### Definition and Classification (competitive partnerships vs service partnerships)

#### Competitive Partnerships

Competitive Partnerships are defined as partnerships (grants and/or contracts) that require applicants, through an open Request for Proposal (RFP), to submit applications or proposals to obtain funding. Not all submitted proposals are selected in a competitive process.

Partnerships initially secured through a competitive process, then renewed based on project performance, are also included as competitive funding. These projects are asterisked in Sponsored Program detail reports.

#### Service Partnerships

Service partnerships are relational partnerships in which the university provides a specific service at the request of the partner. These partnerships are not open to other service providers through an open Request for Proposal (RFP).

### Dollars Pursued (Activity) Report Definitions

- The **“dollars pursued” report** is a snapshot of dollars pursued between two fixed dates (September 1 - August 31) and may change daily.
- The final comparative number of dollars pursued is **not “final” until all partnerships have received partner notification** (i.e. funded/not funded).
- **Funded** partnerships (including multi-year partnerships awarded in budget cycles) are recorded according to the budget period.
- **Not Funded** partnerships (the total amount requested) are counted in the year that they are submitted
