 School Accreditation Process (3)
The purpose of this course is to examine the local, state, regional, and national standards associated with school accreditation. The accreditation process in these areas will be reviewed and analyzed. Students will compare and contrast the different ways schools are accredited. Topics such as: the accreditation process, school self-study procedures, validation/documentation, roles of school personnel, and creating school improvement plans will be investigated.

ECE 7763 Legal Issues and Ethics in Education (3)
The purpose of this course is to allow educational leaders to explore the organizational development and maintenance services required for effective operation of the schools within the legal framework established by local, state, and federal legislative and judicial requirements. Major emphasis will be given to studying legal issues and community relations. Legal issues and services related to exceptional children will be closely examined. The development of ethical standards, informed legal decision making, and emergency procedures for ensuring safety, as well as the political factors which impact schools, society and community relations will be studied.

ECE 7790 Qualitative Research Methodology (3)
The purpose of this course is to provide graduate students with an introduction to qualitative research methodology. The historical development, rationale, and relationship to quantitative research will be examined. Qualitative research methods will include procedures for selection and sampling and for data collection and analysis. Students will read a variety of qualitative studies and conduct a brief qualitative research project. Prerequisite: Course in research or tests and measurement. A grade of “B” or better is required.

ECE 7793 Problem Analysis in ECE (3)
A study of processes involved in identifying, framing, evaluating, analyzing, and seeking information about problems. Emphasis is given to information collection and processing. Students will select and analyze a problem related to early childhood education or elementary education. Restricted to students enrolled in an Education Specialist program.

ECONOMICS

ECO 6630 Advanced Macroeconomics (3)
A survey of modern economic theories of the business cycle. The mathematical methods employed in macro and micro-foundations of macroeconomics will also be covered.

ECO 6631 Advanced Microeconomics (3)
A mathematical analysis of consumer choice, firm production decisions, and market exchange. Mathematical methods employed in microeconomics will also be covered.

ECO 6632 Econometrics I (3)
An introduction to regression analysis as employed in cross sectional time series econometrics. The statistical and probability tools required for regression analysis will also be covered.

ECO 6633 Econometrics II (3)
A survey of important regression models employed in econometric analysis. Topics will vary according to the interest of instructor, but could include forecasting models, panel data analysis, limited dependent variable, and spatial econometrics.

ECO 6634 Mathematical Economics (3)
An introduction to fundamental mathematical methods used in economic analysis: overviews of differential calculus, linear algebra, constrained optimization, and comparative statics. Also includes an introduction to mathematical statistics as applied to econometrics.

ECO 6652 Macroeconomics and Forecasting (3)
An analysis of the courses of business cycles with the applications of macroeconomic theory and economic forecasting techniques available to the business manager. Prerequisite: All business foundation courses or equivalent.

ECO 6654 Labor Economics (3)
An overview of the forces of supply and demand as related to labor markets; wage determination and resource allocation in U.S. labor market operations; the interrelationship of labor and the national economy, wages, prices, and employment; and labor economics in the microenvironment. An introduction to wage determination policies and strategies in a competitive global marketplace. Prerequisite: All business foundation courses or equivalent.

ECO 6655 Managerial Economics for the Global Manager (3)
A study of the decision-making process of business managers when operating in a global economy. The efficacy of market based approaches to real world problems is considered. Various theories of the firm and managerial strategies are used to study the optimal decision-making rules for business firms when
such firms must operate under conditions of uncertainty and in a global environment. Graduate standing, acceptance into the MBA program, all undergraduate business prerequisite courses or equivalent completed.

ECO 6657 International Trade and Economics (3)
Principles and problems of international economics, trade theory, international payments, and monetary policies, economic integration, international economic institutions and policies, and contemporary developments in political economy. Prerequisite: All business foundation courses or equivalent.

ECO 6660 Public Choice (3)
An analysis of government decision-making using economic models. Topics include voting, the theory of elections, interest groups, rent seeking, bureaucracies, and the organization of legislatures.

ECO 6661 Austrian Economics (3)
An introduction to the market process theory of the Austrian School of economics. Topics include spontaneous order, entrepreneurship, the discovery function of the market, information transmission, and the role of time and uncertainty in economic activity.

ECO 6662 History of Economic Thought (3)
An analysis of the development of economic thinking and the history of the discipline, including the contribution of major economists and trends in economic analysis.

ECO 6663 Economic Institutions and Prosperity (3)
Analysis of the role of institutions in an economic system and an examination of the types of institutions which allow for prosperity, growth, and human flourishing. Theories of institutional change may also be studied.

ECO 6664 International Economic Development (3)
Examination of theories and case studies of how nations develop and rise out of poverty. Topics would include the impact of foreign aid, comparative economic systems, and international trade. Specific countries of focus will vary with instructor.

ECO 6665 Monetary Theory and Policy (3)
Examination of the role of money, credit, and financial institutions in an economy, and the history of the development of money and financial institutions.

ECO 6666 Constitutional Economics (3)
Examination of the role constraints beyond election of government. Normative theories of constitutional constraints and comparative analysis of the performance of constraints will be covered. Theories of constitutional change will be examined.

ECO 6667 Economics of Public Policy (3)
Tools of economic theory used in the analysis of government sector policies. Topics will include normative vs. positive theories of government policy, cost-benefit analysis, theories of market failure, and comparative institutional analysis.

ECO 6668 Advanced Austrian Economics (3)
Further study of the Austrian theory of the market process. Topics include roles of the equilibrium construct in Austrian versus neoclassical price theory, capital theory, and the Austrian theory of business cycle. Prerequisite: ECO 6661.

ECO 6690 Master’s Research (3)
Directed research on a selected topic of economics, with the advice and approval of a faculty advisor, culminating in a research paper of appropriate length and original scholarship.

ECO 6695 Thesis Hours (1-9)
Directed research on a selected topic of economics, based on a student’s proposal, and with the advice and approval of a faculty advisor, culminating in a research paper of appropriate length and original scholarship. Pass/Fail

GIFTED EDUCATION

EDG 6666 Nature and Needs of Gifted Individuals (3)
This foundation course in the study of gifted education and talent development focuses on understanding gifted individuals, assessment and identification issues in finding gifted students in the schools, models often used to provide education for gifted students and developing support systems for programs for gifted learners.

EDG 6667 Creativity (3)
This course in creative thinking in gifted education focuses on understanding creativity and creative students. This course emphasizes the importance of helping children and adolescents become more self-actualized, creative individuals to better enable them to make important contributions to society.

EDG 6668 Integrating Thinking Skills into the Curriculum (3)
The focus of this course is the integration of critical and productive thinking skills into the curriculum for gifted learners. This course emphasizes an inquiry-based approach to differentiation of the curriculum content for gifted learners.

EDG 6669 Teaching Methods in Gifted Education (3)
This methods course in curriculum development in gifted education focuses on planning, designing, and developing appropriate curriculum for gifted students. This course emphasizes the connection between the needs of gifted learners and the cognitive, affective, social, and aesthetic areas of curriculum experiences.
EDG 6670  Special Populations of Gifted Students (3)
This course examines ways in which teachers can identify and plan for gifted children from special and underrepresented populations with particular emphasis on underachieving students, minority students, and students with physical, emotional, and learning disabilities.

EDG 6696  Practicum in Gifted Education (3)
Supervised experiences related to instruction in gifted education. The application of skills, concepts, and principles acquired in previous courses will be emphasized. Prerequisite: EDG 6666, EDG 6667, EDG 6668, EDG 6669, and EDG 6670, or equivalents, or permission from instructor. A grade of "B" or better is required.

EDU 5590  Global Identity: Connecting Your International Experience to Your Future (1-3)
Studying abroad is a transformative experience that has the power to challenge our thinking and our perspective on the world. This course aims to attract students across disciplines, to promote interprofessional development, and to prepare them to expand their understanding of their global identity and communicate their growth in intercultural competence toward their personal and professional development. Students make connections between their study abroad experience and the broader range of skills connected with this experience, to become a competitive member of a global workforce.

EDU 6600  Classroom Management and Behavior Intervention (3)
This course is a study of current theory, research, and practice in psychology, sociology, leadership, and human behavior as related to school age students, the nature of the educational organization, and the role of the teacher in that organization. Emphasis is placed upon the formation of a positive, developmental philosophy for effective management of classroom resources and student behavior as well as the identification of some appropriate methods and techniques to apply this philosophy.

EDU 6603  Planning For the Classroom (3)
This course provides students with an overview of the K-12 classroom environment and the planning necessary to establish environments that are conducive for learning.

EDU 6606  Current and Emerging Instructional Technologies (3)
This introductory course focuses on current and emerging instructional technologies. The emphasis of this class is on the instructional use of computers, Microsoft Office Instructional Applications, software tutorials, mobile learning, desktop publishing and storyboarding, graphics, hypermedia, social media, and web-based instructional technologies. Prerequisite: permission of instructor.

EDU 6607  Curriculum Integration of Technology (3)
This course covers the evaluation, selection, and integration of various instructional software and web-based technologies into curricula, taking into consideration teaching and learning styles while relating technologies to instructional settings, diverse models, and developmental levels. Micro-lessons are produced using multimedia-authoring tools. Prerequisite: EDU 6606 or permission of instructor.

EDU 6611  Educational Technology in the Curriculum (3)
The purpose of this course is to advance pre-service and in-service teachers beyond simple computer literacy and basic understanding of Computer-Based Instructional Technologies. It will focus on more advanced educational use of multimedia and Internet based technologies. The student will explore technologies and learning tools that foster a more learner centered constructivist environment within their specific teaching area. Critical issues arising from the integration of these technologies such as development of interactive environments and new modes of communication and subsequent effects on the definition of learning will also be investigated.

EDU 6613  Principles of Instructional Design (3)
This course focuses on the development of instruction by using the Instructional Systems Design (ISD) approach based on the ADDIE Model. Students will develop the necessary pedagogical skills that will facilitate the analysis, design, development, implementation, and evaluation of instructional needs to synthesize appropriate teaching and learning curriculum.

EDU 6614  Instructional Performance Design Systems (3)
This course introduces students to the Macro Instructional Design Approach and further exposes them to the pedagogies, processes, tools, and techniques of curriculum design and performance improvement. It includes instructional design and development (ID) case study analysis and in-depth discussion of the relevant literature to foster theoretical application and evaluation of instructional design and program development products. Prerequisite: EDU 6613

EDU 6616  E-Learning Design (3)
A study of various forms of distance learning with emphasis on computer based systems and on-line learning. The course integrates relevant technology including multimedia authoring, web design, and internet delivery systems. The course concentrates on the development of web-based instructional materials and the management of internet-based courses and programs. Students design an educational website and develop a strategy to deliver web-based instruction. Prerequisite: EDU 6606 and EDU 6613
EDU 6617 Graphic Design in Multimedia Instruction (3)
A study of graphic design principles as they apply to the development of multimedia instructional courseware. The course integrates advanced graphics, multimedia authoring and web design software to teach the student relevant technology as it applies to instructional design. Students apply graphic design principles in developing a variety of multimedia instructional products working individually and in teams. Prerequisite: EDU 6606 and EDU 6613

EDU 6618 Advanced Multimedia Instruction (3)
An advanced course in computer based multimedia interactive course design. The course integrates course design software, multimedia authoring, web design and presentation graphics in the development of a multimedia lesson or course. The course concentrates on the total instructional process culminating complete multimedia class delivered either by disk or internet. Students develop their own video and audio elements learning the complete production process necessary for multimedia instructional products. Prerequisite: EDU 6617

EDU 6619 Instructional Media (3)
A study of graphic design principles as they apply to the development of multimedia instructional courseware and multimedia interactive course design. The course integrates advanced graphics, multimedia authoring and web design software to teach the student relevant technology as it applies to instructional design. The course integrates course design software, multimedia authoring, web design, social media and presentation graphics in the development of multimedia lesson or course. The course concentrates on the total instructional process in developing and delivering interactive online lessons or courses. Students develop their own video and audio elements learning the complete production process necessary for multimedia instructional process. Prerequisite: EDU 6606 and EDU 6613

EDU 6625 Specialized Study in Area of Education (1-3)
This course focuses on the study of a problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, the appropriate college dean, and the Dean of the Graduate School. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed 4 semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.

EDU 6629 The Master Teacher (3)
This course is designed to assist the beginning graduate student in determining the expectations and attributes of the master teacher. Major emphasis will focus on effective teacher characteristics, skills and practices of teaching, as well as a review of the requirements for National Board for Professional Teaching Standards (NBPTS).

EDU 6630 Teachers and the Law (3)
This course is designed to help teachers become legally literate by providing them with information about the law that affects them, how the legal system works, and how that system can work for them.

EDU 6632 Seminar in Classroom Teaching (2)
This course is an inter-disciplinary seminar course designed for classroom teachers who desire to investigate in depth the techniques, procedures and strategies related to improving learning through improved teaching.

EDU 6645 The Nature of Intelligence (3)
This course provides a description and analysis of the quantitative and qualitative aspects of intelligence. It includes classic and contemporary theories of learning and their relationship to the understanding of individual differences.

EDU 6650 Global Education in the Elementary/Middle School (3)
This course is designed to instruct teachers about the complexities of citizenship in a world community, current issues, and concerns in this field, and methods of globalizing the existing elementary curriculum.

EDU 6653 Educational Evaluation (3)
A study of the basic statistical processes and measures used in education. Analysis of a variety of standardized tests and measurements procedures including construction, use and interpretation. Construction of teacher made tests and measuring devices.

EDU 6655 The Arts Curriculum (3)
This course prepares the teacher to provide a broad-based arts education program that includes history, interpretation, production, and appreciation. Emphasis is placed on utilizing the arts to enrich students learning in all curricular areas.

EDU 6656 Teaching the Bilingual Child (3)
This course prepares teachers to make classroom and instructional accommodations to meet the needs of the bilingual child. It also addresses facilitating home-school partnerships with families of bilingual children.

EDU 6658 Understanding Cultural Diversity (3)
Understanding of culturally different studies, the psychological and sociological factors that influence the counseling, teaching or training, and the employment of the culturally different. Special emphasis is placed on current practices utilized in overcoming the deficiencies in school, home, and work settings.
EDU 6665 Field Project (3)
The content of this course is variable, depending on student interests. The determination of the course content for each student will be made through collaboration between the student, the student’s adviser, and the Instructor. Students may focus on supervised teaching, action research, or a project with a P-12 school system. This course is open only to students enrolled in teacher education programs. The field project does not replace the comprehensive exam. Students are required to take the comprehensive exam.

EDU 6672 The Wiregrass Writing Project (3)
The Wiregrass Writing Project is the local affiliate of the Alabama Writing Project and the National Writing Project. The National Writing Project strives to improve student writing achievement by improving the teaching and learning of writing in the nation’s schools. The 165 sites operate on a teachers teaching teachers model. Successful writing teachers who attend this invitational summer institute will examine their classroom practice, conduct research of sound theory supporting particular approaches to the teaching of writing, and develop their own writing skills.

EDU 6680 The Alternative Experience Internship Grades K-6(3)
This field experience is designed only for students who are admitted to the Alternative Fifth-Year Experience Route Program in Elementary Education. The internship will consist of a minimum of 100 clock hours of instructional experiences in elementary classroom (K-6) settings. Grading system is Pass/Fail.

EDU 6682 Internship in Area of Specialization (3)
This field experience is designed for teacher education candidates who hold current graduate-level professional educator certification and desire additional certification in another field and/or level. Experiences include planning, teaching and supervised activities in an approved clinical setting. Grading system is Pass/Fail. Prerequisite: Admission to the Teacher Education Program, completion of all required coursework, and approval from the Director of Teacher Education.

EDU 6691 Research Methodology (3)
This course is a study and evaluation of a variety of research methods and types of reporting. (May carry the prefix appropriate to the program of study i.e. SPE, SED, IED). A grade of “B” or better is required.

EDU 6693 Quantitative Methods of Evaluation of Teaching and Learning (3)
This course is a study of descriptive and inferential statistics commonly used in the literature of psychology and education. Emphasis is placed on the application of statistical method to research design. Instruction deals specifically with measures of central tendency and variability, probability theory, estimation and significance, correlation and regression, analysis of variance, and chi-square. A grade of “B” or better is required.

EDU 6695 Thesis (3)
The thesis must be related to an educational problem or situation. Information regarding the thesis program may be obtained from the Dean of the Graduate School. This course may be repeated. Grading system is Pass/Fail.

EDU 6696 Practicum in Area of Specialization (1-6)
The Practicum is supervised experiences related to instruction in area of specialization. The application of skills, concepts, and principles acquired in previous courses will be emphasized. Prerequisite: All Teaching Field courses must be completed.

EDU 6698 Introduction to Research (3)
This course is designed to assist graduate students as they become competent consumers and producers of educational research. Purposes, designs, and characteristics of quantitative and qualitative research will be examined as students read and analyze a variety of studies. A grade of “B” or better is required.

EDU 6699 Research in Practice (3)
The purpose of this course is to provide graduate students in teacher education programs with an opportunity to design, implement, and write about practical quantitative or qualitative research related to their own teaching. Joint research projects with P-12 school systems are encouraged. Prerequisite: EDU 6698 or EDU 6653. A grade of “B” or better is required.

EDU 7706 Environmental Education: Teaching Across the Curriculum (3)
This course is designed to provide an interdisciplinary experience in teaching using an approach designed around environmental education themes. The graduate students will be immersed in teaching across the curriculum using issues related to the environment. The focus will be interdisciplinary and utilize hands-on learning experiences which will help to make learning meaningful and authentic.

EDU 7709 Seminar in Decision-Making for Teachers and Educational Administrators (3)
The purpose of this course is to critically examine, analyze, and evaluate American public education in order to frame problems, identify possible causes, seek and collect information, delineate steps to solutions, and generate possible solutions to problems facing schools today. Particular focus will be given to curriculum and instruction, financial, political, cultural, economic ethical and legal policies, and the impact of cultural diversity in American schools. Restricted to students enrolled in an Education Specialist program.
EDU 7762 School Accreditation Process (3)
The purpose of this course is to examine the local, state, regional, and national standards associated with school accreditation. The accreditation process in these areas will be reviewed and analyzed. Students will compare and contrast the different ways schools are accredited. Topics such as: the accreditation process, school self-study procedures, validation/documentation, roles of school personnel, and creating school improvement plans will be investigated.

EDU 7763 Legal Issues and Ethics in Education (3)
The purpose of this course is to allow educational leaders to explore the organizational development and maintenance services required for effective operation of the schools within the legal framework established by local, state, and federal legislative and judicial requirements. Major emphasis will be given to studying legal issues and community relations. Legal issues and services related to exceptional children will be closely examined. The development of ethical standards, informed legal decision making, and emergency procedures for ensuring safety, as well as the political factors which impact schools, society and community relations will be studied.

EDU 7764 Models and Strategies for Instruction (3)
The purpose of this course is to assist education specialist candidates as they explore a variety of instructional models throughout the educational and other learning environments. There will be an emphasis on current research of effective teaching and learning practices. Students will compare and contract different educational instructional practices and develop set of strategies to enhance the instructional environment.

EDU 7765 Thesis (1-6)
Research for and preparation of a scholarly paper related to a school administration, supervision, and/or curriculum problem. The project will be under the direction of the student’s advisory committee. Grading system is Pass/Fail.

**ELEMENTARY EDUCATION**

ELE 5544 Internship Seminar (3)
This course provides interns an opportunity to develop analytical thinking skills through examining broad educational issues and concerns, topics on the state and local levels, and those of personal interest. The scope of the course ranges from juvenile law, classroom management, professionalism, professional development for teachers, and other course topics. **This course must be taken concurrently with internship. Grading system is Pass / Fail.**
ELE 6600  Diagnostic Approach to Teaching Mathematics (3)
The diagnostic/prescriptive component of teaching mathematics will be studied with an emphasis on the interpretation of diagnostic materials.

ELE 6601  The Art of Teaching Writing (3)
Course in which classroom teachers investigate and apply the art of teaching writing via whole language/natural approach. Focus on writing process.

ELE 6602  Seminar in Mathematics Education (3)
This course will look at recent research and publications relative to the teaching of elementary school mathematics. Not only will specific areas selected by the instructor be examined, but the students in the class will have the opportunity to suggest areas of particular interest to them. This course provides opportunities for the student to extend knowledge and skills necessary for developing programs, selecting appropriate methods and employing materials, and evaluating in mathematics instruction, kindergarten through grade 6.

ELE 6603  Seminar in Science Education (3)
This course will examine relevant research and a variety of instructional strategies appropriate in the field of natural science. Emphasis is placed on appropriate instruction and materials including technology for teaching science to students in grades K-6.

ELE 6604  Seminar in Language Arts Education (3)
This course is a seminar for elementary educators desiring to design and implement developmental programs of language arts instruction in view of recent research. An examination of the research in the language arts and current practices in teaching techniques will be pursued.

ELE 6605  Seminar in Social Science Education (3)
This course will examine relevant research and a variety of instructional strategies appropriate in the field of social science. Emphasis is placed on appropriate instruction and materials including technology for teaching social science to students in grades K-6.

ELE 6622  Parents as Partners in Education (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding of and develop techniques to strengthen the school-parent relationship while developing mutual supporters for the total development of the young child. Pertinent topics include: stress and children, parents and families in crisis, and helping children cope with the future.

ELE 6625  Specialized Study in Elementary Education (1-3)
A study of a problem using research techniques. Selection of problem must be approved by the professor under whom the study is to be made and the Dean of Education. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed four semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.

ELE 6633  Integrated Thematic Curriculum (3)
The purpose of this course is to assist graduate students as they construct an operational knowledge of integrated thematic curriculum. The course will focus on theory, planning, implementation, and evaluation of an integrated thematic curriculum. Additionally, issues surrounding the implementation of innovative teaching methodology in traditional settings will be examined. This course serves as the capstone for MS ELE program and must be taken as one of a student’s final four courses. A grade of “B” or better is required.

ELE 6635  Program Evaluation in Elementary Education (3)
This course is designed for the education student to examine evaluation in early childhood and elementary education programs. Techniques and procedures concerning the design and implementation of evaluation in the total school program will be investigated.

ELE 6640  Integrating Children's Literature (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding of and develop techniques to incorporate quality children’s literature across the curriculum. Pertinent topics include: award winning authors and titles found in children’s literature among a variety of genres, along with developmentally appropriate techniques for focusing curriculum delivery through children’s literature.

ELE 6674  Elementary Internship Grades K-6 (6)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. Grading system is Pass/Fail.

ELE 7725  Specialized Study in Elementary Education (1-3)
A study of a problem using research techniques. Selection of problem must be approved by the professor under whom the study is to be made, and the Dean of Education. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed four semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.
ELE 7736 Mentoring and Supervision in ELE (3)
This course is designed for the advanced sixth year education student to examine the faculty leadership roles of mentor/supervisor in ELE settings. Techniques and procedures will be investigated.

ELE 7760 Leading for Learning in the School Environment (3)
This course is designed to extend the teacher leader from the classroom to the school environment. Students will be provided a study of the processes involved in evaluating school settings and the problems faced by instructional leaders. Major emphasis will be placed on the transition to a teacher leading in the school environment. Characteristics of leading for learning will be explored. Topics that affect today’s teacher leaders and positive ways to deal with instructional issues will also be investigated.

ELE 7761 Effective Schools and Teachers (3)
This course is designed to examine the knowledge base for effective schools to enable teacher leaders to develop skills in their own practices. There will be emphasis through in-depth study of the research literature on effective school settings. Students will critically examine, analyze, and evaluate the components and characteristics of effective school environments.

ELE 7762 School Accreditation Process (3)
The purpose of this course is to examine the local, state, regional, and national standards associated with school accreditation. The accreditation process in these areas will be reviewed and analyzed. Students will compare and contrast the different ways schools are accredited. Topics such as the accreditation process, school self-study procedures, validation/documentation, roles of school personnel, and creating school improvement plans will be investigated.

ELE 7763 Legal Issues and Ethics in Education (3)
The purpose of this course is to allow educational leaders to explore the organizational development and maintenance services required for effective operation of the schools within the legal framework established by local, state, and federal legislative and judicial requirements. Major emphasis will be given to studying legal issues and community relations. Legal issues and services related to exceptional children will be closely examined. The development of ethical standards, informed legal decision making, and emergency procedures for ensuring safety, as well as the political factors which impact schools, society and community relations will be studied.

ELE 7790 Qualitative Research Methodology (3)
The purpose of this course is to provide graduate students with an introduction to qualitative research methodology. The historical development, rationale, and relationship to quantitative research will be examined. Qualitative research methods will include procedures for selection and sampling and for data collection and analysis. Students will read a variety of qualitative studies and conduct a brief qualitative research project. Prerequisite: Course in research or tests and measurement.

ELE 7793 Problem Analysis in ELE (3)
A study of processes involved in identifying, framing, evaluating analyzing, and seeking information about problems. Emphasis is given to information collection and processing. Students will select and analyze a problem related to early childhood education or elementary education. Restricted to students enrolled in an Education Specialist program.

ENGLISH

ENG 5501 Chaucer (3)
A study of Chaucer’s major poetry.

ENG 5502 Studies in Medieval Literature (3)
A study of non-Chaucerian British literature from the Middle Ages, including Beowulf, Piers Plowman, Sir Gawain and the Green Knight, mystery plays, Le Morte d’Arthur, and other works.

ENG 5503 English Renaissance Literature (3)
This course covers English prose and poetry of the 16th and early 17th centuries, with emphasis on Sidney, Spenser, Donne, and Jonson.

ENG 5504 Milton (3)
A study of Milton’s poetry and major prose.

ENG 5505 History of the English Language (3)
A study of the development of English from the Anglo-Saxon period through the present, with reference to the Indo-European background of English.

ENG 5513 Modern Short Story (3)

ENG 5515 Modern Drama (3)
A detailed study of selected British and/or American plays written between 1900 and present. Review of production history, subject matter, staging, and dramatic techniques. Several oral and written reports. List of plays may vary with each offering.

ENG 5516 Nineteenth-Century American Novel (3)
A study of representative American novels of the 19th century.

</tr>
<tr>
<td>ENG 5565</td>
<td>African American Literature (3)</td>
<td>A study of selected works by significant African American writers from the eighteenth century to the present. Works include poetry, fiction, autobiography, and argumentative and expository prose.</td>
</tr>
<tr>
<td>ENG 5568</td>
<td>Methods and Approaches in Second Language Teaching (3)</td>
<td>This course traces the evolution of language teaching from the methods era (e.g., grammar translation method, audiolingual method) to post-methods approaches (e.g., task-based learning, content-based learning, communicative approaches). Students will develop a repertoire of teaching approaches and identify appropriate options for different language teaching scenarios.</td>
</tr>
<tr>
<td>ENG 5569</td>
<td>Principles, Techniques, and Materials in Second Language Teaching (3)</td>
<td>This course overviews the teaching principles, techniques, and materials relevant to an interactive approach to second language teaching. Students will expand their teaching repertoire by studying curriculum design, assessment measures, learner variables, techniques for teaching grammar/vocabulary/four skills (listening, speaking, reading, writing), and sociopolitical contexts for teaching ESL/EFL.</td>
</tr>
<tr>
<td>ENG 6601</td>
<td>Seminar in Chaucer (3)</td>
<td>A close examination of two major works of Chaucer and critical responses to them. Special consideration given to Chaucer’s language and versification and the medieval social background to his writing.</td>
</tr>
</tbody>
</table>
ENG 6603 Seminar in Shakespeare (3)
A study of selected tragedies or comedies. Examination of various critical approaches. Extensive reading in relevant criticism. List of plays, as well as genre, may vary with each offering.

ENG 6605 Linguistic Approaches to Grammar (3)
Study of American English from point of view of modern linguistic theories. Special consideration given to structural grammar and its possibilities in classrooms.

ENG 6606 Theory and Practice of Analyzing Poetry (3)
A critical study of representative types of poetry, employing several approaches in analytical process.

ENG 6607 The Backgrounds of Victorian Literature (3)
A study of Victorian literature (1837-1900) as it reflects social, economic, political, educational, aesthetic, and religious concerns.

ENG 6608 Shakespeare’s History Plays (3)

ENG 6609 The Backgrounds of Nineteenth-Century American Literature (3)
A study of literature (fiction, nonfiction prose, and poetry) as it reflects key issues, ideas, concerns, problems, and trends of the period. May be taught in conjunction with a course in American history.

ENG 6610 The Backgrounds of Twentieth-Century American Literature (3)
A study of literature (fiction, nonfiction prose, poetry, and drama) as it reflects key issues, ideas, concerns, problems, and trends of the period. May be taught in conjunction with a course in American history.

ENG 6613 Theory and Practice of Analyzing the Short Story (3)
A critical study of representative types of short stories employing theoretical approaches in the analytical process.

ENG 6620 Seminar in Restoration and 18th Century Literature (3)
A study of English prose and poetry in the Restoration and early 18th century, with emphasis on Dryden, Behn, Swift, and Pope.

ENG 6625 Specialized Study in Area of English (1-4)
A study of problem or problems using research techniques. Selection of problem to be approved by student’s adviser, instructor under whom study is to be done, and director of graduate studies. Study should contribute to student’s program. Preparation of scholarly paper required and may involve oral defense. Total credit for any combination of enrollments in these courses not to exceed four semester hours. A specialized study may be substituted for a required course only one time in student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.

ENG 6630 Survey of SLA for Second Language Teachers (3)
SLA is the study of how language, social, and psychological factors influence language learning. A range of SLA topics are addressed from the perspective of language teaching: theories of human learning, theories of language acquisition, learning styles and strategies, communicative competence, cross-linguistic influences, and sociocultural factors.

ENG 6631 Survey of Sociolinguistics for Second Language Teachers (3)
Sociolinguistics is the study of how social, political, and educational factors affect language use. A range of Sociolinguistics topics are addressed from the perspective of language teaching: literacy, world Englishes, language standardization, language variation and change, multilingual education, language planning and policy, group identity/morality, and regional/social dialects.

ENG 6632 American Realism and Naturalism (3)
A seminar stressing critical approaches to the major works of such writers as James, Howells, Twain, Crane, and Dreiser.

ENG 6635 The Victorian Novel (3)
The study of the content and techniques of representative novels of the period with some consideration of these novels in relation to significant social, philosophical, and literary needs.

ENG 6636 The American Renaissance (3)
A seminar stressing critical approaches to the major works of Emerson, Thoreau, Hawthorne, Melville, Poe, and Whitman.

ENG 6638 Major American Writers: WWI to Present (3)
A study of major American writers who represent the various currents in American literature and thought from 1917 to present.

ENG 6641 Theory and Practice of Grammar Studies (3)
Advanced studies in descriptive grammar in conjunction with sentence structure and standards of usage. Special emphasis upon current procedures for presenting the various systems of grammar (particularly structural).

ENG 6642 Theory and Practice of Written Composition (3)
Advanced studies in expository and argumentative writing. Special emphasis upon procedures for presenting methods for organizing and developing various types of essays.
ENG 6643  Trends in Children’s and Young Adult Literature (3)
A study of literature at the elementary, middle, and senior high levels. It includes reading the primary sources and studying the research and theory that support the use of children’s and young adult literature in the classroom.

ENG 6648  Studies in the American Renaissance (3)
A study of the major works of the American Renaissance.

ENG 6651  Studies in Modern Novel (3)
A study of selected American, British, and/or European novels of the modern age.

ENG 6656  Studies in Literacy and the English Language (3)
Explores the rationale and practices for integrating the study of grammar and composition in the English language arts classroom.

ENG 6660  Introduction to Applied Linguistics (3)
This course introduces the main content areas and research practices of Linguistics and Applied Linguistics. Linguistics involves the systems of a language (phonology, morphology, syntax, semantics). Applied Linguistics requires familiarity with these systems for the purpose of researching and teaching the way language is used (e.g., Sociolinguistics, Second Language Acquisition).

ENG 6665  Studies in African American Literature (3)
A study of major works by African American writers.

ENG 6670  Seminar in Selected Topics (3)
6671  Maximum of two semesters. Study of topic of special interest and importance which is not covered in regularly offered courses for advanced graduate students. See semester hour limits listed under Course Restrictions in General Regulations section.
6672

ENG 6680  Thesis Option in Literature (3)
An advanced study of a problem or issue in literary studies. Selection of topic must be approved by the student’s thesis director, who will oversee the project. Final project must demonstrate knowledge of extant criticism on the topic and should contribute to the student’s program. Oral defense of the thesis required before final approval. Recommended for students interested in pursuing doctoral work in literature.

ENG 6691  Research in Education (3)
Research strategies for English educators and procedures for evaluating the language arts. ENG 6691 is a prerequisite for ENG 6696 Practicum. A grade of “B” or better is required.

ENG 6696  Practicum in Area of Specialization, English (3)
Supervised experiences related to instruction in area of specialization. The application of skills, concepts, and principles acquired in previous courses will be emphasized. Prerequisite: All courses in Teaching Field Component and ENG 6691 must be completed.

FIN 6625  Specialized study in the Area of Finance (1-3)
6626  Study of problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, and the appropriate dean. The study must contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in the General Regulations section. Prerequisite: All business foundation courses or equivalent.

FIN 6631  Global Financial Management (3)
A comprehensive and advanced study of financial analysis, planning and control techniques for a business entity with emphasis on corporations in a global setting. Prerequisite: Graduate standing, acceptance into the MBA program, all undergraduate business prerequisite courses or equivalent completed.

FIN 6632  Investments (3)
An introductory investments course which identifies and analyzes various forms of investments (such as corporate bonds, common stock, preferred stock) and government securities (such as bonds, notes and bills). The course also includes discussion of the securities market, brokerage functions, and stock exchanges. Particular emphasis is placed on the selection of securities based on the degree of risk and expected rate of return. Prerequisite: Graduate standing, acceptance into the MBA program, all undergraduate business prerequisite courses or equivalent completed, FIN 6631.

FIN 6633  International Finance (3)
An examination of the foreign exchange market, exchange rate determination, international financial institutions, and the management of the risks associated with international business. Prerequisite: FIN 6631.

FIN 6634  Derivative Securities (3)
A study of options and futures markets, with emphasis on the nature of speculative transactions, pricing, and method of trading. Prerequisite: FIN 6631.

FIN 6651  Financial Institutions (3)
A comprehensive graduate study of financial markets and institutions. Prerequisite: FIN 6631.
FIN 6652 Problems in Financial Management (3)
Case discussions used to examine a broad range corporate finance issues and decisions. Topics include forecasting financial statements, capital budgeting, risk and return, estimation of capital costs, working capital analysis and business valuation. Prerequisite: FIN 6631.

FIN 6653 Finance Research (3)
A comprehensive graduate study of practical research in Finance. Prerequisite: FIN 6631.

FIN 6656 Analysis of Financial Data (3)
This course provides a study of the basic methods and techniques of data analysis in finance. It covers tolls such as regression and time series, including non-stationary models, multivariate concepts such as co-integration, and models of conditional volatility. Prerequisite: FIN 6631.

FIN 6657 Corporate Risk Management (3)
This course is a study of the analysis and treatment of the pure risks faced by corporations. The course includes development of the risk management process, analysis and uses of various techniques for managing identified exposures.

FIN 6658 Special Topics in Finance (3)
A study in unique topics in Finance. Prerequisite: FIN 6631.

GEOGRAPHY

GEO 5502 International Political Geography (3)
Political geography course is designed to provide an understanding of political, economic, and social aspects of international relations from a geographical perspective. It examines the ways in which humans have arranged the territory of the Earth’s surface. This course concerns itself with the internal and external relationships of politically organized areas. It also explores the effects of political actions on social and economic conditions, and with the significance of geographical factors behind political situations, problems, and conflicts.

GEO 5503 Conservation (3)
A study of the conservation of natural and human resources with emphasis on population expansion as the major element in a changing ecology.

GEO 5506 Urbanism (3)
A study of the historical, physical, economic, and social evolutions of urbanized areas. Emphasis on contemporary urban problems with implications for policy and planning.

GEO 5511 Demography (3)
An analysis of past and present population changes, population characteristics and the interrelationship of population and other social, economic, environmental, and political factors.

GEO 5512 Geography of Latin America (3)
This course covers Latin American countries and colonies and their strategic and economic importance to the U. S. NOTE: Not open to education majors.

GEO 5526 Geography of the Russian Realm (3)
An analysis of the physical and cultural elements of Russia and the other former republics of the Soviet Union.

GEO 5535 Historical Geography of North America (3)
An analysis of the physical and cultural factors in the development of North America from early European settlement to the present.

GEO 5550 Introduction to Geographic Information Systems (3)
This course provides an overview of the theory and general principles of geographic information systems (GIS) and hands-on experience in its use. It introduces various methods of geographic data processing and analysis using computer-based mapping software and data gathering techniques, including global positioning systems.

GEO 5595 Selected Topics in Geography (3)
This course focuses on a topic of a timely nature and/or special interest. Course may be taken twice for a maximum of six hours toward degree requirements. See semester hour limits listed under Course Restrictions in General Regulations section.

GEO 6625 Specialized Study in Area of Geography (1-6)
A study of a problem or problems using research techniques. Selection of problem must be approved by the professor under whom the study is to be made, and the Dean of Arts and Sciences. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve oral defense. Total credit for any combination of enrollments in these courses may not exceed four semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.

GEO 6650 Geography of the Global Economy (3)
An examination of the global economy from colonialism to the present. Social, political, and environmental factors associated with the diffusion and intensification of world trade are examined.

GEOSPATIAL INFORMATICS

GIS 5530 Crime Mapping (3)
An introduction to analyzing and mapping crime and other public safety data using commercial and open-sourced geographic information system (GIS) software. Students will learn skills to make and analyze
GLOBAL LEADERSHIP

GLOL 8801 Global Leadership Seminar (1)
This course is an advanced seminar for doctoral students in global leadership. Candidates will be exposed to a comprehensive examination of the factors that impact global leaders. The course will focus on the development of the students’ ability to think critically about the complexity of the direct, indirect, and interactive impact of factors on leadership within multinational organizations that operate worldwide. Attention is given to global ethical, diversity, and conflict management, research and practices. The course includes theoretical orientation and theory-to-practice experiences using case studies, demonstrations, guest speakers, and simulations. Written projects will focus on critical thinking, problem solving, decision making and information literacy. Students meet each year with professors, distinguished leaders, practitioners, academic advisors, external coaches and mentors to work on the development of their skills. (Course credit is one hour for each yearly seminar for a total of 3 hours credit.)

GLOL 8802 Introduction to Doctoral Study in Global Leadership and Innovation (3)
In this course the doctoral student explores the rationale for pursuing a doctorate in global leadership within the context of personal preferences, professional competencies and organizational politics. The student is provided an orientation to the doctoral program including expectations and skills required in anticipation of the tremendous demand for performance. Participation skills, professional writing competencies, and analytical ability in a structural collegial environment are required.

GLOL 8803 Global Leadership (3)
Global Leadership is designed to enable doctoral candidates to understand the foundational concepts and develop the analytical skills needed to be an effective global leader in a variety of education and related settings. Candidates will explore their own leadership, personality and cognitive styles and learn how these may affect the performance of others within the organization. This course will build upon fundamental leadership theory and further explore historical and contemporary global leadership theories, models and perspectives. The course will focus on performance-based projects and exercises as well as provide opportunities to individually reflect and write about the concepts explored and skills gained throughout the course.

GLOL 8804 Innovation in Global Leadership (3)
Students will examine innovation through an analysis of theory, measurement, diffusion, strategy, costs, tools, models, applications, benchmarking, and future trends. Global organizations will be studied by analyzing infrastructure for innovation, motivation for innovation by the global leader, the measure of innovation and the use of innovation to promote the competitive advantage of the global organization as well as the role of the global leader in 80 quality growth and innovation, the use of social networks and innovation, and the use of knowledge sharing, adaptation and innovation.

GLOL 8805 Cultures, Values and Ethics in a Global Environment (3)
This course will address diverse, cultural, ethnic, social and special populations in the global environment. The changing culture of global higher education; disparate cultural norms across borders, including the importance of values and ethics for the global leader will be considered. The course rests on the assumption that leadership is a subset of ethics rather than ethics being a subset of leadership studies; the ethics of what and who global leaders are, what they do, and how they do it in their changing environment will be examined. Ethical and cultural issues related to leadership will be assessed through case studies concerning leaders in a variety of contexts and cultures. The course looks at how leaders convey values through actions, language, and as role models exposed to a comprehensive examination of the factors that impact global leaders. The course will focus on the development of the students’ ability to think critically about the complexity of the direct, indirect, and interactive impact of factors on leadership within multinational organizations that operate worldwide. Attention is given to global ethical, diversity, and conflict management, research and practices. The course includes theoretical orientation and theory-to-practice experiences using case studies, demonstrations, guest speakers, and simulations. Written projects will focus on critical thinking, problem solving, decision making and information literacy. Students meet each year with professors, distinguished leaders, practitioners, academic advisors, external coaches and mentors to work on the development of their skills. (Course credit is one hour for each yearly seminar for a total of 3 hours credit.)

GLOL 8806 Policy and Politics in Global Leadership (3)
In this course the doctoral student is exposed to numerous contemporary issues in the field of global leadership. Candidates will research selected topics to gain a broad perspective of the field of global leadership as it applies to various organizations and locations. Candidates will evaluate relevant data and draw conclusions and implications based upon the data, research and class discussions.

GLOL 8807 Internship in Global Leadership (3)
In this course the candidate identifies various types of global higher education institutions or global organizations and plans a program of study in the institution of choice. Candidates will explore issues, challenges and opportunities in the institution through practicum experiences under professional supervision provided by practicing professionals and Troy University faculty (May be repeated to a maximum of 9 semester hours.)

GLOL 8898 Writing the Dissertation in Global Leadership (3)
The purpose of this course is to begin to prepare students to undertake a major research study, specifically the dissertation. Requirements and expectations of doctoral candidates, as well as technology that can be used will be addressed. This course will assist the doctoral candidate to refine and/or define a dissertation topic and develop the rationale for a particular research agenda. This course is designed to prepare candidates to develop a dissertation proposal for presentation to a committee and to gain the knowledge maps and will develop a solid foundation and develop further expertise in crime mapping with GIS.
necessary to complete the dissertation. The outcome from the course is the prospectus.

GLOL 8899 Dissertation (1-3)
This course is designed to assist candidates as they complete the development of a dissertation proposal, present the proposal to the committee for approval, conduct a study, analyze, present and discuss data, complete and defend the dissertation. The candidate will be enrolled in this course for a minimum of 9 semester hours. The instructor of record will serve as the committee chair for the dissertation (May be repeated.)

HIGHER EDUCATION

HEA 8801 Introductory Seminar in Higher Education (3)
This course provides doctoral students with an opportunity to examine globalization from the viewpoint of global higher education. Students develop a global perspective and develop their focus a focus from an organizational perspective as a leader who promotes a global perspective among colleagues. Specifically, this course examines higher education from the changing context of globalization.

HEA 8802 Global Higher Education Leadership (3)
This course provides doctoral students with an opportunity to examine globalization from the viewpoint of globally competent educators. Students should begin to understand and develop a global perspective and create a focus on becoming a global leader who promotes a global perspective among students and colleagues. This course examines education in the changing context of globalization; surveys educational policy and practices globally; and permits students to study the impact of globalization on education.

HEA 8803 Global Perspectives in Higher Education (3)
This course is designed to examine the role of global leaders in emerging social, economic, and political contexts that are changing the nature of higher education, altering how higher education organizations are viewed, and are transforming how the global leader interacts in a changing environment. A broad range of issues will be explored that are critical to the success of the global leader that can affect relationships and impact organizations. Particular attention will be paid to issues of leadership and management in diverse global organizations.

HEA 8804 Disruption and Innovation in Global Higher Education (3)
In this course doctoral students in global leadership are provided an opportunity to examine disruption and innovation from the viewpoint of global higher education. Students will begin to understand and develop a knowledge of the perceived interrelationship of the two factors specifically influencing higher education in the US and the world.

HEA 8805 Contemporary Issues in Global Higher Education (3)
In this course the doctoral student is exposed to numerous contemporary issues in the field of global leadership. Candidates will research selected topics to gain a broad perspective of the field of global leadership as it applies to various organizations and locations. Candidates will evaluate relevant data and draw conclusions and implications based upon the data, research and class discussions.

HEA 8806 Advanced Seminar in Higher Education (3)
This course examines globalization from the viewpoint of global higher education. Students develop a focus from an organizational perspective as a leader who promotes a global perspective among colleagues. This course requires the student to synthesize and apply higher education knowledge through work based in real-life settings.

HISTORY

HIS 5501 French Revolution and Napoleon (3)
An exploration of the major historiographical works and controversies of the French Revolution and Napoleonic era.

HIS 5502 Europe from 1815-1900 (3)
An exploration of the major historiographical works and controversies of European history from the Congress of Vienna to 1900.

HIS 5503 Contemporary Europe (3)
An exploration of the major historiographical works and controversies of 20th century European history.

HIS 5504 Military History of the United States (3)
An exploration of the major historiographical works and controversies of war in American history, from the colonial period through the Vietnam War.

HIS 5505 The Old South (3)
An exploration of the major historiographical works and controversies of the Old South.

HIS 5506 The New South (3)
An exploration of the major historiographical works and controversies of the New South, through the Civil Rights Movement.

HIS 5509 England to 1688 (3)
An exploration of the major historiographical works and controversies of English history through the Glorious Revolution.

HIS 5510 England since 1688 (3)
An exploration of the major historiographical works and controversies of English history beginning with the reign of William and Mary.

<td>An exploration of the major historiographical works and controversies of Mediterranean and European history during the 3rd through 8th centuries.</td>
</tr>
<tr>
<td>HIS 5564</td>
<td>The Crusades (3)</td>
<td>An exploration of the major historiographical works and controversies of the Crusades.</td>
</tr>
</tbody>
</table>
HIS 5567 Medieval Europe (3)
An exploration of the major historiographical works and controversies of Medieval Europe, the Byzantine and Islamic worlds from the 7th century to the eve of the Renaissance.

HIS 5574 Modern Eastern European (3)
An exploration of the major historiographical works and controversies of Modern Eastern Europe from the Revolutions of 1848 through the collapse of the Soviet bloc and beyond.

HIS 5595 Selected Topics in History (3)
An exploration of the major historiographical works and controversies of a designed topic of specific and/or current interest and importance, which is generally not covered in regularly offered courses by the department.

HIS 6600 Seminar in 19th Century American History (3)
Study of topics in 19th century American History. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6603 Seminar in 18th Century American History (3)
Study of topics in 18th century American history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6604 Seminar in Modern France (3)
Study of topics in modern French history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6610 Seminar in Comparative Revolutions (3)
Study of historical topics of various revolutions, including the American, French, Russian, and other revolutions. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6611 Seminar in 19th Century Europe (3)
Study of topics in 19th century European history, emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6612 Seminar in 20th Century Europe (3)
Study of topics in 20th century European history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6613 Seminar in British History (3)
Study of topics in British history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6614 Seminar in Contemporary Japan (3)
Study of topics in contemporary Japanese history from the Meiji reforms to the present. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6615 Seminar in Latin American History (3)
Study of topics in Latin American history, emphasizing on the 20th century. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6640 Seminar in 17th century American History (3)
Study of topics in 17th century American history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6641 Seminar in Slavery (3)
Study of topics in slavery, focusing on American slavery. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6642 Seminar in Ethnicity/Race in America (3)
Study of topics in race/ethnicity in American history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6643 Seminar in War and American Society (3)
Study of topics in war and society in American history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6650 Seminar in the History of Science (3)
Study of topics in the history of science. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6651 Thematic Historiography (3)
An exploration of the major historical works and historiographical controversies in a specific topic not generally covered by the curriculum. Emphasis placed on discussion and students producing a major research paper. Designed to fulfill the historiography component for the thematic secondary field.

HIS 6653 Seminar in Gender History (3)
Study of topics in gender history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6660 Seminar in Holocaust and Genocide (3)
Study of topics in the history of the Holocaust and genocide. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6665 Seminar in Medieval History (3)
Study of topics in medieval history. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6666 Seminar in Renaissance and Reformation Europe (3)
Study of topics in the history of the European Renaissance and Reformation. Emphasis on discussion and student producing a major research paper based on primary documents.
HIS 6667  Seminar in Age of Absolutism and Enlightenment (3)
Study of topics in age of absolutism and the Enlightenment in Europe. Emphasis on discussion and student producing a major research paper based on primary documents.

HIS 6670  The Middle East (3)
An exploration of the major historiographical works and controversies of the Middle East from the rise of Islam to the modern era.

HIS 6671  Modern East Asia (3)
An exploration of the major historiographical works and controversies of East Asian history since the rise of imperialist and militarist Japan in Asia in the 1930s. The course focuses on China, Japan, Korea, and Vietnam.

HIS 6672  Africa (3)
An exploration of the major historiographical works and controversies of African history, focusing on the 19th and 20th centuries.

HIS 6673  Colonial Latin America (3)
An exploration of the major historiographical works and controversies of Latin American history from pre-Columbian times to the independence movements of the early 19th century.

HIS 6674  Modern Latin America (3)
An exploration of the major historiographical works and controversies of Latin American history from the early 19th century to the present.

HIS 6675  History of Mexico (3)
An exploration of the major historiographical works and controversies of Mexican history from pre-Columbian times to the present.

HIS 6676  The ABC powers (3)
An exploration of the major historiographical works and controversies of the Latin American history, focusing on the ABC powers- Argentina, Brazil, and Chile.

HIS 6677  History of the Caribbean (3)
An exploration of the major historiographical works and controversies of Caribbean history from pre-Columbian history to the present.

HIS 6678  Women, Health, and History (3)
An exploration of the major historiographical works and controversies of women, health, and history in the western world.

HIS 6679  Infectious Diseases and History (3)
An exploration of the major historiographical works and controversies of infectious disease in history from the Neolithic revolution to the present, focusing on a specific case study.

HIS 6680  Teaching College History (3)
This course examines issues and pedagogy of teaching college level history. Students will produce a course syllabus, develop and present lectures, and develop assessments for their course content. Students will also observe a variety of teaching styles and begin to understand benefits and problems of a variety of course delivery methods.

HIS 6696  Seminar in Selected Topics in History (3)
A study of a specific topic not generally covered by the curriculum. Emphasis placed on discussion and students producing a major research paper based on primary sources.

HUMAN RESOURCE MANAGEMENT

HRM 6603  Human Resource Management (3)
The study of the management of people at work with an emphasis on recruiting, selecting, training and evaluating personnel. The study of the use of technology to streamline HR activities. Must be taken during the first term. Prerequisite: BUS 6600 (if required for admission to the MSHRM program).

HRM 6604  Labor Relations (3)
A broad survey of relevant laws, court decisions, and administrative agency rulings relating to union/management relations. An introduction to the techniques, strategies, and objectives of contract negotiation, collective bargaining, and contract administration. For MSHRM students, this elective should be taken after completing 15 credit hours in the MSHRM program.

HRM 6605  Legal Environment of Employment Decisions (3)
This course is designed to help the student learn the law as it applies to the management of human resources. Its coverage is aimed at preparing human resources professionals to recognize legal problems, to know the legal impact of decisions on personnel matters and to be knowledgeable of the law as it might impact individuals in organizations.

HRM 6622  Workforce Planning and Staffing (3)
A study of theory, principles, and legal requirements for effective workplace planning, recruitment, selection, and employment in organizational settings. The course provides an in-depth analysis of tools, techniques and statistical concepts applied to the fundamental HR function of workforce planning and staffing.

HRM 6623  Talent Development (3)
A study of concepts and practices critical to identifying employee human resources training and developmental needs and programs critical to ensuring organizational effectiveness. Topics include instructional
systems development, succession planning, coaching, and organizational development.

HRM 6625 Specialized Study in the Area of Human Resource Management (3-6)
The detailed study of a problem, topic, or issue in Human Resource Management. The course requires preparation of a scholarly paper and oral defense. For MSHRM students, this elective should be taken after completing 15 credit hours in the MSHRM program. Special conditions, restrictions, and approvals apply; contact the Program Directors for information.

HRM 6628 Human Resource Management in the Hospitality Industry (3)
This elective course applies the principles of human resource management to the hospitality industry. It also provides an overview of the hospitality industry and analyzes contemporary issues in the management of human capital in the hospitality industry. For MSHRM students, this elective should be taken after completing 15 credit hours in the MSHRM program.

HRM 6632 Compensation and Benefits (3)
This course is designed to provide the student with both the theoretical and practical knowledge to design, administer, and evaluate compensation systems. It addresses the application of both tangible and intangible forms of compensation to attract, motivate and retain employees.

HRM 6635 Employee Relations, Health, and Safety (3)
This course is designed to develop the student’s understanding of major employment laws and sound employee relations practices that promote positive employee relationships, employee engagement, and retention. The course examines key employee relations functions such as developing corporate culture, promoting effective organizational communication, advancing diversity, equity, and inclusion, resolving issues of employee misconduct, fostering employee safety, health and wellness, and ensuring legal compliance.

HRM 6641 People Analytics (3)
An examination of the metrics, data analysis methods, and data interpretation that are central to creating evidence-based human capital management practices that support business strategy. Applications will relate to the analysis of a variety of human resource functions. While the course takes an applied perspective, basic competency in Excel or SPSS and related statistical techniques (e.g., ANOVA, correlation, regression) is required. For MSHRM students, this elective should be taken after completing 15 credit hours in the MSHRM program.

HRM 6645 International Human Resource Management (3)
A survey of the theory and practice of human resource management in global firms and issues of cross-cultural communication and behavior affecting organizational effectiveness in culturally diverse environments. For MSHRM students, this elective should be taken after completing 15 credit hours in the MSHRM program.

HRM 6689 Human Resource Management Internship (3)
Must have less than one year’s work experience in the Human Resources Management field, must not be currently employed in any capacity by the firm or organization sponsoring the internship, and must have completed at least 12 credit hours in the MSHRM program prior to the term in which the internship is to begin. Special conditions and approvals apply; contact the Program Director for information.

HRM 6698 Strategic Human Resource Management (3)
This capstone course serves as a review and integration of theories and concepts related to the formulation and implementation of human resource strategies to support business strategies. Students discuss issues, analyze case studies, identify problems and their causes, and propose solutions. A grade of B or better is required. Prerequisites: Successful completion of all non-elective HRM courses. Under extenuating circumstances, enrollment in HRM 6698 may be permitted with the approval of the Department Chair as long as only one non-elective course has not been completed but is taken concurrently with HRM 6698.

**HEALTH SERVICES ADMINISTRATION**

HSA 6625 Specialized Study in the Area of Healthcare Management (1-3)
Study of problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, and the appropriate dean. The study must contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student’s program.

HSA 6635 Strategic Management in Health Care Organizations (3)
Focuses on the formulation, implementation, and evaluation of strategy in health care financing/delivery organizations. Emphasizes concepts dealing with industry structure; the strategic management process; achieving and sustaining competitive advantage.
HSA 6680 Health Services Administration and Policy (3)
Focuses on the unique characteristics of the U.S. healthcare delivery system; acquaints students with increased understanding of the context of health services administration and healthcare policy; and examines key factors and forces impacting total health system performance in the United States.

HSA 6681 Legal and Social Issues in Health Administration (3)
Includes an examination of legal and ethical aspects of contemporary issues associated with the health services administration process.

HSA 6682 Healthcare Planning and Management (3)
This course stresses application of traditional management concepts to a variety of health service operational issues, analyzes similarities and differences in management of health service organization (HSO) and other organizational models, formulates new organizational designs and management practices appropriate to current HSO environments, and evaluates adequacy of new models.

HSA 6683 Healthcare Economics (3)
This course stresses economic analysis applied to the health services sector.

HSA 6684 Managed Care: Origins, Organizations, and Operations (3)
Covers managed care programs, structures, practice models, role of physicians and other clinicians, capital, cost-accounting and forms of reimbursement.

INSTRUCTIONAL LEADERSHIP AND ADMINISTRATION

ILA 6603 School Operations & Management (3)
This course presents the skills and knowledge needed for effective school operation. Candidates will demonstrate their ability to promote the current and future success and well-being of each student and adult by applying best practices in management, communication, technology, school-level decision-making, and operation systems. The goal of the course is to improve candidate’s ability to make data-informed and equitable educational resource allocations that comply with laws, policies and regulations. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6611 Community Relationships
There are four spheres of influence, (home, neighborhood, community, and virtual) in which today’s public schools exist. These arenas exert force upon the schools and at the same time are affected by the school. Because these environments are dynamic, they present school leadership with many challenges and an equal or greater number of opportunities. The purpose of this course is to show school leaders how to provide the resources that the stakeholders need in each of these arenas. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6613 Legal Dimensions of Education (3)
Public schools are among the most regulated industries in the United States. Constitutional, Legislative, and Judicial mandates control everything from the length of the school day/year to who is qualified to teach. This course will examine the legal precedents that impact instructional leaders. Distinct attention will be given to special education law, Constitutional freedoms, personnel and civil law and to federal and state mandates related to student accountability. The candidate will need to understand how to manage uncertainty, risk, competent initiatives, and politics of change for continuous improvement. This course teaches students how to develop and administer systems that are fair and equitable management of conflict for the P12 student, faculty, staff, leaders, family, and community. Candidates should expect to

IEE 5544 Internship Seminar (3)
This course provides interns an opportunity to develop analytical thinking skills through examining broad educational issues and concerns, topics on the state and local levels, and those of personal interest. The scope of the course ranges from juvenile law, classroom management, professionalism, professional development for teachers, and other course topics. This course must be taken concurrently with internship. Grading system is Pass/Fail.

IER 6655 Interdisciplinary Internship in Grades P-12 (6)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. Grading system is Pass/Fail.
spend some hours in clinically related activities as part of this course.

ILA 6614 Ethics & Professional Responsibilities (3)
Public schools are among the most regulated industries in the United States and to a certain degree so are the people who work in them. Holding educators to a higher standard than others should not come as a surprise. The primary focus of the course is how the leader serves as an ethical role model and decision-maker. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6633 Instructional Leadership (3)
The success or failure of the school largely depends on the effectiveness of its leader in defining a mission, a professional set of core values and the implementation of the vision. For this reason, increased attention is being placed upon the preparation of the school leader. This preparation includes not only the professional knowledge but the professional dispositions-ethics and core values necessary to successful leadership. With this in mind, leaders must be able to not only manage the physical plant but also create an environment where students can learn. This course will provide program completers with the knowledge and skills necessary to lead a 21st century school but also give them tools and processes critical to the development of a mission, vision, and core values that will insure high-quality instruction and increased learning. In addition, the course will examine the strategies that are critical to continuous improvement. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6643 Human Resources for Collaborative Schools (3)
From a budgetary perspective, the most important aspects of education are those things, which get the most funding. In a typical budget, personnel (salaries and retirement) receive about 80% of the expenditures. This course will deal with the selection, staffing and development of all school personnel. Special attention will be given to the legal issues relating to human resource management. The candidate will learn how to establish a professional culture driven by a shared vision, goals and objectives for the well-being of every student while setting high expectations, ethical, and equitable practices, collaboration, integrity, and continuous improvement. Using collaborative practices and professional feedback, the candidate will examine the applicability of roles, trends, and research in order to improve the execution of strategic plans for managing staff resources related to school improvement and student learning. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6658 Working with Diverse Populations (3)
According to recent demographic predictions, the American classroom will continue to increase in diversity. According to some estimates, within the next 20 years ethnic minorities will become the majority. To succeed in this changing world, instructional leaders must be prepared to lead a diverse learning environment. This course will provide instructional leadership candidates with the skills, abilities, dispositions, and strategies to foster learning environments where all children including those with special needs, can experience success. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6684 Curriculum and Instructional Strategies (3)
Which instructional practices support the highest gains in student achievement? If one reads the publicity associated with new programs, they all do! How is the busy instructional leader to know how to separate the genuine instructional practice from the fad? This course examines the current research that supports student learning and engagement. In order for instructional leaders to promote effective learning environments, they must be able to understand, identify, and apply effective learning theories, research-based instructional strategies and methodologies. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6685 Assessment & Intervention Strategies (3)
This course is a review of assessment strategies. It will include statistical processes used in data analysis. Various standardized tests and measurement procedures will be analyzed. Test construction and interpretation of teacher-made tests will be a prominent part of the course. Particular importance will be given to research-based intervention strategies. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 6699 Residency (3)
The purpose of this course is to provide instructional leadership candidates with an opportunity to lead school-based experiences at the elementary, middle, secondary grade levels for a period of 10 consecutive days. Supervising these experiences are the full-time university faculty members and approved local mentors. The intern will gain hands-on knowledge of school operations. Candidates should expect to spend some hours in clinically related activities as part of this course.

ILA 7700 Adult Learning Theories and Managing Change (3)
This course will focus on the examination of how adults learn in instructional settings and managing change. The adult learners’ characteristics will be examined. Adult learning theory and current trends on advancement in adult learning and managing change will be examined. The focus will be on preparing the student to make better instructional deci-
The greatest asset any organization possesses is its employees. Current research indicates that organizations routinely report 80% of the expenses go to employee compensation. This figure underscores the need for skills to increase the performance of this very important asset. This course examines the leadership of human resources and what it takes to create an environment where employees can thrive.

ILA 7791 Current Trends and Issues in Instructional Leadership (3)
Examines the trends and issues that arise impacting educational policy. Emphasizes group and individualized integration of theory and application of professional knowledge toward a given trend and/or issue affecting public education from a national, state, or school-based level.

ILA 7792 Advanced Comprehensive Research Strategies (3)
This course is intended to explore the concepts of quantitative and qualitative research methods application for research in education. Participants apply their skills in research design by completing a proposal for a substantive study related to the improvement of instructional services. A grade of “B” or better is required.

ILA 7793 Program Evaluation (3)
This course focuses on a variety of concepts and strategies associated with effective planning in Educational and Human Services organizations.

ILA 7794 Research in Action (3)
The purpose of this course is to provide instructional leaders with a study of the processes involved in identifying, framing, evaluating, analyzing and seeking information about problems faced by schools. The goal for the student is to propose a research and implement a study that examines a problem currently impacting the K-12 school setting.

ILA 8801 Visionary Leadership (3)
Educational leaders need to have vision, continuously learn, take risks, be decisive and ethical, understand and care about people in the organization, and empower the organization’s workforce to be creative and take ownership of their jobs. Focus areas include the role of being a visionary leader, examination of leadership styles, strengths and limitations of effective leaders, as well as qualities of leadership that are needed in crisis.

ILA 8802 Finance and Governance (3)
The course addresses educational finance and governance. Educational policy, as a part of finance is a focus, as the social and political positions of leaders and public influence governance specifically in planning, development and implementation of the finances including budgeting, purchasing, human resources, and business management. Emphasis is placed on processes and procedures, which effectively and equitably meet the instructional needs of the district or state while supporting increased student achievement.

ILA 8803 Educational Law (3)
This course will focus on the education-related litigation and the implications of court rules for educational leaders as well as related changes in policies affecting the educational environment. The focus
will be current federal and state laws as they apply to the state and districts and educational settings, personnel, and other entities.

ILA 8804 Human Resources (3)
This course examines the principles of human resources at the district, regional, and state level. Topics include planning, organizing, staffing, directing, controlling, communication, decision-making, priority setting to meet organizational and institutional goals. The course also examines tools and techniques for selection, training, compensation, and performance appraisal. Focus areas include knowledge of diversity in the workplace, cultural values, ideals, principles, ethics, and the role of leadership.

ILA 8805 Analysis and Design of Educational and Instructional Systems (3)
This course examines the analysis and design of educational and instructional systems including the structure and infrastructure of technology used in face-to-face and distance education. The course will emphasize evaluative processes such as strategic planning and needs assessments for systems that lead to improved student achievement.

ILA 8806 Advanced Seminar in Instructional Leadership and Administration (3)
This course is an advanced seminar for doctoral students in leadership in the field of instructional leadership and administration. In their coursework, candidates have been exposed to a comprehensive examination of the factors comprise education in the 21st century in instructional leadership and administration. Therefore, the theme of the seminar is innovation and related phenomena and processes in organizations. There is a focus on the interaction between leadership and culture, approached as a set of norms, a set of related practices, language and values, that marks gender, resilience, racial and ethnic groups, countries, and national and transnational social movements: why certain leaders and leadership styles have evolved; the roles of social movements, changes in societal views regarding leadership and what resources, if any, it offers leaders. Students chose a topic in educational leadership at the district, regional, or national or international level and research their topic, construct a literature review, and complete a final project on the topic related to their dissertation.

INTERNATIONAL RELATIONS

IR 6600 Selected Topics in International Relations (3)
An examination of a specifically defined topic of special and/or current interest and importance, which is not covered in regular course offerings in the International Relations program. A selected topic in International Relations course can only be used as an elective in the program. See semester hour limits listed under Course Restrictions in General Regulations section.

IR 6601 Research Methods in International Relations (3)
An investigation of the research methodologies employed in the study of International Relations including research design, variables and hypotheses, citations and reference, qualitative analysis and quantitative techniques. Note: MSIR candidates must achieve a grade of “B” or better in IR 6601 to complete degree program requirements. Note: IR 6601 must be taken within the first six classes.

IR 6603 Introduction to International Relations (3)
A survey of the discipline of International Relations (IR) introducing IR theory, power, national interests, instruments of foreign policy, international law and organizations, international political economy, comparative government, and research methodology.

IR 6602 Geostrategic Studies (3)
An examination of the political, military, economic and cultural effects of geography in historical and contemporary terms: specific emphasis is placed on the role of geography in the formulation of military-political policy in land power, sea power, airpower, and outer space. Comprehensive geopolitical theories will be employed as analytical tools in the course.

IR 6610 International Organizations (3)
An examination of the evolution and functions of international organizations; political structures and international systems for the collective use of power and cooperative action among states; and the impact of international Non-Governmental Organizations (NGO) and other types of transnational relations and organizations on global affairs.

IR 6611 Comparative Government (3)
A comparative analysis of state governments in the world with an emphasis on political cultures, governmental institutions and political processes that lead to differences and international tensions.

IR 6614 International Law (3)
An examination of the sources and development of international law from historical, political, legal, and philosophical standpoints, with emphasis on substantive areas of law.

IR 6615 Comparative Politics of North Korea (3)
This course examines North Korea politics, economics, and society. The course will review the establishment of the North Korean state and its contemporary political institutions, as well as the economy and state-society relations. While North Korea will be viewed through theoretical lenses, the course will address practical policy dilemmas when dealing with North Korea.
IR 6618 Chinese Intelligence in International Relations (3)
Understanding Chinese Intelligence is a critical strategic element for the United States and its allies. We begin with a classical and strategic examination of Chinese espionage and look at its historical development. We will examine Beijing’s cyber strategy, capacity, and strategic use and look at industrial espionage. Finally, we will examine counter-intelligence and assess overall Chinese intelligence capabilities.

IR 6616 East Asian Security (3)
This course provides an examination of East Asian security issues using international relations and comparative politics theories. Topics include nuclear proliferation in North Korea, military upgrades in China, territorial disputes, rising nationalism, Association of Southeast Asian Nations (ASEAN), and the United States’ role in the region.

IR 6617 Chinese Security (3)
China’s rise in the international affairs has given Beijing a means to advance its global interests. This course will consider China’s vulnerabilities and interests and consider the government’s response. This course examines Beijing’s identity and interests and then moves on to consider the strategic elements that determine China’s policy responses. This course examines China’s access to energy, food, and raw materials, currency and trade exposure, military modernization, and Beijing’s instruments of power.

IR 6615 Arab-Israeli Security (3)
This course focuses on the Arab-Israeli conflict since 1948 with a special focus on the challenges to conflict resolution on both the Arab and Israeli sides and the role great powers play in Middle Eastern politics. The course will begin by examining the major historical events from the birth of Israel to the present day. Attention will be given to important groups, events, movements that will allow the complexity of this relationship to come to light. Additionally, the course will focus on the relationship between the West, particularly Europe and the United States, and the Middle East.

IR 6620 International Political Economy (3)
An examination of the interrelationships between international politics and economics covering theories of International Political Economy, states and markets, trade, foreign investment, international monetary affairs, foreign aid, state development strategies, and globalization.

IR 6621 East Asian Political Economy (3)
This course provides an examination of East Asian political economy issues using international relations and comparative politics theories. Topics include economic development in Japan, China, and on the Korean Peninsula, economic development and democratization, regional and global economic integration and discussion of the relationship of economics to security in the region.

IR 6622 European Security (3)
This course provides an examination of European security issues using international relations and comparative politics theories. Topics include political and military integration, examining both NATO and the European Union, NATO expansion, relations between Western Europe and Russia, European peacekeeping, the United States-Europe relationship, and comparative security and foreign policy.

IR 6623 Arab-Israeli Security (3)
This course focuses on the Arab-Israeli conflict since 1948 with a special focus on the challenges to conflict resolution on both the Arab and Israeli sides and the role great powers play in Middle Eastern politics. The course will begin by examining the major historical events from the birth of Israel to the present day. Attention will be given to important groups, events, movements that will allow the complexity of this relationship to come to light. Additionally, the course will focus on the relationship between the West, particularly Europe and the United States, and the Middle East.

IR 6624 Geopolitics of Eurasia (3)
This course provides an examination of geopolitical issues and power politics across Eurasia. Topics include the Putin Doctrine, Russian regional hegemony and the legacy of the Soviet Union, regional integration, the role of natural resources in power politics, and the increasing prominence of Central Asia in international politics.

IR 6625 Specialized Study in International Relations (3)
A study of a problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, and the department chair. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. A specialized study may be substituted for a required course only once in a student’s program. It may, however, be substituted for one or two electives. Prerequisite: IR 6601. See semester hour limits listed under Course Restrictions in General Regulations section.

IR 6626 International Political Geography (3)
An analysis of the reciprocal effects of geography and political organization on the behavior of states including boundaries and frontiers, national resources, spatial strategy and maritime power.

IR 6627 Intercultural Relations (3)
An analysis of the influence of culture on interstate relations including theories, concepts, and applications.

IR 6628 Arctic and Antarctic Security (3)
The course focuses on development and security in the most northern and southern regions of the world. The economic importance of polar politics has increased due to international competition for natural resources resulting from global growth in population and industry. The strategic importance of the Arctic and Antarctic has increased due to easier access resulting from warmer weather and stronger ships. The combination of competition and access has heightened the danger of environmental degradation and military conflict in these two previously neglected regions. Note: This course is listed in the Graduate Catalog as an elective in two concentr-
Revolutions have upended the politics of many countries over the past two centuries, from the American and French Revolutions of the eighteenth century to the Arab Spring and the Color Revolutions of the past twenty-plus years. This course examines the process of revolutions across the modern world, along with prominent theories of revolutions. It also dissects the ways by which major political change comes about, such as through popular movements (“People Power”), revolutions from above organized elites, negotiated ends to authoritarian regimes, and democratization in its various forms. It also considers the fall of democracies. Finally, the course looks at the relationship between cultural and political changes, in terms of the various social, business, and scientific upheavals (also popularly called revolutions) that have transformed modern societies.

An examination of the structures, motivations, and major objectives of national security policy making from a comparative perspective with particular emphasis on the politics of national defense in the United States.

This course provides an examination of diplomacy in International Relations, viewed from both theoretical and practical perspectives. Topics will include fundamentals in the practice of statecraft, including negotiation and conflict resolution, and the difference between public and private diplomacy, ethics and morality in diplomacy, and the continually evolving nature of diplomatic practices.

This course examines the development of Irregular Warfare (IW) since the Second World War. Various aspects of this type of warfare will be examined from the counter-insurgency (COIN) to Foreign Internal Defense (FID) conducted by three democracies: Britain, France, and the United States will be discussed. The central focus of this course will be American IW. Further, Irregular Operations on land, air, and sea will be thoroughly analyzed. There will also be a discussion role of technology in these type of conflicts.

This course provides an examination of European political economy issues using international relations and comparative politics theories, with specific attention to the European Union. Topics include models of economic and political integration, the evolution, development, structure and function of the E.U., and economic relations between E.U. countries and the world.

In 2014, events in Ukraine shocked the world. Russia became the first major country since World War II to forcefully invade another country and assimilate new territory. The Crimean crisis and the resulting civil war in Ukraine in which Russia took an active role not only surprised the rest of the world, but also surprised Russian security experts. This class looks at the evolutions of Russian security following the collapse of the Soviet Union. It examines a resurgent Russia and its security needs. Further, this class analyzes whether the world has entered another Cold War with Russia.

An analysis of the government and politics of developing states including economic, social, and cultural perspectives and strategies pursued for growth and development.

An examination of Latin American politics, legal systems, economics, culture, military power, geography, and their impact on Latin American regional relations and linkages to the world system.

An examination of Russia and Eastern Europe's politics, legal systems, economics, culture, military power, geography, and their impact on regional relations and linkages to the world system.

The election of 2016 in the United States was unique in that all of the United States Intelligence agencies claimed that the Russian Federation had tried to influence the presidential election in favor of Donald Trump. This technique of hybrid war is nothing new to Russian intelligence agencies. In fact, the Russian intelligence agencies have consistently been honing their skills to act as an efficient wear in the security of the Russian Federation. This class will examine the history of the Russian Intelligence services, their decline during the initial post-Soviet period, and their meteoric resurgence following the ascension of Vladimir Putin, himself a Russian Intelligence operative, to the presidency of the Russian Federation.

An examination of Middle East politics, legal systems, economics, culture, military power, geography, and their impact on regional relations and linkages to the world system.
IR 6645 Comparative Politics of East Asia (3)
An examination of Asian politics, legal systems, economics, culture, military power, geography, and their impact on regional relations and linkages to the world system.

IR 6646 Comparative Politics of South Asia (3)
An examination of the intrastate and global relationships of South Asia; the course will focus on India and Pakistan, but also cover Bangladesh, Sri Lanka, and additional states in South Asia to engage the student in the security, political, cultural, and social aspects of the region.

IR 6647 Comparative Politics of Western Europe (3)
An examination of Western Europe and the European Union, including state and EU politics, legal systems, economics, culture, military power, geography, and their impact on regional relations and linkages to the world system.

IR 6648 Comparative Politics of Sub-Saharan Africa (3)
An examination of Sub-Saharan politics, legal systems, economics, culture, military power, geography, and their impact on regional relations and linkages to the world system.

IR 6649 Cyber Warfare and International Relations (3)
This course introduces students to the literature and methodological approaches related to the study of cyberwar/cyberterrorism and international relations. Topics covered include: Targeting, Weapons, Tactics, Defense, International Law and Policy, Digital Authoritarianism, and a study of selected cases.

IR 6650 Environmental Security, Conflict and Development (3)
An analysis of how environmental issues such as resource scarcity, desertification, loss of biodiversity, global warming, etc., may influence development and/or affect the national security of nations, communities and individuals. The course also examines the evolution and function of global environmental governance institutions including international organizations (IGOs), transnational non-governmental organizations (NGOs), and legal/regulatory structures.

IR 6651 Contemporary American Foreign Policy (3)
An examination of the foreign policies processes of the United States including historical traditions, political institutions, economic and military capabilities, the Congress, the Presidency, interest groups, the media, and public opinion.

IR 6652 International Relations Theory (3)
An examination of historical and contemporary theories in international relations; the role of political, economic, ethnic, religious and other belief systems or philosophical approaches within the global system.

IR 6653 Game Theory and Forecasting (3)
An introduction to game theory, and game theory based forecasting, this course covers expected utility theory, and games in both normal and extensive forms as well as their use in analyzing cases and making predictions about outcomes. The emphasis

IR 6654 International Conflict Management (3)
An analysis of responses to international conflict and approaches to establishing peace and peacekeeping at the local, national, and global levels to include theoretical constructs about conflict management techniques such as mediation, negotiation, escalation, de-escalation, termination, and outcomes.

IR 6656 Strategy (3)
An examination of how nations use political, military, and economic resources to achieve their objectives in the international arena.

IR 6657 Middle Eastern Security (3)
This course provides an examination of Middle Eastern security issues using international relations and comparative politics theories. Topics include conflict between Sunni and Shi’a Muslims, conflicts involving ethnic and religious minorities such as Kurds and Druze, democratization, relations and tensions with the West including recent military and development operations, and Saudi Arabia’s “special relationship” with the United States, and conflict involving non-state actors, and nuclear politics with Iran.

IR 6658 Middle Eastern Political Economy (3)
This course provides an examination of Middle Eastern political economy issues using international relations and comparative politics theories. Topics include the politics of oil, the role of Islam, the legacy of colonialism in economic development, the impact of globalization on economics in the region and the potential for economic reforms.

IR 6659 Russian Hybrid Warfare (3)
This course opens with a historical and conventional examination of hybrid warfare and considers how it is employed by Russia against the West. It looks at the place hybrid warfare has within the Russian strategic framework and considers its dimensions and how it is manifested in particular regions.

IR 6660 Military Strategy and International Relations (3)
An examination of the core ideas of classical and contemporary military strategists, the international context that inspired their strategic concepts, and a review of the interaction and influence of armed forces and their leadership and strategies on national security policies and interstate relationships.

IR 6661 U.S. Intelligence in International Relations (3)
An examination of the purposes, structure, development, and operations of state intelligence programs, with a particular focus on the U.S. Intelligence community.

IR 6662 Contemporary American Foreign Policy (3)
An examination of the foreign policies processes of the United States including historical traditions, political institutions, economic and military capabilities, the Congress, the Presidency, interest groups, the media, and public opinion.
is on applications of game theory in analyzing and predicting international political events.

IR 6664  European Nationalism (3)
Nationalism is an ideology that has risen to the forefront of European politics in the last decade. This course provides a theoretical and empirical examination of nationalism in Europe. The course will start with a discussion of the foundations of nationalist thought, before turning to discussion of nationalist political parties in Greece, Hungary, and Bulgaria. After discussing nationalist political parties, we will discuss the role that nationalism plays in ethnic conflict using the case of the former Yugoslavia as a case study. Finally the course will also deal with the effects of violence on feelings of ethno-nationalism, and the course will culminate in a discussion that have to their own questions the bond that individuals have to their 'nation.' In addition to learning about a variety of nationalist parties and movements in Europe, students will also learn about minority groups (such as Jews and the Roma) that often find themselves victimized by nationalist.

IR 6665  Readings in International Relations (3)
A guided program of readings and study in international relations related to the needs of the student. Enrollment must be approved by the department chair. See semester hour limits listed under Course Restrictions in General Regulations section.

IR 6667  Nuclear Strategy (3)
The course examines the theory and practice of nuclear strategy. It reviews the development and current state of nuclear weapons technology, and how nuclear weapons have enabled various deterrence and warfighting strategies during and after the Cold War. The course traces the development of nuclear strategy and efforts to prevent proliferation. It considers the nuclear strategy of the major states who hold nuclear weapon or are actively trying to acquire them by considering China, Russia, North Korea, and Iran. As great power competition has intensified since 2014, the role of nuclear weapons in great power conflict has also experienced a resurgence, where many strategic questions of the Cold War about deterrence credibility, strategic stability, the role of arms control pose themselves in a new form.

IR 6668  Thesis (3)
A directed research in selected areas of international relations, based on a student’s proposal, related to the student’s needs, and with the advice and approval of a faculty thesis adviser, and culminating in a research paper of appropriate depth and scholarship. The final, bound product must be approved by a faculty committee composed of the thesis adviser and a faculty reader. The first course will cover the paper design and supporting research; the second course will be undertaken to support the actual writing of the thesis. Prerequisites: IR 6601 and the satisfactory completion of 30 semester hours in the MSIR program. Grading system is Pass/Fail.

IR 6671  European Intelligence in International Relations (3)
Understanding European Intelligence culture and strategic environmentalist a critical strategic element for the United States and its allies. We begin with a focus on European intelligence culture, its role in strategic thought, and the current European security environment. The course includes a case study of British intelligence and the role of intelligence in fighting terrorism in Europe. We will consider intelligence sharing and cooperation, how to fix the intelligence crisis, and contemporary lessons.

IR 6673  Iranian Security (3)
This course focuses on the Islamic Republic of Iran (IRI), including Iranian domestic politics, Iranian foreign policy, and the impact of the IRI on regional security. Topics include regime ideology, political structure, governmental performance, and foreign relations.

IR 6681  Tribalism and Colonialism in Africa (3)
An investigation of the politics that govern tribalism and colonialism, the sociological influences it has induced, and how the two concepts impact the people of Africa today.

IR 6684  Political Violence in Latin America (3)
An examination of the nature, origins, and impact of political violence in Latin America. This course examines forms of organized violence with explicitly political aims, including civil wars, state repression, coups, revolutions, and terrorist violence.

IR 6685  Terrorism and Political Violence (3)
An examination of the origins and significance of contemporary political violence with an emphasis on the phenomenon of terrorism. The course employs an interdisciplinary, case-study approach.

IR 6686  Human Security in Latin America (3)
This course applies the framework of human security to understand emerging and non-traditional sources of instability in Latin America. This includes an exploration of the social and political dimensions of chronic problems like criminal violence, human trafficking, ethnic and gender-based violence, and environmental threats.

IR 6687  Latin American Political Economy (3)
A critical analysis of the origins, development, consolidation and limitations of free trade and economic integration in the Western Hemisphere; special attention will be given to the complex political, economic and social forces that support, hinder and otherwise shape such international economic agreements.
IR 6688 Political Islam (3)
An advanced seminar dealing with the theology and practice of Islam and its impact on international, legal, political, security, and social issues.

IR 6690 Capstone (3)
This course serves as the capstone course for the MSIR program and requires students to conduct a significant research project in an IR topic chosen by them in consultation with the instructor. Students will have 6 weeks to produce a conference level paper (5,000+ words) that will be graded by at least two faculty members. Note: MSIR candidates must achieve a grade of “B” or better in IR6690 to complete degree program requirements. Prerequisites: Students must have completed all other IR core courses (IR 5551, IR 6601, IR 6620, IR 6652) as well as at least 15 hours of MSIR electives prior to enrolling in this course.

IR 6691 Contemporary Conflicts (3)
This course is an in-depth case study of contemporary global conflicts. Each case is examined historically to understand what led to the outbreak of violence and in the context of great power competition.

IR 6692 Economic Statecraft (3)
This course will introduce students to the study of economic statecraft by focusing on the nexus between economics and security. It examines how states and non-state actors use economic and financial policies and tools such as trade, foreign aid, natural resources, and infrastructure for strategic and national security purposes. Topics include international trade and trade statecraft, financial statecraft, economic sanctions and coercion, foreign aid, infrastructure and development, natural resources, industrial policies, terrorism and economic tools, etc.

IR 6693 Space Security (3)
Space is a domain that is contested, congested, and competitive. Further, the unique physical conditions of space challenge all those who wish to take advantage of it. This class, while focusing on issues inherent in the military use of space including weaponization, the security dilemma, and theory, also focuses on the difficult operating conditions space presents as we explore major strategic challenges and the rise of great power competition in space. The course begins with a broad overview of space warfare and the issues inherent in it, followed by a broader discussion of historical trends and patterns in space security and strategy, beginning with the Cold War. We then discuss various theoretical approaches to space power, considering the implications of using analogies in discussions about space.

IR 6694 African Terrorism (3)
An examination of terrorism in Sub-Saharan Africa and how it is tied to both domestic and international factors.

IR 6695 Sub-Saharan African Diplomacy and Economics (3)
An examination of Sub-Saharan African diplomacy and economics and their impact on regional relations and linkages to the world system.

IR 6696 Women, Peace, and Security (3)
This course will examine how gender matters in the study of conflict and security, with a special focus on issues related to the Women, Peace, and Security agenda. Students will gain exposure to mainstream and critical work in international relations and will examine topics including: women’s roles in national militaries and nonstate armed groups, gender-based violence, masculinities, intersectionality, and gender in peace processes and post-conflict rebuilding.

IS 6625 Specialized Study in the Area of Information Systems (1-3)
Study of problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, and the appropriate dean. The study must contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student’s program. Prerequisite: All business foundation courses or equivalent.

IS 6660 Introduction to Data Analytic Strategies and Applications (3)
This course focuses on developing new insights and understanding of organizational performance based on data and quantitative methods. The course introduces the fundamentals of interpreting data, performing data analysis, understanding the data, visualizing the data and communicating with the data into actionable insights. Topics of study include qualitative and quantitative data analysis, fundamental tools and techniques for data manipulation using software tools, visualization, and decision making methodologies.

IS 6662 Big Data Analytics and Business Decision Support (3)
This course introduces the concepts and practices of Big Data analytics and its application to executive business decisions that enhance business competitiveness. Students will learn how to utilize Big Data methodologies and analytic software to interpret and visualize large data sets into meaningful and useful information for business use. The course also includes case studies in how major businesses have used big data to gain new perspectives and insights that enabled new competitive advantages and marketing advantages.
IS 6672  Information Systems and Business Strategy (3)
Consider the role of operations and information systems in defining competitive business strategies. Structural decisions (product design, marketing, and finance) as well as issues that cross corporate boundaries (strategies for distribution, supply management and global operations) are addressed. Examines emerging issues such as global manufacturing, e-commerce, sourcing strategies, manufacturing automation and environmental issues. Prerequisite: All business foundation courses or equivalent.

IS 6674  Information Systems in the Global Economy (3)
Theoretical and practical applications for managing computerized information systems; planning and control functions of the firm; emphasis on case studies of design projects; the application of computer and organizational issues of Management Information Systems (MIS); current academic research into the analysis, design, and implementation of computer information systems. Prerequisite: All business foundation courses or equivalent.

IS 6675  Information Security and Assurance in a Global Economy (3)
This course introduces the various technical and administrative aspects of information security and assurance within a global networked environment and provides the foundation for understanding the key issues related to them. Topics covered include inspection and protection of information assets, detection of and reaction to internal and external threats, determining the levels of protection needed, and the design of a consistent, reasonable information security architecture along with an implementable process. Other topics include technical and managerial aspects of a wide range of policies and issues relating to reporting and monitoring, upgrading and patching, intrusion detection, maintenance and mining of security logs, backup and recovery, and global issues related to trans-border data flow and intellectual property rights. Prerequisites: Graduate standing, admission into the MBA program and all undergraduate business prerequisite courses or equivalents completed.

IS 6676  E-Commerce for Global Business (3)
Introduces state-of-the-art concepts and applications which are emerging in the field of electronic commerce. Prerequisite: All business foundation courses or equivalent.

IS 6677  Leadership Series on Information Technology (Seminar Course) (3)
This course consists of seminars and a final semester student research paper. Seminars will be given by information technology (IT) leaders; each seminar will be followed by a session of questions and informal gathering. Seminar topics and speakers chosen based on the progression of other courses in the program and will have an international context. Each semester, students have the opportunity to complement their in-class learning experience with related practical experience from IT leaders. At the end of the semester, students must submit a quality written research paper to be presented in class or at a conference.

IS 6678  International Information Technology Project Management (3)
This course discusses the processes, methods, techniques, tools, issues, and practices that organizations use to manage their international information systems projects. The course covers a systematic methodology for initiating, planning, executing, controlling, and closing projects. This course assumes that project management in a global organization is a complex team based activity, where various types of technologies including project management software as well as software to support group collaboration are an inherent part of the project management process. This course also acknowledges that project management involves both the use of resources from within the firm, as well as contracted from outside the organization. Prerequisites: Graduate standing, admission into the MBA program and all undergraduate business prerequisite courses or equivalents completed.

IS 6679  Management Information Systems (3)
Conceptual and practical foundations of information systems to include support of management and decision-making functions, computer system project management, economic and legal considerations of management information systems, and system implementation/evaluation. Prerequisite: All business foundation courses or equivalent.

JRN 6600  Media Management (3)
In this course, students will examine the competitive environment facing today’s media, the various management principles that may be applied to media companies, and media management crisis.

JRN 6615  Public Relations and Strategic Communication
Students will examine how the changing media environment affects outreach methods and explores practical solutions to achieve communication goals. Emphasis is placed on crisis public relations problems. Topics include the importance of research, designing a strategic communication program, advertising and the pervasive effect of public relations.

JRN 6635  International Advertising (3)
This course examines the global dimensions of advertising communication; the analysis of economic, cultural ethical/legal, and media conditions affecting international advertising and its methods.
Kinesiology and Health Promotion

KHP 6602 Motor Skills and Human Performance (3)
In an interdisciplinary approach, students will be exposed to a systematic analysis of motor skills and human performance. Students will learn how to observe, evaluate and diagnose, and apply interventions to improve motor skill performance.

KHP 6604 Statistical Analysis and Interpretation (3)
This course requires graduate students to utilize statistical fundamentals, analyses, and interpretation of statistics. Statistical information includes, but is not limited to, sampling, hypothesis testing, regression, frequency distributions, t-tests, parametric and non-parametric statistical techniques, multivariate data analysis (MANOVA), and others using SPSS and other statistical software.

KHP 6610 Physical Education, Sport and the Law (3)
The course is designed to provide students with an in-depth awareness and understanding of legal responsibilities of sport managers, coaches, and administrators. Emphasis will be placed upon critically analyzing the legal theories, structures, statutes, case law, and standards that apply to the sport industry and that impact sport organizations. Substantive legal areas include tort, constitutional, antitrust, intellectual property, agency, contract, and business law.

KHP 6615 Organizational Behavior & Leadership in Sport (3)
In this course students will study the basic concepts, theories and organization of administration including financial management as applied to sport, physical education, and recreation.

KHP 6616 Sport Finance (3)
This course is designed to provide students with information concerning advanced theory in finance, accounting, and managerial control of budgets.

KHP 6617 Research Methods I (3)
An independent exploration of the literature and current research in the fields of Health Education and Physical Education. A grade of "B" or better is required.

KHP 6620 Physical Fitness: A Critical Analysis (3)
This course is designed to prepare the student for the American College of Sports Medicine (ACSM) Health Fitness Specialists (HFS) certification. The course will examine the process of pre-participation health screening and risk stratification, administration of physical fitness assessments, and interpretation of results and the development of appropriate exercise prescriptions used in the evaluation and improvement of human fitness.

KHP 6623 Biomechanics of Sport Techniques (3)
This course is designed to prepare the student for the National Strength and Conditioning Association (NSCA) Certified Strength and Conditioning Specialist (CSCS) certification. The course explores basic biomechanical concepts and their application in the analysis of sport technique. Students will apply scientific knowledge to examine sport-specific testing assessments and interpretation of results, and practice the implementation of safe and effective training techniques for the goal of improving athletic performance.

KHP 6625 Specialized Study in KHP (1-3)
KHP 6626
KHP 6627 A study of the problem or problems using research techniques. Selection of problem must be approved by student’s adviser, instructor under whom the study is to be made, and the appropriate Director of Graduate Studies. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.

KHP 6631 Programs in Health and Physical Education (3)
The course reviews appropriate curriculum for children of various age levels. Particular attention is devoted to a study of the capacities, attitudes, and needs of pupils as they are related to health and physical education. The principles, problems and procedures in the development of a health and physical education curriculum are thoroughly examined.

KHP 6632 Critical Issues in Sport and Fitness Management and Health and Physical Education (3)
Recognition, discussion, and systematic analysis of controversial issues and problems encountered in the conduct of professional activities in health and physical education.

KHP 6635 Kinesiology (3)
This course is a clinically oriented human anatomy course. This course is designed to provide an advanced analysis of human functional anatomy, with primary emphasis being placed on the articular, skeletal, and muscular systems.

KHP 6640 Sport Marketing: Physical Education, Athletics, Recreation and Intramurals (3)
The purpose of this course is to teach educators how to create a marketing plan. The emphasis is on following a ten-step procedure designed primarily for the non-profit sector and learning the theoretical base required to complete the process accurately and proficiently.

KHP 6650  Sport Nutrition and Exercise Metabolism (3)
This course examines established dietary requirements of athletes relative to performance, training, and recovery. Emphasis will be placed on the use of peer reviewed literature to understand the importance of pre- and post-event nutrition, nutritional issues faced by athletes, and possible ergogenic strategies, foods, and dietary supplements. Examination of metabolic pathways and will allow advanced interpretation of the metabolism and macronutrients during conditions of exercise and disordered metabolism.

KHP 6670  Exercise Physiology (3)
This course examines acute and chronic physiological responses to the respiratory, cardiovascular, and musculoskeletal systems to the demands of exercise. Contributions made by aerobic and anaerobic metabolism to energy production will be examined. The contribution of various physiological variables will be investigated to facilitate an understanding of the physiological basis of human performance.

KHP 6671  Advanced Exercise Physiology (3)
This course will allow students to experience and explore advanced concepts, topics, and laboratory techniques related to exercise physiology. Material covered in this course will prepare students to interpret, conduct, and share advanced material with their peers. Students will have the opportunity to implement an advanced research project or commence thesis-related research.

KHP 6672  Sport Psychology (3)
The course is designed for the student with a vocational interest in athletic coaching within the educational environment. Psychological theories will be applied to the teaching of sports skills and the development of individuals into efficient team units.

KHP 6673  Ethics in Sport (3)
The course examines ethical matters and issues relating to sport and physical activity.

KHP 6674  Entrepreneurship in Sport (3)
The course provides the student with an awareness and understanding of basic concepts and problems in starting a business.

KHP 6680  Practicum in Physical Education (3)
A supervised application of concepts, principles, instructional, curriculum, and delivery skills acquired by students in previous coursework. Students will identify issues regarding classroom management, testing, and evaluation in physical education. Students will explore innovative ideas for the classroom and research peer reviewed journals for information for application in the classroom setting.

KHP 6690  Internship (3)
A 400-hour supervised experience in planning, staging, and evaluating a formal practicum in related field.

KHP 6691  Research Methods II (3)
This course examines the variety of research methods and reporting methods used in health and physical education research. A grade of “B” or better is required. Prerequisite: KHP 6604 and KHP 6617 with a “B” or better.

KHP 6694  Thesis I (3)
Independent research leading to the preparation of a scholarly paper related to sport and fitness management topic under the supervision of the student’s advisory committee. The student’s advisory committee will administer an oral examination covering the research and findings. Grading system is Pass/Fail.

KHP 6695  Thesis II (3)
Independent research leading to the preparation of a scholarly paper related to sport and fitness management topic under the supervision of the student’s advisory committee. The student’s advisory committee will administer an oral examination covering the research and findings. Grading system is Pass/Fail.

ORGANIZATIONAL LEADERSHIP

LDR 8801  Introductory Seminar in Organizational Leadership (3)
This course provides doctoral students with an opportunity to examine globalization from the viewpoint of organizational leadership. Students develop a global perspective and develop their focus from an organizational perspective as a leader who promotes a global perspective among colleagues. Specifically, this course examines organizational leadership from the changing context of globalization.

LDR 8802  Seminar in Supervision, Mentoring, and Coaching (3)
This course examines advanced definitions and determinations of staffing needs, supervision, and management and coordination problems, which include methods in supervision, mentoring, and coaching. These methods focus on but are not limited to policies and practices relating to the functions of employee engagement concerning recruitment, selection, assignment, salary planning, scheduling, promotion, separation, grievances, reassignment, records, development programs, in-service training, evaluation, benefits and services.
LDR 8803 Seminar in Leading Change and Transformation (3)
We recognize on some fundamental level that we shape and are shaped by self and organizations. The purpose in this course is to bring greater skilled application and meaning-making to the increasingly volatile, uncertain, complex, and ambiguous world of organizational life as applied to organizational environments. Part one of the course involves setting the foundation and framing concepts of change along with an individual visit to a student selected organization and interview of someone in a leadership role. In Part two of the course, begins with a process of exploring what change means within ourselves at the intrapersonal and interpersonal levels. The focus will then go on to the study of classic theories and progress to the critical analysis of emerging models. We will work to understand what brings (and does not bring) sustainable change to self, others, and organizations and how different leadership models can be applied to this learning. The second part of this class concludes with resistance and immunity to change and applying what we have learned to our own environment. Part three of the course begins with a follow-up visit to the same organization for a second interview of that same person in a leadership role. The second visit, interview and engagement are a metaphor in how we reframe and re-look learning, assumptions, blind spots, challenges, and resistance from the beginning of the course. The final class culminates with a student-led Socratic final exam. Mastery of theoretical constructs, best practice models, and in a nested systemic analysis applied to leaders and organizations will be required of all students to be successful in the course. Collectively, the readings, class experiences, and interviews become an integrative understanding of change and are presented in a final presentation of individual and organizational change recommendations. Our effort is to consider the process of and resistance to change, from the intra-personal to the Eco global levels, that is essential to prepare ourselves to lead in the world of now as well as in the rapidly approaching future that awaits us all.

LDR 8804 Seminar in Human Resource Development (3)
This course examines the major conceptual frameworks for understanding human behavior within organizations, the competencies required for effective leadership and the major functions of human resource development as an integral part of overall management as applied to organizations.

LDR 8805 Seminar in Planning and Management of Groups and Teams (3)
This course is designed both for current and aspiring global leaders. It is designed to examine the role of global leaders in emerging social, economic, and political contexts that are changing the nature of education, altering how educational organizations are viewed, and are transforming how they are led. A broad range of planning and management issues relating to groups and teams within organizations will be explored that are critical to the success of global leaders and issues that can affect relationships and impact global organizations. Particular attention will be paid to issues of management in diverse organizations and across countries and regions in the global environment.

LDR 8806 Advanced Seminar in Organizational Leadership (3)
This course is an advanced seminar in organizational leadership that addresses individual and global issues. Students form an organization in the class and take on roles of key stakeholders based on personal interests and inter-group requirements. Each group or division of students will appropriately organize to achieve divisional and organizational goals decided upon in the first and/or second class session. Students develop a focus from an organizational perspective as a leader who promotes a global perspective among colleagues. Specifically, this course requires the student to synthesize and apply organizational leadership knowledge through work based in real-life settings.

MARINE BIOLOGY (MB)

Offered at Dauphin Island Sea Lab (DISL) only
Courses are offered during the summer semester only. Since course offerings change, check the current DISL summer bulletin for specific course offerings and descriptions and contact the Marine Biology Adviser at Troy. The courses listed below are taught at Dauphin Island Sea Lab in the summer only. The faculty members are recruited from many colleges and universities within and outside Alabama. The courses are identified by an MB prefix. All Marine Biology courses for graduate students have the prerequisites of General Chemistry and Ecology, or the equivalents.

MB 5502 Marine Invertebrate Zoology (4)
A study of the natural history, systematics, and morphology of marine invertebrates from a variety of habitats in the Gulf of Mexico. Participation in extended field trips is part of the course.

MB 5503 Marine Vertebrate Zoology (4)
A study of the biology of marine vertebrates emphasizing systematics, behavior, physiology, and ecology of local forms.

MB 5504 Marine Botany (4)
A general survey of algae and vascular plants associated with the marine and estuarine environment.

MB 5510 Introduction to Oceanography (4)
A general introduction to the physics, chemistry, geology, and biology of the oceans.

MB 5519 Marine Aquaculture (2)
Techniques in live animal culture with an emphasis on basic principles that can be applied to the culture of any organism for research, display, or commercial profit.
Marine Ecology (4)
Lecture and laboratory studies of bioenergetics, community structure, population dynamics, predation, competition, and speciation in marine ecosystems.

MB 5528 Shark and Ray Biology (2)
An introduction to the biology of sharks and rays, with special emphasis on regional shark fauna and field techniques.

MB 5532 Biology and Conservation of Marine Turtles (2)
An overview of the biology and conservation of marine turtles, including identification, distribution, nesting behavior, migratory behavior, and feeding ecology.

MB 5535 Environmental Application of Geographic Information Systems (2)
This course of learning applied mapping and analysis with GIS and will leverage other geospatial techniques including remote sensing, geo-visualization, and spatial analysis with particular emphasis on environmental applications. Prerequisites: CHM 1143/L143, BIO 2229/L229

MB 5538 Coastal Wetlands Ecology (4)
The course will focus on coastal and near shore wetland areas, with an emphasis on the biogeochemical processes that occur within.

MB 5560 Introduction to Neurobiology (4)
The study of the structure, development, physiology, and pharmacology of the nervous systems and sense organs. Prerequisite: Permission of the instructor.

MGT 6615 Ethical Leadership and Management in a Global Economy (3)
Equips students with the critical leadership skills and solid understanding of today’s ethical theory they need to become effective business leaders in today’s turbulent times. The class explores the latest thinking in leadership theory and contemporary practices at work within organizations throughout the world. Closely connects theory to recent world events, such as the Wall Street meltdown, ethical scandals, and political turmoil. Students examine emerging topics, attitudinal structuring, values, motivation, communication, conflict, quality, and social reinforcement. Emphasis is placed on the relationship of these processes to individual and group performance and their implications for leadership and decision-making. A grade of “B” or better is required.

MGT 6625 Specialized Study in Management (1-6)
Study of a problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, and the appropriate dean. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. No more than three semester hours credit of this course may be transferred in from another institution. See semester hour limits listed under Course Restrictions in General Regulations section. Prerequisites: All business foundation courses or equivalent.

MGT 6670 Seminar in International Management (3)
A survey of theories and issues related to managing the internationalization of business firms and multinational management.

MGT 6681 Organization Development and Change (3)
A study of management concepts and practices useful in improving organizational performance. Theories and concepts applicable to making organizations more hospitable to people and more productive in accomplishing their goals and objectives are identified and discussed. Special attention is paid to strategic interventions and change in both private and public sector organizations and in the global arena. Prerequisite: MGT 6615.

MKT 6661 Global Strategic Marketing (3)
This course is a comprehensive survey of strategic marketing concepts used to provide value to customers in a global business context. Topics focus on the application of marketing theories and concepts to address problems and take advantage of opportunities. Prerequisites: Graduate standing, acceptance into the MBA program, all undergraduate business prerequisite courses or equivalent completed. This course serves as the research requirement for the MBA degree and may not be transferred into the MBA program. A grade of “B” or better is required.

MSM 6610 Theories of Organizational Behavior (3)
This course is the study of the theories and concepts of individual leaders and group behaviors within organizations. The course examines important behavioral processes, including learning, perception, attitudinal structuring, values, motivation, communication, conflict, quality, and social reinforcement. Emphasis is placed on the relationship of these processes to individual and group performance and their implications for leadership and decision-making. Prerequisite: Admission into the MSM degree program.

MSM 6630 Management Information Systems for Leaders (3)
Conceptual and practical foundations of information systems to include support of management and decision-making functions, computer system project management, economic and legal considerations
of management information systems, and system implementation/evaluation. Prerequisite: Admission into the MSM degree program.

MSM 6633 Leading and Developing High Performance Teams (3)
An in-depth study of the process of developing a new team or revitalizing an existing team. The course will involve the study and application of current theories of team development and performance in the workplace. Special emphasis will be placed on the leadership of work teams in both face-to-face and virtual settings for effective performance and member satisfaction. Prerequisite: Admission into the MSM degree program.

MSM 6640 Foundations of Leadership and Motivation (3)
The course examines the foundational concepts of leadership, reviews traditional theories of leadership, and investigates critical issues in leadership and motivation as they apply in the contemporary workplace. Applications develop critical thinking skills about the concepts. Prerequisite: Admission into the MSM degree program.

MSM 6645 Continuous Improvement (3)
Analysis of Total Quality Management (TQM) and the driving philosophy, including leadership, human resource management and human resource development, strategic planning, implementation, methods, benchmarking, results, and the principles of closing the loop. Case analyses used to illustrate TQM as a systemic approach to organizational effectiveness using the Baldrige Criteria. Prerequisite: MSM 6610, MGT 6615.

MSM 6650 Strategic Management (3)
Study of the integrative functions of senior management in long-range strategic planning and decision making to support implementation. This is a capstone course which utilizes all the skills and knowledge developed earlier in the program. It focuses on policy problems and planning beyond the boundaries of the firm. Prerequisite: completion of at least 15 semester hours in the MSM core. Students should be in their last term or semester of their program when completing this course. A grade of “B” or better is required and MGT 6615.

MSM 6655 Advanced Leadership (3)
The leadership concentration capstone course provides an in-depth examination of leadership theory and practical applications. Aspects of leadership are examined relative to change management, implementation, and communication, with an emphasis on ethical behavior, team and global leadership, team development, the learning organization, role modeling, and employee development. Analysis of cases and workplace situations focus on integrating theory and application. Prerequisite: MGT 6615.

MTH 5512 Discrete Mathematics (3)
Topics include counting techniques such as Pigeonhole Principle, permutations, combinations, binomial coefficients, inclusion-exclusion, and relations and graphs. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisites: Permission of instructor.

MTH 5520 Graph Theory (3)
The elements of graph theory including: trees; bipartite, chordal and planar graphs; graph coloring; graph traversals; and flows. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisites: Permission of instructor.

MTH 5522 Numerical Analysis (3)
This course covers topics including finite differences, interpolation, numerical integration and differentiation, solutions of equations of one variable, linear systems, and numerical solutions of ordinary differential equations. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course.

MTH 5524 Real Analysis I (3)
A study of the real number system, completeness, limits, continuity, sequences, differentiation, and the Riemann integral. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course.

MTH 5525 Real Analysis II (3)
A study of sequences and series of functions, series, and a continuation of the integral to include the Fundamental Theorem of Calculus. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisite: MTH 4424 or MTH 5524.

MTH 5526 Complex Analysis (3)
A study of complex numbers, elementary functions and their mappings, complex limits and power series, analytic functions, integrals, contour integral, and Cauchy integral formula. This course contains additional graduate-level content equivalent to a
one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course.

**MTH 5536 Number Theory (3)**
This course covers divisibility, congruences, prime numbers, Fermat’s theorem, Diophantine equations, number theoretic functions, quadratic reciprocity. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisite: MTH 3331.

**MTH 5541 Abstract Algebra I (3)**
A study of properties of the integers, modular arithmetic. Elementary theory of groups, finite groups, subgroups, cyclic groups, permutation groups. Group isomorphisms and homomorphisms. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisite: MTH 3331.

**MTH 5542 Abstract Algebra II (3)**
This course covers the elementary theory of rings, polynomial rings, divisibility, unique factorization domains. Integral domains, ideals, factor rings, divisibility in integral domains. Elementary theory of fields. Extension fields. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisite: MTH 4441 or MTH 5541.

**MTH 5560 Topology (3)**
An introduction to metric and topological spaces and associated topics, separation axioms, compactness, and connectedness. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course.

**MTH 6600 Modern Topics in Mathematics (3)**
An investigation of current topics in mathematics that are generally not covered in regularly offered graduate courses in the mathematics graduate curriculum. Prerequisites will be determined by the topic under investigation.

**MTH 6601 Metric Education for Elementary Teachers (3)**
A study of the materials and methods program of instruction with workshops in selected school systems. Prerequisite: Admission by permission of instructor.

**MTH 6610 History of Mathematics (3)**
The course is designed to acquaint the secondary mathematics teacher with the historical development of mathematics with particular attention given to the techniques of the period studied.

**MTH 6612 Advanced Discrete Mathematics (3)**
This course is a study of discrete mathematical structures and associated concepts—which may include graphs and hypergraphs, Boolean Algebra, modeling computation—properties of these structures and their applications. Prerequisite: MTH 4412, MTH 5512 or permission of instructor.

**MTH 6615 Advanced Topology (3)**
Generalization of such topics as functions, continuous functions, open, closed, compact and connected sets, arbitrary topological spaces. Prerequisites: MTH 4442 or 5524, MTH 4426 or 5526 or permission of instructor.

**MTH 6616 Mathematical Models (3)**
An introduction to the modeling process. Students will practice creative and empirical model constructions, analyze models and do independent model research. Application using paired data will be included.

**MTH 6620 Advanced Concepts of Algebra (3)**
This course covers topics including rings and fields, polynomial rings and factorization, and Galois theory. Prerequisite: MTH 4442 or 5542 or permission of instructor.

**MTH 6621 Foundations of Mathematics (3)**
A study of the axiomatic nature of mathematics, theory of sets, cardinal and ordinal numbers, continuum hypothesis and axiom of choice.

**MTH 6624 Applied Combinatorics (3)**
This course includes topics from computational aspects of discrete optimization problems from graph, hypergraph and combinatorial design theory. These aspects include complexity, algorithms for solving such problems, and their contemporary applications.

**MTH 6625 Specialized Study in Area of Mathematics (3)**
A study of a problem or problems using research techniques. Selection of problem must be approved by student’s adviser, instructor under whom the study is to be made, and the appropriate director of the Graduate School or Dean of Arts and Sciences. Note: Total credit for any combination of enrollments in these courses may not exceed six semester hours. See semester hour limits listed under Course Restrictions in General Regulations section.

**MTH 6630 Design Theory (3)**
Latin Squares, mutually orthogonal Latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets, and finite geometries. Topics of current interest and research in combinatorial design theory will be explored. (areas may include: Latin squares, embeddings, enclosings,
Wilson’s constructions, quadruple systems, Hadamard designs, graph designs, orthogonal arrays, and computational models. Prerequisite: MTH 4412 or MTH 4420 or permission of instructor.

MTH 6632 Non-Euclidean Geometry (3)
A study of non-Euclidean geometries with emphasis given to their logical development.

MTH 6633 Advanced Linear Algebra (3)
A study of linear and orthogonal transformations, orthogonal and unitary matrices, numerical linear algebra, and applications. Spectral theory and duality. Prerequisite: MTH 3331 or permission of instructor.

MTH 6640 Advanced Concepts of Analysis (3)
A study from the classical theory of point sets in Euclidean space and the theory of functions of one or more real variables to topology, continuous functions, and Lebesgue integral and the Henstock integral. Prerequisites: MTH 4425 or MTH 5525.

MTH 6650 Trends in Technology and Problem Solving in Secondary Mathematics Instruction (3)
A comprehensive study of contemporary teaching strategies that incorporate current technologies and effective problem solving approaches for use by the mathematics educator in the modern secondary school mathematics program. Emphasis will be placed upon the effective use of calculators, writing, and computer software in the mathematics curriculum.

MTH 6691 Research in Education (3)
A study of a variety of research and evaluations methods in the teaching of mathematics. A grade of "B" or better is required.

MTH 6692 Research and Thesis (1-6)
Under the guidance of the student’s adviser and the chair of the department, the student may pursue original research or project in a particular area of mathematics. The completion of a thesis is required. The results and conclusions must be successfully defended before the student’s graduate committee. Grading System is a Pass/Fail. Prerequisites: 3.0 GPA and permission of the Chair of the Mathematics and Statistics department.

MUSIC INDUSTRY

MUI 6610 Marketing of Recorded Music (3)
Examination of the process of studio production, manufacturing, promotion and distribution of contemporary recordings. Record release programs for independent and major label-controlled products are analyzed. In addition, students will serve in the administration and marketing/merchandising of a record label. An individual creative marketing project will be assigned and submitted for successful completion of the course. In addition, the project will be added to the student’s Professional Performance Skills Portfolio as part of a comprehensive assessment prior to graduation.

MUI 6612 Composition and Arranging for the Music Industry (3)
Students will explore the art, craft and business of composition and arranging for the music industry through a variety of experiences. A final project including the composition, arranging and production of a musical work is included. A final creative composition/arranging project will be assigned and submitted for successful completion of the course. In addition, the project will be added to the student’s Professional Performance Skills Portfolio as part of a comprehensive assessment prior to graduation.

MUI 6614 Music Publishing (3)
An in-depth examination and application of current production, marketing, merchandising and distribution of music products with an emphasis in publishing. In addition, the student will develop a new music-publishing product incorporating multiple media technologies including print, audio, video and web-based marketing tools. The final creative project will be submitted for successful completion of the course. In addition, the project will be added to the student’s Professional Performance Skills Portfolio as part of a comprehensive assessment prior to graduation.

MUI 6616 Advanced Song Writing (3)
Students will explore the art, craft and business of songwriting through a variety of exploratory and creative experiences. In addition, the student will produce a demonstration recording using various music technologies suitable for the song marketing in the music industry. A final project including the composition, arranging and production of a musical work is included. The final creative project will be added to the student’s Professional Performance Skills Portfolio as part of a comprehensive assessment prior to graduation.

MUI 6618 Advanced Music Technologies (3)
This course of study will include a conceptual and skill-based overview of advanced music technologies. Students will experience various applications through production projects including sequencing, audio editing, and music notation, among others. Students will complete a series of projects incorporating these technologies using current music industry practices and standards. Creative projects will be submitted for successful completion of the course. In addition, each project will be added to the student’s Professional Performance Skills Portfolio as part of a comprehensive assessment prior to graduation.

MUI 6620 Studio Production Techniques (3)
This course is an in-depth examination of audio recording. The curriculum will cover remote and stu-
dio recording techniques. The related areas of sound reinforcement and post-production will be covered at length. Students will apply advanced microphone techniques, utilize digital editing and plug-ins, and prepare a recording project portfolio. Creative projects will be assigned and submitted for successful completion of the course. In addition, the project will be added to the student’s Professional Performance Skills Portfolio as part of a comprehensive assessment prior to graduation.

MUI 6622  Concert Production and Promotion (3)
The examination and application of current practices in musical artist career/business management including live concert production. Legal aspects of the music industry including contractual agreements will be examined. A concert production will be completed during the term including marketing, ticketing, venue management and artist coordination. A written report of all concert production activities will be submitted for successful completion of the course. In addition, the report will be added to the student’s portfolio as part of a comprehensive skills assessment prior to graduation.

MUI 6630  Media Composition and Sound Design (3)
The composition, creation and production of music for media and foundational part of the music and entertainment industries. With the growing demand for media driven largely by streaming services, the demand for media composers and sound designers is expanding at an exponential rate. This course is focused in two key areas including music composition for any and all dramatic visual needs as well as sound design/special effects. An overview of music composition in various forms of media will be explored and experienced. A final capstone media project will be written and produced for inclusion in the student’s portfolio.

MUI 6640  The Business of Music: Entrepreneurship Through American Music, Media, and Entertainment (3)
An in-depth look at the main structures of the music business, the important changes that are guiding its future and strategies for creating successful business models. The history of the music and entertainment industries is examined leading to detailed projections of our future business systems and prospects.

MUI 6645  Legal Aspects of the Music Industry (3)
The business and creative sides of the music business are inextricably linked requiring musicians to think like a business and businesses to think creatively like musicians. Music-related business endeavors are affected by legal matters on a daily basis. From artist contracts, recording and music publishing agreements to copyright law, name protection and business organization, the legal aspects of the industry are a part of all daily business activities. Legal Aspects of the Music Industry examines the legal issues business leaders, artists, musicians, engineers, and producers encounter when building their companies and careers. The course presents a focused look at the important legal changes that have evolved as a result of the continuing shifts in the music business landscape.

MUSIC

MUS 6600  Band Performance (1)
This course covers rehearsal/performance through band literature

MUS 6601  Choral Performance (1)
This course covers rehearsal/performance through choral literature

MUS 6605  Advanced Music Technologies (3)
Advanced educational use of multimedia and internet based music technologies.

MUS 6607  Literature and Techniques for the Beginning/ Middle School Band (3)
A study of the materials and techniques utilized in the beginning/middle school band program. Listening and score analysis will be included.

MUS 6610  Advanced Woodwind Pedagogy (3)
A study of teaching techniques, materials, and repertoire for woodwind instruments.

MUS 6612  Advanced Music Program Administration (3)
An intensive study of the administration, curriculum, organization, and teaching techniques of school music programs.

MUS 6614  Piano
MUS 6615  Organ
MUS 6616  Voice
MUS 6617  Clarinet
MUS 6618  Oboe
MUS 6619  Flute
MUS 6620  Bassoon
MUS 6621  Saxophone
MUS 6622  Trumpet
MUS 6623  Horn
MUS 6624  Trombone
MUS 6628  Compositional Techniques
MUS 6644  Guitar
MUS 6645  Euphonium
MUS 6646  Tuba
MUS 6647  Percussion
MUS 6648  Conducting

MUS 6625  Specialized Study in Area of Music (1-3)

MUS 6626  The student has the opportunity to engage in intensive study of a particular subject or learn a pertinent skill, which fits his/her academic and/or professional needs, but is not available in the regular curriculum.
See semester hour limits listed under Course Restrictions in the General Regulations section.

**MUS 6630  Collaboration for Inclusion (3)**
This course is designed to provide advanced students with an in-depth study of current literature and research on collaboration and consultation as a service delivery model to meet the challenge of educating students with disabilities in the regular classroom. Specifically, this course focuses on collaborative-related issues for teachers who work with students with disabilities. **Prerequisite:** A survey of Special Education Course is required if not previously completed.

**MUS 6631  Advanced Rehearsal Techniques (3)**
Teaching music through performance in context.

**MUS 6638  Literature Analysis (3)**
Historical and theoretical analysis of masterworks for band or choir.

**MUS 6639  Computer-based Music Notation (3)**
An exploration of music notation software. Students will use industry standard notation software to design and produce musical scores, parts, and assignments to be used in a K-12 educational setting.

**MUS 6650  Practical Band Instrument Repair (3)**
This course covers the maintenance, repair, and supervision of equipment used by music educators.

**MUS 6652  Advanced Brass Pedagogy (3)**
A study of teaching techniques, materials, and repertoire for brass instruments.

**MUS 6655  Music Pedagogy 2 (1)**
Troy University High School Honor Band or Choir Clinic. Attendance and written portfolio is required.

**MUS 6656  Music Pedagogy 3 (1)**
Troy University Middle School Honor Band Clinic. Attendance and written portfolio is required.

**MUS 6657  Advanced Percussion Pedagogy (3)**
A study of teaching techniques, materials, and repertoire for percussion.

**MUS 6659  Computer-based Music Notation (3)**
An exploration of music notation software. Students will use industry standard notation software to design and produce musical scores, parts, and assignments to be used in a K-12 educational setting.

**MUS 6660  Legal Issues in Music Education (3)**
This course will provide an overview of our legal system, examine court cases in music/music education and identify the implications studied from this review to assist the practicing music educator.

**MUS 6661  Advanced Arranging (3)**
A study of advanced arranging and scoring concepts for instrumental or choral ensembles.

**MUS 6670  Practical Band Instrument Repair (3)**
The course will focus on principles of leadership as they relate to the music educator and conductor.

**MUS 6671  Music Pedagogy 4 (1)**
Troy University Summer Band Clinic. Attendance and written portfolio required.

**MUS 6672  Advanced Musicianship (3)**
A survey of undergraduate music theory sequences with emphasis on the pedagogy and functional use of the musicianship skill set in the classroom.s.

**NURSING**

[Courses credit hours/contact hours (if different) per week are noted in parentheses]

**NSG 6604  Theories in Nursing (2)**
Explores the evolution and importance of knowledge and theory in nursing, mechanisms for developing and critiquing theory, and the analysis and application of theories in nursing practice.

**NSG 6605  Healthcare Economics (2)**
An introductory course in health economics, designed to provide the student with the elements of economic analysis as applied to the area of health care and healthcare policy.

**NSG 6612  Advanced Health Assessment (3)**
Designed to prepare an expert clinician in health assessment of patients within diverse settings and populations across the lifespan. Advanced content in history and interviewing processes, physical
examination, and documentation of assessment findings are included. The clinical diagnostic process is emphasized. Prerequisite or Corequisite: NSG 6649 and NSG 6671. Corequisite: NSG 6613

NSG 6613 Advanced Health Assessment Preceptorship (3/9)
Preceptorship course designed for clinical application of skills in advanced health assessment, clinical diagnosis and management, and maintenance of health promotion/disease prevention for patients within diverse settings and populations. Prerequisites or Corequisite: NSG 6671 and 6649 Corequisite: NSG 6612.

NSG 6625 Specialized Study in Advanced Nursing (1/4)
Under supervision of a faculty member, student may pursue study in selected area applicable to the practice of nursing which fits his/her academic needs but is not available in the regular curriculum. Total credit for any combination of enrollments in these courses may not exceed four semester hours. F, Sp, Su. See semester hour limits listed under Course Restrictions in General Regulations section.

NSG 6630 Introduction to Nursing Leadership and Technology Practicum(2/8)
The first clinical immersion experience in the selected advance nursing practice roles, nursing leadership and/or nursing informatics. The course focus is on the integration of nursing leadership and technology into healthcare delivery. Students participate in relevant clinical practice with either a nursing administrator or nursing information technology expert. Prerequisites NSG 6631 and NSG 6632 Corequisite: NSG 6633

NSG 6631 Concepts of Healthcare Informatics and Leadership (3)
Focuses on an examination of the concepts and core principles that are essential for nurse informatics specialists and nursing leaders to operate within a dynamic healthcare environment. Course topics include foundations of practice, data management, healthcare technology, organizational structure, human capital management, care delivery systems, continuous performance improvement, and practice applications.

NSG 6632 Theoretical Foundations of Nursing Informatics and Leadership (3)
Explores the foundation of nursing informatics, organizational leadership, and nursing administration, related theories and sciences. Identifies nursing and healthcare data sets, classifications systems, and nomenclatures utilized in practice. Students also explore transformational leadership, emotional intelligence, strategic planning principles, shared leadership/governance, and leading and sustaining change.

NSG 6633 Healthcare Systems (3)
Centers on the understanding of the Advanced Practice Nurse’s role to practice dimensions of leadership and technology within today’s healthcare system. Explores the planning, analysis, design, implementation, and evaluation of clinical information systems. Includes strategies for developing a strategic plan and issues in project management along with major design and implementation issues. Students will also explore managerial functions of planning, organizing, leading, and evaluating across the healthcare system. Prerequisite: NSG 6631, NSG 6632 Corequisite: NSG 6630

NSG 6634 Roles in Nursing Leadership and Informatics (3)
Focuses on the role of the advance practice nurse in the healthcare environment. Emphasizes concepts, research, issues and trends relative to the practice of the nursing informatics specialist and nursing leader within the healthcare environment. Prerequisites: NSG 6630, NSG 6633 NSG 6635, NSG 6636. Corequisite NSG 6637

NSG 6635 Applied Principles of Leadership and Technology in Healthcare (3)
Prepares students with the knowledge and skills to integrate leadership and informatics concepts into clinical practice. Nursing leadership content addresses the application of fiscal planning, execution, accountability, and risk management within nursing practice. Nursing informatics content addresses health literacy, access, electronic health records, clinical decision support systems, and emerging technologies. Prerequisites: NSG 6630, NSG 6633 Corequisite NSG 6636

NSG 6636 Advanced Nursing Practice Internship I (3/12)
First of two internship courses that facilitate the application of nursing leadership or nursing informatics within field experiences to provide the student an opportunity to work collaboratively with healthcare systems. Students may select to intern with a nursing leader, a nursing information technology expert, or a combination of roles. Students will participate in relevant clinical practice to meet the demands of changing patient care services. Prerequisites: NSG 6630, NSG 6633 Corequisite NSG 6635.

NSG 6637 Advanced Nursing Practice Internship II (3/12)
Second of two internship courses that provides students with an immersion experience in one of the selected advance nursing practice roles, nursing leadership or nursing informatics. The course focus is on the application and synthesis of knowledge and skills acquired in all previous courses. Students participate in relevant clinical practice with either a nursing administrator or nursing information technology expert. Prerequisites: NSG 6636, NSG 6635; Corequisite: NSG 6634.

NSG 6645 Family and Cultural Theories in Advanced Nursing Practice (3)
Provides the student with in-depth knowledge of family and cultural assessment. Further analysis of diverse cultures and multi family structures enhance
the student’s application of family and/or cultural theories and advanced nursing interventions.

NSG 6649 Advanced Pharmacology (3)
Prepares knowledge and theory critical to management of the pharmacological needs of a variety of populations across the lifespan. Discusses major classification of drugs and protocols for administration and use of technology in management of drug therapy.

NSG 6660 Foundations of Advanced Nursing Practice (3)
Provides content that enables students to focus on the advanced nursing practice. Emphasizes the theoretical bases critical to leadership and analyzes current issues in relation to advanced practice.

NSG 6665 Primary Care I: Pediatrics and Women’s Health (3)
Focuses on advanced knowledge and theory base in the assessment and care of children and women of child-bearing age. Health promotion is emphasized, but the practitioner is also prepared to deliver complex multifaceted care to patients in primary care settings. Prerequisites: NSG 6612, 6613. Corequisite: NSG 6666.

NSG 6666 Primary Care I Preceptorship: Pediatrics and Women’s Health (3/9)
Clinical preceptorship course in the advanced practice role of the family nurse practitioner with pediatric patients and women of child-bearing age in primary care settings. Prerequisites: NSG 6612, 6613. Corequisite: NSG 6666.

NSG 6667 Primary Care II: Adults and Geriatrics (3)
Focuses on advanced knowledge and theory base in the assessment and management of care of adult and geriatric patients. Health promotion is emphasized, but the practitioner is also prepared to deliver complex multifaceted care to clients in primary and rehabilitative settings. Prerequisites for MSN students: NSG 6604, 6660, 6665, 6666, 6691, 6692. Corequisites for DNP students: NSG 6604, 6665, 6666, 6691. Co-requisites: NSG 6668.

NSG 6668 Primary Care II Preceptorship: Adults and Geriatrics (3/9)
Clinical preceptorship course in the advanced practice role of the family nurse practitioner with adult and gerontological patients in the primary and rehabilitative care settings. Prerequisites: NSG 6665, 6666. Corequisite: NSG 6667.

NSG 6670 Role Synthesis Seminar (1)
Provides a forum for the analysis and synthesis of role behaviors specific to the family nurse practitioner. Emphasis is on the role, patterns of health promotion, primary care, and professional, social, and political issues related to the role. Prerequisites: All core FNP specialty courses. FNP students only: Co-requisite: NSG 6680.

NSG 6671 Advanced Pathophysiology (3)
Provides an in-depth study of pathophysiologic processes across the lifespan to correlate changes that occur at the cellular and system level with the development, clinical manifestations, and management of various disease states.

NSG 6672 Teaching and Learning Theories in Nursing Education (3)
Introduces the basic principles and theories of education and their impact on student learning. Focuses on teaching and learning, learning styles, and the needs of diverse learners to include the generational and cultural differences of today’s learners. Prepares students to function within the educational environment and to facilitate learning and learner development and socialization effectively.

NSG 6673 Teaching Strategies in Nursing Education (3)
Presents instructional strategies to enhance learning experiences in nursing education. Instructional methods will include collaborative educational models as large and small group teaching, team-based, interactive and case-based learning. Strategies will include the use of simulation and clinical teaching at the bedside with a focus on educator behaviors that stimulate achievement of learners. With an appreciation of diversity in learning styles, strategies will be discussed that apply to technology into instruction to develop and deliver curricula.

NSG 6674 Curriculum Design & Development in Nursing Education (3)
Explores a brief history of curricula, philosophical foundations of curriculum design, and contemporary influences on nursing program curricula. Progresses through the steps of curriculum design and development, specifically for undergraduate and graduate nursing programs. Nursing course design is a focus. An overview of types of learning experiences appropriate for course objectives is included. Prepares students for role competencies in curriculum design and development.

NSG 6675 Assessment and Evaluation in Nursing Education (3)
Presents models and methods for assessment and evaluation in nursing education. Focuses on principles for construction of test and written assignments and the interpretation of findings for the evaluation of learning outcomes in traditional and online classroom and clinical settings. Addresses development of plans for course and program evaluation. Reviews ethical and legal considerations for assessment and evaluation in nursing education. Prepares students for role competencies in assessment and evaluation as a nurse educator.
NSG 6676 Nursing Education Preceptorship (3/12)
The course provides experiential learning necessary for students to apply those theories of teaching and learning, teaching strategies, curriculum design and evaluation to instructional design in nursing education. Involves supervised experience in the role of nurse educator.

NSG 6680 Family Nurse Practitioner Internship (5/20)
Internship course designed to provide extensive clinical experience with a broad spectrum of patients to allow students opportunities to strengthen clinical skills in specific areas. Prerequisites: All core and FNP specialty courses. Corequisite: FNP students only: NSG 6670.

NSG 6685 Global Identity (1-3)
Studying abroad is a transformative experience that has the power to challenge our thinking and our perspective on the world. This course aims to attract students across disciplines, to promote inter-professional development, and to prepare them to expand their understanding of their global identity and communicate their growth in intercultural competence toward their personal and professional development. Students make connections between their study abroad experience and the broader range of skills connected with this experience, to become a competitive member of a global workforce.

NSG 6691 Research and Evidence for Advanced Nursing Practice (3)
Reviews the processes for ethical conduct of research and translation of evidence for nursing practice and patient outcomes. Emphasis is on the rigorous critique, utilization and generation of research and evidence relevant to advanced practice nursing. A grade of “B” or better is required.

NSG 6692 Data Analysis and Interpretation in Quantitative Research (2)
Examines basic statistical methods for analyzing, interpreting, and evaluating quantitative data. The focus is on developing knowledge necessary to critically evaluate research reports and selected data.

NSG 6696 Scholarly Inquiry Practicum I (1/2)
Faculty-guided experience to further develop the student’s knowledge of a special area of interest utilizing research-based inquiry or evidence-based practice. Students must take this course during their final Fall semester. Grading system is Pass/Fail. Prerequisites: NSG 6604, 6660, 6691, 6692.

NSG 6697 Scholarly Inquiry Practicum II (1/2)
Faculty-guided experience for implementation and evaluation of student’s scholarly inquiry. Grading system is Pass / Fail. Prerequisite: NSG 6696. Successful completion of this course meets the MSN comprehensive exam requirement.

Thesis Option
Students who plan to progress to doctoral education will be encouraged to pursue the thesis option in preparation for the doctoral dissertation. Students should discuss with their adviser the option prior to filing their degree plan.

DOCTOR OF NURSING PRACTICE

NSG 8801 Healthcare Informatics and Data Management (3)
Provides an overview of the planning, implementation, and evaluation of clinical information systems. Assists students in recognizing the applications of nursing informatics in healthcare systems. Includes a historical review of the evolution of nursing informatics and current trends. Provides students with an understanding and analysis of information management systems in evidence-based advanced nursing practice.

NSG 8802 Applied Biostatistics (3)
Builds on prior knowledge of basic statistical concepts, including descriptive statistics and the components of statistical inference (p-values and hypothesis testing). Emphasizes ethically generated application and results rather than clinical theory. Focuses on application of statistical methods that evaluate evidence-based nursing practice including inferential statistics (t-test, ANOVA, risk index, linear and multiple regression, and other multivariate tests). Requires writing narrative and tabular results using APA format.

NSG 8804 Policy and Politics in Healthcare (3)
Addresses healthcare policies and political forces that shape them. Analyzes the adequacy and impact of current legislation; federal, state, local and workplace policies; and best practice guidelines for patient-centered care, and advanced practice roles. Emphasizes the leadership role of the DNP in areas of analyzing, formulating and implementing health-care policies. Explores the interrelationships between policies and nursing, organizations, politics, and the economics of healthcare.

NSG 8805 Principles of Epidemiology (3)
Presents concepts, principles, and methods of the epidemiological approach to disease and intervention, identification of cause of disease, response to disease outbreak, disease surveillance, evaluation of screening and prevention measures, and ethical issues in epidemiological research. Applies biostatistical concepts necessary to interpret findings of epidemiological studies and to critically evaluate application to evidence-based practice. Examines distribution and determinants of disease risk in human populations across the lifespan with an emphasis on disease prevention and early detection.
**NSG 8810 Synthesis of Evidence Based Practice I: Project Identification (1)**
Orients and introduces the DNP Synthesis Project which focuses on the identification and initial development of the DNP Synthesis Project for improvement of nursing practice or patient outcomes within a specialized area of advanced practice. Requires the identification of feasible DNP Synthesis Project idea, synthesis of evidence-based literature, selection of a DNP Synthesis Project Chair and committee and initiation of an e-portfolio. Requires completion of a minimum of 60 clinical hours for the development of DNP role competencies. **Corequisite: NSG 8812.**

**NSG 8812 Foundations of Evidence-Based Practice (3)**
Explores issues related to evidence-based practice. Emphasizes the process of evaluating evidence for best practices within healthcare delivery systems. Equips the advanced practice nurse with the skills needed to identify, critically appraise, and utilize best evidence to recognize and comprehend concurrent needs and demands of patients, communities, and organizations and direct appropriate interventions for the improvement of outcomes. **Corequisite: NSG 8810.**

**NSG 8815 Evaluation Methods for Improvement of Clinical Outcomes (3)**
Appraises the methods of evaluation of clinical and program outcomes as they guide safe and effective patient and aggregate health care. Focuses on application of evidence-based models and middle range nursing theories to methodologies and evaluation methods; measurement of study variables related to evidence-based practice; and nurse-sensitive outcomes. Contributes to the development of DNP Synthesis Project methods and outcomes. **Prerequisite: NSG 8812 Corequisite: NSG 8820**

**NSG 8820 Synthesis of Evidence Based Practice II: Project Development (2)**
Develops the methodology for an evidence-based DNP Synthesis Project with a systems-level impact for the improvement of nursing practice or patient outcomes within a specialized area of advanced practice. Explores the impact of ethical, safe and effective patient and organizational outcomes in the translation of evidence into practice. Culminates in the defense of the DNP Synthesis Project proposal, compliance with the regulations involving human subjects and approval from Troy University’s Institutional Review Board. Requires completion of a minimum of 120 clinical hours for the development of DNP role competencies. **Prerequisite: NSG 8810. Corequisite: NSG 8815.**

**NSG 8822 Leadership in Organizations and Systems (3)**
Prepares students to lead and manage the challenges of a global, dynamic, and changing healthcare environment. Analyzes and evaluates nursing leadership and evidence-based management theories critical to leading in today’s healthcare systems. Focuses on integration and application of concepts of leadership, management, business planning, and evaluation of population-based efforts to provide affordable quality care. Prepares the student to utilize these concepts in articulating a vision encompassing evidence-based care.

**NSG 8826 Health Disparities from a Systems Perspective (3)**
Explores the relationship between vulnerability, social determinants of health, and health disparities. Analyzes vulnerable populations for the lack of or absence of social determinants of health and the resulting disparity, illustrated with statistics. Analyzes and applies systematic healthcare delivery models best suited for the use in vulnerable populations. Analyzes and applies interprofessional theories to address health disparities and to create novel interventions to resolve them.

**NSG 8830 Synthesis of Evidence Based Practice III: Project Implementation (2-4)**
Focuses on implementation of an evidence-based DNP Synthesis Project with a systems-level impact for the improvement of nursing practice or patient outcomes within a specialized area of advanced practice. Requires integration of knowledge of nursing theory, evidence-based nursing practice, physiologic and pathophysiologic foundations, ethical and legal principles and healthcare systems. Involves development of datasets for analysis of DNP Synthesis Project outcomes. Requires completion of a minimum of 120 clinical hours and up to 240 clinical hours. **Prerequisite: NSG 8820.**

**NSG 8840 Synthesis of Evidence Based Practice IV: Project Evaluation (3-5)**
Emphasizes the evaluation, synthesis and critique of DNP Synthesis Project outcomes to support quality clinical or organizational practices. Requires completion of a final paper to the DNP Advisory Committee and presentation to faculty and peers. Concludes with reflection and evaluation of achievement of DNP role competencies. Requires completion of a minimum of 180 clinical hours and up to 240 clinical hours. **Prerequisite: NSG 8830. Corequisite: NSG 8850.**

**NSG 8850 Dissemination (3)**
Emphasizes preparation and submission of a manuscript to a professional peer-reviewed journal for dissemination of the DNP Synthesis Project. Includes selection of best fit journals and conferences, review of manuscript submission process, and techniques (guidelines) for scholarly writing. Examines ethical issues related to publication and dissemination. **Co-require: NSG 8840.**

**NSG 8880 Directed Professional Practicum (1-3)**
Provides the DNP student with the opportunity to obtain required clinical hours for completion of the program. 1000 post-BSN clinical hours. Students enrolled in this course will engage in practi-
PA 6601 Research Methods in Public Administration (3)
An introduction to basic, applied, and evaluative research methodologies and data analysis techniques. Students apply these methodologies to issues, programs, and research problems in the field of public administration. A grade of “B” or better is required. Prerequisite: PA 6610. In special circumstances, may be waived by the Department Chair.

PA 6603 Economics for Public Management (3)
An introduction to economic theory emphasizing the application of selected micro-economic and macro-economic theories to issues in public administration.

PA 6604 Workforce Planning and Staffing (3)
A study of theory, principles, and legal requirements for effective workforce planning, recruitment, selection, and employment in public and non-profit organizational settings. The course provides an in-depth analysis of tools, techniques and statistical concepts applied to the fundamental HR function of workforce planning and staffing. Prerequisite: PA 6624.

PA 6605 Training and Development (3)
A study of concepts and practices critical to identifying human resources training and development needs critical to ensuring organizational effectiveness.

PA 6606 Issues in Managing the Public Workforce (3)
A study of concepts and practices to introduce the student to public sector employee performance management requirements, sound employee/labor relations practices, how compensation is determined and the various pay systems and benefits, special monetary incentives, and tangible and intangible awards to motivate, retain, and recognize employee performance of today’s multi-generational workforce.

PA 6607 Performance Measurement and Management for Public and Non-profit Organizations (3)
This course focuses on how performance measurements are becoming increasingly important in public and non-profit settings. It will ground students in the fundamentals of performance measurement systems and demonstrate how they are critical from a mission, strategic, funding, transparency and accountability perspective. It will cover not only how to select appropriate measures, but also how to implement a performance measurement system and use performance measures in managing an organization. In addition, the course will highlight the need for leadership and management acumen to ensure success in achieving meaningful, significant and lasting results.

PA 6608 Comparative Public Administration (3)
This course employs a global comparative approach to introduce students to the structures, behaviors, and processes of public administration with an emphasis on exploring the role of public management systems within the wider political and democratic frameworks in which they function in a global environment.

PA 6610 Global Challenges in Public Administration (3)
An introduction to contemporary global challenges, including the need for more inclusivity, that face leaders in both public and nonprofit organizations in an increasingly multicultural and interdependent global society. This course will introduce students to the role of government and basic management skills needed to meet those challenges from a global perspective including policy making, leadership, management, and ethics.

PA 6620 Theory of Organizations (3)
An introduction to the major theoretical approaches and debates in organization theory including core concepts and key issues arising from the classical and contemporary influences. Emphasis is on the evolution of organization theory in the United States and the elements that distinguish public from private organizations.

PA 6622 Public Policy (3)
An overview of the theoretical orientations underlying the public policy process and the conceptual framework for differentiating types of public policies. Students examine current issues and policies from various theoretical and practical perspectives. Prerequisite: PA 6601

PA 6624 Public Human Resource Management (3)
A survey of the basic principles, functions, and constitutional issues involved with managing public employees. Specific functions addressed include planning, job analysis, position classification, recruitment and selection, staffing, performance management and appraisal, labor-management relations, training, and other personnel functions.

PA 6625 Specialized Study in Public Administration (3)
A study of problem(s) in a public or nonprofit organization using research design and methodologies and producing a scholarly paper that contributes directly to the student’s curriculum. The Director of the MPA Program must approve the topic. PA 6625 may substitute for a required concentration course only once in a student’s program and only if taken for three credit hours.
PA 6630 Strategic Planning (3)
A study and application of decision making models with emphasis on understanding the role and importance of strategic planning in public and nonprofit organizations.

PA 6631 Program Evaluation (3)
An overview of the theoretical foundations and techniques of program evaluation including need assessments, outcome evaluations, surveys, program outcomes, and impact evaluation(s). Prerequisite: PA 6601.

PA 6632 Arbitration, Collective Bargaining, and Labor Relations (3)
This course examines the fundamentals of labor relations, exploring a range of issues including employee rights to strike and specific statute addressing collective bargaining on the federal and local levels. The course provides a practical experience in collective bargaining and arbitration through participation in a bargaining exercise. Specific differences between public and private collective bargaining and labor relations are explored in depth.

PA 6640 Intergovernmental Relations (3)
An examination of the administrative, fiscal, and legal issues that govern relations among the various governmental entities in the United States.

PA 6641 Social Marketing in Public Administration (3)
The primary objective of this course is the application of traditional marketing principles and techniques to the challenges and rewards of influencing positive public behavior. Social marketing offers a revolutionary approach to solving a range of social concerns, such as public health, safety, emergency management, environmental protection, financial well-being, and community involvement. Prerequisite: Graduate Student of good standing.

PA 6643 Advanced Public Human Resource Management (3)
This course is designed to help the student understand the law as it applies to the management of human resources. Its coverage is aimed at preparing the managers of human resources to recognize legal problems, to know the legal impact of decisions of personnel matters and to be knowledgeable in general of the law as it might impact individuals in organizations. Prerequisite: PA 6624.

PA 6644 Administrative Law (3)
An overview of the legal environment of public administration. The focus is on the powers and procedures of administrative agencies including administrative discretion, rule-making, investigations, prosecuting, negotiating and settlement based on Constitutional law, statutory law, common law, and agency-made law and the liability of governments and their officers.

PA 6646 Organizational Behavior (3)
A study of the various theoretical perspectives that help to explain complex organizational behavior in public and nonprofit organizations in the global environment.

PA 6650 Governmental Budgeting & Financial Management (3)
A survey of concepts, principles, processes, and practices in governmental budgeting at national, state, and local levels and the interrelationships of planning, programming, and budgeting strategies.

PA 6660 Readings in Public Administration (1-3)
A study of problem(s) in a public or non-profit organization using analytical methods with a public policy focus and producing a scholarly paper that contributes directly to the student’s curriculum. The Director of the MPA Program must approve the topic. PA 6660 may substitute for a concentration course only once in a student’s program and only if taken for three credit hours.

PA 6661 Global Challenges in Leadership and Management (3)
Global change is driven by effective leaders who can identify key problems that need to be solved, understand their root causes and barriers to overcome, develop strategies to address those barriers, design effective coalitions through advocacy and partnerships, and evaluate performance to maximize the impacts of the approach that has been implemented. Effective leadership requires an understanding of the management tools to ensure success, organizational sustainability, and maximum outreach. This course will introduce students to the role of government and basic management skills from a global perspective including: policy making, organizational vision and direction, regulations, strategic planning and implementation processes, basic budgeting methods, leadership skills and intercultural team dynamics, and group facilitation, negotiation, and conflict resolution techniques.

PA 6662 Global Health Administration (3)
The aim of this course is to accomplish an overview of the multi-topic study of global health. The course is comprised of the comprehensive exploration of various health systems, the disparities in healthcare and nutrition on a global level, the burden of disease, child health regional variations, pharmaceuticals access and other low- and middle income countries health equity issues.

PA 6664 Global Perspectives in Local Government (3)
Today’s world is characterized by ever-increasing interconnectedness and interdependence in economic, political, environmental, and social issues. Cities are becoming more ethnically culturally, linguistically, and economically diverse as migration becomes less costly and barriers to immigration decrease. Local government is changing. The growing diver
Policy (3)

PA 6665 Organizational Leadership (3)
An introduction to the major theoretical perspectives in organizational theory and behavior including core concepts and key issues arising from classical and contemporary influences which mold organizational leadership and behavior in public and nonprofit organizations in the global environment.

PA 6666 Foundations of Nonprofit Organizations (3)
A survey of the history, theory, and political, organizational, legal, financial, personnel, and service contexts unique to nonprofit management.

PA 6667 Executive Leadership in Nonprofit Organizations (3)
An examination of the managerial tools and professional practices for developing the internal and external capacity of nonprofits. Topics include working with boards, volunteers, and communities; developing partnerships with public, private and other nonprofit organizations; marketing the program; planning special events; and influencing policy directions through lobbying.

PA 6668 Grant Management for Public and Non-Profit Organizations (3)
An overview of strategies and techniques integral to identifying potential funding resources and planning, developing, and writing grant proposals. Topics include program development and grant opportunities, the funding acquisitions processes, stewardship of funds and project management strategies including evaluation, dissemination, and continuation plans.

PA 6674 Ethics in Public Administration (3)
A study of the philosophical and practical issues related to ethical decision making in the public sector. Emphasis is on the analysis of ethical problems and the development of analytical skills and values framework to act ethically in public service roles.

PA 6675 Public Health Services Administration and Policy (3)
The course provides a framework for developing and analyzing a range of U.S. public health policy areas and issues; acquaints students with increased understanding of the context of public health administration and healthcare policy; and examines key factors and forces impacting total public health system performances in the United States.

PA 6676 Legal and Social Issues in Public Health Administration (3)
An examination of the legal and ethical aspects of contemporary legal and social issues within the public health services administration process.

PA 6677 Public Health Preparedness & Emergency Response (3)
The course provides an overview of public health’s involvement and response strategies to various natural and unnatural emergencies and the domestic and international responses to disasters, outbreaks, and epidemics.

PA 6678 Introduction to Public Health (3)
An introduction to the mission, roles, issues, and context of public health, community health, and health systems, including the history and mission of public health as well as a comprehensive exploration of the essential services and core functions of public health, social justice, and human rights.

PA 6679 E-Governance (3)
The course studies concepts and methods of e-Government strategies to include planning, implementing, and evaluating information technology used to deliver government services. Topics include e-Government strategy, the use of Web 3.0 and social media, policy concerns, and how to assess the performance and function of e-Government applications and strategies.

PA 6694 Internship (3)
A practical learning experience in a public or nonprofit organization that includes a written paper analyzing a problem pertinent to the student’s concentration.

PA 6699 Capstone in Public Administration (3)
The required outcome assessment course using case analyses, research papers, and/or experimental learning projects that emphasize the application of analytical skills and knowledge gained from curriculum courses to administrative, organizational, and policy problems. To enroll in PA 6699, students must have a 3.0 grade point average or better and take PA 6699 as the final core course or, with the approval of their faculty advisor, in conjunction with the final core course in the MPA program. To successfully complete this course, the student must achieve a grade of “B” or better. Students should retain core course textbooks for use in PA 6699. Prerequisite: 3.0 grade point average or better and completion of all required core courses. In special circumstances, may be waived by the student’s faculty advisor.

PA 8801 Introductory Seminar in Public Administration (3)
This course provides doctoral students with an opportunity to examine globalization from the viewpoint of public administration. Students develop a global perspective and develop their focus a focus from an
This course provides an in-depth understanding of specific issues in public administration. Emphasis throughout the course will be on critical thinking and reading. Attention is given to 85 theoretical and empirical approaches to understanding public administration phenomenon that have emerged within the last half century. Key questions will be explored, together with contributions to the literature, and evolving questions, as well as areas for future research. This seminar course includes theoretical orientation and theory-to-practice experiences using case studies, demonstrations, guest speakers, experts in the field, and simulations.

PA 8805 Seminar in Public Administration II (3)
This course provides an in-depth understanding of specific issues in public administration. Emphasis throughout the course will be on critical thinking and reading, as well as class discussion. Specifically, this exploration will include critical analysis of the claims, assumptions, definitions, and values underpinning the key ideas associated with public administration. Attention is given to theoretical and empirical approaches to understanding public administration phenomenon that have emerged within the last half century. Key questions will be explored, together with contributions to the literature, and evolving questions, as well as areas for future research. This seminar course includes theoretical orientation and theory-to-practice experiences using case studies, demonstrations, guest speakers, experts in the field, and simulations.

PA 8806 Advanced Seminar in Public Administration (3)
This course examines globalization from the viewpoint of public administration. Students develop a focus from an organizational perspective as a leader who promotes a global perspective among colleagues. Specifically, this course requires the student to synthesize and apply public administration knowledge through work based in real-life settings. Instructional Leadership and Administration.

NOTE: Courses from disciplines other than Public Administration (CJ and IR) used as PA concentration selections are described in the Catalog sections pertaining to those programs.

PHYSICS

PHY 5500 Topics in Physics (3)
This course focuses on selected topics in the field of physics. These may include geophysics, biophysics, nuclear power and waste, relativity, health physics, astrophysics, mathematical methods in physics, particle physics.

PHY 5511 Advanced Modern Physics (3)
Foundations of statistical physics, solid state physics, nuclear physics, elementary particles, astrophysics, and cosmology. Prerequisite: PHY 5510

PHY 5520 Mechanics (3)
A study of the kinematics and dynamics of particles and systems of particles.

PHY 5530 Electromagnetic Fields (3)
A study of vector fields, dielectric and magnetic media, fields in conductors, electric and magnetic circuit elements. Maxwell’s equations and boundary condition problems in one, two and three dimensions.

PHY 5591 Guided Independent Research (1)
A laboratory based physics research project under the direction of a faculty member. The project must culminate in a written report with the results presented at a department seminar.

PHY 5593 Guided Independent Study (3)
An independent study for advanced students under the direction of a faculty member.

PHY 6600 Advanced General Physics (3)
This course explores the scientific view of the world as it has developed from the earliest theories of Aristotle, Euclid and Newton to modern theories such as Einstein’s relativity and quantum mechanics. Prerequisite: Eleven hours of college physics or permission of instructor.

PHY 6625 Specialized Study in Area of Physics (1-3)
A study of a problem or problems using research techniques. Selection of a problem must be approved by the professor under whom the study is to be ma-
POLITICAL SCIENCE

POL 6605 Foundations of Public Administration (3)
An overview of the history and intellectual foundation of public administration including the major ideas, developments, theories, concepts, and contributors to the growth of public administration and its practice in the United States. The students are introduced to the case analysis method.

POL 6622 Comparative Government (3)
A comparative analysis of state governments in the world with an emphasis on political cultures, governmental institutions and political processes that lead to differences and international tensions.

POL 6624 Intercultural Relations (3)
An analysis of the influence of culture on interstate relations including theories, concepts, and applications.

POL 6636 Selected Topics in Political Science (3)
A detailed examination of a specifically defined topic of special and/or current interest and importance, which is not covered in regular course offerings in the Political Science Concentration.

POL 6649 Leadership in Public Administration (3)
A survey of leadership theories, styles, and strategies in the contemporary public and nonprofit workplace.

POL 6650 American Politics (3)
An examination of the American government, institutions, and political structure.

POL 6657 Contemporary American Foreign Policy (3)
An examination of the foreign policies processes of the United States including historical traditions, political institutions, economic and military capabilities, the Congress, the Presidency, interest groups, the media, and public opinion.

POST SECONDARY EDUCATION

PSE 6660 Trends and Issues in Adult Education (3)
This course focuses on current trends in adult education. It includes a comprehensive investigation of current issues in adult education and an examination of how historical events and ideas have influenced those issues and trends. Special emphasis will be given to the analysis of trends and issues and formation of judgments based on supportable information.

PSE 6665 Field Project in Post Secondary Education (3)
This course helps students make connections between theoretical knowledge and practical situations. The content of this course is variable, depending on the individual student’s interests, present situation, and future plans. The determination of the content for each student will be made through collaboration between the student, the student’s adviser, and the instructor of the course. Students may focus on supervised teaching, action research, or a project with a major field agency. Prerequisites: This course is open only to students enrolled in the Masters of Science in Post Secondary Education program who have completed 18 hours of coursework including the research class.

PSE 6670 Psychological Foundations of the Adult Learner (3)
An in-depth study of research findings and psychological concepts related to the nature of adult learners and learning processes; principles of motivation, effective instructional design geared toward adult learners; and social and cultural influences on adult learning. Emphasis will be given to the understanding of critical and variables attributes of adult learners.

PSE 6680 Curriculum Development for Adult Education (3)
A study of concepts, learning theories, materials, and media related to curriculum and program development in adult education.

PSE 6691 Research Methodology (3)
The study and evaluation of research methods commonly used in the social sciences. The course will provide information necessary to understand and apply research processes, synthesize knowledge and writing, and plan and organize research problems for interpretation and application of research results. Application of these skills in the form of a written project using the Publication Manual of the American Psychological Association (APA) is required. A grade of “B” or better is required.

PSE 6695 Thesis (3-6)
The thesis must be related to both the students’ concentration area and post secondary education. Information regarding thesis guidelines and requirements may be obtained from the Graduate School office. Grading system is Pass/Fail.

PSE 6699 Capstone in Post Secondary Education (3)
This course is a culminating experience that helps students integrate and apply the knowledge they have gained through their previous coursework. Emphasis is placed on challenging students to view the post secondary educational process from many perspectives and to develop a professional portfolio of their work.
perspectives. Students complete field experiences appropriate to their concentration areas and analyze case studies drawn from real-life situations. Students also create a personal philosophy of post secondary instruction. Prerequisites: This course is open only to students enrolled in the Master of Science in Post Secondary Education program. Students may take this class only during their last two semesters of coursework.

### PSYCHOLOGY

**PSY 5501** Psychological Tests and Measurements (3)
The selection, evaluation, administration, scoring, interpretation and use of tests of intelligence, proficiency, interests, personality, aptitude and social adjustment.

**PSY 5556** Gerontology (3)
The study of aging. Emphasis on biomedical, psychological, and social aspects of middle and late adulthood.

**PSY 5559** Applied Behavior Analysis (3)
This course is an advanced study of the characteristics, research methods, concepts, and applications of applied behavior analysis. Students will design, implement, and present a behavior-change project and read articles in the field of applied behavior analysis.

**PSY 6606** Interventions for Children and Adolescents (3)
This course examines the behavioral characteristics of children and adolescents including their emotional, social, and cognitive behaviors. Emphasizes intervention, assessment, diagnoses, teaching, and prevention.

**PSY 6607** Introduction to Infant/Early Childhood Mental Health (3)
This is a graduate level course and will provide an overview of the trajectory of early human development for infants and their families. Influences that lead to mental health well-being and influences that can push development off track will be examined through the lens of attachment, neurobiology, ethics, and biopsychosocial factors. A clinical mental health and reflective perspective will be employed to inform understanding, case conceptualization, assessment and treatment of infants and their families. Student taking this course will conduct a series of three observations modified version of the “Tavistock method of Infant Observation” and receive a minimum of two hours of reflective supervision/consultation via an online platform every week during this course. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources. Prerequisite: Advisor’s approval

**PSY 6609** Infant/Early Childhood Testing and Evaluation (3)
This is a graduate level course and is intended to provide an understanding of various models of assessment by examining biopsychosocial development and cultural formation of infants and their families through a reflective lens of attachment, neurobiology, ethics, case conceptualization, and other factors using clinical observations of infants, families, and relationships; informal and formal assessments. Student taking this course will conduct a series of three observations modified version of the “Tavistock method of Infant Observation” and receive a minimum of two hours of reflective supervision/consultation via an online platform every week during this course. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources. Prerequisite: PYS 6607.

**PSY 6610** Physiological Dynamics of Alcohol & Other Drugs (3)
A study of physiological and psychological dynamics and resultant behavioral implications in use of alcohol and other drugs. Based on assessment of dynamics and behavior and application of diagnostic procedures using appropriate manuals and materials.

**PSY 6612** Infant/Early Childhood Neuroscience, Diagnosis & Treatment Planning (3)
This is a graduate level course and will examine current theory, research and clinical practice regarding Neuroscience and Diagnosis and Treatment Planning for Infants and Early age children in the context of their family system. A specific area of examination will be the use of the Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood (DC:0-5). Neuroscience and interpersonal neurobiology will be discussed and considered together with ethics, cultural and other specific influences when diagnosing and designing appropriate treatment plans for this population. Student taking this course will conduct a series of three observations modified version of the “Tavistock method of Infant Observation” and receive a minimum of two hours of reflective supervision/consultation via an online platform every week during this course. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources. Prerequisite: PYS 6607, PYS 6609

**PSY 6613** Objective Personality Assessment (3)
An introduction to objective personality assessment. The student will learn basic administration, scoring procedures, and utilization of assessment results in clinical practice for various objective personality and temperament measures. Application of objective personality instruments and computer scoring will be explored. Prerequisites: PYS 6645 or similar graduate course and PYS 6609 or similar graduate course.
PSY 6614  Abnormal Psychology (3)
An advanced study of theories, research, etiology, assessment, and diagnosis of psychological disorders as defined by the current edition of the Diagnostic and Statistical Manual of Mental Disorders.

PSY 6615  Reflective Supervision (3)
This is a graduate level course and will focus on understanding and engaging in Reflective Supervision exploring historical formation and current use of Reflective Supervision. The Reflective Interaction Observation Scale (RIOS™) will be used to understand and to practice Reflective supervision/consultation. Attention will be given to establishing, maintaining and improving the reflective alliance. Additionally, course work will include understanding Reflective supervision models, which will include but not be limited to fields of mental health counseling, early childhood care, psychology, social work, nursing, K-12 education, and any persons involved in working with infants/early aged children and their families. Student taking this course will conduct a series of three observations modified version of the “Tavistock method of Infant Observation” and receive a minimum of two hours of reflective supervision/consultation via an online platform every week during this course. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources. Prerequisite: PSY 6607, PSY 6609, PSY 6612.

PSY 6616  Psychology of Leadership (3)
This course examines the psychological aspects of leader theories and effective leadership. Topics include leadership styles and behaviors, adaptive and situational leadership, decision making, and empowerment for leading change. The course includes leadership training, team work, diversity, and organizational strategy for global, cross-cultural leadership.

PSY 6617  Ethical, Legal, and Professional Issues (3)
Ethical and Legal Principles of Psychologists, Code of Conduct, and the values and ideas that guide practice and research in the field of psychology. Topics include confidentiality, informed consent, competence, integrity, respect, and using the ethical code to make decisions in a variety of settings. This course will also cover professional conduct in terms of interacting with people within a multi-cultural world.

PSY 6620  Introduction to Play Therapy (3)
This course is designed to promote the development of a historical, theoretical and ethical basis for the practice of play therapy. This course must be taught by a registered play therapist.

PSY 6621  Social Psychology (3)
An advanced study of social behaviors with a focus on social theories and empirical findings related to social perception, social influence, social interaction, and applied social psychology.

PSY 6625  Specialized Study in Psychology (1-3)
A study of a problem or topic using research techniques or a guided program of readings. Preparation of a scholarly paper is required and may involve an oral defense. A specialized study may be substituted for only one required course or elective in a student’s program. Approval by the student’s adviser, the course instructor, and department chair is required. See semester hour limits listed under Course Restrictions in General Regulations section.

PSY 6628  Principles of Behavior Analysis (3)
Students will develop competence in the use of technical terminology pertaining to the concepts and principles of behavior analysis.

PSY 6629  Psychology of Learning (3)
This course is an advanced study of the experimental methods, concepts, and theories of learning. Basic research as well as applications to the everyday world will be covered.

PSY 6630  Ethics and Professionalism in Behavior Analysis (3)
Students will develop an understanding of legal constraints and ethical guidelines pertinent to behavioral research and practice. They will also develop an understanding of the Behavior Analysis Certification Board Compliance Code and Disciplinary Systems.

PSY 6631  Psychological Foundations of Education (3)
An overview of educational psychology, including research findings and philosophical concepts related to nature of learner and learning process; principles of motivation and educational evaluation; and educational concepts representing different schools of psychological theory.

PSY 6632  Research Methods in Behavior Analysis (3)
Students will develop competence in measurement of behavior, data collection and analysis, graphic representation, and experimental design with particular emphasis on single-subject design.

PSY 6633  Advanced Psychology of Learning (3)
A study of the historical roots and contemporary principles and theories of human learning and their applications to educational practices. Emphasis of this course is on contemporary perspectives and developments; field and cultural influences on learning; and the relation of individual and group adjustment to school learning.

PSY 6635  Vocational Psychology and Career Development (3)
This course covers the procedures used in obtaining, organizing, integrating, and utilizing educational and occupational information including electronic media. Career development theories, scope of the world of work, decision making strategies and counseling for career development including information on the relationship between career choice and life
style. Attention is given to the appraisal of interest, aptitude and personality measurements.

PSY 6636  Wechsler Scales (3)
An exploration of the theory, nature, and measurement of human intelligence. Techniques of administering the Wechsler scales are taught include but are not limited to the following: WAIS-III, WISC-III, WPPSI-R, WIAT, and WMS. The student administrators, scores, and interprets test batteries and writes satisfactory reports. Prerequisites: PSY 6645 and adviser approval.

PSY 6637  Stanford Binet and Others (3)
This course requires the administration, scoring, interpretation and reporting of psycho-educational batteries, including Binet IV, Woodcock Johnson, PIAT, and Kaufman. This course will include measures of intelligence, academic achievement, adaptive behavior, behavior rating, and perceptual-motor skills. The primary focus will be upon those instruments commonly used in schools excluding the Wechsler scales. Prerequisites: PSY 6645, PSY 6636, and adviser approval.

PSY 6638  Philosophy of Cognitive Development (3)
An investigation of educational philosophies and human development as they relate to cognitive development and teaching of thinking skills.

PSY 6641  Behavior Assessment (3)
Students will develop competence in a broad range of common behavioral assessments, including preference assessments, skill-based assessments, and functional behavior assessment and analysis.

PSY 6643  Behavior Change Procedures (3)
Students will develop competence in a broad range of common behavioral interventions, including differential reinforcement procedures, token economies, and behavioral contracts.

PSY 6644  Bio-Psychology (3)
A study of the physiological correlates of behavior focusing on the cells of the nervous system, the structure and functions of the nervous system, psychopharmacology, drug abuse, and research techniques.

PSY 6645  Evaluation and Assessment of the Individual (3)
The study of knowledge and skills necessary to obtain records, appraise information, and write reports regarding individuals. Involves integration and use of data from interviews, standardized tests, scales, inventories, other procedures, including individual and group methods of assessment.

PSY 6646  Survey of Industrial Organizational Psychology (3)
This course covers applied psychology in the workplace. Topics include personnel selection, organizational learning and training, performance management, organizational change, teamwork, job satisfaction, work behavior and attitudes, motivation, union/management relations, and leadership styles.

PSY 6647  Organizational Behavior Management (3)
Students will develop competence in personnel supervision and management. They will also develop competency in selecting and implementing interventions designed to improve personnel performance and safety.

PSY 6648  Theories of Personality (3)
A critical analysis of major theories and systems of personality.

PSY 6649  Experimental Analysis of Behavior (3)
Students will develop competence in understanding how principles of behavior are discovered and described in the context of basic research.

PSY 6650  Practicum: Psychometry (3)
This course provides field supervised experiences preparatory to the Internship in School Psychometry/School Psychology. At least 100 hours of prescribed experiences in school psychometry/psychology must be completed at approved schools (K-12) and must be supervised by an approved school psychometrist or school psychologist. Prerequisites: PSY 6636 and PSY 6637.

PSY 6653  Measurement and Evaluation (3)
A study of basic statistical processes and measures used in education, counseling, and psychology. Analysis of a variety of standardized tests and measurement procedures including construction, use, and interpretation. Construction of teacher/counselor-made tests and measuring devices.

PSY 6654  Behavioral Theory and Philosophy (3)
Students will develop competence in the history and philosophy of behaviorism, theoretical approaches to understanding behavior, and interpretation of behavior in terms of the concepts and principles of behavior analysis.

PSY 6655  Internship: Psychology Assessment (6)
This course will provide a clinical internship appropriate to the specialty and practice of psychological technician. Training will be six months in duration and consist of at least 500 hours, 250 of which hours must be in direct contact with patients/clients. The student will be supervised for at least one hour per each five hours of client contact. At least 60% of supervision will be provided by a licensed psychologist. Grading system is Pass/Fail.

PSY 6656  Special Topics in Behavior Analysis I (3)
An examination of selected topics or issues in behavior analysis.
PSY 6657 Special Topics in Behavior Analysis II (3)
An examination of selected topics or issues in behavior analysis.

PSY 6659 Cognitive and Behavioral Interventions (3)
This is a study of the basic principles and techniques of cognitive and behavioral systems of intervention. Applications of these techniques are applied to the problems of children and adults in school, home, and clinic settings are presented.

PSY 6660 Cognitive Psychology (3)
This course covers the properties of human cognition and the principles that govern how it works. Course content includes classic and recent findings in core topics in cognitive psychology such as attention, perception, memory, language comprehension, and problem-solving.

PSY 6661 Developmental Psychology (3)
An advanced study of human development with emphasis on major developmental theories and the psychosocial, physical, emotional, and cognitive changes that occur across the lifespan.

PSY 6662 Internship: Psychometry (3)
This course includes at least 300 hours of prescribed experiences in school psychometry, completed at approved schools (K-12), and supervised by an approved school psychometrist or school psychologist. Grading system is Pass/Fail. Prerequisites: PSY 6650 and approval of instructor.

PSY 6664 Assessment of Disabling Conditions (3)
This course covers client assessment in the rehabilitation process and knowledge and skills required by the counselor in order to provide quality services to the individual. Prerequisite: PSY 6653 or permission of instructor.

PSY 6668 Human Lifespan and Development (3)
A study of the nature and needs of individuals at all developmental levels. Problems of human adjustment faced at all stages of development from conception through retirement, including adjustment issues in the home, school, work place, social groups, and retirement. An understanding of developmental crises in human behavior is also a goal of this course.

PSY 6669 Behavior Pathology (3)
A study of psychopathological disorders with emphasis on the psychological, social, and biological origins. The current classification system used by the American Psychiatric Association is used as a foundation. Diagnosis and treatment planning are emphasized.

PSY 6670 Diagnosis and Treatment Planning (3)
A course designed to assist mental health professionals in the understanding and application of a multi-axial system (current edition of the Diagnostic and Statistical Manual). Also included is a comprehensive treatment planning strategy for development statements of behavioral symptoms, short-term objective, long term goals and therapeutic interventions. Psychopharmacology treatment interventions are covered. Prerequisite: PSY 6669.

PSY 6671 Concentrated Supervised Fieldwork I (3)
Students will develop skills in professional practice and research. Students will develop competence in behavior-analytic skills and defining a research problem, designing a method to address the problem, and conducting and reporting an investigation that carries out the method to conclusion.

PSY 6672 Concentrated Supervised Fieldwork II (3)
Students will develop skills in professional practice and research. Students will develop competence in behavior-analytic skills and defining a research problem, designing a method to address the problem, and conducting and reporting an investigation that carries out the method to conclusion.

PSY 6673 Concentrated Supervised Fieldwork III (3)
Students will develop skills in professional practice and research. Students will develop competence in behavior-analytic skills and defining a research problem, designing a method to address the problem, and conducting and reporting an investigation that carries out the method to conclusion.

PSY 6674 Concentrated Supervised Fieldwork IV (3)
Students will develop skills in professional practice and research. Students will develop competence in behavior-analytic skills and defining a research problem, designing a method to address the problem, and conducting and reporting an investigation that carries out the method to conclusion.

PSY 6676 Concentrated Supervised Fieldwork V (3)
Students will develop skills in professional practice and research. Students will develop competence in behavior-analytic skills and defining a research problem, designing a method to address the problem, and conducting and reporting an investigation that carries out the method to conclusion.

PSY 6677 Concentrated Supervised Fieldwork VI (3)
Students will develop skills in professional practice and research. Students will develop competence in behavior-analytic skills and defining a research problem, designing a method to address the problem, and conducting and reporting an investigation that carries out the method to conclusion.

PSY 6679 Infant/Early Childhood Internship
This is a graduate level course and the purpose of the Infant/Early Childhood Internship is to promote the student’s understanding and integration of knowledge and skills developed through courses and field placement experiences focused on infant and early childhood mental health. Through direct observation of infant/early age child and family development,
assigned readings, group discussion, and class presentations, the developmental and relationship needs of infants/early aged children, parents, families, ethics, and standard of care will be deeply explored. Students will be encouraged to explore their own response to being with infants and families and will be required to write about these experiences. Student taking this course will conduct a series of three observations modified version of the “Tavistock method of Infant Observation” and receive a minimum of two hours of reflective supervision/consultation via an online platform every week during this course. Course readings and recordings are pulled from clinical and nonclinical infant/early childhood mental health and parent mental health sources. Pre-requisite: PSY 6607, PSY 6609, PSY 6612, PSY 6615.

PSY 6680 Thesis I (1-3)
Independent research under the supervision of the student’s advisory committee. A thesis proposal must be approved by the student’s advisory committee. Grading is Pass/Fail.

PSY 6681 Thesis II (1-3)
Independent research under the supervision of the student’s advisory committee. A thesis defense must be approved by the student’s advisory committee. Grading is Pass/Fail.

PSY 6682 Capstone (3)
This capstone course synthesizes the knowledge and research skills acquired throughout this graduate program into a non-empirical research project. The capstone project will consist of a comprehensive theoretical paper, integrative research review, or position paper on an emerging topic or contemporary issue relevant to psychology.

PSY 6688 Medical/Psychosocial Aspects of Disability (3)
A study of medical and psychological information related to the disabled persons and to their families. Aspects of personal and social adjustment will be emphasized.

PSY 6689 Research Methods/Statistics I (3)
This course covers introductory research theory, design, and analysis as well as applicable descriptive and inferential statistics.

PSY 6690 Research Methods/Statistics II (3)
This course covers advanced research theory, design, and analysis as well as applicable descriptive and inferential statistics.

PSY 6693 Psychological and Educational Statistics (3)
A study of variety of descriptive and inferential statistics commonly used in psychology and education. Emphasizes application of statistical methods to research design. A grade of “B” or better is required. Pre-requisite: ADE/CP/EDU 6691.

PSY 7700 Professional School Psychology (3)
This course provides a knowledge base specific to the professional practice of school psychology and includes legal and ethical issues, professional standards, models of service delivery, roles of the school psychologist, modern technology, and assessment. Enrollment limited to Ed.S. students.

PSY 7725 Specialized Study in Psychology (1-6)
Under supervision of faculty member selected by student and approved by adviser and faculty supervisor, student may pursue extensive study of particular area which fits his/her academic needs but is not available in regular curriculum. Department will establish guidelines for supervision and pursuance of study. See semester hour limits listed under Course Restrictions in General Regulations section.

PSY 7734 Internship: School Psychology (3-6)
At least 300 hours per three-semester-hour course of prescribed experiences in school psychology, completed at approved schools (K-12), and supervised by an approved school psychologist. The student is advised to check national and multi-state requirements for internship experiences. Prerequisites: PSY 6650 and approval of instructor.

PSY 7753 Internship: School Psychology (3)
At least 300 hours per three-semester-hour course of prescribed experiences in school psychology, completed at approved schools (K-12), and supervised by an approved school psychologist. The student is advised to check national and multi-state requirements for internship experiences. Prerequisites: PSY 6650 and approval of instructor.

PSY 7755 Internship: School Psychology (3)
At least 300 hours per three-semester-hour course of prescribed experiences in school psychology, completed at approved schools (K-12), and supervised by an approved school psychologist. The student is advised to check national and multi-state requirements for internship experiences. Prerequisites: PSY 6650 and approval of instructor.

PSY 7794 Field Project (3)
An independent study of a problem of a practical nature that is encountered in a field setting. A proposal for the study and a written report of findings must be approved by the student’s advisory committee. The advisory committee may administer an oral examination covering the research findings.

PSY 7795 Thesis (3)
Independent research for and preparation of a scholarly paper related to a school psychology problem under the supervision of the student’s advisory committee. A research proposal and the written paper must be approved by the student’s advisory committee. The advisory committee will administer an oral examination covering the research findings. Grading system is Pass/Fail.
### QUANTITATIVE METHODS

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>QM 6640</td>
<td>Data Analysis for Global Managers (3)</td>
<td>This applied course provides the skills managers need to analyze data quantitatively and to make decisions using spreadsheet modeling tools. As a basic understanding of statistical concepts is assumed, the focus will be on the application of these concepts. Topics covered include probability distributions, statistical inference, regression analysis, time series analysis and forecasting, quality management, and an introduction to simulation. Prerequisites: Graduate standing, admission into the MBA program and all undergraduate business prerequisite courses or equivalent completed.</td>
</tr>
<tr>
<td>QM 6641</td>
<td>Management Science (3)</td>
<td>An analysis of the probabilistic and deterministic quantitative techniques available to business managers involved in the decision-making process of the marketplace. Included is an evaluation of the models and processes now available for problem-solving purposes. Prerequisite: QM 6640</td>
</tr>
<tr>
<td>QM 6655</td>
<td>Introduction to Project Management (3)</td>
<td>This course provides an introduction to effective project management theory, tools, and techniques used throughout the entire project sequence, from pre-project definition through post-project evaluation. Prerequisites: Admission into the MSM degree program. Undergraduate statistics course within 8 years preferred, or demonstrated proficiency in statistics.</td>
</tr>
<tr>
<td>QM 6660</td>
<td>Intermediate Project Management (3)</td>
<td>This course provides an extension of QM 6655. Emphasis is on the extensive use of project management software to enhance the student's knowledge of project management and his or her value to the organization. Prerequisites: Graduate standing. Admission into the MSM degree program, QM 6655.</td>
</tr>
<tr>
<td>QM 6665</td>
<td>Advanced Project Management (3)</td>
<td>The course is an in-depth study of the Project Management Body of Knowledge from the Project Management Institute. All knowledge areas are covered. It prepares students to take the CAPM or PMP exams, if they choose. Prerequisite: QM 6655.</td>

<tbody>
<tr>
<td>RED 6603</td>
<td>Special Topics in Literacy (3)</td>
<td>An in-depth investigation of an approved topic designated by the instructor and the student for further research and exploration of a particular topic in literacy education.</td>
</tr>
<tr>
<td>RED 6625</td>
<td>Specialized Study in Area of Literacy (1-3)</td>
<td>A study of a problem or problems using research techniques. Selection of the problem must be approved by the student’s adviser, the instructor under whom the study is to be made, the appropriate college dean, and the Dean of the Graduate School. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. Total credit for any combination of enrollments in these courses may not exceed four semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.</td>
</tr>
<tr>
<td>RED 6630</td>
<td>Directed Reading Practicum (3)</td>
<td>This course is designed to provide the future teacher with directed practice in providing reading interventions to individual students or small groups of students in school settings. Experiences in the planning and preparation of lessons, modification of lesson procedures, and materials to fit student needs and the ongoing evaluation of student progress are included.</td>
</tr>
<tr>
<td>RED 6670</td>
<td>Advanced Study of Literacy (3)</td>
<td>This course will require students to examine, in depth, the science of reading. Reading subskills, including phonological awareness, fluency and comprehension, will be covered, as well as specific teaching methodologies proven effective for literacy instruction. These strategies will include explicit and systematic instruction, guided practice, error correction, corrective feedback, and multisensory language instruction. Course content will emphasize specific teaching methodologies to improve reading comprehension.</td>
</tr>
<tr>
<td>RED 6674</td>
<td>Literacy in the Content Areas Grades 6-12 (3)</td>
<td>The examination of research-based methods and materials for teaching reading and writing in grades 6-12. Field experiences required.</td>
</tr>
<tr>
<td>RED 6675</td>
<td>Literacy Instruction for Diverse Populations (3)</td>
<td>A study of English language learners and culturally and academically diverse learners and an examination of appropriate instructional strategies for those learners. Field experiences required.</td>
</tr>
<tr>
<td>RED 6678</td>
<td>Literacy and Multicultural Diversity (3)</td>
<td>A course designed to help teachers explore the cultural values, language structures, and belief systems of the major racial, ethnic, and national groups found in today’s classrooms. Specifically, methods, materials, and evaluation instruments and techniques which would maximize learning efficiency for these culturally diverse groups will be introduced. Children’s literature and instructional activities that would increase self esteem and understanding of cultural diverse groups and their contributions to society will be explored.</td>
</tr>
</tbody>
</table>
**RES 8801 Mixed Methods in Research Methodology (3)**
This course provides an overview of mixed methods research, particularly as it relates to educational research. Specifically, mixed methods research is put into historical context, and examined as a third research paradigm. In doing so, attention is given to the progression and methodological uncertainties related to the definition, philosophical assumptions, designs and analytic approaches. The applied nature of the course will address strategies for conducting, reporting, and evaluating mixed methods research in education.

**RES 8802 Qualitative Research Methodology (3)**
This course provides an overview of qualitative research, particularly as it relates to educational research. Specifically, qualitative is put into historical context, and examined as a research paradigm. In doing so, attention is given to the progression and methodological uncertainties related to the definition, philosophical assumptions, designs and analytic approaches. The applied nature of the course will address strategies for conducting, reporting, and evaluating qualitative in education.

**RES 8803 Quantitative Research Methodology (3)**
This course is a study of descriptive and inferential statistics. Emphasis is placed on the application of statistical method to research design. Instruction deals specifically with measures of central tendency and variability, probability theory, estimation and significance, correlation and regression, analysis of variance, and chi-square. A grade of “B” or better is required.

**RES 8804 Assessment and Evaluation in Global Leadership (3)**
This course provides an overview of assessment and evaluation as an inquiry process. The course will review the philosophy and practice of assessment and evaluation. The course will further examine the usefulness and appropriateness of various program evaluation methodologies (quantitative, qualitative, mixed methods), theories of evaluation usage and practice, and theories of valuing in the global environment. Additional emphasis is placed upon the practical application of evaluation theories, designs, models and techniques for use in assessment.
SECOND LANGUAGE INSTRUCTION

SL 6610 Survey of SLA for SL Teachers (3)
This course will look at recent research and publications relative to second language teaching. Not only will specific areas selected by the instructor be examined but the students in the class will have the opportunity to suggest areas of particular interest to them. This course provides opportunities for the student to extend knowledge and skills necessary for developing programs, selecting appropriate methods and employing materials, and evaluation in second language teaching.

SL 6615 Intro to Linguistics (3)
The purpose of this course is to provide students with a foundational understanding of the complex multifaceted system that we call language. Through lectures, discussions, and problem solving, students will develop an understanding of the various components that constitute language acquisition and to describe the interlanguage of language learners. In the first mid-term, the areas of psycholinguistics, sociolinguistics and animal communication as they relate to second-language learning will be explored.

SL 6620 Survey of Sociolinguistics for Second Language Teachers (3)
Sociolinguistics is the study of the systematic relations of language varieties and social groups. A wide variety of phenomena are investigated in sociolinguistics, including social, regional and stylistic variation, pidgins and creoles, multilingualism, age and gender differences, relationship between language and culture, etc. The goal of the course will be to gain understanding and an awareness of the sociocultural factors that influence the way people use different language varieties to communicate with each other.

SL 6630 Principles, Techniques & Materials in SL Teaching (3)
This course overviews the teaching principles, techniques and materials relevant to an interactive approach to second language teachers. Students will expand their teaching repertoire by studying curriculum design, assessment measures, learner variables, techniques and materials for teaching grammar/vocabulary/four skills (listening, speaking, reading and writing) and sociopolitical contexts for teaching ESL/EFL. Prerequisite(s): SL 6035 Methods and Approaches to Second Language Teaching.

SL 6635 Methods & Approaches in SL Teaching (3)
This course will look at recent research and publications relative to SECOND LANGUAGE TEACHING. Not only will specific areas selected by the instructor be examined, but the students in the class will have the opportunity to suggest areas of particular interest to them. This course provides opportunities for the student to extend knowledge and skills necessary for developing programs, selecting appropriate methods and employing materials and evaluating in language teaching.

SL 6640 Teaching Language Skills (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding of language and develop techniques to teach a new language and its grammar connected to the language. This class will help participants to develop instructional strategies and practical tools for integrating grammatical instruction into a language acquisition classroom.

SL 6645 Grammar (3)
The purpose of this course is to assist graduate students as they investigate and construct a deeper understanding of and develop techniques to teach a new language and its grammar connected to the language. This class will help participants to develop instructional strategies and practical tools for integrating grammatical instruction into a language acquisition classroom.

SL 6653 Assessment & Evaluation (3)
The purpose of this course is to provide students with an overview of the skills, techniques and information necessary to become competent in the process of second language assessment and research. Students will be required to learn and practice various forms of assessment and research. The learning structure of this course will consist of interactive instructor presentations, learning activities, group discussions, independent readings and practice of assessments and research procedures.

SL 6691 Research Methodology (3)
This course will examine issues and recent research on second language acquisition (SLA). The course will provide information necessary to understand and apply research processes, synthesize knowledge and writing, and plan and organize research problems for interpretation and application of research results. Application of these skills in the form of a written project using the Publication Manual of the American Psychological Association (APS) is required. This research course may not be substituted with another research course or one transferred from another university. A grade of “B” or better is required.

SL 6695 Thesis (1-3)
The thesis must be related to a Second Language Instruction problem or situation. Information regarding the thesis program may be obtained from the Dean of the Graduate School. This course may be repeated. Grading system is Pass/Fail. Prerequisite(s): All 9 of the Core Courses must be completed.
SL 6696 Practicum (3)  
Supervised experiences related to instruction in area of specialization. The application of skills, concepts and principles acquired in previous courses will be emphasized as well as all the principles of the SIOP Model. Prerequisite(s): All 9 of the Core Courses must be completed.

SL 6699 Capstone (1-3)  
This course helps students make connections between theoretical knowledge and practical situations. The content of this course is variable, depending on the individual student’s interests, present situations and future plans. The determination of the content for each student will be made through collaboration between the student, the student’s advisor and the instructor of the course. Students may focus on supervised teaching, action research or a project with a major field agency. Prerequisite(s): All 9 of the Core Courses must be completed.

SOC 5506 Urban Society (3)  
Historical, physical, economic, and social evolutions of urbanized areas. There is an emphasis on contemporary urban problems with implications for policy and planning.

SOC 5515 Sociology of Gender (3)  
Provides an analysis of the conceptualization of gender, reinforced with a focus on the methods of studying gender, historical perspectives on gender, biological and social bases of gender, and how gender intersects with other stratification systems within societies. Using a multicultural perspective, special emphasis is placed on how gender is manifested in the family, work as well as other major social institutions.

SOC 5556 Gerontology (3)  
Multidisciplinary overview of characteristics, strengths, and problems of older persons; diversity in aging process involving gender, race, ethnicity, subculture; services to older adults; gerontology as an academic discipline and a field of practice.

SOC 5560 Sociology of Health, Medicine and Illness (3)  
The sociological perspective applied to medicine. Topics include changing ideas of disease causation, the role of practitioners and patients, the institutional setting, differential delivery of health services, differential patterns of morbidity and mortality and the politics of health.

SOC 6615 Trends in Globalization (3)  
Examines the accelerated rise of globalization since the 1970s and its effect on individuals, families, communities, society, and the world. Students will learn about theories of globalization; and the effects of globalization on cultural, economic, and political life. Topics to be addressed include: the shift from a developmental economy to global economy, culture and globalization, migration and family structures, and global identity formations.

SOC 6618 Criminology (3)  
This seminar will introduce you to the major criminological theories, concepts of deviance and crime as well as some correlates of crime. We will also trace the origins of criminological theories and examine their underlying assumptions and contributions to criminology and recent debates about criminological theory in the literature. Finally, we will evaluate some recent theoretical developments in criminology focusing on the extent to which they move us beyond traditional perspectives. Throughout, we will be especially concerned with the following issues: 1) evolution of central concepts in criminology over time; 2) unique contributions of each theory to our understanding of crime; 3) relationships among theoretical concepts; and 4) operationalization of theoretical concepts in empirical research and assessment of research findings relevant to these theoretical concepts.

SOC 6620 Peace, Conflict, and Human Rights (3)  
This course will conduct an in-depth investigation of the multiple ways to create the conditions where social justice can flourish from global to local levels. Themes will include non-violence, conflict resolution, human rights, social inequality, and the role of ethnic and religious affiliations in current wars and conflict at home and abroad. This course will also explore non-violent struggles at the international level and the nation-state level.

SOC 6622 Sociology of the Family (3)  
An in-depth analysis of sociological perspectives on family behaviors and relationships. Readings and discussions will focus on major changes that occurred in the social institution of the family since the middle of last century. The course will investigate sociological theories about the family and use empirical approaches to better understand family life. Discussion will consider theories, explanations, and debates about changing family forms and assess the implications of contemporary family change for research and public policy. Class topics include families through the lens of gender, race and class variations, fertility intentions and childlessness, non-marital child bearing and teen pregnancy, transition to adulthood, marriage and cohabitation, parenting, divorce, remarriage, step families, multigenerational, and aging families, and same sex couples as parents.

SOC 6625 Specialized Study in Area of Sociology (3)  
A study of a problem or problems using research techniques. Selection of problem must be approved by the professor under whom the study is to be made and the Dean of the Graduate School. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve
oral defense. Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student's program. See semester hour limits listed under Course Restrictions in General Regulations section.

**SOC 6628 Gender, Crime, and Justice (3)**

This course is designed to explore the important and under-studied intersection between gender/women and crime. The word intersection is used because the status structures commonly used by criminologist, and sociologist never occur alone. Another way of saying this is that scientists study a number of social demographics or correlates of crime at the same time. Thus, in this class women involvement in crime, whether as victims or as offenders, or as professionals engaged in the criminal justice system, a number of these variables have to be investigated (studied) at the same time. We will explore the nature and extent of women as victims, offenders, and workers in the criminal justice system. We will investigate the relationship between victimization and offending, and study the details of women in the criminal justice as offenders or workers (professional as law enforcement officers, court personnel, correctional workers, etc.) A major focus will be to learn about the major debates and topics within criminology relating to gender and crime. In addition to the above ideas, we will look at women fear of crime, women limited mobility economically, crime policies that impact the lives the women as victims, offenders, and professionals.

**SOC 6631 Deviant Behavior (3)**

This course focuses upon the social and cultural factors as they apply to deviance. The work of other disciplines in the study of deviation is reviewed and evaluated. Special emphasis is given to the different sociological approaches in the area of deviance; selected types of social deviation are examined and analyzed through these different sociological perspectives. The course is structured as a service course that has a pragmatic and interdisciplinary appeal to people in education, business, counseling, criminal justice and agency work, as well as to those who wish to further their training in sociology.

**SOC 6632 Minorities in the U. S. Social Structure (3)**

An in-depth theoretical and methodological study of racial and cultural minorities in America society will be undertaken in this course. This course includes directed readings on the intersecting dimensions of inequality that are woven through life in contemporary societies. The goal of the course will be movement away from unidimensional analyses and movement toward thought and scholarship that consider the multiple effects of cross-cutting oppressions and privileges.

**SOC 6633 Race, Crime, and Justice (3)**

Explores the relationship between the criminal justice system and racial minorities in the United States. Seeks to understand some of the economic, political, and sociological reasons why racial minorities, particularly African-Americans, are over represented in the criminal justice system. Explores normative issues of justice and equity in broader social interactions that influence and are influenced by crime and the criminal process.

**SOC 6635 Sociology of Education (3)**

This course is structured to conduct a thorough survey of education in contemporary society. Emphasis will be placed on examining education as a social institution and the school as a social organization. The educational system's role in creating inequality and the contribution of formal education to individuals' physical and mental well-being will also be examined. Topics will include the dynamics of race, class, and gender in education, standardized testing, school choice issues, and the current state of higher education.

**SOC 6636 Social Inequality (3)**

Examines theories, definitions, and measurement of poverty and implications of recent research on the poor; considers social consequences and strategies to combat poverty.

**SOC 6640 Death and Dying (3)**

An overview of historical aspects of death and dying will be conducted in this course. In addition, the biomedical, economic, social, and psychological issues surrounding death and dying in the 21st century in America will be explored in depth. Both individuals as well as societal attitudes toward death and the dying process will be covered, including: an exploration of the death system, variations of grief, hospice and palliative care, end of life issues and decisions, the bereavement, grief and mourning process and funeral process. A theoretical and applied approach will be utilized in this course.

**SOC 6644 The Sociology of Cinema (3)**

This course is designed to critically examine sociological issues within American society via the lens of cinema.

**SOC 6645 Sociology of Violence (3)**

This course offers a graduate-level foundation of theoretical and empirical research in the study of violence. While it primarily focuses on scholarship within the discipline of sociology, it will also examine other disciplines and benefit from interdisciplinary contributions to the understanding of violence & society. During the semester the diverse forms, sites, and spaces of violence and the intricate relations of violence with issues and discourses of race, gender, ethnicity, religions, and state, among others, will explored and discussed.
SOC 6646  Food and Society (3)
Explores the central role of food in social life, considering similarities and differences in the sociality of food across communities, places, regions, and nation-states. The sociological significance of food is approached from multiple perspectives: institutionally as part of economic and political systems; interpersonally, as an important element of identity and socialization; organizationally, as part of the community and family structure; and as an embodiment of class, culture, age, and gender.

SOC 6655  Sociological Social Psychology (3)
This course provides and in-depth exploration of the topic of social psychology. Subtopics to be examined as part of this course include the self, emotion, motivation, group dynamics, and collective behavior, as well as the theoretical paradigms of symbolic interactionism, social exchange, and social constructionism. Emphasis will be placed on the similarities and differences between the sociological and psychological approaches to social psychology.

SOC 6656  Sociology and Religion (3)
This course introduces fundamental concepts used in the sociology of religion and discusses different aspects of religion from a sociological standpoint. It examines the classical/neo-classical perspectives and thinkers that have extensively influenced contemporary scholars in the field. While this course also analyzes examples of different worldwide religions, it primarily focuses on the sociological understanding of religion as a social phenomenon.

SOC 6665  Sociological Theory (3)
Theoretical analysis of social inequality with emphasis on how social class status, power, and culture shape social relations and determine life chances. Emphasis will also be given to an examination of how social inequality affects attitudes, opinions, and political choices of individuals and groups. Topics that are covered include family, educational opportunities, religious practices, status attainment, and social mobility.

SOC 6680  Selected Topics in Sociology (3)
SOC 6681  Sociological examination of a designated topic of special and/or current interest and importance that is generally not covered in regularly offered courses in the department.

SOC 6690  Internship 1 in Sociology (3)
Application of skills and knowledge of Sociology in government agency, public service institution or similar situation under the supervision of a faculty member. Prerequisite(s): successful completion of SS 6690, SS 6691, SS 6698, SOC 6690 and approval of the student's academic adviser and/or graduate coordinator.

SOC 6691  Internship 2 in Sociology (3)
Advanced application of skills and knowledge of Sociology in government agency, public service institution or similar situation under the supervision of a faculty member. Prerequisite(s): successful completion of SS 6690, SS 6691, SS 6698, SOC 6690 and approval of the student's academic adviser and/or graduate coordinator.

SOCIAL SCIENCE

SS 6610  Grant Writing in the Social Sciences (3)
In the non-profit world as well as in social science research, grant writing is a valuable skill to acquire. This course will explain how to research potential funding sources not only in the social sciences but also in the social service sector. It will also provide hands-on experience in writing well-crafted proposals.

SS 6630  Quantitative Analysis in the Social Sciences (3)
This course is designed to teach what social scientists do with the data they gather. Particular attention is given to descriptive and inferential statistics, the relationship between research and policy, evaluation research and research ethics. Special emphasis is given to utilization of SPSS.

SS 6680  Internship 1 in Social Science (3)
Application of skills and knowledge of Social Science in government agency, public service institution or similar situation under the supervision of a faculty member. Prerequisite(s): SS 6690, SS 6691, SS 6698, and approval of the student's academic adviser and/or graduate coordinator.

SS 6681  Internship 2 in Social Science (3)
Advanced application of skills and knowledge of Social Science in government agency, public service institution or similar situation under the supervision of a faculty member. Prerequisite(s): successful completion of SS 6690, SS 6691, SS 6698, SS 6680 and approval of the student's academic adviser and/or graduate coordinator.

SS 6690  Seminar in Social Sciences (3)
This course will focus on current issues in the Social Sciences and prepare the student for transition into a Social Science career or further graduate study at the doctoral level.

SS 6691  Survey of Research Methods in the Social Sciences (3)
This course is designed to provide you with a comprehensive overview of the research methods used in the social sciences. Topics covered will include both qualitative and quantitative research methods, the nature of social scientific research, how to operationalize a research problem, quantitative research techniques, qualitative research techniques, research instrumentation, sampling procedures, data collection, data analysis, the presentation of research results, and the ethical concerns of social scientific research.
SS 6693  **Thesis Practicum (3)**
During this course, the student, under the supervision of the instructor, will design and implement a plan to collect and analyze data in preparation for the completing of the thesis.

SS 6695  **Thesis (3)**
During this course, the student, under the supervision of the instructor, will use data collected during SS 6693 Thesis Practicum to write a thesis as partial fulfillment of the requirements for the Master’s degree.

SS 6696  **Introduction to College Teaching (3)**
The purpose of this course is to introduce students to college and university level teaching. This class will present the responsibilities of college teaching, introduce learning outcomes, teaching strategies and different forms of learning evaluation. This class is designed for those who are interested in teaching in Social Sciences at the college/university level.

SS 6698  **Social Theory (3)**
A survey of theoretical approaches used historically and currently in the Social Sciences.

**SOCIAL WORK**

SWK 6601  **Introduction to Social Policy Development and the Effects Community and Organizations (3)**
This course is designed to assist students in developing a working understanding of American social policy, and the system, its response to human need and its relation to the organized profession of social work. Emphasis is placed on identifying and examining social, political, economic, legal and cultural concepts that influence policy formation, program development and service delivery. This course also explores the effects of social policy at the community level, including organizations, formulating coalitions, engaging in participatory planning and economic development.

SWK 6604  **Human Behavior In The Social Environment I (3)**
The overall purpose and primary focus of this course is the exposure to and acquisition of knowledge about the development of human behavior within the social systems of individuals, families, groups, communities, institutions, and organizations. This course will provide through a series of lectures, participatory discussions and in-class activities, a framework with which to gain a professional understanding of human behavior from an ecological systems perspective.

SWK 6605  **Human Behavior in the Social Environment II (3)**
The overall purpose and primary focus of this course is the exposure to and acquisition of knowledge about the development of human behavior within the social systems of individuals, families, groups, communities, institutions, and organizations as this relates to the adult to elderly aspects of the life span. This course will provide through a series of lectures, participatory discussions and in-class activities, a framework with which to gain a professional understanding of human behavior from an ecological systems perspective.

SWK 6606  **Direct Practice Methods with Individuals and Families (3)**
This course focuses on direct social work practice with individuals and families based on an ecological multi-level systems framework and a strengths perspective. Knowledge, skills and values essential to the professional relationships (including mutuality, collaboration and respect for the client system) are developed. Knowledge, skills and values essential to implementation of a variety of social work roles are acquired through examination and analysis of appropriate practice models through experiential classroom activities and critiques of case studies.

SWK 6608  **Theory and Practice with Groups (3)**
This course is an introduction to theory and practice with diverse groups to assist students in developing a contextual understanding of group dynamics over the course of the group process. Viewed through the lens of race, culture, and gender, this course will emphasize group functioning within a strengths-based, resiliency framework.

SWK 6612  **Foundation Pre-Practicum and Seminar (3)**
This course is designed to prepare the Foundation student to enter into Foundation Practicum. Students will draw upon all previous foundation coursework to successfully apply and secure an approved Foundation Practicum placement. In this course, students will be required to submit the necessary documentation to be approved to take the block (3) of Foundation Practicum and Seminar classes. Prerequisites: Must have approval of academic advisor.

SWK 6614  **Cultural Diversity (3)**
The purpose of this course is to provide students with an opportunity to examine and integrate current trends, issues, and dynamics as they relate to professional social work practice with diverse individuals, families, groups, and communities. The effects of race, class, ethnicity, age, disability, and sexual orientation are examined as related to interpersonal, inter-group, inter-group, and inter-system power struggles and differences.

SWK 6620  **Social Work Practice with Women (3)**
This course is designed to facilitate an understanding and appreciation of diversity among women utilizing multiple practice perspectives (including feminist theories). In addition, it is designed to foster a critical understanding of the dynamics and consequences of social and economic injustices, inclusive of but not
limited to discrimination and oppression in formulating our assessment and treatment plans with women and the critically assessment and challenge of policies that negatively impact women.

**SWK 6622 Crisis Intervention (3)**
Direct Practice techniques for dealing with crisis. Crisis theory, stress management and time-limited intervention will be examined.

**SWK 6645 Principles of Non-Profit Organizations (3)**
This course provides students with introductory knowledge about nonprofit organizations, including their historical and contemporary roles in human services, and their unique structure and governance, as well as their social, political and economic impacts in society.

**SWK 6691 Foundation Research Methods (3)**
Basic principles of developing, testing, refining, and using scientific knowledge for direct social work practice are presented. Consideration is given to the development of theory, formulation of testable problem statements, the design of appropriate strategies for obtaining and analyzing relevant information, drawing conclusions and applications for use in professional practice, and communication of findings to others.

**SWK 6696 Foundation Practicum and Seminar I (2)**
The Foundation Field Practicum and Seminar engages the student in an assigned human service agency. In addition to providing an orientation to the practicum experience, this course directs the student’s study of the practicum client population and agency, promotes the student’s self-assessment and learning goals for professional social work development. This course is the first 134 contact hours at an agency; a second course (SWK 6697, 134 contact hours); and a third course (SWK 6698, 134 contact hours) will complete a total of 402 contact hours at the same agency. Prerequisites: Approved by Director of Field Education.

**SWK 7701 Advanced Social Work Practice with Individuals and Families (3)**
Advanced practice with individuals within family systems and community environments are addressed. The course builds from the knowledge acquired in SWK 6606, SWK 6604, and SWK 6605 by expanding the conceptual dynamics of the ecological perspective related to individuals. Topics will include assessing individuals within a family and community context using multiple theoretical orientations.

**SWK 7703 Direct Practice Evaluation (3)**
This course is the second research course in the graduate social work curriculum. Building upon the principles of social science research methods acquired in SWK 6691, the content of this course focuses upon the linkages between individual and family centered social work practice and evidenced based social work research.

**SWK 7705 Assessment and Psychopathology (3)**
This course provides an overview of social work assessment methods applicable to family-centered clinical practice. Topics include the basic principles of social work assessment (including reliability and validity) and a review of common methods of empirically supported assessment methods.

**SWK 7707 Advanced Social Work Practice with Groups (3)**
This advanced clinical practice course teaches group practice skills development for use as a primary treatment modality in clinical social work practice. Theoretical and practice principles of group work are emphasized to enhance understanding and use of “group” as a complex system of roles and interrelationships in a highly experimental format.

**SWK 7720 Special Topics (Social Work with Abusing and Neglecting Families) (3)**
This course is a critical examination of current knowledge about the causality and interventions to prevent or remedy child abuse and neglect (more recently referred to as child maltreatment). Attention is given to ethical and cultural issues in defining and intervening with abusive and neglectful families. Legal aspects and implications for social policy and social work practice for prevention and remediation with families are emphasized. The course provides specialized content for graduate students interested in social work practice with families and children. It builds upon foundation content in social policy, social work theory and practice, and research pro-
The course is designed as an introduction to the process of grant writing in human service organizations as an orientation to the broader funding landscape. Students will develop skills related to effective grant writing including assessing and conveying need, developing programmatic responses to need, the creation and use of logic models, and project/program evaluation.

**SWK 7726 Social Work with Military Families (3)**
The course is designed as an elective for graduate students in the School of Social Work who wish to increase knowledge and skills for practice with military personnel, Veterans, and their families. Students will learn about the role of social work within the military and the Department of Veterans Affairs in meeting the needs of active duty service members, National Guard and Reserve members, Veterans and their families. Students will develop a working understanding of the history of military social work, aspects of the military culture that they will need to know in order to be able to develop a strong therapeutic alliance, social and mental health needs and issues facing this ethnically and culturally diverse population, military social work policies and services, and needed advocacy efforts in that regard, evidence-based and other mental health interventions with emerging empirical support for this population, and other ethnic and cultural diversity issues in military social work.

**SWK 7730 ORGM Evaluation (3)**
This course provides both the theoretical basis and practical application of evaluation processes and skills for use across human service organizations. Students will be provided with a variety of approaches for evaluation efforts at the project, program, organizational, and community levels. Additionally, students will explore the importance of the evaluative context to include organizational capacity, cultural considerations, stakeholder involvement, and ultimately, communicating the evaluation findings.

**SWK 7732 Program Design and Development (3)**
This course is designed to equip students with the knowledge and skills needed to design and implement projects and programs within human service organizations. To do so, students will utilize data driven approaches to determine the need for, and the design of, programs as well learn how to develop and carry out strategic planning efforts to implement and carry out these programs.

**SWK 7734 Advanced Policy Analysis (3)**
This course builds upon previous policy coursework in an effort to further the students understanding of the policy landscape and identify opportunities within that landscape to influence the policy making process. Students will be provided with opportunities to apply this knowledge and build practice skills through advocacy efforts, practical policy analysis and political involvement, to politically empower and serve individuals, groups, and communities, at the local, state, and national levels.

**SWK 7736 Organizational Leadership and Management (3)**
This course is designed to equip students for supervisory and managerial roles within human service organizations. Topics covered include organizational theory, administrative roles and responsibilities, personnel management, resource development and stewardship, and organizational capacity building.

**SWK 7738 Organizational Leadership and Management Senior Seminar (3)**
This course is conceptualized as a mechanism for students to draw upon all previous courses in the MSW program and integrate and apply all that they have learned. The course is taken prior to and in preparation for field placement. Students will be prepared to demonstrate mastery of the current issues, theories, policies, and methods in the development and management of organizations as applied in the field setting.

**SWK 7740 Social Work Practice with Children and Adolescents (3)**
The overall purpose and primary focus of this course is to address Social Work practice methods when working with children and adolescents as well as identify the diverse issues and concerns impacting them. Unique aspects of working with children an adolescent that will also be discussed in this course include impacts at home and at school, ethical and legal consideration as well as best practice methods when working with parents, guardians and educators.
COURSE DESCRIPTIONS

SWK 7742  Social Work in School Settings (3)
This course presents advanced knowledge and skills essential to providing effective school social work interventions. Students will learn to identify, select, apply evidence-based prevention and intervention methods for use with individuals, groups, families, school personnel, and communities to enhance student learning, development, and school success. Students will acquire the skills needed to effectively practice as a school social worker to enhance student learnings and achievement.

SWK 7769  Advanced Direct Practice Senior Seminar (3)
This course is conceptualized as a mechanism for students to draw upon all previous courses in the MSW Program and integrate and apply all that they have learned. The course is taken concurrently with the final block field placement. Students demonstrate mastery of the theoretical and empirically-based knowledge from all components of the curriculum, and the ability to apply this knowledge in advanced social work practice with children, youth, and families.

SWK 7796  Specialization Practicum I (3)
Placement in a social service agency which provides the opportunity to practice and develop professional social work skills under the joint supervision of a faculty and an agency supervisor. Includes a weekly seminar plus a minimum of 170 contact hours in a specialization agency setting. This is the first of three required practicums. Prerequisites: Completion of all Foundation Courses. Must have approval of Director of Field Education.

SWK 7797  Specialization Practicum II (3)
Placement in a social service agency which provides the opportunity to practice and develop professional social work skills under the joint supervision of a faculty and an agency supervisor. Includes a weekly seminar plus a minimum of 170 contact hours in a specialization agency setting. This is the second of three required practicums. Prerequisites: Completion of all Foundation Courses. Must have approval of Director of Field Education.

SWK 7797  Specialization Practicum III (3)
Placement in a social service agency which provides the opportunity to practice and develop professional social work skills under the joint supervision of a faculty and an agency supervisor. Includes a weekly seminar plus a minimum of 170 contact hours in a specialization agency setting. This is the third of three required practicums. Prerequisites: Completion of all Foundation Courses. Must have approval of Director of Field Education.

SPORT MANAGEMENT

SM 6600  Foundations of Sport Management (3)
This course is designed to introduce graduate students to the field of sport management. Various topics related to sport management and related fields will be discussed. Students must enroll in this course during their first semester of graduate school.

SM 6604  Statistical Analysis and Interpretation (3)
This course requires students to utilize statistical fundamentals, analyses, and interpretation of statistics. Statistical information includes, but is not limited to, sampling, hypothesis testing, regression, frequency distributions, t-tests, parametric and non-parametric statistical techniques, multivariate data analysis (MANOVA), and others using SPSS and other statistical software.

SM 6605  Global Perspectives in Sport (3)
This course examines sport as a global phenomenon and will investigate historical, cultural, economic, and governance perspectives from around the globe. A requirement of this course is participation in Study Abroad.

SM 6610  Sport and the Law (3)
The course is designed to provide students with an in-depth awareness and understanding of legal responsibilities of sport managers, coaches, and administrators. Emphasis will be placed upon critically analyzing the legal theories, structures, statutes, case law, and standards that apply to the sport industry and that impact sport organizations. Substantive legal areas include tort, constitutional, antitrust, intellectual property, agency, contract, and business law.

SM 6614  Risk Management in Sport (3)
Sport organizations are required to ensure safety and, as a result, they may be held liable for injuries. While safety and risk management are not viewed as being overly complicated, the specific understanding of safety principles and risk management decisions that assist sport managers to provide reasonably safe environments may be more problematic. This class will examine various theories of risk management as managerial functions in modern sport organizations as applied, but not limited to negligence, premises liability, product liability, financial considerations, and harassment.

SM 6615  Organizational Behavior & Leadership in Sport (3)
In this course students will study the basic concepts, theories and organization of administration including financial management as applied to sport, physical education, and recreation.
SM 6616  **Sport Finance (3)**
This course is designed to provide students with information concerning advanced theory in finance, accounting, and managerial control of budgets.

SM 6617  **Research Methods I (3)**
This course explores principles, methods, and strategies for planning, designing, evaluating, and applying research in sport and/or related fields. A grade of “B” or better is required. **Prerequisites:** SM 6600 *Foundations of Sport Management* and a total of 18 hours of SM courses.

SM 6618  **Sport Economics (3)**
This course assists students in understanding past and contemporary trends in economics and sport economics research. In addition, major economic concepts and frameworks related to and outside of sport are researched and discussed.

SM 6624  **Sociological Aspects of Sport (3)**
This course focuses on the advanced recognition, discussion, and systematic review and analyses of sociological and ethical issues in sport. Topics discussed will include but are not limited to: the development of sport and the sports industry; the political and cultural significance of sport; the part played by sport in international relationships; the relationship between sport, gender, class and ethnicity; a range of sports-related issues such as health, drugs, and violence, and the management of sports activities both in educational establishments and in the wider society.

SM 6625  **Specialized Study in Sport Management (1-3)**
Study of problem or problems using research technique. Selection of problem must be approved by student’s adviser, instructor under whom the study is to be made, and the appropriate Director of Graduate Studies. The study should contribute to the student’s program. Preparation of a scholarly paper is required and may involve an oral defense. **Total credit for any combination of enrollments in these courses may not exceed six semester hours. A specialized study may be substituted for a required course only once in a student’s program. See semester hour limits listed under Course Restrictions in General Regulations section.**

SM 6630  **Applied Sport Analytics (3)**
Throughout this course students will develop skills in working with descriptive and inferential statistics as well as modeling techniques and data visualization through the use of the R programming language to explore issues and challenges present in sport business settings. Students will discuss and analyze topics in sport through the use of cutting-edge data analytics approaches.

SM 6632  **Critical Issues in Sport Management (3)**
This course focuses on the recognition, discussion, and systematic analysis of controversial issues and problems encountered in the conduct of professional activities in sport.

SM 6633  **Sport Consumer Behavior (3)**
This course examines the sport consumer as a decision maker by reviewing their social, cultural, and psychological influences on purchasing decision-making processes. Also, this course allows for students to gain an in-depth review of such influences emphasizing their implications for marketing strategies.

SM 6639  **Sport Communication (3)**
Students in this course will explore and apply communication theories to the sport industry. Emphasis will be on the examination of public and media relations with a special focus on organizational communication to external and internal publics.

SM 6640  **Sport Marketing (3)**
The purpose of this course is to teach the sports manager how to create a marketing plan. The emphasis is on following a ten-step procedure designed primarily for the non-profit sector and learning the theoretical base required to complete the process accurately and proficiently.

SM 6641  **Sport Facility and Event Management (3)**
This course is designed to provide the student with information concerning the planning, design, organization, and administration of sport and recreational facilities, with an added emphasis on event management.

SM 6644  **Human Resource Management in Sport (3)**
This course focuses on management of human resources within sport and physical activity organizations. The course will explore the organizational processes of job design, staffing, leadership, performance appraisal, and reward systems. Desired outcomes of job satisfaction are examined along with organizational commitment. **Prerequisite:** SM 6600

SM 6645  **Revenue Generation in Sports (3)**
This course will explore the contemporary trends in revenue generation of professional and amateur sport teams and programs. The course will analyze and produce skills essential to the revenue production and sales process commonly found in business and sport business.

SM 6672  **Sport Psychology (3)**
The course is designed for the student with a vocational interest in athletic coaching within the educational environment. Psychological theories will be applied to the teaching of sports skills and the development of individuals into efficient team units.

SM 6673  **Ethics in Sport (3)**
The course examines ethical matters and issues relating to sport and physical activity.
SM 6674  Entrepreneurship in Sport (3)
The course provides students with an awareness and understanding of basic concepts and problems in starting a business.

SM 6675  NCAA Governance, Compliance and Institutional Control (3)
This course is designed to give graduate students an understanding of the history, purposes, fundamental policies, and administrative organization of the NCAA. The student will gain sufficient working knowledge of the Operating Bylaws of the NCAA Manual and learn to apply NCAA rules and regulations to compliance related scenarios. In addition the student will learn the basic principles of institutional control of an intercollegiate athletics program and the basic components and applications of an institutional compliance program.

SM 6680  Practicum in Sport Management (1-9)
6681 A supervised application of the concepts, principles and skills acquired by the students in previous course work. Problems in the area of financial management personnel supervision, fitness management, sport management, and curriculum development will be identified. Students will explore and identify alternative solutions to problems through group interactions. Permission of the instructor is required.

SM 6690  Internship (3)
A 400-hour supervised experience in planning, staging and evaluating a formal practicum in related field. Prerequisite: Permission of instructor.

SM 6691  Research Methods II (3)
This course examines the variety of research methods and reporting methods used in sport & fitness management research. Prerequisite: SM 6600, SM 6604, and SM 6617

SM 6694  Thesis I (3)
Independent research related to sport and fitness management topic under the supervision of the student’s advisory committee. A thesis proposal must be approved by the student’s advisory committee. Grading system is Pass/Fail.

SM 6695  Thesis II (3)
Independent research leading to the preparation of a scholarly paper related to sport and fitness management topic under the supervision of the student’s advisory committee. The student’s advisory committee will administer an oral examination covering the research and findings. Grading system is Pass/Fail.

SM 8801  Statistical Analysis and Interpretation (3)
This course examines the fundamentals, analyses, and interpretation of statistics. Statistical information to include sampling, hypothesis testing, regression, frequency distributions, t-tests, parametric/nonparametric statistical techniques, multivariate data analysis (MANOVA), and others using SPSS and other statistical software.

SM 8803  Research Methods I (3)
The purpose of this course is to introduce the student to broad and practically oriented research design methods within sport management as a social science. This course will also require students to investigate the development and usage of theory and design as they relate to research in sport management. Using this knowledge, students will be able to begin developing their own research agenda by identifying and expanding key questions within the area of interest. A grade of “B” or better is required.

SM 8805  Research Methods II (3)
This course further examines the research process, research designs, sampling procedures, and other quantitative and qualitative research procedures. This course will also emphasize the questionnaire development process and development of other data collection procedures. Utilizing this knowledge, students will be able to complete a research study from idea formation to dissemination. Prerequisite: SM 8803

SM 8807  Seminar in Research Dissemination (3)
This course is designed to prepare individuals for the research demands of higher education and the sport industry. Emphasis will be given to both scholarly and practical publication and presentation processes including but not limited to: researching appropriate publication and presentation outlets, adhering to publication/presentation requirements, submitting projects according to the respective guidelines, and preparing for oral and poster presentations.

SM 8810  Seminar in Applied Statistics in Sport Management (3)
This course provides an introduction to the statistical techniques commonly employed in sport management research. Course topics will include statistical techniques that measure the relationship among variables, determine significance of group differences, predict group membership, and analyze scale structure.

SM 8812  Seminar in Sport Marketing (3)
This course will include discussions of current topics and issues impacting sport marketing and its application within the sport management field. Emphasis is on discussion and critical analysis in sport marketing theory, research, education, and current issues relative to social, cultural, political, and ethical issues in sport marketing.

SM 8814  Seminar in Sport Finance (3)
This course is designed to provide students with an advanced appreciation and understanding of financial theories related to sport management. Emphasis is on review, research, discussion and application of financial cases.
**SM 8816 Seminar in Organizational Behavior and Leadership (3)**
This course covers a wide spectrum of organizational behavior and leadership topics and focuses intently on the theoretical evolution and underpinnings of the material and how research could be potentially directed in the future. This course exposes the student to various leadership theories, management principles, and variables, including analysis of the methods and materials commonly utilized by organizational researchers.

**SM 8820 Seminar in Legal Aspects of Sport (3)**
This course is designed to provide students with an advanced appreciation and understanding of legal responsibilities of sport managers. Emphasis will be on researching and reviewing legal cases and understanding and applying legal theories to select cases.

**SM 8822 Seminar in Sport Management Pedagogy (3)**
This course examines common practice and issues in higher education and sport management pedagogy. Emphasis will be placed on understanding the varying types of institutions, traditional roles and responsibilities within the respective institutions, ethical issues in higher education, research and practice for effective college teaching, the classroom environment, effective instructional formats (online and traditional), and teaching strategies.

**SM 8825 Specialized Study in the Area of Sport Management (3-6)**
This course is designed to provide the student with an opportunity to explore an area of interest related to his/her selected specialty under the direct supervision of a faculty member.

**SM 8830 Special Topics (3)**
This course is designed to explore sport management related topics in depth to allow the graduate student to become an “expert” in that topic. Significant preparation, recognition of the topic, research, discussion, and collaboration with peers and colleagues will be required in order to adequately prepare for the submission of a scholarly research paper.

**SM 8835 Seminar in Advanced Statistics in Sport Management (3)**
This course provides an introduction to the advanced statistical techniques recently employed in sport management research. Course topics will include Exploratory Factor Analysis, Confirmatory Factor Analysis, and Structure Equation Modeling that systematically evaluate conceptual/theoretical models.

**SM 8860 Dissertation (1-9)**
In consultation with the dissertation chair and committee, the student will design and conduct research to complete the aims identified in his/her research proposal, or as modified subsequently, in line with recommendations from the committee. Dissertation credit hours are offered in 3 hour increments.

A student may not exceed 9 semester hours within a semester or six semester hours within a term. Prerequisite: Instructor Approval

### SPECIAL EDUCATION

**SPE 5544 Internship Seminar (3)**
This course provides interns an opportunity to develop analytical thinking skills through examining broad educational issues and concerns, topics on the state and local levels, and those of personal interest. The scope of the course ranges from juvenile law, classroom management, professionalism, professional development for teachers, and other course topics. This course must be taken concurrently with internship. Corequisite: SPE 6654 or SPE 6655

**SPE 6609 Content Enhancement (3)**
This methods course emphasizes inclusive teaching practices that combine an interactive instructional sequence with a teaching device for teachers of secondary level students (6-12) with mild disabilities. This course focuses on content enhancement routines that help teachers carefully organize and deliver content area information.

**SPE 6610 Research Trends and Issues in Special Education (3)**
This course is designed to provide advanced students with an in-depth study of significant research in special education. Specifically, this course focuses on (a) methodological issues that relate to descriptive research, intervention, research, case study, qualitative and longitudinal research, (b) issues in assessment and instrumentation and (c) ethical issues related to research in special education. The course is premised on the trend of recent changes in the discipline from a service orientation to one that is becoming more scientific. A grade of “B” or better is required.

**SPE 6614 Adaptive Teaching Strategies for Students with Mild Disabilities K-6 (3)**
This course focuses on evidence-based practices and teaching strategies for students with mild disabilities, including social and emotional needs. Specifically this course reviews strategies for adapting curriculum materials, teacher instruction, and student learning activities for fundamental academic skills and content area instruction. Prerequisite: SPE 3340 or SPE 6640 (or equivalent).

**SPE 6615 Adaptive Teaching Strategies for Students with Moderate/Severe Disabilities K-6 (3)**
This course is built on a comprehensive review of research, theoretical issues, diagnosis, and educational planning for those students with moderate/severe disabilities, including more severe social and emotional disorders. Curriculum adjustment and differentiated instruction practices will be emphasized. Prerequisite: SPE 3340 or SPE 6640 (or equivalent)
**SPE 6616 Teaching Students with Emotional and Social Needs (3)**

This course will emphasize the behavioral, psychological, and social needs of the learner who demonstrates emotional and behavioral disabilities that significantly impact their progress in the general education curriculum and in building and maintaining appropriate social relations with peers and adults. Appropriate intervention strategies used to increase appropriate social behavior and decrease inappropriate social behavior will be studied. *Prerequisite: SPE 3340 or SPE 6640 (or equivalent).*

**SPE 6617 Adaptive Teaching Strategies for Students with Mild Disabilities—Grades 6-12 (3)**

This course focuses on instructional approaches that emphasize teaching students effectively, regardless of disability or special need. Specifically, this course provides strategies for adapting curriculum materials, teacher instruction, and student practice activities for both basic-skills and content area instruction. *Prerequisite: SPE 3340 or SPE 6640 (or equivalent).*

**SPE 6618 Adaptive Teaching Strategies for Students with Moderate/Severe Disabilities—Grades 6-12 (3)**

A comprehensive study of research, theoretical issues, diagnosis, and educational planning for those students with moderate/severe disabilities. Curriculum adjustment and the development of differential instruction will be emphasized. *Prerequisite: SPE 3340 or SPE 6640 (or equivalent).*

**SPE 6620 Service Delivery Models for Multiple Disabilities (3)**

The purpose of this course is to explore the many issues surrounding the education of secondary students with multiple disabilities. Special emphasis is placed on assessment, instructional models, transition programming, and data-based instructional decision making. *Prerequisite: SPE 6640 or equivalent.*

**SPE 6630 Collaboration for Inclusion (3)**

This course is designed to provide advanced students with an in-depth study of current literature and research on collaboration and consultation as a service delivery model to meet the challenge of educating students with disabilities in the regular classroom. Specifically, this course focuses on collaborative-related issues for teachers who work with students with disabilities. The course is based on the federal mandate that requires educators to employ the interactive framework established by PL 94-142 (now IDEA) to assure that all students are educated in the least restrictive environment. *Prerequisite: PE 3340 or SPE 6640.*

**SPE 6631 Legal Issues in Special Education (3)**

This course provides the special educator with relevant background on the legal issues impacting students with disabilities. Advocacy issues and collaborative roles of administrators, parents, teachers, and significant others in implementing federal legislation will be addressed. The text will be supplemented by more recent case law and policy developments in special education.

**SPE 6632 Assessment and Individual Programming (3)**

A comprehensive study of the assessment process used in the field of Special Education will be examined to include both standardized assessment measures and curriculum-based measures. Emphasis will be on the selection, administration, and analysis of standardized assessment instruments along with the development, administration, and analysis of curriculum-based instruments in determining eligibility for placement and instructional planning. *Prerequisite: Undergraduate special education assessment.*

**SPE 6635 Meeting Instructional Needs Through Technology (3)**

This is an advanced survey course in the classroom-adaptable and assistive technologies that are associated with the personal computer and other technologies that assist the learner with disabilities in accessing the teaching and learning environments. This course includes information on the assessment of assistive technology needs as a means of considering assistive technology and matching adaptations with individual needs in various settings. The student will explore ways to make instruction more meaningful for learning. Study will also focus on familiarity with keyboarding, disk operating systems, and tool software. Proficiency with word processing, database and spreadsheet use in an integrated program is developed. *Prerequisite: an undergraduate course in the integration of technology into the curriculum.*

**SPE 6638 Reading Interventions for Students with Special Needs (3)**

This course is designed to familiarize students with evidence-based/research-based reading intervention strategies for students with disabilities or students demonstrating significant deficits in reading skills. Students will build their knowledge base by completing an APA style literature review on validated reading intervention strategies, and identify interventions that address phonemic awareness, phonics, fluency, comprehension, and vocabulary, and that use direct instruction, guided practice, and error detection, and corrective feedback. Students will select and implement one evidence-based reading intervention strategy, progress monitor to determine its effectiveness and formally summarize and evaluate the results of the intervention.

**SPE 6640 Teaching Diverse Learners (3)**

The purpose of this course is oriented toward identifying exceptional students and providing appropriate learning experiences in the classroom setting. This course is a survey of the nature and needs of exceptional children and an introduction to their educational programs.
SPE 6654  Collaborative Internship Grades 6-12 (6)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience. Corequisite: SPE 5544

SPE 6655  Collaborative Internship Grades K-6 (6)
The Professional Internship Program is the culminating clinical field-based experience for students seeking certification in a teaching field. The Professional Internship Program provides the student with the opportunity to conduct classes and assume the role of a teacher while receiving supervision from a classroom teacher and a university supervisor for a period of one full semester. The student will demonstrate skills of the informed, reflective decision maker throughout the internship experience. Corequisite: SPE 5544

SPE 6694  Collaborative Teacher K-6 Practicum (3)
The practicum is designed to provide a supervised experience related to instruction in the area(s) of specialization (K-6). The application of skills, concepts, and principles acquired in previous coursework as well as current research will be emphasized.

SPE 6695  Collaborative Teacher 6-12 Practicum (3)
This course is designed to provide a supervised experience related to instruction in the area(s) of specialization 6-12. The application of skills, concepts, and principles acquired in previous coursework, as well as current research, will be emphasized.

SPE 6697  Field Based Research Project (3)
The purpose of this course is to provide graduate students with an opportunity to design, implement, and write about quantitative or qualitative research related to their own teaching. This course will be taken at the end of the graduate program of study. The course serves as the capstone course for the MS Collaborative/Special Education Program. The course must be taken as one of the candidates final two courses after EDU 6691. A grade of “B” or better is required. Advisor approval required before adding course. Prerequisite: EDU 6691, and complete 30 program credits.

SPE 6698  Collaborative Teacher 6-12 Initial Practicum (3)
This course is for those candidates who do not currently hold an undergraduate teaching certificate for Collaborative Teacher, 6-12. This is a supervised experience in the 6-12 classroom with both the inclusion of disabled students into the general education classroom and with disabled students in a resource or self-contained setting. The prospective Collaborative Teacher will spend 100 clock hours in designing instructional and teaching methods that will allow the student with a disability to access the general education curriculum as outlined by the Alabama Course of Study. The prospective Collaborative Teacher will work collaboratively with the general education teacher, special education teacher, IEP committee, and other professionals to design and deliver an appropriate education for students with disabilities. Prerequisites: Completion of core and teaching field areas for persons who do not currently hold an undergraduate teaching certificate in Collaborative Teacher, 6-12.

SPE 6699  Collaborative Teacher K-6 Initial Practicum (3)
The practicum is for those candidates that do not currently hold an undergraduate teaching certificate for Collaborative Teacher, K-6. This is a supervised experience in the inclusive K-6 classroom and for students with disabilities in a resource and/or self-contained setting. The prospective Collaborative Teacher will spend 100 clock hours in designing instructional programs that emphasize the adaptation and/or modification of the curriculum content and teaching methods that will allow the student with a disability to access the general education curriculum as outlined by the Alabama Course of Study. The prospective Collaborative Teacher will work collaboratively with the general education teacher, special education teacher, IEP committee, and other professionals to design and deliver an appropriate education for students with disabilities.

STAT 5553  Time Series (3)
The concept of a time series refers to a sequence of values recorded over a period of time. The use of such data is widespread in nearly all areas of science and the humanities, such as econometrics and finance, engineering, medicine, genetics, sociology, and environmental science. It is the existence of dependence between observations in a series as well as the fact that usually only one observation is made at any given point in time that makes time series data so special. Consequently, standard statistical methods are not appropriate, and special statistical analysis methods must be used. The purpose of this course is to introduce current methods and software for time series analysis. Prerequisites: STAT 4459 or STAT 5559.

STAT 5540  Biostatistical Analysis (3)
This course provides an overview of statistical methodology useful in the process of modern biostatistics. Biostatistical Methods combine the theory and application of commonly used distributional and distribution-free, or parametric and nonparametric, test statistics, density and function estimation methods. SAS/R is used for data analysis. Prerequisites: STAT 4451 or STAT 5551.
STAT 5551 Mathematical Statistics I (3)
A study of probability theory, sample spaces, random variables, mutual exclusion, independence, conditional probability, permutations and combinations, common discrete and continuous distributions, expected value, mean, variance, multivariate distributions, covariance, Central Limit Theorem. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course.

STAT 5552 Mathematical Statistics II (3)
A study of the fundamentals of the theory of statistics, the Central Limit Theorem, point estimation, sufficiency, consistency, hypothesis testing, sampling distributions, confidence intervals, linear regression models, interpretation of experimental results, Bayesian Estimation. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisite: STAT 4451 or STAT 5551.

STAT 5556 Mathematics of Finance (3)
The fundamental concepts of financial mathematics and how these concepts are applied in calculating present and accumulated values for various streams of cash flows as a basis for future use in the following: reserving, valuation, pricing, asset/liability management, investment income, capital budgeting, and valuing contingent flows. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisites: STAT 4451 or STAT 5551.

STAT 5559 Regression Analysis (3)
Topics include simple linear regression, inferences in regression analysis, techniques of multiple regression and model building, ANOVA as regression analysis, analysis of covariance, model selection and diagnostic checking techniques, nonlinear regression, and logistic regression. Computations are an integral part of the course and will involve the use of SAS and R statistical software. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisites: STAT 4451 or STAT 5551.

STAT 5562 Advanced Statistical Methods (3)
This course is a continuation of Statistical Methods and Computations. Topics include inference for categorical variables, multiple regression, logistic regression, one-way ANOVA, two-way ANOVA, ANCOVA, and nonparametric methods. Data analysis is carried out using the SAS program. Statistical packages such as SAS and R will be used. Prerequisites: STAT 3350, STAT 4451 or STAT 5551.

STAT 5564 Multivariate Analysis (3)
Possible topics to be covered include multivariate descriptive statistics, multivariate normal distribution, analysis of covariance, MANOVA, multivariate regression, principal components, discriminate analysis, cluster analysis, factor analysis. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Some familiarity with R and SAS is expected. Prerequisites: STAT 4451 or STAT 5551, and STAT 3350.

STAT 5565 Categorical Data Analysis (3)
In recent years, the use of specialized statistical methods for categorical data has increased dramatically, particularly for applications in the biomedical and social sciences. The course gives an introduction to analyzing categorical data. Principal topics include: contingency tables, generalized Linear Models, log-linear models, logistic regression, and models for matched pairs. Two statistical software packages SAS and R will be used appropriately throughout the course. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisites: STAT 4451 or STAT 5551.

STAT 5566 Data Mining (3)
Data mining is a fast growing interdisciplinary field between Statistics and Computer Science due to the emergence of massive data sets. This course covers an information extraction activity whose goal is to discover hidden facts from large data warehouses. A number of data mining task including description, classification, selection, estimation, prediction, and affinity grouping and clustering will be discussed. Also students will learn how to use data mining software to perform data mining functionalities. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoretical aspects of or applications of the topics discussed in the course. Prerequisites: STAT 4451.

STAT 5567 Experimental Design (3)
Fundamentals principles of designing and analyzing experiments with application are considered. The concepts of experimental unit, randomization, blocking, replication, error reduction and structure are introduced. The design and analysis of completely randomized, randomized complete block, incomplete block, Latin square, split-plot, repeated measures, factorial and fractional designs will be covered. This course contains additional graduate-level content equivalent to a one-hour recitation with the instructor which will further investigate the theoreti-
cbral aspects of or applications of the topics discussed in the course. Prerequisites: STAT 4451 or STAT 5551.

**STAT 6620 Selected Topics in Probability and Statistics (3)**
The content of this course vary with the topics, and could include Bayesian Model Analysis, Advanced Probability and Inference, Time Series, and Forecasting Methods, Statistics for Quality and Productivity, Applied Nonparametric Methods, or others. Prerequisites: STAT 4451 or STAT 5551 and STAT 4459.

**STAT 6621 Research and Thesis (1-6)**
Under the guidance of the student’s advisor and the chair of the department, the student may pursue original research or project in a particular area of statistics. The completion of a thesis is required. The results and conclusions must be successfully defended before the student’s graduate committee. Grading is Pass/Fail. Prerequisites: 3.0 GPA and permission of the Chair of the Mathematics and Statistics department.

---

**TEACHER LEADER**

*Prerequisite: Restricted to candidates who are admitted to a State of Alabama approved Teacher Leader program.

**TL 7700 Adult Learning Theories and Managing Change (3)**
This course will focus on the examination of how adults learn in instructional settings and managing change. The adult learners’ characteristics will be examined. Adult learning theory and current trends and advancement in adult learning and managing change will be examined. The focus will be on preparing the student to make better instructional decisions and use of resources in the education and training of adults.

**TL 7702 Diverse Populations and Involving Parents/Community Stakeholders in the School Setting (3)**
The focus of this course is on the successful school for all students and exploring the critical issues of diversity. Issues relating to diversity and the implications for parental and community involvement will be analyzed. Candidates will explore the construct of diversity as it relates to: race, gender, military status, culture, sexual orientation, and second language learners. Through coursework, readings, group work, and field experiences students will be challenged to examine best instructional and leadership practices to develop sensitive and proactive responses to all members of the school community.

**TL 7717 Mentoring (3)**
The purpose of this course is to prepare educational leaders to serve as role models and mentors for individuals. The educational leaders will develop methods, techniques and organize mentorship programs. Leaders will develop a knowledge base upon which to make informed reflective decisions about mentorship programs in diverse educational settings.

**TL 7737 Curriculum (3)**
This course examines the tenets of curriculum. This course peruses the current research that supports student learning and engagement. In order for instructional leaders to promote effective learning environments, they must be able to understand, identify and apply effective learning theories and methodologies.

**TL 7740 Creating Effective Learning Environments (3)**
Instructional leaders must work within the framework of the Individuals with Disabilities Education Act (IDEA) in order to effectively create, develop and maintain a highly efficient learning environment. This course will present best practices and the most up to date research related to the creation of effective learning environments within the public schools. The focus of the course will be both theoretical and practical in nature. As a result of the course, instructional leaders will be able to establish, develop, and maintain and evaluate instruction in order to build an effective learning environment.

**TL 7747 Instructional Coaching (3)**
This course focuses on (a) common forms of instructional coaching including literacy coaching, cognitive coaching, and content coaching and (b) the components/stages of instructional coaching.

**TL 7757 Staff Development**
Candidates consider and evaluate methods for promoting professional growth focusing on the improvement of teaching and learning. Various approaches to staff development and in-service education are examined in terms of their purposes and components.

**TL 7767 Communication and Consultation Methods Practicum (3)**
This course explores communication models and consultation methods as well as the implementation of those models to improve educational practices in the teacher leader. The course provides an opportunity for the teacher leader candidate to perform a variety of activities that a teacher leader must perform, under the supervision of a practicing teacher/instructional leader. Focus is placed on strategies that will result in enhanced communication among all stakeholders, and increased student achievement.

**TL 7792 Advanced Comprehensive Research Strategies (3)**
This course is intended to explore the concepts of quantitative and qualitative research methods application for research in education. Participants apply their skills in research design by completing a proposal for a substantive study related to the improvement of instructional services. A grade of “B” or better is required.
**TL 7794 Research in Action (3)**

The purpose of this course is to provide instructional leaders with a study of the processes involved in identifying, framing, evaluating, analyzing, and seeking information about problems faced by schools. The goal for the student is to propose a research and implement a study that examines a problem currently impacting the K-12 environment.

*Prerequisite: TL 7792*
