

# Mandarin Robotics Internship(s) - Red Sky Robotics

---

## Company Background

Red Sky Robotics is a startup company that has been building and incubating various technologies for the past 3 years. Red Sky is focused on building software to make verbal robots and devices more intelligent and more social. Red Sky is in the final stages of securing a contract to produce and license a next generation of robot brain software to a large Chinese manufacturer over the next several years. For the next 6 months, Red Sky's brain software will be extended to support Mandarin speaking consumers, with Cantonese to follow. The picture below is of one of our robots named 小红 - "Little Red". We need your help to teach her and others like her about China and the Mandarin language.

## Job Description

The company is looking for a variety of candidates to assist in training social robots about Chinese language and culture, as well as to improve the overall intelligence and social skills of the robots in general. All applicants who are fluent in Mandarin and capable in English are encouraged to apply.

## Education

- Only applicants with Bachelor, Masters, or Doctorate degrees will be considered.
- Majors in Business, Education, Psychology, Management Information Systems, Computer Science, Mathematics, or Engineering will be strongly preferred.

## Requirements

- Candidates must be verbally fluent in Mandarin Chinese in both social and professional settings. Candidates must have excellent reading and writing skills with the Simplified Chinese character set. Candidates with strong bilingual English comprehension may be considered for leadership positions on the team.
- Candidates must have diligent work ethic and be able to collaborate effectively with others as part of small teams to achieve daily and weekly goals.

- Candidates must be comfortable using computers and interacting with one or more robots for most of the day to complete assigned tasks using a set of proprietary technology tools. Candidates with their own laptop computers will be strongly preferred.

## Responsibilities

- Talking to robots or simulated robots on a daily basis, in Mandarin, to simulate various situations.
- Generating Mandarin conversational content (text) based upon assigned topics of interest and hypothetical conversational situations.
- Testing robot behavior through verbal dialogs, simulators, and web-based tools, and documenting errors or situations that need more study, in English.
- Provide opinions, feedback, and ideas to improve the robot's intelligence and social skills.
- Editing / Translating Conversational Chinese and English from one to the other.

## Compensation

- \$15-\$30 per hour Full-Time on W2 basis for 6 Month Internships, depending on experience.
- Successful internships could lead to permanent opportunities.

## Location

- Montgomery, AL (downtown) or Troy, AL.
